

Colleton County Emergency Operations Plan

Colleton County Fire-Rescue Emergency Management Division

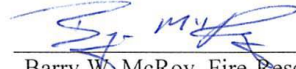

Updated January 31, 2025

Notice of Promulgation Colleton County Emergency Operations Plan

Colleton County Fire-Rescue Emergency Management Division's Emergency Operations Plan has been reviewed and updated in accordance with the provisions of SC State Regulation 58-101. The printing dated January 31, 2025 replaces any previously published Colleton County Emergency Operations Plans. This plan is effective for planning purposes upon receipt and will be activated by the Colleton County Administrator as required by events. This plan has been updated to reflect guidelines as identified in the National Response Framework (NRF) and the National Disaster Recovery Framework (NDRF).

Meagan Utsey, Colleton County Administrator

Approval and Implementation Colleton County Emergency Operations Plan

The Colleton County Administrator (Meagan Utsey) and the Colleton County Fire-Rescue Chief (Barry W. McRoy) have approved this Emergency Operations Plan. It supersedes any plans in effect prior to January 31, 2025. This plan is effective for planning purposes upon receipt and will be activated by the Colleton County Fire-Rescue Emergency Management Division when directed by the County Administrator.

EOP Preface

- I. Federal Assistance, Authority, and Guidance
 - A. All emergencies and disasters are local emergencies and disasters. Many times, local governments can allocate sufficient resources to remedy the emergency or disaster. At times, local resources can be overwhelmed by an incident and require assistance from surrounding jurisdictions/agencies or from state officials that coordinate and deploy additional resources from other areas of the state. Occasionally, emergencies or disasters occur which can overwhelm all the resources available throughout the state. When this occurs, state emergency management officials will request assistance from the federal government through the National Response Framework.
 1. Famed professional boxer Mike Tyson once said, “Everyone has a plan, until they get punched in the mouth.” It is impossible to plan for every conceivable contingency or scenario that could be encountered in this document. The purpose of the Emergency Operations Plan is to anticipate threats or hazards, designate resources that can be used to mitigate the impacts from those threats or hazards, and consider the impacts on Colleton County citizens. However, the EOP does not replace the need for continuous communication and collaboration before, during, and after an emergency or disaster by all local and state government agencies to properly serve and protect our community.
 - B. The legal authorities that guide the structure, development, and implementation of the National Response Framework (NRF) are statutes, regulations, executive orders, and presidential directives. Through the use of the National Incident Management System (NIMS), local emergency management officials, through state emergency management officials, can access federal emergency management assets.
 - C. Declarations Process
 1. The Robert T. Stafford Disaster Relief and Emergency Assistance Act, Pub. L. 93-288, 88 Stat. 143 (1974), codified in 42 U.S.C. §§ 5121-5206 (2007), was also amended in the Department of Homeland Security Appropriations Act of 2007, Pub. L. 109-295, 120 Stat. 1355 (2006), particularly Title VI, the Post-Katrina Emergency Management Reform Act of 2006. The Stafford Act describes the programs and processes by which the Federal Government provides disaster and emergency assistance to State and local governments, tribal nations, eligible private nonprofit organizations, and individuals affected by a declared major disaster or emergency. The Stafford Act covers all hazards, including natural disasters and terrorist events.
 2. The Stafford Act and its implementing regulations at 44 CFR § 206 set forth a process for a Governor to request the President to declare a major disaster or emergency:

- a) If an event is beyond the combined response capabilities of the State and affected local governments; and
 - b) If, based on the findings of a joint Federal-State-local Preliminary Damage Assessment (JPDA), the damages are of sufficient severity and magnitude to warrant assistance under the Stafford Act. In a particularly fast-moving or clearly devastating disaster, there may be an expedited declaration, and the JPDA may be deferred until after the declaration.
3. The President may direct emergency assistance without a Governor's request if an incident occurs that involves a subject area that is exclusively or preeminently the responsibility of the United States. The President will consult the Governor of any affected State, if practicable.
 4. FEMA may provide accelerated Federal assistance and support where necessary to save lives, prevent human suffering, or mitigate severe damage, even in the absence of a specific request. The Governor of the affected State will be consulted if practicable, but this consultation shall not delay or impede the provision of such rapid assistance.

D. Response Process

1. Before a major disaster or emergency declaration, the Stafford Act authorizes FEMA to pre-deploy personnel, who may be from various Federal agencies, and equipment to reduce immediate threats to life, property, and public health and safety, and to improve the timeliness of its response.
2. The Stafford Act requires the President to appoint a Federal Coordinating Officer immediately upon the declaration of a major disaster or emergency to coordinate the delivery of Federal assistance to the affected State and local governments, tribal nations, eligible private nonprofit organizations, and individuals affected by a declared major disaster or emergency.
3. The Stafford Act was amended by section 607 of the Security and Accountability for Every (SAFE) Port Act of 2006, Pub. L. 109-347, to declare that Federal agencies will not deny access or impede access to an "essential service provider" to the disaster site whose access is necessary to restore and repair an essential service; or impede the restoration or repair of the services of an "essential service provider." Under the amendment an "essential service provider" means an entity that provides: telecommunications service; electrical power; natural gas; water and sewer services; or any other essential service, as determined by the National Response Framework; and is a municipal entity; a nonprofit entity; or a private, for-profit entity; and is contributing to efforts to respond to an emergency or major disaster.

E. Recovery

1. The Stafford Act provides temporary housing and other assistance to eligible individuals and households who have basic and essential needs as a result of a major disaster or emergency.
2. The Stafford Act provides assistance to public and certain nonprofit entities that have disaster-related damage.
3. The Stafford Act prohibits the duplication of benefits from other sources, such as insurance.

II. State Authority and Guidance –

A. S.C. Code 58-1 establishes, among other items, the following:

1. In order to provide effective and orderly governmental control and coordination of emergency operations in emergencies each county within this state must establish and maintain an emergency management agency and shall develop a county emergency management plan and program that is coordinated and consistent with the state comprehensive emergency management plan and program.
2. Each county emergency management agency shall perform emergency management functions within the territorial limits of the county within which it is organized and, in addition, shall conduct such activities outside its territorial limits as are required and in accordance with state and county emergency management plans and mutual aid agreements. Counties shall serve as liaison for and coordinator of municipalities' requests for state and federal assistance during post-disaster emergency operations.
3. County government shall be responsible for ensuring that all appropriate local resources, including those of municipalities, are being utilized to support emergency operations prior to requesting outside assistance from state government. This requirement is deferred when state or inter-jurisdictional plans or procedures provide for an automatic response by state government. (SC Code 58-101.A.2.e.)

III. Local Authority, Requirements, and Regulations

A. History

1. Modern day emergency management is rooted in the Cold-War era Civil Defense model. At the end of the Cold-War, the field was known as Emergency Preparedness. Today, Emergency Management is a more holistic field that focuses on four interrelated areas:
 - a) Preparedness
 - b) Mitigation
 - c) Response
 - d) Recovery

B. Authority

1. Colleton County Council adopted Ordinance 87-O-2 on April 7, 1987 which first created the office of Colleton County Emergency Preparedness. On September 5, 1995, Colleton County Council approved Ordinance 95-O-15, which amended Ordinance 87-O-2 and

changed the wording from “County Supervisor” to “County Administrator”. This was the only change and recognized the new terminology for referencing the County’s Chief Executive Officer. On September 11, 2018, Colleton County Council adopted Ordinance 18-O-10. This ordinance replaced 87-O-2 and 95-O-15 and established the Emergency Management Division under the Fire-Rescue Department. 18-O-10 continued to recognize that County Council is “responsible for meeting the dangers to the County and its people presented by disasters of any origin.” Under Ordinance 18-O-10, County Council may issue proclamations and regulations and amend or rescind them. Proclamations of the County Council have the force and effect of law. Ordinance 18-O-10, Section 2.21.050 B lists the following possible Council actions:

- a) A state of disaster emergency may be declared by the County Council if it finds a disaster has occurred, or that the threat thereof is imminent, and extraordinary emergency measures are deemed necessary to cope with the existing or anticipated situation. Once declared, the state of emergency shall continue until terminated by proclamation of the County Council or as prescribed by State Law. All proclamations issued under this section shall indicate the nature of the disaster, the area or areas affected by the proclamation, and the conditions which brought about or make possible termination of the state of disaster emergency.
- b) In addition to any other powers conferred by law, the County Council may, under the provisions of Ordinance 18-O-10:
 - (1) Suspend the provisions of existing regulations prescribing the procedures for conduct of County business if strict compliance with the provisions of any statute, order, rule or regulation would in any way prevent, hinder, or delay necessary action in coping with the emergency.
 - (2) Utilize all available resources of County government as reasonably necessary to cope with disaster emergency.
 - (3) Transfer the direction, personnel, or functions of County departments and agencies or units thereof for purposes of facilitating or performing emergency services as necessary or desirable.
 - (4) Compel performance by elected and appointed County government officials and employees of the duties and functions assigned in the County Emergency Operations Plan (EOP).
 - (5) Contract, requisition and compensate for goods and services from private sources.
 - (6) Direct and compel evacuation of all or part of the population from any stricken or threatened area within the

County if this action is deemed necessary for preservation of life or other disaster mitigation, response or recovery.

- (7) Prescribe routes, modes of transportation, and destination in connection with evacuation.
- (8) Control ingress and egress to and from a disaster area, the movement of persons within the area, and the occupancy of premises therein.
- (9) Suspend or limit the sale, dispensing or transportation of alcoholic beverages, firearms, explosives and combustibles.
- (10) Make provisions for the availability and use of temporary housing.

- c) Ordinance 18-O-10 was declared to be an emergency measure necessary for the immediate protection of life, safety and health of the people, and preservation of public business, of the County and took effect immediately, upon approval of County Council. Ordinance 18-O-10 superseded all past Ordinances and did not sunset or expire.

C. Requirements

1. Pursuant to S.C. Code 58-101, Colleton County is required to create, maintain and regularly update the County Emergency Operations Plan (EOP). Further, S.C. Code 58-101 requires the review and update of the County EOP not exceed once every three years. Typically, the County EOP is reviewed and updated annually.

D. Regulation

1. In South Carolina, State Law requires that the County be prepared for any emergency or disaster. In Colleton County, the Fire-Rescue Emergency Management Division is designated as the agency responsible for coordinating those activities necessary to meet the goals intended by State Legislation. Emergency response personnel, equipment and facilities must be maintained in a constant state of readiness. This will facilitate saving lives, prevent or minimize damage to property, and provide assistance to all people who are threatened by an emergency or who fall victim to a disaster. Emergency operations will be coordinated to the maximum extent possible with comparable activities of local, state, and federal governments as well as volunteer and private agencies.
2. Every attempt has been made to identify and designate available forces and resources at all levels of government that are to be utilized in response to emergencies and disasters. Planning, preparation and timely response must be the goal of all those responsible for providing emergency support functions if the people of Colleton County are to enjoy the services and protection of their government.
3. Tasks for specific emergency support functions have been assigned, where feasible, to those organizations accustomed to performing such

duties as primary day-to-day responsibilities. In addition, local governmental and volunteer organization decision makers have been provided with instructions and guidelines for implementing disaster response actions and programs appropriate to the emergency at hand. In charging these officials, all Colleton County citizens are strongly urged to render their full support and cooperation to leaders and planners to avert or mitigate effects of emergencies. This will enhance restoration of order and lead to rapid recovery after a disaster.

4. In the absence of a Presidential or Governor declaration, and if County Council is unable to convene to declare a state of emergency, the authority to do so is delegated, in succession, to the County Council Chairperson or Vice Chairperson, the County Administrator, the Deputy County Administrator, the Fire-Rescue Chief and the Emergency Management Division Director.
5. Colleton County Fire-Rescue Emergency Management Division is charged with the responsibility to implement this plan through coordination with all county departments, municipalities and primary agencies involved.

GLOSSARY

ACTIVATION - A process by which a facility is brought up to emergency mode from a normal mode of operation. Activation is completed when the facility is ready to carry out full emergency operations.

ALERT (WARNING & NOTIFICATION) - A system that uses landlines; cell phones, voice and text; and email to alert county and municipal officials. This system provides local governments warnings and alerts the public of actual or impending disasters.

ALTERNATE EOC - A site located away from the primary EOC from which government officials can exercise direction and control in an emergency or disaster.

AMATEUR RADIO EMERGENCY SERVICE (ARES) - A group of amateur radio operators organized by the American Radio Relay League to provide emergency communications wherever and for whomever it may be needed.

CERT (Community Emergency Response Team) – Trained citizens who deploy following a disaster to assist in their community as first responders or otherwise assist with disaster preparedness, response, mitigation and/or recovery.

CITIZENS INFORMATION – A function within the EOC, once activated, receives phone calls from the public to assist in pre and post disaster issues facing the public. This function is under the direction of ESF-15 – Public Information.

CONGREGATE CARE -Refers to the provision of temporary housing and basic necessities for evacuees.

CONTINUITY OF GOVERNMENT (COG) - All measures that may be taken to ensure the continuity of essential functions of the three branches of government--executive, legislative and judicial--in the event of an emergency or disaster.

CRISIS COUNSELING - Service provided by mental health professionals to psychiatric casualties such as bystanders, responders and relatives of disaster victims that need treatment for shock, anxiety, hysteria, or other extreme stress. This function is under the direction of ESF-8 – Health and Medical.

CRISIS RELOCATION - The movement of population from high risk areas to those of lower risk.

CRITICAL INCIDENT STRESS MANAGEMENT - Actions taken and debriefings held to reduce the psychological stress on the responders to a Mass Fatality Incident (MFI). This function is under the direction of ESF- 8 – Health and Medical.

DECONTAMINATION – The reduction or removal of contaminating chemical or radioactive material from a structure, area, object or person.

DISASTER CATEGORIES:

Emergency - As defined by Section 25-1-430, SC Code of Laws, an emergency is an actual or threatened enemy attack, sabotage, conflagration, flood, storm, epidemic, earthquake, riot, or other public calamity. Section 25-1-440, SC Code of Laws authorizes the Governor to declare emergencies for all or part of the state and to utilize all available resources of state government to respond to the emergency. At the Federal level, an emergency is defined by Title V of P.L. 93-288, Section 102(1), as any occasion or instance for which, in the determination of the President, federal assistance is needed to supplement state and local efforts and capabilities to save lives and to protect property and public health and safety. Title V includes authority for the

President to direct federal agencies to provide emergency assistance to save lives and protect property and public health and safety for emergencies other than natural disasters. Under Title V, the President may direct the provision of emergency assistance either at the request of a Governor (Section 501(a)) or upon determination by the President that an emergency exists for which the primary responsibility for response rests with the United States...(501(b)).

Major Disaster - As defined by P.L. 93-288, any natural catastrophe, (including any hurricane, tornado, storm, flood, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought), or, regardless of cause, any fire, flood, or explosion, in any part of the United States, which in the determination of the President causes damage of sufficient severity and magnitude to warrant major disaster assistance under this Act to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.

Catastrophic Disaster - A catastrophic incident, as defined by the NRF, is any natural or manmade incident, including terrorism that produces extraordinary levels of mass casualties, damage, and disruption severely affecting the population, infrastructure, environment, economy, and government functions. A catastrophic incident may result in sustained national impacts over a prolonged period of time, and interrupt public and private operations, emergency services, and infrastructure to such a significant extent that national security is threatened. Such an event would immediately exceed resources normally available in state, local, tribal, and private sectors and therefore urgently require federal/national assistance.

DISASTER MEDICAL ASSISTANCE TEAM (DMAT) - A regional group of volunteer medical professionals and support personnel with the ability to quickly move into a disaster area and provide medical care. This function is under the coordination of ESF- 8 – Health and Medical.

DISASTER MORTUARY OPERATIONAL TEAM (DMORT) - A regional group of volunteer medical professionals and support personnel with the ability to quickly move into a disaster area and provide temporary morgue facilities, victim identification, and processing, preparation and disposition of remains. This function is under the coordination of ESF- 8 – Health and Medical.

DISASTER RECOVERY CENTER (DRC) – A Disaster Recovery Center is an office or building or other location where various agencies are brought together to provide assistance to individuals who have been affected by a presidentially declared disaster.

EMERGENCY ALERT SYSTEM (EAS) - Radio, TV and cable broadcast stations and non-governmental industry entities operating on a voluntary, organized basis during emergencies at national, state or local levels.

EMERGENCY INFORMATION - Material designed to improve public knowledge or understanding of an emergency.

EMERGENCY INSTRUCTIONS - Information provided to the general public during an emergency pertaining to recommendations for actions such as evacuation and sheltering.

EMERGENCY MANAGEMENT - The organized analysis, planning, decision making, assignment and coordination of available resources to the mitigation of, preparedness for, response to and recovery from emergencies of any kind, whether from acts of aggression, technological or natural sources.

EMERGENCY MANAGEMENT ASSISTANCE COMPACT (EMAC) – A congressionally ratified organization that provides form and structure to interstate mutual aid. Through EMAC, a disaster-affected State can request and receive assistance from other member states quickly

and efficiently, resolving two key issues upfront: liability and reimbursement.

EMERGENCY OPERATIONS CENTER (EOC) -The site which government officials (municipal, county, state and federal) exercise direction and control in an emergency/disaster.

EMERGENCY PUBLIC INFORMATION (EPI) -Material designed to improve public knowledge or understanding of an emergency.

EMERGENCY REPATRIATION - Mass evacuation of noncombatant U.S. citizens and their dependents to the continental United States from foreign countries under emergency conditions.

EMERGENCY SUPPORT FUNCTION (ESF) - A functional annex in the County Emergency Operations Plan, State Emergency Operations Plan and National Response Plan which tasks local, state and federal agencies to provide and/or coordinate certain resources in response to emergencies or disasters.

ENGINEERING AND PUBLIC WORKS - An organization comprised of all engineering and public works personnel and resources, public and privately-owned resources within the county, including local government, appropriate state agencies and volunteer organizations. This function is under the direction of ESF- 3 – Public Works.

EOC OPERATIONAL STAFF - Those designated individuals who are essential for the operation of the EOC in order to provide for the collection, collation and dissemination of information, make decisions and allocate resources during an emergency.

FIRE SERVICE - Composed of all firefighting organizations, their personnel, facilities and resources at county level, including local government, appropriate state agencies/departments, and non-government/volunteer departments. This function is under the direction of ESF-4- Fire.

FULL ACTIVATION - EOC staffed with sufficient personnel to effect disaster response and recovery activities.

HAZARD - A dangerous event or circumstance that may or may not lead to an emergency or disaster. Hazards may be further differentiated as:

- Natural Hazards or "Acts of God" such as earthquakes, tornadoes, floods, hurricanes, wildfires, landslides, or avalanches.
- Technological Hazards or man-made incidents such as toxic chemical releases, nuclear power plant accidents, dam failures or bridge collapses.

HAZARDOUS MATERIALS (Hazmat) - A substance or material in a quantity or form that may pose an unreasonable risk to health and safety or property when released to the environment. This function is under the direction of ESF- 10 – Hazardous Materials.

HEALTH AND MEDICAL SERVICE COORDINATOR - The SCDPH Director is designated to coordinate all elements of health and medical into a functional emergency organization, including health, emergency medical, hospitals, mental health and mortuary services.

INCIDENT COMMAND SYSTEM (ICS) - The combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure with responsibility for the management of assigned resources to effectively accomplish stated objectives pertaining to an incident.

INCIDENT MANAGEMENT TEAMS (IMT) - An Incident Management Team can respond to a wide range of emergencies, including fires, floods, earthquakes, hurricanes, tornados, tsunamis, riots, spilling of hazardous materials, and other natural or human-caused incidents. An IMT assists in the overhead coordination of a large incident to assist the jurisdiction having authority to manage the incident or emergency.

INFRASTRUCTURE - As used in this annex, pertains to roads, streets, public buildings, highways, bridges, waterways and highway/railroad overpasses. Some will be classified as critical.

JOINT FIELD OFFICE (JFO) – A temporary federal facility established locally to provide a central point for federal, state, local, and tribal executives with responsibility for incident oversight, direction, and/or assistance to effectively coordinate protection, prevention, preparedness, response, and recovery actions. The JFO will combine the traditional functions of the JOC, the FEMA DFO, and the JIC within a single federal facility.

LAW ENFORCEMENT SERVICE - Composed of all law enforcement organizations, their personnel, facilities and resources at county level. Upon request, qualified commissioned personnel from state and federal agencies may be utilized. This function is under the direction of ESF- 13 – Law Enforcement.

MONITORING ACTIVATION - EOC primarily staffed by EMD and key agency representatives.

LOCAL GOVERNMENT RADIO (LGR) - A radio service authorized by the Federal Communications Commission to provide governmental entities with a system for any type of governmental communications. In SC this is a low band VHF repeater system. State EMD Warning Point is net control.

MASS FATALITIES INCIDENT (MFI) - Any situation where there are more bodies than can be handled using local resources. See the Carolina Lowcountry Mass Fatalities Emergency Response Plan (not a part of this annex). This function is under the direction of ESF- 8 – Health and Medical.

MEDICAL SERVICE (MS) - The organization of professional, skilled and unskilled groups and individuals who will utilize all available personnel, facilities and resources provided during an emergency to assure transportation and treatment for those people who are injured, sick, aged, bedridden and/or institutionalized; (the purity of water, food, etc., that adequate sanitation standards are maintained and enforced and emergency mortuary service is provided).

MITIGATION - Activities designed to reduce or eliminate risks to persons or property or to lessen the actual or potential effects or consequences of an incident. Mitigation measures may be implemented prior to, during, or after an incident.

MILITARY AFFILIATED RADIO SYSTEM (MARS) - Is made up primarily of amateur radio operators licensed to operate in a special military communications system.

MOBILE COMMAND POST - A transportable command cell capable of exercising direction and control from a forward deployed location during an emergency and is used by Incident Commander to manage the incident. The emergency communications vehicle normally provides the necessary communication equipment and capabilities on-scene to perform the on-scene communication coordination role.

NATIONAL INCIDENT MANAGEMENT SYSTEM (NIMS) - NIMS establishes standardized incident management processes, protocols, and procedures that all responders -- Federal, state, tribal, and local -- will use to coordinate and conduct response actions. With responders using the same standardized procedures, they will all share a common focus, and will be able to place full emphasis on incident management when a homeland security incident occurs -- whether terrorism or natural disaster. In addition, national preparedness and readiness in responding to and recovering from an incident is enhanced since all of the Nation's emergency teams and authorities are using a common language and set of procedures.

NATIONAL WARNING SYSTEM (NAWAS) - A nationwide dedicated voice warning network. Primary purpose is to provide the American population with information of an impending attack upon the United States.

NATURAL OR MAN-MADE DISASTER SHELTERING - All shelters for emergencies or disasters will normally be managed by the American Red Cross (ARC) according to the ARC regulations. Spaces are assigned at a minimum of 20 square feet per person.

OPERATING CONDITIONS (OPCONS) - Increasing levels of operations (from 3 to 1) requiring performance of predetermined actions in response to a real or perceived threat.

PARTIAL ACTIVATION - Response exceeds EMD's day-to-day responsibilities and capabilities. Additional EOC/ESF positions may be activated as deemed necessary by the event.

PREPAREDNESS - Those activities, programs and systems that exist prior to an emergency used to support and enhance response to an emergency or disaster

PUBLIC INFORMATION OFFICER (PIO) - The designated individual responsible for disseminating official information relating to emergency operations. This function is under the direction of ESF- 15 – Public Information.

PUBLIC SAFETY ANSWERING POINT (PSAP) - A point which receives incoming 911 calls and furnishes emergency operators with caller information, i.e. phone numbers, addresses, etc.

PUBLIC SAFETY COMMUNICATIONS - A radio service that provides for the reception of emergency requests for assistance through 911, other telecommunications lines, radio, or alarm boxes which provides the dispatching of proper emergency services to furnish assistance as requested. Emergency services may include, but not limited to, Fire-Rescue and Law Enforcement.

RADIO AMATEUR CIVIL EMERGENCY SERVICE (RACES) - A group of amateur radio operators authorized by the Federal Communications Commission to provide emergency Civil Defense communications.

RECOVERY - Recovery is that phase which restores systems to normal. Short-term recovery actions are taken to assess damage and return vital life-support systems to minimum operating standards; long-term recovery actions may continue for many years.

REGIONAL EMERGENCY MANAGEMENT (REM) - The mission of the regional emergency management program is to represent the state emergency management program at the local level, enabling effective preparation for, and efficient response to, emergencies and disasters in order to save lives, reduce human suffering and reduce property loss. The REM staff coordinates with county emergency management personnel on plan enhancement, training, exercise development and evaluation.

RE-ENTRY - Return to evacuated areas by resident populations which may be constrained by time function based on the existing situation.

RESPONSE - Those activities and programs designed to address the immediate and short-term effects of the onset of an emergency or disaster.

RURAL SEARCH & RESCUE (RS&R) - The effort of attempting to locate, locating, stabilizing, and removing to a secure area, such persons who are lost, stranded, injured, or in areas of danger. This involves searching by air, ground, and waterborne vehicles for missing persons. This function is under the direction of ESF- 9 – Search and Rescue and supported by ESF-4 Fire.

SITUATION REPORTS (SITREPs) - Using statistical, narrative and graphical information from response and recovery operations that help paint the overall picture of the situation. SITREPs should include information pertaining to major actions taken, unmet needs and recommended actions, priority issues and requests, and an overall narrative situation.

MEDICAL NEEDS (MN) - Citizens who have medical conditions where they need electricity to sustain life. This function is under the direction of ESF- 8 – Health and Medical.

SUPPLY AND PROCUREMENT SERVICE - Composed of all supply and procurement sources and resources, public, private, and those not otherwise under Federal or State control, located in Colleton County prior to or entering the county subsequent to disaster. This function is under the direction of ESF- 7 – Logistics.

SUPPLY AND PROCUREMENT - The acquisition, use, and payment for those commodities and services necessary during and after a disaster.

TELECOMMUNICATIONS - All telephone services, fixed, cellular, and individual pagers used to support the agencies and activities of the EOC including FAX, before, during, and after an emergency. This function is under the direction of ESF- 2 – Communications.

TERRORISM – Any activity that (1) involves an act that (a) is dangerous to human life or potentially destructive of critical infrastructure or key resources; and (b) is a violation of the criminal laws of the United States or of any State or other subdivision of the United States; and (2) appears to be intended (a) to intimidate or coerce a civilian population; (b) to influence the policy of a government by intimidation or coercion; or (c) to affect the conduct of a government by mass destruction, assassination, or kidnapping.

TRANSPORTATION SERVICE - All County, public, private and volunteer organizations within the County that can be used in support of emergency operations. This function is under the direction of ESF- 1 – Transportation.

UNIFIED COMMAND - A method for all agencies or individuals who have jurisdictional responsibility, and in some cases those who have functional responsibility at the incident, to contribute to determining overall objectives for the incident, and selection of a strategy to achieve the objectives.

URBAN SEARCH & RESCUE (US&R) -The process of locating, extricating and providing immediate medical treatment of victims trapped in collapsed structures. This function is under the direction of ESF- 9 – Search and Rescue.

UTILITIES - As used in this annex, pertains to the buildings and equipment associated with the services of the public, such as lights, power, water, gas, and telephone. This function is under the direction of ESF- 12 – Energy.

VOLUNTEER RECEPTION CENTER (VRC) - A defined location where unsolicited and unaffiliated volunteers can register with local officials, receive credentials and be assigned to known, unmet needs.

WARNING OFFICER - This position is handled by the Colleton County Sheriff's Office Dispatch Center/PSAP/911 Center Supervisor on duty.

WARNING POINT - The Colleton County Sheriff's Office Dispatch Center/PSAP/911 Center is designated as the Primary Warning Point for Colleton County.

ACRONYMS

ACC - Agency Coordination Center
ARC - American Red Cross
ARES - Amateur Radio Emergency Service
CART – County Animal Response Team
CCP - Crisis Counseling Assistance and Training Program
CCSO - Colleton County Sheriff's Office
CCSD- Colleton County School District
CDC – Consolidated Dispatch Center
CDBG - Community Development Block Grant
CERT – Community Emergency Response Team
CISD - Critical Incident Stress Debriefing
COE - Corps of Engineers
COOP - Continuity of Operations
CP - Command Post
CRS - Community Rating System
CULPH - Clemson University Livestock Poultry Health
DAT - Damage Assessment Team
DCO - Defense Coordinating Officer
DEMOB - Demobilization
DFO - Disaster Field Office
DMAT - Disaster Medical Assistance Team
DMORT - Disaster Mortuary Operational Readiness Team
DoD - Department of Defense
DOE - Department of Energy
DOT - Department of Transportation
DRC - Disaster Recovery Center
DSNAP - Disaster Supplemental Nutrition Assistance Program
DSS - Department of Social Services
DUA - Disaster Unemployment Assistance
DWI - Disaster Welfare Inquiry
EAS - Emergency Alert System
EIDL - Economic Injury Disaster Loans
ELT - Evacuation Liaison Team
EOC - Emergency Operations Center
EOP – Emergency Operations Plan
EPA - Environmental Protection Agency
EMAC – Emergency Management Assistance Compact
EMD - Emergency Management Division - a division of Colleton County Fire-Rescue
EMPG - Emergency Management Performance Grant
EPCRA - Emergency Planning and Community Right to Know Act
EPI - Emergency Public Information

ERT - Emergency Response Team
ESF - Emergency Support Function
EST - Emergency Support Team
EWS - Emergency Welfare Service
FAA - Federal Aviation Administration
FCO - Federal Coordinating Officer
FEMA - Federal Emergency Management Agency
FNF - Fixed Nuclear Facility(ies)
FOCCAS - Friends of Colleton County Animal Shelter
GAR – Governor’s Authorized Representative
GE - General Emergency
HMGP - Hazard Mitigation Grant Program
IA - Individual Assistance
IAP - Incident Action Plan
IC - Incident Commander
ICS - Incident Command System
IMT - Incident Management Team
IND - Improvised Nuclear Device
ITS - Information Technology Services
IVA - Identification Verification Area
JCC – Joint Communication Center
JFO – Joint Field Office
JIC - Joint Information Center
JIS - Joint Information System
JPDA – Joint Preliminary Damage Assessment
LART - Large Animal Rescue Team
LCAA - Lowcountry Community Action Agency
LCOG - Lowcountry Council of Governments
LE - Law Enforcement
LEPC - Lowcountry Emergency Planning Committee
LNO - Liaison Non-Commissioned Officer
LIDA - Local Initial Damage Assessment
LSA - Logistical Staging Area
LTRG - Long Term Recovery Group
MARS - Military Affiliated Radio System
ME - Medical Examiner
MFT - Mass Fatality Team
MNS - Medical Needs Shelter
MOA - Memorandum of Agreement
MOU - Memorandum of Understanding
MRE - Meals, Ready to Eat
NAWAS - National Warning System
NDRF - National Disaster Response Framework

NFIP - National Flood Insurance Program
NIMS - National Incident Management System
NOUE - Notification of Unusual Event
NRC - Nuclear Regulatory Commission
NRF – National Response Framework
NTSB - National Transportation Safety Board
NVOAD - National Voluntary Organizations Active in Disaster
NWS - National Weather Service
OSHA - Occupational Safety and Health Administration
PA - Public Assistance
PDA - Preliminary Damage Assessment (see JPDA)
PFO - Principal Federal Official
PIO - Public Information Officer
POD - Point of Distribution
PNP - Private Nonprofit
POC - Point of Contact
PPDR – Private Property Debris Removal
PPRD – Private Property Removal of Debris
PSC - Public Service Commission
PW - Project Workshops
PWD - Public Works Department
RACES - Radio Amateur Civil Emergency Service
RCC - Regional Coordination Center
RDD - Radiological Dispersion Device
REC - Regional Emergency Coordinator
REM - Regional Emergency Manager
ROC - Regional Operations Center
RP - Responsible Party (or Person)
RSAR - Rural Search and Rescue
RSF - Recovery Support Functions
SAD - State Active Duty
SAE - Site Area Emergency
SAR - Search and Rescue
SAT - State Assistance Team
SCDES – South Carolina Department of Environmental Services
SCDPH – South Carolina Department of Public Health
SCDSS - South Carolina Department of Social Services
SCEEP – South Carolina Earthquake Education Program
SCEMD - South Carolina Emergency Management Division
SC EMD LGR Net - SC Emergency Management Division Local Government Radio Net
SCMO - State Hazard Mitigation Office
SCNG - South Carolina National Guard
SCO - State Coordinating Officer
SCORERP- South Carolina Operational Radiological Emergency Response Plan

SCPPP - South Carolina Probation, Pardon and Parole
SCSG – South Carolina State Guard
SEOC – South Carolina State Emergency Operations Center
SITREP - Situation Report
SLED - State Law Enforcement Division
SNF EAP - Spent Nuclear Fuel Energy Action Plan
SOP - Standard Operating Procedure
SRS - Savannah River Site
SWP – South Carolina State Warning Point
TCP - Traffic Control Point
TDD - Telecommunications Device for Deaf
USACOE - US Army Corps of Engineers
USAR - Urban Search and Rescue
USCG – US Coast Guard
USDA - US Department of Agriculture
USEPA - US Environmental Protection Agency
VMAT - Veterinary Medical Assistance Team
VOAD - Voluntary Organizations Active in Disasters
VRC – Volunteer Reception Center
WIPP - Waste Isolation Pilot Project
WMD - Weapons of Mass Destruction

BASIC PLAN

I. Introduction

A. General

1. Colleton County Government will strive to protect human life, personal and public property and the environment prior to, during, and following the occurrence of a disaster. The Colleton County Emergency Operations Plan addresses all hazards that threaten the County, effectively utilizing preparedness, mitigation, response, and recovery measures. Coordination with stakeholders that include but are not limited to Federal, State, local, faith based and private sector organizations is critical to ensuring the safety, security, and stewardship of the Colleton area. Recovery activities will be activated at the same time the Colleton County Emergency Operations Center (EOC) is activated.

B. Scope

1. This plan establishes the policies and procedures by which the County will coordinate county, state, and federal response to disasters impacting the citizens of Colleton County.
2. It generally describes how the County will mobilize resources and conduct activities to guide and support local government emergency management efforts through preparedness, mitigation, response, and recovery planning.
3. This plan also addresses the Emergency Support Function (ESF) concept and responsibilities by which the County will deliver effective response and recovery operations. Recovery operations are also outlined by Recovery Support Function (RSF) in ESF-14 of this EOP.

C. Mission Statement

1. County Government has a five-fold mission:
 - a) To warn of impending danger;
 - b) When required, support local municipal disaster operations with timely, effective deployment of county resources;
 - c) Through the public information process, working with the media as a team member, to keep affected residents informed about the situation and convey how they can take protective actions;
 - d) Coordinate restoration and recovery operations within the County when local government resources are exhausted; and
 - e) Assess local needs and coordinate support from adjacent counties not impacted by the event as well as state and federal forces.

D. Purpose

1. Provide a framework for the effective delivery of county support and resources to local government when directed by the Chairman of County Council or their designee, through the County Administrator; and

2. Coordinate with the State Emergency Management Division for the delivery and implementation of state and federal assistance programs.
- E. Emergency Management Planning Responsibilities
1. Preparedness activities, programs and systems are those that exist prior to an emergency and are used to support and enhance response to an emergency or disaster. Planning, training, and scenario exercising are among the activities conducted under this phase.
 2. Mitigation activities are those that either prevent the occurrence of an emergency or reduce the community's vulnerability in ways that minimize the adverse impact of a disaster or emergency. Building code enforcement and land use legislation are examples of mitigation activities.
 3. Response involves activities and programs designed to address the immediate and short-term effects of the onset of an emergency or disaster. It helps to reduce additional casualties and damages and speeds recovery. Response activities include warning, direction and control, evacuation, and other similar operations.
 4. Recovery involves returning systems and the infrastructure to pre-disaster conditions. Short-term recovery actions are taken to assess damage and return vital life-support systems to minimal operations while long-term recovery actions may go on for years and involve various federal and state recovery programs.

II. Situation and Planning Assumptions

A. Situation Overview

1. Vulnerability Analysis (Demographics)
 - a) Colleton County's population was estimated at 38,604 in 2020 (US Bureau of Census). In addition to the permanent residential population, millions of tourists visit South Carolina each year. As the twenty-third most populated state in the nation, combined with such a huge tourist population, Colleton County can experience a loss of life and property of catastrophic proportion due to an array of hazards. The following statistics illustrate the vulnerability of the state's population:
 - (1) Forty-one (41) percent (1,670,000) of the state's total population resides in the 23 coastal and Lowcountry counties.
 - (2) Thirty-nine (39) percent (7,821) of the County's 19,824 housing units are mobile homes.
 - (3) Twenty (20) percent (7,720) of the County's population is 65 years of age and over.
 - (4) Thousands of people have special medical and/or dietary needs requiring special sheltering or assistance.
 - (5) Hundreds of thousands of tourists visit Colleton County each year.

- (6) Colleton County has vulnerable populations in three pre-established evacuation zones
 - (a) 1,332 persons live in Zone A
 - (b) 703 persons live in Zone B
 - (c) 12,084 persons live in Zone C
 - (d) 24,485 persons do not live in an Evacuation Zone
- b) Vulnerable Critical Facilities
 - (1) Colleton County has one medical facility (Colleton Medical Center) located in Northeast Walterboro. It is bounded on the south, east, west, and northwest by flood zone “AE” properties (1% chance of flooding every year or 100-year floodplain).
 - (a) Without access to Colleton Medical Center, ambulances must transport to another county.
 - (2) The Emergency Operations Center maintains a list of several other critical facilities in Colleton County including fire stations, government buildings, schools, businesses, and water/sewer facilities.

2. Hazard Analysis

- a) The Lowcountry area of South Carolina is threatened by natural and technological hazards. The threat posed by these hazards can be both immediate (i.e. hazardous materials release, tornado, earthquake) and long-term (i.e. drought, chronic environmental chemical release). These hazards have the potential to disrupt day-to-day activities, cause extensive property damage, and create mass casualties. See Table 1, Hazard/Risk/Vulnerability Analysis.
 - (1) Tropical Cyclones
 - (a) Colleton has over 20 miles of coastline and is considered at great risk for tropical storms and hurricanes. Tropical cyclones produce three major hazards: storm surge, high winds, and rainfall-induced flooding. The last major storm to strike South Carolina was Hurricane Hugo (1989). However, for most of the Colleton area only Category 1 and 2 conditions were experienced.
 - (b) Saffir-Simpson Tropical Storm/Hurricane Scale

| <u>Storm Type</u> | <u>Wind Speed</u> | <u>Damage/Risk</u> |
|---------------------|-------------------|--------------------------------|
| Tropical Depression | <=38 mph | Primary hazard may be rainfall |
| Tropical Storm | 39-73 mph | Rainfall and some wind damage |

| | | |
|------------|-------------|--|
| Category 1 | 74-95 mph | Very dangerous winds, roof damage even to well-constructed homes, some power loss due to downed lines |
| Category 2 | 96-110 mph | Extremely dangerous winds, some trees down, damage to most homes, power outages could last days to weeks. |
| Category 3 | 111-129 mph | Devastating damage will occur: Well-built framed homes may incur major damage or removal of roof decking and gable ends. Many trees will be snapped or uprooted, blocking numerous roads. Electricity and water will be unavailable for several days to weeks after the storm passes. |
| Category 4 | 130-156 mph | Catastrophic damage will occur: Well-built framed homes can sustain severe damage with loss of most of the roof structure and/or some exterior walls. Most trees will be snapped or uprooted and power poles downed and may isolate residential areas. Power outages will last weeks to possibly months. Most of the area will be uninhabitable for weeks or months. |
| Category 5 | >156 mph | Catastrophic damage will occur: A high percentage of framed homes will be destroyed, with total roof failure and wall collapse. Fallen trees and power poles will isolate residential areas. Power outages will last for weeks to possibly months. Most of the area will be uninhabitable for weeks or months. |

(2) Flooding

- (a) Riverine flooding occurs when an increase in water volume within a river channel causes an overflow onto the surrounding floodplain. Colleton County is home to one of the longest free-flowing blackwater rivers in North America. The Edisto River completes its 206-mile journey to the Atlantic Ocean by passing through Colleton County's northern and eastern borders. While flooding can occur while storms are over Colleton County, flooding can also occur days later as a result of storms producing rain in areas north and west of Colleton County. Riverine flooding is most prevalent along the Edisto River between the Canadys State Park and the Jellicos / Camp Buddy areas. Ireland Creek is another area that can flood and affect an apartment complex and several businesses.
- (b) Coastal flooding is usually the result of a severe weather system such as a tropical storm or hurricane which contains an element of high winds. Coastal flooding can also be caused by excessively high tides (King Tides). The damaging effects of coastal flooding are caused by the combination of storm surges, wind, rain, erosion, and battering of debris. Areas adjacent to the coastal areas, rivers, and low-lying areas throughout the county may

experience flooding from a variety of situations like severe tropical storms, storm surges, or tsunamis.

- (c) Areal flooding is normally the result of a prolonged and persistent moderate to heavy rainfall event. Flash flooding is normally the result of heavy or excessive rainfall that occurs over a short period of time (generally less than 6 hours).
- (d) Flooding can be exacerbated by the fact that the overall topography of Colleton County is flat and by disrupted drainage patterns or where channels or culverts have not been maintained.
- (e) Dam failures can also contribute to flooding. SCDES monitors approximately 15 dams in Colleton County, but only one is considered high-risk for failure (McGrady Dam on Black Creek in the area of Cane Branch Rd and Cavanaugh Rd).

(3) Fires

- (a) Being a rural county, Colleton County has many areas where homes and wildlands interface. During periods of drought or times with high winds and low humidity (resulting in low fuel water contents), the threat of wildfires becomes a serious hazard. Careless discarding of a cigarette, careless outdoor burning, or the match of an arsonist can cause major fires, which put citizens at risk. These fires can also produce large amounts of smoke that can reduce visibility on highways. According to the S.C. Forestry Commission, the heaviest wildfire season is between January and April.
- (b) Structural fires are occurring at lower frequencies across the country; however, they are an increasing threat to Colleton County citizens. Lightweight construction, structural contents consisting of synthetic fuel packages with extremely high heat release rates and the evolution of extremely toxic smoke (byproduct of combustion), and energy efficient construction that prevents temperature exchange with the outside environment has reduced the time an occupant has to escape a structural fire from 15-17 minutes (two decades ago) to two to four minutes (today) according to the National Institute of Standards and Technology, Underwriters Laboratories and the National Fire Protection Association.

(4) Tornadoes

(a) The most common type of tornado for Colleton County is relatively weak and short-lived type and occurs between March and May. The last major tornado outbreak in Colleton County was in April 2020 which resulted in extensive, widespread damage to downtown Walterboro, Lowcountry Regional Airport, and Edisto Beach. There was one death, 139 reports of damage to structures, 33 roads closed (including Interstate 95), and 12,000 power outages. Tornadoes are most likely to occur during the spring but can occur almost anywhere at any time in Colleton County. The average tornado moves southwest to northeast but can move in any direction and are capable of destroying homes and vehicles with great personal injuries and even fatalities. Colleton County has had waterspouts (Tornadoes) that form over water and move onto land. The Enhanced Fujita-Pearson Scale rates the intensity of the tornado as follows:

| <u>Scale</u> | <u>Type</u> | <u>Wind Speed</u> | <u>Damage</u> |
|--------------|--------------|-------------------|---------------|
| EF-0 | Gale Tornado | 40-72 mph | Light Damage |
| EF-1 | Moderate | 73-112 mph | Moderate |
| EF-2 | Significant | 113-157 mph | Considerable |
| EF-3 | Severe | 158-206 mph | Severe |
| EF-4 | Devastating | 207-260 mph | Intense |
| EF-5 | Incredible | 261-318 mph | Almost Total |

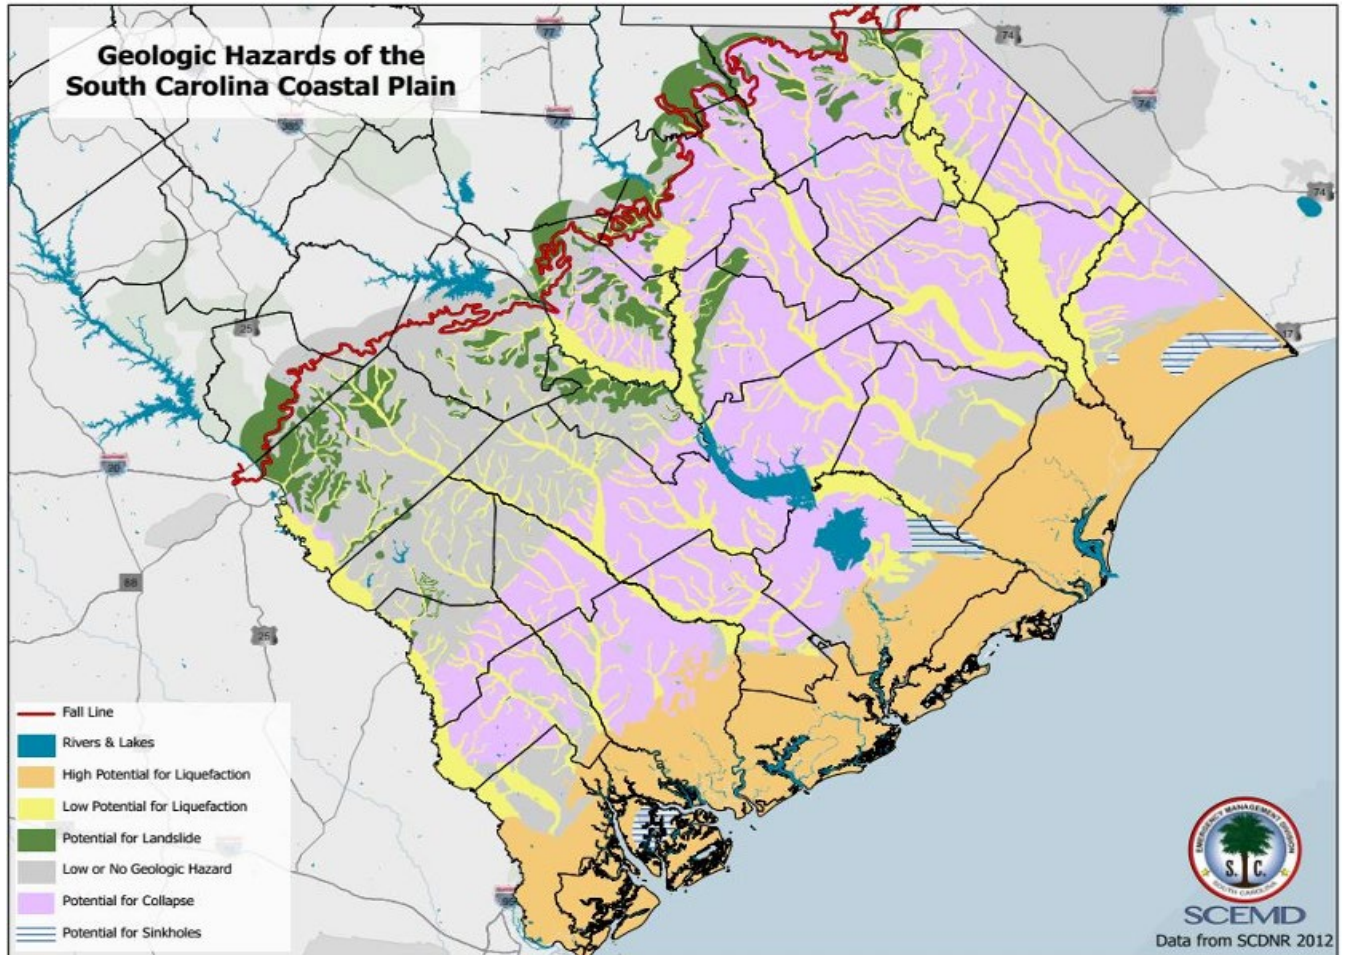

*** Note: Size does not indicate intensity of a tornado.***

(5) Earthquakes

(a) While there have not been any large-scale earthquakes in South Carolina in recent years, a 2001 study titled, Comprehensive Seismic Risk and

Vulnerability Study for the State of South Carolina, confirmed the state is extremely vulnerable to earthquake activity. This is due to Colleton's subsurface geology and the "quick sand" effect from liquefaction. The South Carolina Earthquake Education Program (SCEEP) at The College of Charleston records and tracks the 12-15 relatively small seismic events we have in the Lowcountry each year as well as providing educational awareness. The Lowcountry's last major quake occurred on 31 August 1886, 9:51 PM and was felt over a 2.5 million square mile area of the U.S. and would have measured 7.6 on the Richter Scale had it existed then. If such an event were to occur today, it has been estimated that 500-1000 people would be immediately killed with thousands more seriously injured. This will be due to the partial or total collapse of un-reinforced masonry structures or from the non-structural hazards within structures even if they are built to proper seismic codes. Total disruption of lifelines and the infrastructure will simultaneously occur without warning. The largest magnitudes ever recorded were 9.5.

| <u>Richter Magnitude</u> | <u>Felt</u> | <u>Impact</u> |
|---------------------------------|----------------------|---|
| 2 | Not felt | Felt by few indoors |
| 3 | Weak | Felt by few outdoors |
| 4 | Light - Moderate | Doors and windows swing open and shut |
| 5 | Strong | Objects fall, furniture shift |
| 6 | Very Strong - Severe | Difficult to stand, walls crack, weak older structures may collapse |
| 7 | Violent | Many weak bldgs collapse, ordinary bldgs very heavy damage |
| 8+ | Extreme | Most ordinary well-built buildings collapse |

(6) Hazardous Materials Incident

(a) Colleton County has several fixed chemical facilities and has several rail lines and major highways that host the transportation of many chemicals. Hazardous materials are a continuous potential hazard due to the large amount of transportation and/or use of these materials occurring in and around the area. Due to transportation, storage, use, and illegal activities, hazardous materials are a threat to the entire county.

(7) Coastal Hazards (Erosion/Sea Level Rise/Rip Currents)

(a) Coastal erosion is a process by which land breaks down and is worn away due to physical and chemical processes of water, wind, and general meteorological conditions. Although Edisto Beach has experienced a net erosion over the last few decades, beach renourishment has largely kept pace with this underlying trend. Hurricane Gracie

(1959) destroyed Edisto Beach, which was later rebuilt with “shell hash” that remains in place to this day.

(b) Sea level rise is difficult to predict, but there are numerous factors related to this hazard including land subsidence, groundwater depletion, wave action, hurricanes, and natural climate variation. Any rise in sea level will cause tide and storm surge heights to increase and reach further inland causing damage to properties that are not currently threatened.

(c) Edisto Beach is the primary island on which rip currents are a threat to swimmers. Rip currents occur when narrow currents flow off a beach into the ocean. These currents carry uninformed swimmers to deep water where they usually panic and possibly drown. There is very little that can be done to mitigate these hazards except public education. The National Weather Service provides warnings on the possible risks of rip currents when necessary.

(8) Severe Thunderstorms/Hail/Lightning

(a) Colleton County experiences approximately 60 days per year with a thunderstorm event. According to NOAA’s Storm Events Database, Colleton County experienced 80 thunderstorm wind events (>40 mph), two reported lightning strikes to buildings, and one hail event in 2022. The threat of these severe storms (specifically hail and wind) can affect humans, animals, and crops throughout Colleton County.

(9) Droughts

(a) Summer is typically the rainiest season, with 41% of the annual rainfall total. When rainfall has fallen below normal time, drought conditions have resulted. Since the area has significant agricultural uses that are adversely affected by drought conditions, drought is a potentially serious economic threat to the area. Drought has also been a contributing factor to wildfires that have occurred in the forested areas of the County.

(10) Extreme Heat

- (a) Summer in Colleton County is hot and humid. Temperatures of 100 degrees or more are possible. High temperatures are generally several degrees lower along the coast than inland due to the cooling effect of the sea breeze. Periods of extreme heat can be a serious threat to many of Colleton's citizens, particularly those that are vulnerable to extreme temperatures (seniors, low income families, and people experiencing homelessness).
- (11) Winter Weather (Freezing/Snow/Ice)
 - (a) Snow and ice storms, coupled with cold temperatures, periodically threaten the state. Winter storms can damage property, create safety risks, destroy crops and valuable timber, damage infrastructure components such as power lines, cripple transportation routes, and have enormous economic impacts throughout the County. Snow and ice storms most recently struck South Carolina in 1989, 1993, 2000, 2002, 2010, 2014 and 2018. Periods of extreme cold can also be a serious threat to many of Colleton's citizens, particularly those that are vulnerable to extreme temperatures (seniors, low-income families, and people experiencing homelessness).
- (12) Infectious Disease Outbreaks or Other Public Health Emergencies
 - (a) Infectious Disease Outbreaks have been documented four times in recorded history of the world (Spanish flu pandemic, 1918-1919; Asian flu 1957-1958, and Hong Kong flu 1968-1969, COVID-19 in 2019-2022). COVID-19 caused significant numbers of sick and hospitalized persons and a significant number of deaths (mortality rates ranged from 1.6% to 4.5%). COVID-19 also caused significant constraints on healthcare resources and impacts on local business and industry as well as the global economy.
- (13) Terrorism
 - (a) While there have not been any successful acts of terrorism committed in Colleton County, there are a number of critical and high-profile facilities, high concentrations of population and other potentially attractive venues for terrorist activity that make Colleton County and its surrounding counties

inherently vulnerable to a variety of terrorist methods.

- (b) Governmental, transportation, commercial, infrastructure, cultural, academic, research, military, athletic and other activities, and facilities constitute ideal targets for terrorist attacks which may cause catastrophic levels of property and environmental damage, injury, and loss of life.
- (c) Terrorist attacks may take the form of other hazards described in this section when incidents of these types are executed for criminal purposes, such as the use of hazardous materials to injure or kill, or the use of biological weapons to create an epidemic.
- (d) Acts of mass violence can also be perceived as domestic terrorism

(14) Active Shooter/Hostile Action

- (a) An active shooter is an individual(s) actively engaged in killing or attempting to continuously harm people. In most cases, active shooters use firearms, and there is generally no pattern or method to the selection of victims. Most active shooter/hostile action situations are over within 10 to 15 minutes.
- (b) In addition to neutralizing the active shooter, managing the incident, treating/transporting victims, reunification of the uninjured with their families, and long-term consequence management will be required.

(15) Civil Disturbance

- (a) Civil disturbances may occur at any time in Colleton County and is often preceded by periods of increased tension caused by questionable social and/or political events. These incidents often require large numbers of resources.

(16) Tsunami

- (a) Tsunamis have generally been considered to be a significant hazard threat primarily for land areas near the Pacific Ocean. Since the Indian Ocean tsunami, geologists have stated that the eastern US could experience this phenomenon but to what severity is unknown. As with any coastal community along the Atlantic Ocean, there is still an extremely remote chance that a volcano

eruption in the Caribbean or Canary Islands, or a collapse of the Continental Shelf, or an earthquake in the Puerto Rico Trench, could trigger a tsunami that could ultimately strike the coastal Colleton County area. However, the volcanic eruption of most scientific concern (Canary Islands) for the Southeastern US is theorized to potentially not occur for another 5,000 years and adequate warning of such an event would be likely, so that residents would be expected to have an opportunity to evacuate coastal areas should such an unlikely event occur. More information on Tsunamis can be found in VI.G.4. of this EOP.

(17) Cyber Attack

- (a) The Department of Homeland Security (DHS) has identified cyber related threats as one of the primary threats to U.S. Critical Infrastructure/Key Resources (CI/KR). Interconnected computer networks regulate the flow of electrical power, natural gas, fuel, water, solid waste, financial services, medical care, public safety, telecommunications, and transportation systems. The consequences of a significant cyber-attack can be very significant given the heavy reliance on computers for day-to-day operations. For example:
 - (i) ESF-2 could experience communication failures in the form of email, phone and network disruptions
 - (ii) ESF-8 could experience disruptions in access to medical records needed for timely and informed medical decisions for patients
 - (iii) ESF-13 could experience disruptions in networks used to verify identities or check for wanted persons or stolen property
- (b) The last cyber-attack in Colleton County occurred in February 2020. It resulted in widespread network outages affecting communications, finance, payroll, and various databases.
- (c) Cyber security is constantly evolving to combat the evolving threat of cyber-attacks. The weakest link is often the individual user. This requires a high level of training in addition to physical security to prevent or limit the effects of cyber-attacks.

(18) Radiological Release

- (a) Nuclear Power Plant Incident – Nuclear power plants generally have two emergency planning zones around nuclear power plants:
 - (i) The first is the “Plume Exposure Pathway Zone” established for those living within a 10-mile radius of a nuclear power plant. Within this emergency planning zone, citizens are urged to prepare evacuation plans in the event an incident occurs to prevent exposure to, and inhalation of, airborne radioactive contamination.
 - (ii) The second zone is the “Ingestion Pathway Zone” and is established for those living within a 50-mile radius of a nuclear power plant. Within this emergency planning zone, citizens are urged to make preparations to protect water and food supplies in the event an incident occurs to prevent ingestion of food and liquid contaminated with radioactivity. Although less likely, citizens in the Ingestion Pathway Zone may also be required to evacuate in the event an incident occurs.
- (b) Northwestern and Western Colleton County (Smoaks, Ruffin, Williams, Islandton) are within the 50-mile radius of one nuclear power plant.
- (c) Far Western Colleton County (Lodge, Ashton) are within the 50-mile radius of two nuclear power plants.
- (d) Because Colleton citizens are within a 50-mile radius of one or more nuclear facility, Colleton County is designated as an Ingestion Pathway Zone (IPZ) county or “Ingestion County.” No Colleton County residents are within a 10-mile emergency planning zone of a nuclear power plant.
- (e) Incidents could involve a contained release on site that would require citizens only to make minor preparations and monitor their local officials’ announcements or could involve the uncontained release of radioactive materials that would require citizens (particularly those in the north and western parts of Colleton County) to protect their water and food supplies or evacuate. Emergencies at Fixed Nuclear Facilities (FNF) are classified at the

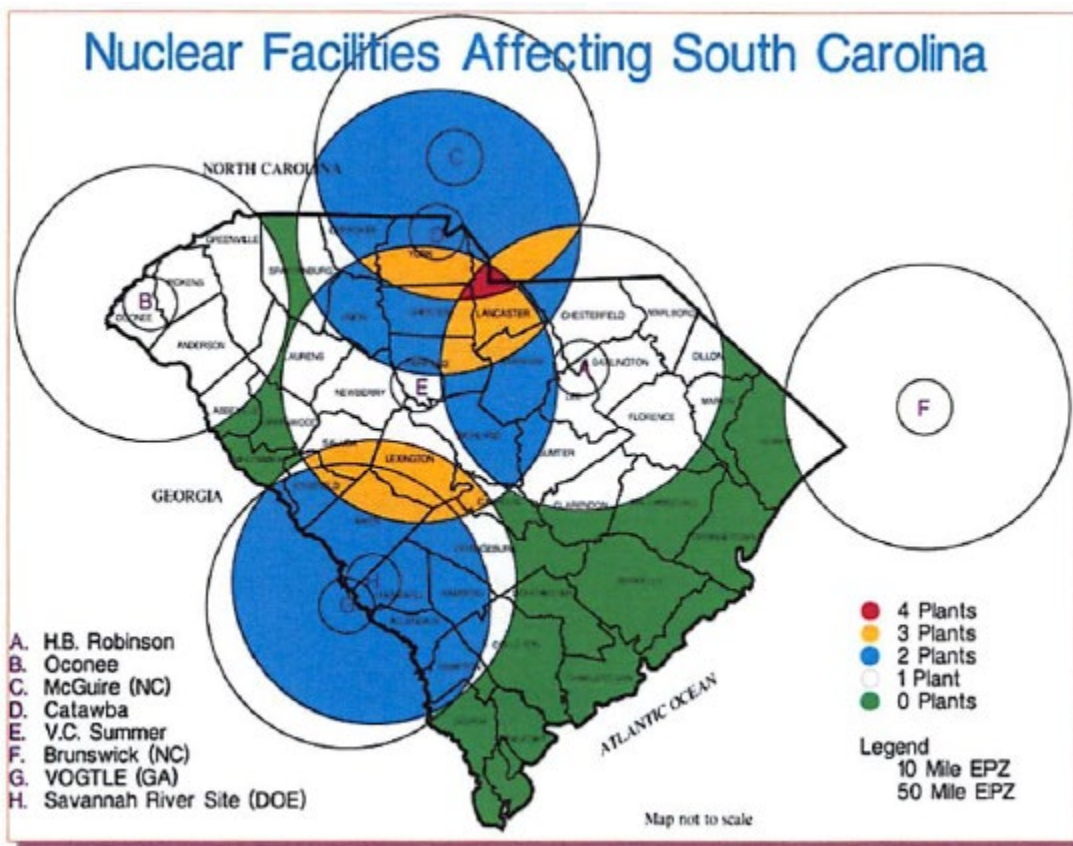

following four Emergency Classification Levels (ECL):

- (i) Notification of Unusual Event (NOUE)
 - (a) No formal notification is made by the FNF and no action is expected by Ingestion Counties
- (ii) Alert
 - (a) The Ingestion County Emergency Manager **may** be notified by the SEOC and will increase communications with the REM.
 - (b) When this occurs, the Ingestion County Emergency Manager **may** increase communications with the appropriate ESF agencies and local elected officials.
 - (c) Large gatherings of people (especially outdoors) **should** be reported to the SEOC.
- (iii) Site Area Emergency (SAE)
 - (a) The Ingestion County Emergency Manager **will** be notified by the SEOC and will increase communications with the REM.
 - (b) When this occurs, the Ingestion County Emergency Manager **will** increase communications with the appropriate ESF agencies and local elected officials.
 - (c) Large gatherings of people (especially outdoors) **must** be reported to the SEOC.
- (iv) General Emergency (GE)
 - (a) The Ingestion County Emergency Manager **will** be notified by the SEOC and will increase communications with the REM.
 - (b) EOC will open with limited to partial staffing at a minimum involving appropriate ESF agencies (particularly ESF-2, 4/8/9/10, 5, 7, 13, 15, 16, 17, and 19 agencies).
 - (c) Large gatherings of people (especially outdoors) must be

reported to the SEOC and may need to be monitored or postponed.

- (d) The SEOC will distribute continual information regarding additional steps that need to be taken. These may include (RP in parenthesis):
- (i) Coordinating with Clemson University Livestock-Poultry Health - CULPH - lead ESF-17 SC Agency and SC DES - lead ESF-10 SC agency (Operations Section Chief)
 - (ii) Coordinating Traffic and Access Control Points to restrict movement of people, animals, and agricultural products (Operations Section Chief with assistance from ESF-13 and 16)
 - (iii) Coordinating the implementation of restrictions of consumption of food products (Operations Section Chief with assistance from ESF-17)
 - (iv) Coordinating the relocation of people from a restricted zone should one be necessary in the county (Logistics Section Chief with assistance from ESF-6/11)
 - (v) Coordinating the release of information to the public in cooperation with the State Joint Information Center (Emergency Council / ESF-15)
 - (vi) Public messaging, food / animal control measures, the establishment of relocation areas, restricted areas, re-entry protocols, return areas, and recovery strategies must be highly coordinated with

state and federal officials. The economic impacts of uncoordinated efforts could have incredible consequences for many years.

- (f) Nuclear Blast - A nuclear blast is an explosion with intense light and heat, a damaging pressure wave, and widespread radioactive material that can contaminate the air, water, and ground surfaces for miles around. A nuclear device can range from a weapon carried by an intercontinental ballistic missile launched by a hostile nation or terrorist organization, to a small portable nuclear device transported by an individual. All nuclear devices cause deadly effects when exploded, including blinding light, intense heat (thermal radiation), initial nuclear radiation, blast, fires started by the heat pulse and secondary fires caused by the destruction.
- (g) The nuclear threat present during the Cold War has diminished; however, the possibility remains that a

terrorist could obtain access to a nuclear weapon. Called improvised nuclear devices (IND), these are generally smaller, less powerful weapons than we traditionally envision.

- (h) It is also possible that a hostile nation or terrorist organization could use a radiological dispersion device (RDD) otherwise known as a “dirty bomb.” These types of bombs create a blast wave and damage from their conventional explosives and spread radioactive particles due to the radiation source being separated and spread by the explosion. However, due to the type of radiation source or construction of the device, there is no fission or fusion process. As a result, a nuclear explosion does not occur. Outside of the immediate blast range, the major threat is the spread of radioactive particles.
- (i) The transportation of radiological materials (i.e., spent nuclear fuel rods, radiological waste) also represents a threat to Colleton County and could also be considered a Hazardous Materials Incident.

(19) Repatriation

- (a) Over one million U.S. citizens and their dependents live, visit and travel in foreign countries. An emergency abroad may occur at any time and require these citizens and their dependents to immediately evacuate to the United States. The U.S. Department of State is responsible for emergency repatriation operations and has designated Charleston, South Carolina as one of several points of entry on the east coast. It is possible that repatriation efforts would require support from Colleton County resources.

(20) Long-Term Power Outage

- (a) Long-term power outages can occur as a result of malicious physical attacks on physical property, cyber-attacks, electromagnetic pulse weapons, wildland fires, overloads, tropical cyclones, etc. Any long-term power outage poses a significant threat to the social, health, safety, and economic well-being of the citizens and visitors within Colleton County.
- (b) Long-term power outages require a coordinated consequence management effort from all levels of

government, volunteer organizations, and private sector partners. No single private sector entity or local, tribal, state or federal government agency possesses the authority or expertise to act unilaterally. Priorities will involve two major concurrent operational efforts: the restoration of power and lifesaving/life-sustaining efforts. Restoration of electric power remains within the purview of energy companies. Colleton County is serviced primarily by Coastal Electric Co-operative and Dominion Energy (Edisto Electric Co-Operative services a very small portion of western and northeastern Colleton County).

(21) Sinkholes and Landslides

- (a) Sinkholes form on karst terrain (a region of bedrock that can be dissolved by water). Water that is slightly acidic dissolves the bedrock, creating cracks that can ultimately form a small depression. While sinkholes can occur suddenly and expectantly, there are often signs that can signal a potential development.
- (b) Landslides are a type of “mass wasting” or “downward movement of rock material.” In Colleton County (and other S.C. Coastal Plain counties), riverbanks are susceptible to slope failure on a larger scale, causing erosion.
- (c) Given the surface geology (absence of rock) and topography (relatively flat), sinkholes and landslides are considered a low threat to Colleton County.

B. Planning Assumptions

1. A disaster may occur with little or no warning and may escalate far more rapidly than the ability of any single local response organization or jurisdiction to handle it.
2. Most disasters/emergencies will be managed by local jurisdictions, utilizing resources available to their governments.
3. When an emergency exceeds local resources and response capabilities, local government will request help from the next higher level of government or from mutual aid organizations.
4. In some emergency or disaster situations, organizations will respond to the affected jurisdiction without being requested. Host governments will need to be prepared to stage and screen the arriving resources to determine which ones are needed and those that can return home.
5. When county assets are impacted, the responsible county agency will notify their chain of command and EMD as soon as possible.

Furthermore, they will utilize their resources and establish communications with the County EOC as applicable.

6. State resources will be requested through EMD and the EOC when it is likely that local resources will be exhausted in trying to respond to the situation.
7. With few exceptions, the Federal government will be available with additional resources and financial assistance only in the case of a Presidential declaration of an emergency or disaster.

III. Organization and Assignment of Responsibilities

A. General

1. Most departments and agencies within county government, as well as state/federal government, have emergency functions to perform in addition to their normal duties. See Table 2, Emergency Operations Center/Emergency Organization. Each is responsible for developing and maintaining emergency management procedures in accordance with the direction and guidance given in this plan. The presumption is that all primary agencies will coordinate with their supporting agencies in preparing all plans and accompanying documents.

B. Emergency Organization

1. Organizational responsibility assignments covered by this plan are displayed in the matrix found in Table 2. In the event it becomes necessary to request outside assistance, coordination will be made via the Emergency Operations Center (EOC).

C. County - S.C. Code 58-1, Local Emergency Management Standards, outlines county emergency management responsibilities. Key elements include:

1. Establishing a formal emergency management organization to be charged with the protection of life and property in the county during an emergency, which includes:
 - a) Developing a vulnerability analysis to identify hazards that may have a potential impact on the jurisdiction.
 - b) Developing a county Basic Emergency Operations Plan outlining the roles and responsibilities of the County Emergency Management Department during an emergency, this will be updated annually and certified by SCEMD.
 - c) Establishing and conducting an emergency management exercise and training program.
 - d) Developing a system, based on available resources, to provide for timely warning of the public and the dissemination of instructions for self-protection during an emergency.
 - e) Establishing and conducting an ongoing emergency management public education program.
2. Conducting emergency operations with support from within the jurisdiction and municipalities, and if needed the State, and effectively supporting the conduct of such operations.

D. Responsibilities of the Colleton County Fire-Rescue Emergency Management Division

1. Coordinate execution of the various ESFs of this plan to the maximum extent possible with the emergency activities of local governments, state government, private agencies, and organizations of the federal government.
2. Operate the County Emergency Operations Center (EOC) with the support of ESF lead and support agency representatives.
3. Maintain surveillance of potentially threatening conditions to and within the area in coordination with state and federal agencies and direct appropriate warning and preparedness actions.
4. Establish procedures for the maintenance and distribution of this plan on a regular basis.
5. Encourage mutual aid agreements with federal agencies, the state, other counties, private industry, relief organizations, and between local governments.
6. Provide technical and planning assistance to county agencies and departments and local governments upon request.
7. Support exercise opportunities provided by SCEMD to test and evaluate county and local plans to include communication and coordination through the use of Palmetto EOC, thereby maintaining a higher standard of preparedness.
8. Maintain an appropriate level of operational readiness.
9. Initiate any and all other actions deemed necessary for effective implementation of this plan.
10. Advise the County Administrator, Emergency Council, county agencies, local government officials, and necessary private and state agencies of the severity and magnitude of the emergency/disaster situation through Situational Reports (SITREPs).

a) Situational Reports are included with incident action plans and contain a wealth of information including the status of FEMA designated Lifelines (which are color coded to reflect their status as Green – minimal impact, Yellow – moderate impact, Red – significant impact, Gray – Unknown Status). Lifelines are as follows:

(1) Health and Medical - typically involves ESF's 8 and 9 and illustrates the status of the county's ability to provide pre-hospital and hospital based medical care to its citizenry.

(2) Transportation – typically involves ESF's 1, 3 and 16 and illustrates the status of the county's roadways and ability of the county to move

its citizenry to affect an evacuation or other movement of the public away from a hazard.

- (3) Communications – typically involves ESF’s 2 and 15 and illustrates the status of both public and government communications systems to provide for communications both between the public and between the government and the public.

- (4) Safety and Security – typically involves ESF’s 4, 9 and 13 and illustrates the status of fire and law enforcement resources to provide for the safety and security of the public.

- (5) Energy – typically involves ESF-12 (often unrepresented in the EOC and supervised by ESF-5 [Planning]) and illustrates the status of both power through electricity providers and fuel provided by fueling stations.

- (6) Food, Hydration, Shelter – typically involves ESF’s 6, 11, and 17 and illustrates the status of food and water supplies for the general population as well as sheltering capabilities provided by the county.

- (7) Hazardous Materials – typically involves ESF-10 and illustrates the status of hazardous materials/waste and the facilities that produce, process, and/or handle such materials.

- (8) Water Systems – typically involves ESF-3 and illustrates the status of infrastructure to deliver water and remove wastewater

- (9) It should be noted that agencies within a particular ESF can function in multiple ESF’s.

For example, SCDPH is a supporting agency in ESF-8 at the County level but also has a role in ESF-10 (Hazardous Materials). Consequently, SCDPH & SCDES can have input in both Health and Medical and Hazardous Materials Lifelines.

- (10) It should also be noted that although ESF’s 5 (Planning), 7 (Logistics), 14 (Recovery), 18 (Donated Goods and Volunteer Services), 19 (Military Support), and 24 (Business and Industry) are not specifically included in the

Lifelines above, all agencies under these ESF's can also provide input as to the status of the Lifelines above.

(11) Color codes by FEMA definition are Red (Significant impact, immediate attention needed to restore functionality), Yellow (Moderate Impact, disruptions or limitations present that require attention to prevent further deterioration), Green (Minimal Impact, only minor disruptions and/or limitations), Gray (Unknown). Color codes can be thought of as green = normal, yellow = impacted but workarounds are in place, red = impacted and workarounds are not in place and/or ineffective, gray = unknown.

(12) Community Lifeline Components and Subcomponents

(a) Safety and Security

(i) Law Enforcement/Security

- (a) Police Stations
- (b) Law Enforcement
- (c) Site Security
- (d) Correctional Facilities

(ii) Fire Service

- (a) Fire Stations
- (b) Firefighting Resources

(iii) Search and Rescue

- (a) Local Search and Rescue

(iv) Government Service

- (a) Emergency Operations Centers
- (b) Essential Government Functions
- (c) Government Offices
- (d) Schools
- (e) Public Records
- (f) Historic/Cultural Resources

(v) Community Safety

- (a) Flood Control
- (b) Other Hazards
- (c) Protective Actions

(b) Food, Hydration, Shelter

(i) Food

- (a) Commercial Food Distribution
- (b) Commercial Food Supply Chain
- (c) Food Distribution Programs (e.g., food banks)

(ii) Hydration

- (a) Temporary Hydration Mission (e.g., bottled water distribution)

- (b) Commercial Water Supply Chain
 - (iii) Shelter
 - (a) Housing (e.g., homes, shelters)
 - (b) Commercial facilities (e.g., hotels)
 - (iv) Agriculture
 - (a) Animals and Agriculture
- (c) Health and Medical
 - (i) Medical Care
 - (a) Hospitals
 - (b) Dialysis
 - (c) Pharmacies
 - (d) Long-Term Care Facilities
 - (e) Veteran’s Affairs (VA) Health System
 - (f) Veterinary Services
 - (g) Home Care
 - (ii) Patient Movement
 - (a) Emergency Medical Services
 - (iii) Fatality Management
 - (a) Mortuary and Post-Mortuary Services
 - (iv) Public Health
 - (a) Health Surveillance
 - (b) Human Services
 - (c) Behavioral Health
 - (d) Vector Control
 - (e) Labs
 - (v) Medical Supply Chain
 - (a) Blood/Blood Products
 - (b) Manufacturing
 - (i) Pharmaceutical Devices
 - (ii) Medical Gases
 - (c) Distribution
 - (d) Critical Clinical Research
 - (e) Sterilization
 - (f) Raw Materials
- (d) Water Systems
 - (i) Potable Water Infrastructure
 - (a) Intake
 - (b) Treatment
 - (c) Storage
 - (d) Distribution
 - (ii) Wastewater Management
 - (a) Collection

- (b) Storage
- (c) Treatment
- (d) Discharge
- (e) Energy
 - (i) Power Grid
 - (a) Generation Systems
 - (b) Transmission Systems
 - (c) Distribution Systems
 - (ii) Fuel
 - (a) Refineries/Fuel Processing
 - (b) Fuel Storage
 - (c) Pipelines
 - (d) Fuel Distribution (e.g., gas stations, fuel points)
 - (e) Off-shore Oil Platforms
- (f) Communications
 - (i) Infrastructure
 - (a) Wireless
 - (b) Cable Systems and Wireline
 - (c) Broadcast (TV and Radio)
 - (d) Satellite
 - (e) Data Centers/Internet
 - (ii) Alerts, Warnings, and Messages
 - (a) Local Alert/Warning Ability
 - (b) Access to IPAWS (WEA, EAS, NWR)
 - (c) NAWAS Terminals
 - (iii) 911 & Dispatch
 - (a) Public Safety Answering Points (PSAP)
 - (b) Dispatch
 - (iv) Responder Communications
 - (a) Land Mobile Radio (LMR) Networks
 - (v) Finance
 - (a) Banking Services
 - (b) Electronic Payment Processing
- (g) Transportation
 - (i) Highway/Roadway/Motor Vehicle
 - (a) Roads
 - (b) Bridges
 - (ii) Mass Transit
 - (a) Bus
 - (b) Rail
 - (c) Ferry

- (iii) Railway
 - (a) Freight
 - (b) Passenger
 - (iv) Aviation
 - (a) Commercial (e.g., cargo/passenger)
 - (b) General
 - (c) Military
 - (v) Maritime
 - (a) Waterways
 - (b) Ports and Port Facilities
 - (h) Hazardous Materials
 - (i) Facilities
 - (a) Oil/HAZMAT Facilities (e.g., chemical, nuclear)
 - (b) Oil/HAZMAT/Toxic Incidents from Facilities
 - (ii) HazMat, Pollutants, Contaminants
 - (a) Oil/HAZMAT/Toxic Incidents from Non-Fixed Facilities
 - (b) Radiological or Nuclear Incidents
- 11. Maintain, update, and distribute all changes to this plan, with an annual review or as required by an actual event.
- 12. Provide expedient training of operations center personnel as Operating Conditions (OPCONs) warrant.
- 13. Maintain a list of EOC Staffing contact information and notification procedures.
- 14. CCFR-EMD also maintains several informational platforms that ESF agencies can access to stay up to date with situational status. They include:
 - a) Fire-Rescue Emergency Management Division Situation Dashboard at <https://colletonfire.com/emd> (username and password available from Fire-Rescue). The dashboard provides current and ongoing status of Community Lifelines, Power Outages, Damage Reports, Shelter Status, Transportation Requests, River Gauges, Tides, Radar, Weather Forecast, Traffic Status, Resource Requests, Notable Activities, Incident/E-Hour/H-Hour/Operational Period/Conference Call timers, Wind Probabilities, Wildfire Risk, Space Weather, and IAP Status, as well as various links to other information.
 - b) Daily Situation Report (SitRep) which is emailed between 09:00 and 10:00 every day and provides a snapshot of current status of various items listed in a) above. Members of ESF agencies can register for the daily SitRep email at <https://colletonfire.com/emd/register>

- c) Fire-Rescue hosts a Google Chat titled “CCFR-EMD EOC” and it can be accessed by an ESF agency personnel with a Google account. It is a secure instant messaging platform that is updated continuously by the National Weather Service notification feed as well as Fire-Rescue’s daily notifications (FEMA Daily Briefing, SCEMD Daily SitRep, CCFR-EMD Daily SitRep, and NWS notifications for Colleton County). ESF agency personnel can register for the Google Chat at <https://colletonfire.com/emd/register>.
- d) Fire-Rescue maintains an email distribution list and forwards SCEMD and National Weather Service updates as well as periodic updates on operational or staffing changes. Personnel that register for the daily SitRep and/or Google Chat are automatically added to the email distribution list.
- e) Fire-Rescue maintains a list of ESF agency contacts in a Code Red Notification Group. This group will be notified by Code Red message (email, text, phone message) during any emergencies or in case of operational condition (OpCon) changes, etc.

E. Responsibilities of County Departments and Agencies

1. Appoint a department or agency liaison or representative, and an alternate, to coordinate with EMD the preparation and maintenance of operational ESFs. This department or agency liaison or representative shall have the authority to commit agency resources and expedite program operations in the provision and coordination of emergency services.
2. Assign personnel to augment the County EOC in accordance with County Personnel Policy and the requirements set forth by EMD.
3. Mobilize and utilize allocated and available resources to meet emergency or disaster requirements.
4. Maintain capability for the emergency procurement of supplies and equipment required and not otherwise available.
5. Provide training as appropriate to personnel assigned to execute respective emergency functions in this plan.
6. Maintain a 24-hour response team capability in the department or agency capable of responding to the EOC or a field command post (CP) in order to carry out organizational responsibilities.
7. Coordinate functional service provisions with local government and private service organization counterparts.
8. Assist state and federal agencies, as may be appropriate, in providing emergency response or disaster assistance within an affected area.
9. Conduct workshops or seminars as necessary to provide information regarding new equipment or procedures for all governmental, service organizations, and volunteer personnel participating in the implementation of the assigned function.

10. Provide all agency/department employees appropriate training to ensure an awareness of the hazardous threats common to the Lowcountry area of South Carolina and the overall emergency management program.
 11. Review this plan annually and update assigned ESFs and departmental plans to meet current department policy and organization. Revisions must be compatible with the policies set forth in the basic plan.
 12. Maintain current internal notification/recall rosters and communications systems. Notify EMD of any changes to the personnel recorded in the Continuity of Government directories.
 13. Participate in tests and exercises to test this plan and internal plans.
- F. Responsibilities of Other Primary and Supporting Agencies
1. Appoint agency representatives and alternate who can work with EMD and the other county departments and agencies regarding preparedness and response issues.
 2. Develop internal and enabling procedures in support of this plan and assigned ESFs. Provide updated copies of detailed procedures and manuals to EMD.
 3. Assign personnel to augment the County EOC and/or field command posts as may be required by your agency.
 4. Mobilize and utilize allocated and available resources to meet the emergency or mitigate the disaster.
 5. Maintain the capability for the emergency procurement of supplies and equipment required and not otherwise available.
 6. Provide training to personnel at a level appropriate to execute respective emergency functions in this plan.
 7. Maintain a 24-hour response team capability.
 8. Coordinate functional service provisions with local governments and private organizations.
 9. Assist county and state officials in providing emergency response or disaster assistance within the affected areas according to internal mission guidelines.
 10. Conduct training workshops in program areas as necessary to keep personnel apprised of plans, equipment, and procedures.
 11. Provide awareness training to all personnel regarding the threat of man-made and natural hazards common to the Lowcountry area of South Carolina.
 12. Review this plan annually and update assigned ESFs and Departmental Directives to meet current agency mission requirements. Revisions must be compatible with the policies set forth in this document.
 13. Maintain current internal notification/alert rosters and communications systems.
 14. Assign appropriate personnel to succeed the decision-making authority.
 15. Participate in drills and exercises to test this plan and SOPs.

IV. Concept of Operations

A. General

1. This plan is based on four organizational levels of emergency management, specifically, municipal, county, state and federal governments. Preparedness, mitigation, response and recovery are the responsibilities of all levels of government working together to provide a delivery system to meet the needs of the public.

B. Local Governments (County and Municipal)

1. The County will perform emergency preparedness operations in accordance with South Carolina Regulation 58-1, Local Emergency Management Standards, this EOP, supporting documents and Departmental Directives.
2. This EOP will be implemented by EMD when a major emergency or disaster occurs or at the direction of the South Carolina Emergency Management Division (SCEMD) Director, or upon a declaration of a State of Emergency by the Governor or County Council Chairperson.
3. Municipal resources will be utilized to protect against and respond to an emergency or threatening situation to include activating pre-established mutual aid agreements.
4. When municipal governments determine that their resources are not adequate, additional resources may be requested through EMD or the EOC, if activated. Otherwise, requests may be made through the County Warning Point.
5. When the County determines that county resources are not sufficient, EMD will request state assistance through the SCEMD or the State EOC (SEOC), if activated.
6. The County, and municipalities as applicable, shall establish and maintain journals, records and reporting capabilities in accordance with state and federal laws and regulations.
7. Municipalities and special purpose districts in the unincorporated areas are encouraged to designate a representative and alternate for each of the ESFs managed by the County, for the purpose of planning and implementation.
8. Where applicable, a county agency or department has been assigned as the primary agency for the ESF and is responsible for coordinating the development, preparation and testing of the ESF and enabling procedures.
9. Depending on the situation EMD, under the direction of the County Administrator, may order a monitoring, partial or full activation of the County EOC. Monitoring activations are staffed primarily by EMD staff. Partial activations will require the presence of key agency personnel as required by the particular emergency. Full activations will require the presence of all designated EOC staff members.

10. Upon the declaration of a State of Emergency, or as the situation warrants, public information briefings, news releases and all emergency information for public dissemination will be released by the County PIO, EMD, and the Joint Information Center (JIC) operated by state and federal agencies.
11. In order to make maximum use of advanced warning, a system of Operating Condition (OPCON) levels has been established. These OPCONs increase the community's level of readiness on a scale from 3 to 1. Each OPCON level is declared when a predetermined set of criteria has been met. OPCONs will not necessarily progress sequentially from 3 to 1. The OPCON placed in effect at any given time will be the appropriate one for existing conditions at the time. EMD will assign OPCON levels in coordination with the State, when required, as described in the below OPCON LEVELS OF READINESS:
 - a) **OPCON 3** – Normal Operations / Steady State – Activities that are normal for the EOC when no incident or specific risk or hazard has been identified. The EOC may be open or closed. If open, staffing may be limited in both time and personnel.
 - b) **OPCON 2** – Enhanced Steady State / Partial Activation – Certain Incident Management Team (IMT) members / organizations within some Emergency Support Functions (ESF) are activated to monitor a credible threat, risk, or hazard and/or to support the response to a new and potentially evolving incident. The EOC is open and staffed with essential personnel during times sufficient to meet operational concerns.
 - c) **OPCON 1** – Full Activation – the Incident Management Team (IMT) and all Emergency Support Functions (ESF) are activated, including personnel from all assisting agencies, to support the response to a major incident or credible threat. Disaster or emergency situation likely or imminent. EOC staffing is likely 24-hours a day.

C. State Government

1. State resources will supplement local efforts upon request or in accordance with the ESF support areas coordinated by SCEMD.
2. The Governor or his designee may execute the SC state EOP to support local situations when local resources are not adequate to sustain an effective response operation or when a significant state presence is required for immediate assistance.
3. When an emergency or disaster has occurred or is imminent, the Governor may issue an Executive Order proclaiming the existence of a State of Emergency or activate the emergency response, recovery and mitigation aspects of state, local and inter-jurisdictional disaster plans. The Executive Order is required for the deployment and use of state personnel, supplies, equipment, materials and/or facilities. SCEMD will

provide recommendations to the Governor and assist in formulating the Executive Order.

4. If disaster threatens prior to the ability of the Governor to issue an Executive Order proclaiming the existence of a State of Emergency, the SCEMD Director is authorized to activate the plan and implement any emergency response actions that may be necessary for the immediate protection of life and property.
5. Emergency Support Functions (ESFs) will be established with state agencies and volunteer organizations to support response and recovery operations. A state agency within each ESF will have primary responsibility for the coordination and implementation of the ESF. By Executive Order, the designated primary agency will coordinate the development and preparation of SOPs.
6. In the event of an emergency situation beyond local control, the SCEMD Director, under the direction of the Governor, may assume direct operational control over all or any necessary part of the emergency operations functions within the State.
7. Support agencies and volunteer organizations are incorporated into the SCEOP with additional state agencies on notice that they may have to support each state ESF as well as the variety of impact hazards affecting South Carolina.
8. Direction and control of a state emergency operation will be exercised by the Governor through the Director of the SCEMD, and the SEOC. All state agencies mobilized pursuant the SCEOP will be coordinated by the SCEMD Director. A SCEMD Officer will be assigned to Colleton County. However, in the event of a terrorist threat or incident, SLED will coordinate the state response in accordance with Section 23-3-15 (A) (8), SC Code of Laws.
9. In order to make maximum use of advanced warning, the State has adopted a system of Operating Condition (OPCON) levels utilized by Colleton County and several other counties. These OPCONs increase the State's level of readiness on a scale of 3 to 1 previously described.
10. Upon occurrence of an emergency or disaster clearly beyond the capabilities and resources of state and local governments, the Governor will likely request assistance from the federal government by requesting a federal declaration.
11. State agencies and departments will support hazard specific and other supporting plans, such as the South Carolina Hurricane Plan, and South Carolina Emergency Recovery Plan, as referenced in this plan.
12. Upon declaration of a State of Emergency, public information briefings, news releases and all emergency information generated by State agencies and departments will be released through the SEOC and will be coordinated with the Governor's Press Secretary.

13. For major/catastrophic events, ESF-7 (Logistics / Resource Support) may be tasked to establish, manage, and support a Logistical Staging Area (LSA). The LSA, normally located at or near a predetermined airport in the impacted area, will receive, support and organize response resources for deployment.
 - a) Lowcountry Regional Airport (KRBW) is the only airport large enough in the county to accommodate logistical support by air. It can handle aircrafts as large as a C-130 or B737. The closest fire station to KRBW is Station 19.
 - b) Station 6 is the closest fire station to rail supply lines (CSX) in the southern portion of the county. There is a siding 0.6 miles west of Station 6.
 - c) Station 21 is the closest fire station to logistical support by water. The waterway can handle boats with drafts of less than 10 feet.
14. State agencies and departments will establish supplementary agreements with their respective counterparts from other states to adapt interstate compacts, mutual aid, and statutes. SC is a signatory of the Emergency Management Assistance Compact (EMAC) that provides for mutual assistance (people, equipment, skills, etc.) between participating member states in managing any emergency or disaster that is duly declared by the governor(s) of the affected state(s). The assisting state will receive approval from its governor before providing assistance. The requesting state will reimburse the assisting state for the cost of response. Normally an advance team (A-team) from the unaffected member state will deploy to the requesting state to assist in interstate coordination. Depending on the extent of the disaster, A-teams may also operate from the FEMA Regional Operations Center (ROC) and/or FEMA headquarters in conjunction with FEMA's Emergency Support Team (EST).
15. Initial planning for recovery will begin before an emergency event impacts South Carolina. While local governments are implementing response actions necessary to protect public health and safety, a team of recovery planners assigned to the SEOC will coordinate implementation of recovery programs.

D. Federal Government

1. Federal assistance will supplement state and local efforts and shall be provided under governing secretarial or statutory authorities.
2. To the extent that public law provides, any federal assistance made available to relieve the effects of the disaster or emergency in SC will be channeled through and coordinated by the Governor or his designated authorized representative.
3. Through the National Response Framework, the federal government provides assistance through fifteen ESFs. These ESFs will establish direct liaison with South Carolina's ESF representatives in the SEOC along with Colleton County EOC. The five state-specific ESFs (16, 17, 18,

19 and 24) will establish liaison with members of the Federal Emergency Response Team (ERT) assigned federal coordination responsibility for that function.

a) The National Response Framework identifies 32 core capabilities in the National Preparedness Goal. By working with local, state and federal partners, Colleton County meets these capabilities as follows:

- (1) Planning – conducted by EMD with close support of all ESF agencies
- (2) Public Information and Warning – conducted by the county’s warning point and EMD
- (3) Operational Coordination – conducted by the EOC
- (4) Forensics and Attribution – conducted by CCSO, supported by CCFR and local/state/federal partners.
- (5) Intelligence and Information Sharing – conducted by all agencies through EOC
- (6) Interdiction and Disruption – conducted by CCSO, supported by local/state/federal partners.
- (7) Screening, Search, and Detection - conducted by CCSO, supported by local/state/federal partners.
- (8) Access Control and Identity Verification – conducted by all agencies with critical facilities
- (9) Cybersecurity – conducted by each agency’s information/technology department
- (10) Physical Protective Measures – conducted by all agencies with critical facilities.
- (11) Risk Management for Protection Programs and Activities – conducted by CCSO, supported by CCFR and local/state/federal partners.
- (12) Supply Chain Integrity and Security - conducted by CCSO, supported by local/state/federal partners.
- (13) Community Resilience – conducted by EMD and government leaders
- (14) Long-Term Vulnerability Reduction – conducted by EMD with support of all ESF agencies
- (15) Risk and Disaster Resilience Assessment – conducted by EMD with support of all ESF agencies
- (16) Threats and Hazards Identification – conducted by EMD with support of all ESF agencies
- (17) Critical Transportation – conducted by EMD with support of ESF-1 and 3 agencies
- (18) Environmental Response/Health and Safety – conducted by EMD with support of all ESF agencies

- (19) Fatality Management Services – conducted by Colleton County Coroner’s Office with support of ESF-8 agencies
- (20) Fire Management and Suppression – conducted by EMD with support of ESF-4 agencies
- (21) Infrastructure Systems – conducted by EMD with support of all ESF agencies
- (22) Logistics and Supply Chain Management – conducted by EMD with support of ESF-7 agencies
- (23) Mass Care Services – conducted by EMD with support of ESF-6 and 11 agencies
- (24) Mass Search and Rescue Operations – conducted by EMD with support of ESF-9 agencies
- (25) On-Scene Security, Protection, and Law Enforcement – conducted by CCSO with support of ESF-13 agencies.
- (26) Operational Communications – conducted by CCFR and CCSO with support of ESF-2 agencies.
- (27) Public Health, Healthcare, and Emergency Medical Services – conducted by CCFR/EMD and ESF-8 agencies.
- (28) Situational Assessment – conducted by EMD and ESF-5 agencies
- (29) Economic Recovery – conducted by EMD and ESF-24 agencies
- (30) Health and Social Services – conducted by EMD and ESF-6 and 8 agencies
- (31) Housing – conducted by EMD and ESF-6 agencies
- (32) Natural and Cultural Resources – conducted by EMD and ESF 14 agencies

- 4. If the disaster is of major or catastrophic classification, SCEMD will contact FEMA Region IV to request a FEMA Liaison or alert them that the Governor may submit a formal request for federal assistance.
- 5. The Secretary of Homeland Security may appoint a Principal Federal Official (PFO) to coordinate overall federal incident management and assistance. If federal assistance under the Stafford Act is provided a Federal Coordinating Officer (FCO) also will be appointed. The FCO is authorized to use the full authority of the Stafford Act and to reimburse response and recovery claims.
- 6. To help ensure state/federal coordination, the FEMA Region IV Regional Response Plan contains an Annex detailing South Carolina's emergency management system. This Annex outlines the SCEOP and unique operational activities the state implements when responding to disasters.

E. Preparedness

- 1. Colleton County EOP Development and Maintenance
 - a) This plan is the principal source of documentation concerning the County’s emergency management activities. Designated

departments and agencies of County government have the responsibility for developing and maintaining a portion of this plan. Overall coordination of this process will be performed by EMD.

- b) EMD will coordinate the efforts of all responsible departments and agencies for plan development and timely update/revision. All organizations that have emergency-oriented missions or support roles are required to prepare supporting documentation (i.e. standard operating procedures).

F. Mitigation

- 1. Mitigation includes those activities designed to reduce or eliminate risks to persons or property or to lessen the actual or potential effects or consequences of an incident. Mitigation measures may be implemented prior to, during, or after an incident. Mitigation involves ongoing actions to reduce exposure to, probability of, or potential loss from hazards. Measures may include zoning and building codes. Mitigation may include efforts to educate governments, businesses, and the public on measures they can take to reduce loss or injury.

G. Response

- 1. County/Municipal Response
 - a) Municipal governments call upon their county government or other municipalities in coordination with their county for assistance during events in which their own capabilities are overwhelmed. Counties provide assistance to municipalities and request assistance through mutual aid or from the state when their capabilities are overwhelmed.
 - b) The local incident command structure must incorporate NIMS practices into their operations. This is particularly important as the incident progresses.
- 2. Local State of Emergency
 - a) As county operations progress, the county may declare a local state of emergency implementing local emergency authorities.
 - (1) During a state or locally declared state of emergency, EMD will ensure that resources (i.e. sandbags, salvage covers, etc.) are available to Colleton citizens to prepare their homes and businesses.
- 3. County Emergency Operations Center (EOC)
 - a) The Colleton County EOC serves as the central clearinghouse for information collection and coordination of response and recovery resources within the county, including the municipalities within the county.
 - b) The EOC maintains communications with Incident Command, providing logistical and planning support when necessary.
 - c) Table 2 provides an organizational chart for EOC operations. When a function or ESF is not represented in the EOC, it

becomes the responsibility of the supervising organizational element. Essential EOC personnel are the Emergency Council, Section Chiefs, and ESF lead agency representatives.

4. State Response

- a) The state must be prepared to respond quickly and effectively on a 24-hour basis to developing events. When an event or potential event is first detected, the SEOC is activated to a level appropriate to the magnitude of the threat. The state's response effort is managed through the State Emergency Response Team (SERT), which is organized into 20 Emergency Support Functions (ESF). Primary and support organizations are designated for each of these ESFs. A State Liaison, typically a SCEMD Regional Emergency Manager (REM) or Regional Emergency Coordinator (REC), may be dispatched to the county threatened by or experiencing an emergency or disaster. The State Liaison is responsible for providing an on-going assessment of the situation, technical assistance, and relaying local recommendations or resource requests to the SEOC.

H. Recovery

1. Recovery activities include the development, coordination, and execution of service and site-restoration plans for impacted communities and the reconstitution of government operations and services through individual, private sector, non-governmental, and public assistance programs.
2. The decision to deploy damage assessment teams will be made in coordination with the affected local governments. Damage assessment teams will be organized and trained in advance. Preparations will be made to deploy teams into affected areas as quickly as possible. These teams include State Assessment Teams and Local Initial Damage Assessment (LIDA) Teams, and Preliminary Damage Assessment Teams.

V. Disaster Intelligence and Communications

- A. Information Planning - In order to effectively respond to disasters that affect the county, EMD will develop facts and assumptions that will allow for the effective collection of disaster intelligence for response and recovery operations. The following paragraphs detail the areas that must be considered when developing response and recovery plans.
 1. The type of disaster determines the overall response to the event. Specific plans for hurricane, earthquake and others are in place and outline the approach the state will take as it responds.
 2. The severity of the disaster will determine how the county will respond. For example, a Category 1 hurricane will require a lesser response than a Category 4. Computer based planning aids such as Hazards United States (HAZUS) allow planners to estimate damages from natural hazards disasters based on severity.

3. The possible effects on the citizenry are critical information in planning for medical and sheltering requirements both pre- and post-event. The repositioning of supplies, response personnel and the opening of shelters require complete and accurate information.
4. Critical infrastructure damage information is important so that resources may be prioritized in order to restore key infrastructure facilities and equipment.
5. Resources available for response at all levels of government are vital in emergency planning. Their location, capabilities, quantity and response time are information needed in order to develop action plans, identify shortfalls and manage resources.

B. Information Collection, Alert, and Notification

It is also important to obtain and disseminate the most current and accurate disaster related information possible. In order to accomplish this task, EMD uses the County Warning Point, the Regional Emergency Manager Program, and relationships with municipal governments, as follows:

1. The County Warning Point monitors, collects and disseminates essential disaster intelligence information, specifically as it relates to loss of life and property damage. Also, the warning point can activate various communication capabilities, as well as public warning systems to alert state agencies, officials, and threatened populations. This information is communicated both manually and electronically through the following mechanisms:
 - a) Colleton County Sheriff's Office Communications Center/PSAP/911 Dispatch operates a 24-hour emergency communications center and serves as the County Warning Point. The County Warning Point provides the County with a single point to receive and disseminate information and warnings that a hazardous situation could threaten the general welfare, health, safety, and/or property of the County's population. The County Warning Point is equipped with multiple communication networks composed of the National Warning System (NAWAS) and the Emergency Alert System (EAS).
 - b) The County Warning Point may initiate public warnings and notifications, particularly for events with little to no warning before they occur.
 - c) The SCEMD local government radio (LGR) network, PAL800 radio system, satellite phone, and Amateur Radio are all capabilities that EMD operates. This alternate system is used to transmit, receive, and coordinate emergency information. The system is tested weekly to ensure operational readiness.
 - d) The state has developed an electronic Web based means of communication between the counties and the SEOC. Palmetto EOC allows for continual communication of the ongoing situation

and provides a means for the affected counties to request resources and monitor events taking place outside of their jurisdiction.

2. The South Carolina Emergency Management Regional Emergency Managers (REMs) are dispatched to the county(ies) threatened by or experiencing an emergency or disaster. The REM is responsible for providing an on-going assessment of the situation, technical assistance, and coordinating local recommendations or resource requests to the SEOC. The information provided by REMs will be incorporated in Situation Reports (SITREPs), which will be used to develop Incident Action Plans (IAPs) for the event.
3. When the County Emergency Operations Center (EOC) is activated, it will be in constant communication with the SEOC. Information on the disaster will be continually updated and requests for assistance can be forwarded.
4. It is imperative that disaster impact assessments be made quickly to determine the necessary county response, state response, and/or federal assistance following any major or catastrophic disaster. To accomplish this, one or more County and/or Local Initial Damage Assessment (LIDA) Teams may be deployed to evaluate immediate needs and report the findings to the County EOC and SEOC. These teams will evaluate immediate victim needs (food, water, medical, shelter, etc.) and any impact to infrastructure (utilities, communications transportation, etc.).

C. Information Flow

As disaster information is obtained in the field, or other sources, it is made available to EMD as soon as possible. However, information flow is dependent upon the OPGON level.

1. In the event the County EOC is not activated at the time of the disaster, information will be received from sources throughout the county via the County Warning Point. The Warning Point, in accordance with its Standard Operating Procedures (SOP), records and notifies the EMD. EMD will notify agencies, ESFs, and volunteer groups as required for further action.
2. When the EOC is activated, disaster information will flow internally between and among various state and local agencies, warning point, Palmetto EOC, and personnel in the field. Information received is disseminated and acted upon in accordance with the County EOC plans.
 - a) It is also important for the Colleton EOC to communicate with surrounding jurisdictions/county EOC's, so that plans can be made for resource requests that do not overburden one county over another.

D. Public Information Dissemination

Providing emergency information to the public and all levels of government is essential to avoid or minimize loss of life and property if a disaster is imminent or

has occurred. Before, during, and after emergency operations, the public will be apprised through reports to the news media and Emergency Alert System (EAS).

1. Warning of emergency related events includes information and reports and the surveillance of threatening conditions. The County operates a 24-hour warning point which serves as a contact to receive and disseminate emergency information. Specialized warning point communication capabilities include:
 - a) Code RED
 - b) Integrated Public Alert & Warning System (IPAWS)
 - c) National Alert Warning System (NAWAS)
 - d) Emergency Alert System (EAS)
 - e) Palmetto EOC
 - f) Cellular phones
 - g) Text phones such as telecommunications device for deaf (TDD) and (telephone -Telephone bridging typewriter or teletypewriter (TTY)
 - h) Satellite phones
 - i) Warning point radios
 - j) Spanish Hotline
 - k) Social Media and Internet Sites
 - l) SCEMD App
 - m) Emergency Notification System

State assistance under this function consists of the utilization of equipment and personnel essential to coordinate and disseminate information before and during an impending or actual disaster situation.

2. Colleton County Fire-Rescue Emergency Management Division (EMD) will coordinate with all appropriate departments/agencies and organizations to ensure timely warning readiness in case of a man-made or natural disaster or emergency.
3. In the event of an imminent or actual disaster, EMD will initiate actions to warn local governments and other agencies by all means necessary.
4. A variety of warning systems are available for use during emergency operations. Weather advisories will be made throughout state and local communications networks as appropriate to alert local governments to conditions. These advisories will be received from the National Weather Service (NWS), National Warning System (NAWAS), and other electronic means. It is primarily intended for the use of emergency management, public safety and public health organizations for contacting either a localized segment of the public, threatened populations, or specialized groups, such as hospitals and response teams. Emergency information may also be received and transmitted using the SLED National Crime Information Center (NCIC), a nationwide information system. The Emergency Alert System (EAS) will be used to notify the general public of emergency conditions. EMD maintains a capability to use numerous radio

systems and networks to provide a statewide emergency warning system, including the SCEMD Local Government Radio (LGR) network, the 800 MHz state radio system, satellite connections, and amateur radio.

5. The EMD will maintain surveillance of storms using NWS Weather Service and information resource programs such as HURREVAC, and other related software
6. Notification to municipal governments, school districts and hospitals will be initiated whenever the potential for an emergency exists.
7. Information for the media and the public will be clear, concise and accurate. Every effort shall be made to prevent and counter rumors, hearsay, and inaccurate information. Telephone operators assigned to the EOC will take calls from the general public and answer questions with the information provided them from all areas within the EOC or refer the call to the proper person.
8. On behalf of the Chairman of County Council and the Administrator, the EMD, through ESF-15, is responsible for informing the public of emergency and disaster information within the County.
9. The County Joint Information Center (JIC) will coordinate with the State's Joint Information Center, the southern hurricane region's County PIOs, FEMA, military public affairs and others as required to ensure the release of timely and accurate information.
10. The ESF-15 staff will coordinate with the local print and broadcast media regarding the County JIC and the media's duties as responsible team members during EOC and/or command post operations. Press conferences that are scheduled will be listed on the IAP.

VI. Evacuation

- A. Evacuation is the controlled movement and relocation of persons and property made necessary by the threat or occurrence of a natural/technological disaster or an act of aggression. County assistance will be the provision of personnel, equipment, and technical expertise beyond that provided by the local jurisdiction.
- B. The lead county agency for carrying out the evacuation due to large natural disasters is the Colleton County Sheriff's Office in conjunction with EMD. State assistance may be provided as previously described when it is necessary to evacuate and return citizens upon the direction of the Governor.
- C. Coordination with all appropriate departments and agencies will be performed through the Law Enforcement Desk (ESF-13/16) at the County EOC or field CP.
- D. EMD will monitor conditions that have the potential to require evacuation of any area(s) in the County and implement changes in the OPGONs as necessary.
- E. Evacuations due to man-made incidents, involving a relatively small geographic area will be the responsibility of the jurisdictional fire and/or law enforcement agencies. As soon as practical, EMD will be alerted of evacuations and will be responsible for notification to the Governor's Office through the State Warning Point as required by state law (Emergency Powers Act).

- F. Evacuations due to tropical storms and hurricanes will be coordinated by EMD with the SEOC, Southern Hurricane Region Counties, and Colleton County Emergency Council. ESF-16 (led by South Carolina Highway Patrol) has an extensive plan for evacuations prior to Tropical Storms/Hurricane evacuations. Crisis relocation as a result of a terrorist act will be coordinated by EMD with SEOC, state and federal law enforcement.
- G. Emergency conditions and affected areas that may require evacuation include:
 - 1. Hurricanes: Coastal areas, beachfront properties, low-lying areas around streams, and mobile home areas.
 - 2. Hazardous Materials Incidents: Densely populated areas throughout the state.
 - 3. Dam Failures and Floods: Inundation areas below dams and low-lying areas around rivers, streams, and swamps.
 - 4. Earthquakes/Tsunamis: Densely populated areas throughout the state.
 - a) Types of Tsunami Alerts
 - (1) Tsunami Warning - A tsunami warning is issued when a tsunami with the potential to generate widespread inundation is imminent, expected, or occurring. Warnings alert the public that dangerous coastal flooding accompanied by powerful currents is possible and may continue for several hours after initial arrival. Warnings alert emergency management officials to take actions for the entire tsunami hazard zone. Appropriate actions to be taken by local officials may include the evacuation of low-lying coastal areas, and the repositioning of boats to deep waters when there is time to safely do so. Warnings may be updated, adjusted geographically, downgraded, or canceled. To provide the earliest possible alert, initial warnings are normally based only on seismic information.
 - (2) Tsunami Advisory - A tsunami advisory is issued when a tsunami with the potential to generate strong currents or waves dangerous to those in or very near the water is imminent, expected, or occurring. The threat may continue for several hours after initial arrival, but significant inundation is not expected for areas under an advisory. Appropriate actions to be taken by local officials may include closing beaches, evacuating harbors and marinas, and the repositioning of boats to deep water when there is time to safely do so. Advisories are normally updated to continue the advisory, expand/contract affected areas, upgrade to a warning, or cancel the advisory.
 - (3) Tsunami Watch - a tsunami watch is issued to alert emergency management officials and the public of an event which may later impact the watch area. The watch

area may be upgraded to a warning or advisory - or canceled- based on updated information and analysis. Therefore, emergency management officials and the public should prepare to take action. Watches are normally issued based on seismic information without confirmation that a destructive tsunami is underway.

- (4) Tsunami Information Statement - A tsunami information statement is issued to inform emergency management officials and the public that an earthquake has occurred, or that a tsunami warning, watch or advisory has been issued for another section of the ocean. In most cases, information statements are issued to indicate there is no threat of a destructive tsunami and to prevent unnecessary evacuations as the earthquake may have been felt in coastal areas. An information statement may, in appropriate situations, caution about the possibility of destructive local tsunamis. Information statements may be reissued with additional information, though normally these messages are not updated. However, a watch, advisory or warning may be issued for the area, if necessary, after analysis and/or updated information becomes available.
- b) Concept of Operations - should an evacuation be necessary as the result of an earthquake or tsunami warning; the following will occur:
- (1) Once a tsunami wave has been detected that may impact the Colleton County coast, the Colleton County Fire-Rescue Chief, or his designee and/or National Weather Service will activate the Emergency Alert System advising the need to evacuate the beach area. Colleton County Fire-Rescue Emergency Management Division will also use all available forms of notifications to warn the public if a tsunami threatens Colleton County's coast line.
 - (2) Coordinate evacuation notifications through Colleton County Fire-Rescue Emergency Management Division, Colleton County Sheriff's Office-Communications, the NWS Charleston Office and the SCEMD State Warning Point. Coordinate beach evacuation notifications through the Town of Edisto Beach, Edisto Beach Police Department, Edisto Beach Fire Department, Colleton County Fire-Rescue and Edisto Beach State Park Officials.
 - (3) The PSAP/911 Center/Dispatch Center/County Warning Point will notify appropriate law enforcement agencies, Town of Edisto Beach, Edisto Beach Police Department, Edisto Beach Fire Department, Edisto State Park Officials

and Colleton County Fire-Rescue to respond to the beach and announce the evacuation of the beach.

(4) In the event of a tsunami or an observation of severe water draw-back by first responders, an evacuation order may be given by the officer in charge. The PSAP/911 Center/Dispatch Center/County Warning Point should be notified immediately and they will notify the Sheriff, Fire-Rescue Chief, and County Administrator.

(5) After initial alerts are distributed, follow up information will be provided by the public information officer (PIO) or through the EOC.

5. Weapons of Mass Destruction Incidents: Densely populated areas throughout the state.

H. Depending on circumstances, an evacuation may be employed: Under the terms of Section 25-1-440, SC Code of Laws, the Governor is the only person authorized to mandate and compel an evacuation in South Carolina. During an evacuation all citizens are expected to leave the affected area.

I. SCEMD will coordinate with Colleton County and the appropriate state agencies for evacuation routing to shelters, pre-positioning of personnel and equipment, provision of transportation, shelter and congregate/non-congregate care, and the provision of public information to deal effectively with the situation.

J. When the conditions which caused the evacuation cease to exist, control of reentry will be passed from the Governor back to the County's Emergency Council for coordination with the affected local jurisdictions.

VII. Re-entry and Security

A. General - This section provides guidance to local and state agencies for an incident during which an evacuation of portions of Colleton County has occurred and an orderly and efficient re-entry of the evacuated population is needed while providing for the security of public and private property.

1. Re-entry must only be allowed after ESF-14 (Recovery) has assessed the immediate human needs (food, water, health/medical and housing) and the operational status of vital community infrastructure (transportation, communications and utility systems). This requires coordination between ESF-5 (Planning) and ESF-12 (Energy), ESF 1 (Transportation), ESF-2 (Communications), and ESF-3 (Public Works). Where needs are unmet, ESF-7 (Logistics) may need to coordinate or request resources to meet those needs. Municipalities are responsible for conducting their own immediate needs assessment to determine re-entry restrictions. Municipalities will coordinate with ESF-14 to determine if the locality is safe to permit the re-entry of residents and property/business owners. In some cases, state and/or federal assistance may also be available to assist or to conduct such an assessment. State participation is coordinated by SCEMD and federal participation is coordinated by DHS/FEMA.

2. Return to the Risk Area

- a) Businesses shall be responsible for credentialing their staff with proper identification, marked vehicles (permanent or magnetic) prior to a disaster or emergency. See Section VII.C. below.
 - b) After impact, re-entry may be based upon one of three scenarios:
 - (1) The threat has passed and there is little to no damage that affects communities.
 - (2) Damage is limited to a localized area, operational area, or region of the county with minimal or isolated significant damaged (i.e. island areas in the southern portion of Colleton County)
 - (3) Devastating damage has occurred with significant infrastructure effects over a wide spread area.
3. The decision of when to permit residents or business owners to return to an affected area will be made cooperatively between the EOC and municipalities based upon the three scenarios above. The decision will be based upon an overall evaluation considering the following major factors:
- a) Access – Following a major event, a survey of impacted areas should be conducted immediately to identify and prioritize the most seriously damaged areas of the locality. This can determine the level of damage to major routes into the area and help determine the time needed for debris clearance from those routes.
 - b) Essential Emergency Services – Fire-Rescue and Law Enforcement resources that have been relocated prior to the impact need to return to their service areas.
 - c) Water Levels – Floodwaters have receded from most of the area.
 - d) Public Health – Water and sewer services are operating.
 - e) Subsistence – Food is available or made available in the impacted area.
 - f) Utilities – Electricity, potable water, sewer services, telephone, and natural gas services are operating or alternative power, water, sewer, and communications services are available in the affected areas.
 - g) Existing services can support both the people already in the impacted areas as well as an additional influx of people.
4. Once the decision to permit re-entry has been established, ESF-13 (Law Enforcement) should set up checkpoints and roadblocks as needed based upon the level of damage that has occurred. Re-entry can proceed as recommended based upon a phased re-entry. This can limit primary access to essential personnel that may be needed to restore services and help to manage the number of people entering the disaster area.
- a) No Access – Access is limited to only those personnel necessary to conduct an evaluation of the area. The area is deemed too dangerous for the general public either because of known or suspected danger. Law enforcement personnel should restrict access during this phase to provide for area safety and security. During this phase, agencies and groups may include, but are not

limited to, Law Enforcement and Security Agencies (including private security for facilities and residential communities) and Fire-Rescue/First Responders.

- b) Restricted Access – Access to the area is limited to those personnel or agencies/organizations necessary to address the safety, service issues or conditions that are preventing the return of the population. The local authority having jurisdiction over the area (i.e. Municipal Government) determines who is authorized to enter. This phase allows the entry of agencies and organizations that play key roles in restoring minimal operations to the impacted area. Law enforcement personnel should restrict access during this phase to provide for area safety and security. **ONLY THOSE WITH PROPER AGENCY CREDENTIALS WILL BE ALLOWED ACCESS.** Only those with SCEMD issued dash passes or Colleton County Fire-Rescue issued identification meeting one or more of the following designations will be allowed to enter:
- (1) Law enforcement and security agencies (including private security for facilities and residential communities).
 - (2) Jurisdictional Fire, Medical, and Search & Rescue, First Responders or designees.
 - (3) Facility/Industrial Emergency Response Teams
 - (4) Contracted Debris Clearing and Removal Crews
 - (5) Infrastructure and Utilities Repair Personnel
 - (6) Officials (Municipal, County, State or Federal) Damage Assessment Teams
 - (7) Other personnel at the direction of the EOC or municipality
- c) Limited Access – allows for the limited re-entry of only those residents or business owners that possess proof that they live, own, rent, lease or otherwise have a need to be allowed into the restricted areas. **ONLY THOSE WITH PROPER RESIDENCE OR AGENCY CREDENTIALS WILL BE ALLOWED ACCESS.**
- Access to others may also include:
- (1) Relief Workers
 - (2) Commodities Points of Distribution (POD) Teams
 - (3) Health Agencies
 - (4) Insurance Agents
 - (5) Large Box Store Management and Staff
 - (6) Hotel/Motel Staff (to prepare for receiving of State and Federal relief agencies)
5. If the impacted areas cannot support the return of evacuated residents, temporary housing may be established in non-impacted areas near the disaster area. State and County authorities in accordance with the State Disaster Recovery Plan will make decisions on the location and operation of temporary housing facilities.
6. Residential and nursing homes are NOT to bring residents back to the community until all services have been restored to normal (including

power, water, sewer, communications and local suppliers of commodities used by the facilities).

B. Checkpoints and Routes

1. Evacuees will return to the area following primary and secondary evacuation routes unless otherwise indicated.
2. Pre-established Traffic Control Points (TCP's) will be used to verify residents or workers that have a need to re-enter a restricted or limited access area. These TCP's serve as a roadblock to deny entry of those who may be looking to simply sight-see or have other undesirable intent.
3. Local law enforcement officers should be primarily responsible for establishing and staffing checkpoints for re-entry into their locality. Local checkpoint staffing may be supplemented by local, state, or federal law enforcement personnel (coordinated by ESF-13). Secondary checkpoints may be established by local jurisdictions where required.
 - a) Potential Primary Traffic Control Points (TCP's) for Re-entry
 - (1) Highway 174 at Point of Pines Road / The Old Post Office Restaurant (in Charleston County)
 - (2) Bennetts Point Road at the Brickyard Bridge Landing (Ashepoo River)
 - (3) Wiggins Road at Stocks Creek Road
4. In order to expedite the re-entry process, an Identification Verification Area (IVA) may be established in close proximity to each TCP for people with questionable identification. Every effort should be made to ensure that residents return to their homes as soon as safely possible. Law Enforcement may limit the flow of returning traffic to better manage the TCP's.

C. Identification Procedures

1. Identification procedures are intended to provide guidance for law enforcement personnel who may be directing access to disaster impacted localities.
2. Residents should have proper identification, such as a driver's license, voter's registration, utility bills, property tax receipts, etc.; a document that proves residence or ownership of property within the disaster area. This is critically important for residents who have second homes or businesses in the disaster area as their driver's license likely lists them as a resident of another community, county or state.
3. Relief workers and business owners should have a company ID card, and/or marked company vehicles with agency information to enter an impacted area.
4. Colleton County does not utilize a credentialing or identification system separate from SCEMD. Business re-entry is managed by ESF-24 in the SEOC. Emergency responders, government employees and essential energy and utility workers can obtain identification cards and credentials from Colleton County Fire-Rescue.

D. Roadblocks

1. The strategic location of roadblocks is an important part of the re-entry process. Roadblocks can be utilized to restrict entry points into devastated areas for two main reasons.
 - a) Roadblocks can be used to prevent mass entry of the civilian population, which can clog rescue routes for people in the impacted areas who may require medical attention.
 - b) Roadblocks are a method to help curtail acts of unlawfulness such as looting.

E. Curfews

1. Curfews may be issued by local, county or state law enforcement officials as a crime prevention measure depending on the intensity of the disaster and the level of damage sustained. The decision to implement a curfew and the duration rests with the local governing body or Colleton County Sheriff, but curfews should be coordinated through the EOC to ensure continuity among jurisdictions. Curfews may also be implemented countywide, regionally or within a particular municipality depending on the impact of the emergency.

F. Contingency Planning for Hurricanes

1. A major Category 3 or greater hurricane, involving a large-scale evacuation with thousands of private vehicles moving inland, is the contingency upon which re-entry plans are developed. Of course, with less powerful storms, the inundation areas will be smaller, the number of evacuees and persons seeking public shelter will be more manageable locally, and the damage may be less. In this case, the special provisions for mass relocation inland and regional traffic control may not be needed.

G. Re-entry Public Information

1. ESF-15 (Public Information) in the EOC will coordinate with ESF-5 (Planning) to provide information to assist residents and businesses in re-entering their homes or businesses inside impacted areas.

H. Security for Re-entry Traffic Control Points (TCP's) / Identification Verification Areas (IVA's)

1. ESF-13 (Law Enforcement) will coordinate effective staffing for TCP's and IVA's. ESF-13 will also consider those that may access restricted / impacted areas by not using roadways (i.e. water and air). Such access may require additional law enforcement personnel for patrolling of impacted areas.

VIII. Direction and Control

A. General

1. Direction and control of response and recovery operations for a technological or natural disaster affecting Colleton residents will be exercised by the Chairperson of County Council through the County Administrator and EMD. The Emergency Council is composed of the County Administrator, Fire-Rescue Chief, Sheriff, and the EOC Commander, but includes coordination and consultation with the Regional Emergency Manager / Coordinator, whenever possible. The decision-

making staff for the County will be located in the EOC unless an alternate location is approved by the EMD.

2. Emergency Management organization in support of the Emergency Council will be accomplished through the use of Emergency Support Functions (ESF).

B. Organization

1. The EOC will be organized according to the National Incident Management System (NIMS). Support elements such as the Incident Management Team (IMT) may be relocated to help establish command and control in those areas devastated by the event.
2. The Incident Command and Command Staff of the EOC are as follows:
 - a) County Administrator
 - b) Fire-Rescue Chief
 - c) Sheriff
 - d) EOC Commander (EOC IC)
 - e) Legal Officer (if available)
 - f) Public Information Officer (if available)
 - g) Liaison Officer (if applicable)
 - h) Regional Emergency Manager (REM) or Regional Emergency Coordinator (REC) - presence of REM/REC in the Command Staff helps to ensure synergy and effective communication between the EOC and the SEOC.
3. General Staff are:
 - a) Operations Section Chief
 - b) Logistics Section Chief
 - c) Planning Section Chief
 - d) Finance Section Chief
 - e) Recovery Section Chief (ordinarily under Planning Section but may be made separate section, if necessary, post event)
4. The Operations Section consists of the Communications Group (ESF-2), Public Works Group (ESF-3), Fire Services Group (ESF-4), Health and Medical Group (ESF-8), Search and Rescue Group (ESF-9), Hazardous Materials Group (ESF-10), Law Enforcement Group (ESF-13), Emergency Traffic Management Group (ESF-16), Animal Services Group (ESF-17), Air Ops Group, and designated support staff members.
5. The Logistics Section consists of the Facilities Support Group, Transportation Group (ESF-1), Mass Care and Food Services Groups (ESF-6/11), Military Support (ESF-19) and designated support staff.
6. The Planning Section consists of the Situation Unit, Documentation Unit, Technical Specialist Unit, Energy (ESF-12), Message Center, GIS/Mapping, Resource Unit, and designated support staff.
7. The Finance Section consists of the Procurement Unit, Cost Unit, Comp/Claims Unit, Time Unit and designated support staff.

8. The Recovery Section consists of Recovery & Mitigation (ESF-14), Donated Goods & Volunteer Services (ESF-18), Business and Industry (ESF-24).

C. Responsibilities

1. Emergency Council/EOC Command Section (Administration)
 - a) Establishes priorities and allocate resources to support disaster tasks and operations.
 - b) Approves the overall plan of action, including deployment of personnel and equipment to implement this plan.
 - c) Directs county support and recovery operations in the disaster area and provides emergency funding of county operations.
 - d) Coordinates requests for and utilization of state and federal support.
 - e) Provides liaison to active duty and reserve military organizations supporting the response and recovery effort.
2. Operations Section
 - a) Participates in the execution of the overall plan providing direction and control for the EOC, assigns tasks to the ESFs in the section, non-ESF designated functional areas, and coordinates activities throughout the operational areas impacted by the event.
 - b) Provides traditional public safety services such as police, fire, medical (including mass fatalities), and Public Works.
 - c) Recommends to the Command Staff the activation and deployment of the Incident Management Team to areas within the impact zone that have lost local command and control or reporting capabilities.
 - d) Coordinates with the other Sections Chiefs regarding emergency relocation to the alternate EOC.
3. Logistics Section
 - a) Provides all support needs to the incident with the exception of Air OPS and medical (which fall under the Operations Chief).
 - b) Orders all off-site resources as may be required in support of operations.
 - c) The Logistic Section and assigned units also provide facilities, transportation, supplies, equipment maintenance and fueling, and feeding and berthing arrangements.
 - d) Provides support to the IMT as tasked by the IC or Section Chiefs.
 - e) Assists emergency operations personnel with personal and family matters.
 - f) Provides communications support beyond that organic to the agency.
4. Planning Section
 - a) Responsible for the collection, evaluation, and dissemination of tactical information about the incident from an overall perspective.

- b) Section maintains information on the current as well as the forecasted situation, and the status of resources assigned to the incident.
 - c) Responsible for the preparation and documentation of Incident Action Plans (IAPs) with the assistance of all sections for each operational period.
 - d) Recommends personnel and logistical forecast requirements to the Command Staff.
 - e) Participates in all group planning meetings and briefings and shift change meetings.
 - f) Coordinates with other Section Chiefs and jurisdictions or units providing a similar function.
 - g) Assists with the relocation to the alternate EOC as required.
 - h) Collects and analyzes damage assessment information gathered from the air and on the ground.
 - i) ESF 24 will coordinate with businesses and industry to develop emergency mitigation, response, recovery and continuity plans to assist them in recovery following a disaster.
5. Finance Section
- a) Although not necessarily activated for smaller incidents, the Finance Section will be in place during major EOC operations.
 - b) The Finance Section Chief will determine, based on the requirements of the incident and the level of EOC activation, the need to establish specific supporting functional units.
 - c) Units typically assigned to the Finance Section are for cost documentation, procurement, coordination with businesses regarding licenses, registration of contractors, and information systems management, payroll sustainment and data processing.
 - d) The Finance Section Chief is also the Applicant Agent and will determine the extent of the damages resulting in a federal declaration.
 - e) The Documentation Unit will assist Section Chiefs, Group Supervisors and Unit Leaders with tracking costs for labor, equipment, and materials as well as other information required by the incident.
 - f) The County's Risk Manager will coordinate with the Finance Section Chief regarding compensation-for-injury and claims. The Risk Manager will keep the EOC Command Section apprised of his/her location if this function is not physically located in the EOC.
 - g) Participate in all group planning meetings and briefings and provide agenda input that is financial in nature.
 - h) Ensure that all obligation documents initiated at the EOC are properly prepared.
6. Recovery Section

- a) Serve as the primary point of contact (POC) for disaster recovery preparedness with the State and neighboring local governments.
 - b) Establish and maintain contacts and networks for disaster recovery resources and support systems.
 - c) Lead the creation and coordination that activates the local recovery dedicated organizations and initiatives.
 - d) Work with the State Disaster Recovery Coordinator to develop a unified and accessible communication strategy.
 - e) Participate in damage and impact assessments with other recovery partners.
7. Municipal Governments
- a) While municipalities may have personnel assigned to specific ESF's (e.g. Municipal Fire Department in ESF-4 or Municipal Police Department in ESF-13), municipal administrative personnel, planners, and managers will typically be grouped with ESF-5 (Planning Section Chief). Municipal concerns will be coordinated by the Planning Section Chief.

D. Operations

- 1. Preparedness Operations
 - a) The County EOC will be maintained in operational readiness by EMD with the support of the Facilities Management Department.
 - b) In the absence of real event activations, periodic exercises will be conducted to test the capability of the EOC, the validity of this plan, and to provide training to EOC staff.
 - c) This plan will be reviewed, updated, and certified annually by the SCEMD.
 - d) Under the provisions of this plan, heads of county departments and agencies are required to ensure preparedness for emergency operations of their assigned ESFs and Departmental Directives.
- 2. Response Operations
 - a) The EOC will be activated and staffed in accordance with the type of emergency and anticipated resource needs. The primary agency for each ESF has responsibility to ensure supporting agencies are informed and their actions coordinated.
 - b) The State Warning Point located within the SEOC will initiate actions appropriate to warn local governments and state agencies. The County Warning Point will disseminate and rebroadcast warning notices as received from state and local sources.
 - c) Direct supervision of resources employed in support of disaster operations is exercised by the agency providing the support.
 - d) The Lowcountry Type III Incident Management Team (IMT) may be assigned to a CP, or other local government facility such as a Satellite Centers or Operational Area Command Posts. Depending

on the situation, the State Forestry Type II Incident Management Team may be requested to assist.

- e) When ordered by the Governor, the EOC will coordinate the movement of people from areas threatened or stricken by an emergency.

3. Recovery Operations

- a) Request and coordinate state and federal assistance.
- b) Establish Disaster Recovery Centers (DRC) as needed.
- c) The Governor will appoint at the state level the State Coordinating Officer (SCO), the Governor's Authorized Representative (GAR), and the State Hazard Mitigation Officer (SHMO). Counterparts to these positions required at the county level will be suggested at the time of the incident as determined by the Applicant Agent and the EMD.
- d) Deploy Local Initial Damage Assessment (LIDA) Teams in coordination with ESF 14 as well as state PDA forces.
- e) Upon activation of a Disaster Field Office (DFO) the SEOC operations will be shifted to the DFO location. The County EOC operations will be continued until a demobilization plan is approved by the Command Section.

4. Mitigation Operations

- a) Following a Presidential Disaster Declaration, the SHMO will develop the mitigation strategy and implement the Hazard Mitigation Grant Program (HMGP). EMD or municipal administrations will coordinate with the SHMO regarding county level projects.

IX. Administration and Logistics

A. General

- 1. A large emergency or disaster will place great demands on the resources of local governments. Distribution of required resources might be made difficult by the circumstances of the emergency. Initial priority will be given to food, water, and medications. Resources will be identified and provided as soon as practical. Coordination with appropriate departments and agencies will be performed to ensure that operational readiness is maintained at all times. Administrative procedures will be conducted in accordance with existing rules, resolutions and ordinances.
- 2. Colleton County IT department will provide technical support to the EOC which will allow network access to the county's Palmetto EOC. This system will enhance information flow not only within the EOC but also to the various detached functions located throughout the EOC. Palmetto EOC also allows for proper resource management and aids in financial record keeping, reporting and tracking resource needs.

3. In the event an incident, emergency or disaster requires logistical support beyond ordinary means, Colleton County Parks and Recreation will be the lead agency for receipt and distribution.
- B. Funding and Accounting
 1. Expenditures of county monies for emergency operations will be in accordance with guidelines set forth by the Finance Department and Administrator. Accounting for expenditure of county funds will be conducted under applicable laws and ordinances and will be subject to audit. Proper documentation will be maintained and will serve as the basis for the federal declaration and subsequent reimbursement request.
 - C. Consumer Protection
 1. In addition to any local efforts to curb price gouging and problems with contractors, the SC Department of Consumer Affairs will monitor emergency activities to provide protection to consumers.
 - D. Environmental Protection
 1. All actions taken pursuant to the event to repair and restore, whether by a government agency, individual, or private entity will be done in accordance with South Carolina and federal laws and regulations regarding the environment. SCDES can provide additional information as required.
 - E. Nondiscrimination
 1. Discrimination against persons on the basis of age, color, economic status, nationality, race, religion, sex or handicap in the administration of emergency services or disaster relief is prohibited. Complaints of discrimination in emergency operations or disaster relief will be made to EMD for investigation and further action.
 - F. Duplication of Benefits
 1. Federal law prohibits any persons, business concerns, or other entities from receiving federal disaster assistance when compensation for the loss has been received from an insurance company or any other source.
 - G. Volunteers
 1. Where feasible and permitted by law, Colleton County will utilize its volunteer force in any manner necessary to assist with emergency planning, response or recovery.
- X. Continuity of Government
- Continuity of Government (COG) is an essential function of emergency management and is vital during an emergency or disaster situation. All levels of government (federal, state, and local) share a constitutional responsibility to preserve the life and property of their citizens. State and local Continuity of Government is defined as the preservation, maintenance, or reconstitution of the civil government's ability to carry out its constitutional responsibilities.
- A. Succession of Authority
 1. The line of succession for county government in making disaster/emergency decisions, if County Council is unable to convene, is

the County Council Chairperson or Vice Chairperson, the County Administrator, the Deputy County Administrator, the Fire-Rescue Chief and the Emergency Management Division Director.

B. Preservation of Records

1. In order to provide normal government operations following an emergency or disaster, essential records must be protected (i.e. vital statistics, deeds, corporation papers, operational plans, resources data, authorities, personnel and payroll rosters, succession lists, supplies and equipment lists, laws, charters and financial records) by each department or agency.

C. Emergency Actions

1. The Colleton County Emergency Operations Plan assigns primary and support agency responsibility to the various Emergency Support Functions (ESFs) and other support activities. Specific emergency delegations are contained in this plan.

D. Delegations of Emergency Authority

1. Colleton County Ordinance 18-O-10 establishes County authority and preparation for and response to emergency situations. Sections 25-1-420 and 25-1-450, SC Code of Laws, establish the state authority for state, county, and municipal government preparation for and response to emergency situations. Section 25-1-440, SC Code of Laws, grants additional powers and duties to the Governor during declared emergencies.

E. Protection of Government Resources

1. Essential functions are those that enable county agencies to provide vital services, exercise civil authority, maintain the safety and wellbeing of the general populace, and sustain the industrial/economic base in emergencies. The success of agency operations at an alternate facility is absolutely dependent upon the availability and redundancy of critical communications systems to support connectivity to internal organizations, other agencies, critical customers, and the public. When identifying communications requirements, agencies should take maximum advantage of the entire spectrum of communications media likely to be available in any emergency situation. These services may include, but are not limited to, secure and/or non-secure voice, fax, and data connectivity, internet access, and e-mail.

XI. Continuity of Operations Planning (COOP)

Colleton County has worked to have in place a comprehensive and effective program to ensure continuity of mission essential county emergency functions under all circumstances.

- A. General - To support this Colleton County Fire-Rescue Emergency Management Division has implemented the Continuity of Operations Program (COOP).

- B. Requirements - The identification of individual department/agency activities and sub-components are key to ensure that mission essential COOP functions are maintained. Agencies are required to:
 - 1. Establish COOP plans and procedures that delineate mission essential functions.
 - 2. Specify succession to office and the emergency delegation of authority.
 - 3. Provide for the safekeeping of vital records and databases.
 - 4. Identify alternate operating facilities.
 - 5. Provide for interoperable communications.
 - 6. Validate the capability to continue mission essential functions through tests, training, and exercises.
- C. Emergency Operations Center
 - 1. Primary Emergency Operations Center (EOC): The County Emergency Operations Center (EOC) is the facility from which local response to emergencies is coordinated, directed and controlled. It is the designated headquarters for the Administrator when he is directing local response to disasters. The EOC is staffed by representatives of county/local agencies and other personnel, as required. The coordination of a local response, as well as a state response, will come from the EOC, under the direction of the Administrator. The Emergency Operations Center, 108 Simmons Street, Walterboro, is the designated primary EOC. Fire-Rescue Headquarters, 113 Mable T. Willis Blvd., Walterboro, is the designated alternate EOC.
 - 2. The Palmetto 800 radio network allows for interoperable communications between agencies, jurisdictions and counties.
- D. County Agencies - Additionally, all county agencies, regardless of location, are encouraged to have in place a viable COOP capability to ensure continued performance of all mission essential functions from alternate operating sites during any emergency or situation that may disrupt normal operations
- E. Security for EOC
 - 1. EOC Command will set the type of security used at the EOC. Although multiple layers of security exist at the EOC, they may not all be implemented simultaneously. EOC security may include the following:
 - a) Limited Security – Doors unlocked and access available to the general public
 - b) Enhanced Security – Doors are locked and can only be opened by authorized personnel with a proper security code or key card/fob/device. The general public is not permitted to enter the EOC without an escort by an ESF representative.
 - c) Full Security / Lockout – Doors are locked and can only be opened by EOC personnel inside after verification of identification. Only authorized ESF representatives are allowed inside the EOC. The general public is not permitted to enter the EOC.

XII. Plan Development and Maintenance
 A. General

1. This plan is the principal source of documentation concerning the county's emergency management planning activities. Designated departments and agencies of county government have the responsibility for developing and maintaining a portion of this plan. Additionally, and to an even greater extent, these same agencies are responsible for developing the enabling Departmental Directives/SOP's/SOG's that are maintained elsewhere. This ensures the success of their individual agencies during times of crisis.
- B. Responsibility
1. The EMD will coordinate the efforts of all responsible departments and agencies for plan development and timely update/revision. Primary ESF agencies will coordinate their Departmental Directives with all supporting agencies within their ESFs. At a minimum, this plan will ideally be updated annually or as required by actual events.
- XIII. Authorities and References
- A. County
1. Colleton County Ordinance 18-O-10
 2. Colleton County Hazard/Risk/Vulnerability Analysis
- B. State
1. Regulation 58-1, Local Emergency Management Standards, SC Code of Regulations
 2. Regulation 58-101, State Emergency Management Standards, SC Code of Regulations
 3. Governor's Executive Order No. 2003-12 and 2003-21

Figure 2 Organizational Chart

ESF-1 - Transportation

Primary: Colleton County School District

Support: Colleton County Fire-Rescue, Colleton County Sheriff's Office, South Carolina School Bus Shop, Colleton County Fleet Management, Lowcountry Community Action Agency, Palmetto Breeze, United States Marine Corps Recruit Depot – Parris Island

| Reports To | Receives Reports From |
|-------------------------------------|---|
| ESF-7 (EOC Logistics Section Chief) | Colleton County Fire-Rescue, Colleton County Sheriff's Office, South Carolina School Bus Shop, Colleton County Fleet Management, Lowcountry Community Action Agency, Palmetto Breeze, Colleton County Facilities Management, United States Marine Corps Recruit Depot – Parris Island |

I. INTRODUCTION:

A. A disaster or any emergency may severely damage the local transportation infrastructure. Most state/local transportation activities will be hampered by damaged roads, bridges, and disrupted communications. Responses that require mass transportation assets will be coordinated by ESF-1 during the immediate pre- and post-disaster period. The County's emergency responsibility will primarily include the prioritization and allocation of local transportation assets including processing of all transportation requests from local agencies and local governments. Further, ESF-1 will request to acquire, and if approved, will coordinate use of air, rail, and water transportation assets and provide transportation damage assessment information.

II. MISSION

A. To provide for the coordination and use of all county, public, private and volunteer transportation resources within Colleton County during a disaster situation.

III. CONCEPT OF OPERATIONS

A. Colleton County School District (CCSD) has been designated as responsible for the coordination of all ESF-1 administrative, management, planning, training, preparedness, mitigation, response, and recovery activities to include developing, coordinating and maintaining ESF-1. This individual (these individuals) is responsible for coordinating transportation assistance to all county, public, private and volunteer transportation organizations within the County as requested or required by the disaster event. All ESF-1 supporting agencies will assist CCSD in the planning and execution of the above.

- B. Transportation operations will be controlled from the County EOC, and/or mobile Command Post using Palmetto EOC where applicable.
- C. CCSD will, in coordination with the County's EOC, be responsible for the development and maintenance for plans related to the ESF but not included in this plan.
- D. ESF-1 Supervisor will coordinate all unmet transportation requirements during a disaster period. Coordination with all supporting and other appropriate departments/agencies and organizations will be performed to ensure continual operational readiness.
- E. CCSD is responsible for the execution of all emergency transportation services necessary to support the emergency operations of county agencies. Requests for use of additional transportation resources will be made through the County EOC. State and Federal support will be committed, as available, on a mission type basis upon request to the State.
- F. Requests from county, public, private, and volunteer transportation organizations for assistance may be made, through the County's EOC, by the ESF-1 Supervisor during a disaster period. These include county departments with air, water, and ground transportation resources.
- G. ESF-1, in coordination with the state and federal governments and the transportation industry, will attempt to provide necessary equipment in response to emergency requirements. All intrastate transportation available for emergency management purposes will be subject to the control of the Department of Transportation with the following exceptions:
 - 1. Transportation required for military and other federal personnel or supplies.
 - 2. Federally controlled or operated vessels, trains, vehicles or aircraft, bridges, and the intracoastal waterway unless specifically made available.
 - 3. Commercial or scheduled air carriers (interstate carriers).
 - 4. Non-state ocean-going vessels.
- H. The process of furnishing transportation services during a disaster situation involves two series of actions.
 - 1. First, essential immediate transportation needs are identified and actions are taken to provide for these needs.
 - 2. Second, as soon as possible, future continuing needs for transportation service and expected future transportation capabilities are estimated.
 - 3. Decisions are then made and actions taken to direct these expected future capabilities to meet the needs considered most essential.
- I. All ESF-1 personnel will be trained on the principles of the National Incident Management System (NIMS) and integrate those principles into all ESF-1 planning and response operations.

IV. ESF ACTIONS

A. Preparedness

- 1. Maintain current inventories of county transportation facilities, supplies, fuel, and equipment by mode.

2. Maintain current resource directories of all commercial and industrial transportation assets, locations, and driver statuses.
3. Establish and maintain liaison with the state and federal transportation officials.
4. Estimate logistical requirements (e.g., personnel, supplies and equipment, facilities, and communications) during the planning process and through exercises. Develop appropriate transportation packages to support likely scenarios.
5. Identify and train CCSD and other supporting agency personnel, as required, to staff the Emergency Support Function in the EOC for determining requirements and for developing plans for an immediate county response.
6. Participate in County and State exercises.
7. Ensure all ESF-1 personnel integrate NIMS principles in all planning. As a minimum, primary action officers for all ESF-1 agencies will complete FEMA's NIMS Awareness Course, or an equivalent course.

B. Mitigation

1. Support and plan for mitigation measures specific to ESF-1.
2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

1. Identify transportation needs required to respond to the emergency.
2. Coordinate with ESF-19 (Military Support) for use of state military transportation assets.
3. Identify available transportation resources and coordinate assignments, as necessary.
4. Report the locations of damage to transportation infrastructure, degree of damage, and other available information to ESF-5 (Planning) as information becomes available.
5. Establish communications with the State Emergency Transportation Coordinator to coordinate transportation required beyond the county's capability.
6. Assist local governments in determining the most viable, available transportation networks to, from, and within the disaster area, and regulate the use of such networks as appropriate.
7. Coordinate emergency information for public release through the EOC ESF-15.

8. Colleton County Facilities Management Department will be responsible for assisting, when necessary, with the installation, maintenance and operations of emergency generators at critical facilities such as the County EOC, alternate County EOC and Medical Needs shelters. Coordination for refueling of these generators will be through ESF-1 in coordination with ESF-3.
9. Coordinate, when available, for transportation support of mobilization sites, staging areas, and distribution points.
10. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.

D. Recovery

1. Continue to render transportation support when and where required as long as emergency conditions exist.
2. Coordinate the re-supply of fixed and transportable fuel supplies to those supporting emergency response to include portable and fixed generators at the County EOC and Medical Needs Shelters.
3. Evaluate and task the transportation support requests for impacted areas.
4. Ensure that ESF-1 team members or their agencies maintain appropriate records of costs incurred during the event.

V. RESPONSIBILITIES

A. General: All ESF-1 primary and support agencies must maintain inventories and procedures to obtain the following transportation assets:

1. Buses of various types and sizes, with drivers, including non-emergency patient transportation carriers, to be used for evacuations and other transportation missions.
2. Passenger and utility vans of various types and sizes, with and without drivers, including non-emergency patient transportation carriers, to be used for evacuation and other transportation missions.
3. Trucks and/or trailers of various types, sizes, and combinations with drivers/operators to be used for various transportation missions.
4. Boats of various types and sizes, powered and non-powered, for various transportation missions.
5. Cars of various sizes to be used for various transportation missions.
6. Vehicle repair facilities, equipment and personnel to be used for repairs to various types of emergency vehicles.
7. Motor pool and vehicle service facilities and personnel to be used for refueling and servicing various types of emergency vehicles.
8. Material handling equipment, including forklifts.

B. ESF-1 Supervisor:

1. In coordination with the supporting agencies and EMD, develops procedures, organizes personnel and maintains a readiness posture.
2. Maintains liaison with EMD and with all organizations within the Transportation Service.

3. Review, develop and prepare procedures for acquisition of additional transportation assets.
 4. Develops and maintains a transportation resources list by type and availability.
 5. In coordination with the EMD, obtains evacuation routes to be used during disaster operations.
 6. Participates in test exercises of this ESF when requested by EMD or required for planning updates.
 7. ESF-1 Supervisor maintains liaison with local government units, public, private and volunteer organizations.
- C. Colleton County Fire-Rescue
1. Will provide transportation resources when necessary.
- D. Colleton County Sheriff's Office
1. Will provide transportation resources when necessary.
- E. South Carolina School Bus Shop
1. Maintains buses utilized by CCSD.
 2. Coordinates the use of buses (state assets) to assist with evacuations in other counties when necessary
- F. Colleton County Fleet Management
1. Assists with maintenance of transportation assets when necessary
- G. Lowcountry Community Action Agency (LCAA)
1. Assists with transportation missions as necessary
 2. Coordinates with EOC to ensure no duplication of efforts
 3. Prefers to execute transportation missions in groups of citizens as opposed to transporting one individual from one area at a time
- H. Palmetto Breeze
1. Can provide transportation assets when available
 2. Serves as ESF-1 Lead Agency in Beaufort County
- I. United States Marine Corps Recruit Depot – Parris Island
1. Utilizes school buses normally at the disposal of CCSD to evacuate Marine Corps recruits from Parris Island
 2. Notifies SEOC and Beaufort EOC of decision to evacuate Marine Corps recruits
 - a) This decision requires the use of school buses normally utilized by CCSD and effectively limits the CCSD ability to keep schools open. As a result, ESF-6 can consider opening shelters in school facilities that can otherwise not be used by CCSD due to the lack of school bus assets.

VI. LOCAL, STATE, AND FEDERAL INTERFACE County ESF-1 will coordinate with State/Federal ESF-1 to obtain assistance as required. Care will be taken in coordinating state and local governmental entities to avoid tasking competing service demands on the civil sector. Records for labor, materials, and equipment will be maintained for federal reimbursement. After-action reports, SITREPs, and other reports will be provided as required.

ESF-2 - Communications

Primary: Colleton County Sheriff's Office - Communications/PSAP/911 Division - Warning Point

Support: Colleton County Fire-Rescue, Colleton County Information/Technology Department, Colleton ARES, Palmetto Rural Telephone Cooperative, Comcast, Frontier, Verizon Wireless, AT&T, T-Mobile

| Reports To | Receives Reports From |
|--------------------------|--|
| Operations Section Chief | Colleton County Fire-Rescue, Colleton ARES, Colleton County Information/Technology Department, Palmetto Rural Telephone Cooperative, Comcast, Frontier, Verizon Wireless, AT&T, T-Mobile |

I. Introduction:

- A. Communications includes information and reports, surveillance of threatening conditions, and 24-hour radio, telephone, internet, and teletype capability. County assistance under this function consists of the utilization of equipment and personnel essential to coordinate and disseminate information before, during and after an impending or actual disaster situation. In the event normal emergency management communications channels become overburdened or destroyed, other county and state agency channels shall be utilized as necessary to augment county communications; assist local law enforcement, firefighting, search and rescue; lifesaving, etc.; and disseminate instructions and operational guidance relating to disaster relief.
- B. The Colleton County Sheriff's Office Communications Division operates the county's sole public safety answering point (PSAP) and dispatches all county and municipal fire and law enforcement services from the PSAP. At the direction of the Sheriff, it is authorized to conduct warnings of the public through all available means (social media, Code RED, door-to-door). When a public warning occurs, the PSAP will notify EMD, which can access other means of warning (State Warning Point, EAS). Where schools, hospitals, institutions, and places of public assembly are to be warned, direct contact may be made to ensure receipt of the warning. The PSAP maintains procedures for warning hearing impaired and non-English speaking citizens. Colleton County Fire-Rescue shares its pre-incident survey database enabling the PSAP to contact industries storing HazMat by which the PSAP can determine contacts for the industry and affected areas in close proximity in the event of a hazmat release.

II. Mission

- A. To provide a means of defining, specifying, and performing the functions of communication through coordination with appropriate local, state, and federal

agencies and organizations to minimize loss of life and property in the event of an emergency or disaster.

III. Concept of Operations

- A. Communication activities will be coordinated from the EOC, CP, or other designated facility or mobile unit at the time of the incident.
- B. The ESF-2 Supervisor has overall responsibility for the coordination of communication activities during a disaster situation including establishment and maintenance of the Colleton County emergency radio network(s) as well as communications with municipalities, adjacent counties, and the state.
- C. The communications coordinators from the various municipalities will develop and maintain all communication activities in their respective jurisdictions. Due to security reasons, frequency lists are not included in this plan but maintained by the Communication Group Supervisor and Communication Coordinators from the various municipalities. The Palmetto 800 system permits interoperability between State, County, and municipal emergency services.
 - 1. All County and Municipal Emergency Services are dispatched by the County Warning Point via the Palmetto 800 system.
- D. The primary means of communications between the EOC and municipalities will be by telephone line, fax, email and radio. Telephone/fax and radio communications (Palmetto 800 system) are available between the EOC and all local and supporting agencies with emergency assignments during a disaster including shelters when opened (through the Law Enforcement and/or Fire-Rescue personnel present). Communications between the County EOC and State EOC will be via email or Palmetto EOC. Secondary communication for this link will be via the SC EMD 800 MHz, Satellite Phone/Radio, LGR Net, RACES/ARES networks, NAWAS, and/or MARS.
- E. Telecommunicators from each agency of local government will operate their own radio systems. When it becomes necessary for the EOC to communicate on Colleton County government radio networks and the agency does not have an operator available, the ESF-2 Supervisor will provide a trained operator. Backup communications support may be supported by the Colleton Amateur Radio Emergency Service / Amateur Radio Club and other support agencies.
- F. Shelters will use telephones for primary communications and 800 MHz radio system for secondary communications. HAM radios (licensed VHF frequencies) will be used as tertiary communications, if available. DSS will maintain a cellular phone link between shelters and net control at DSS Headquarters.
- G. ESF-2 will record all messages sent from or received at the County EOC. All messages from the EOC communications service will be routed through the duty communications supervisor.
- H. All verbal messages received will be recorded on message forms by the individuals receiving such messages.
- I. Should 9-1-1 service be interrupted, the CCSO Communications Division maintains procedures to have service rerouted to an alternative facility.

- J. All ESF-2 personnel will be trained on the principles of the National Incident Management System (NIMS) and integrate those principles into all ESF-2 planning and response operations.
- IV. ESF ACTIONS Operations necessary for the performance of this function include, but are not limited to:
- A. Preparedness
 - 1. Develop procedures to implement this ESF including alerting of communications staff.
 - 2. Ensure day-to-day and disaster response interoperability of communication among county and mutual aid emergency services responders within the county.
 - 3. Identify public and private communications facilities, equipment, and personnel located throughout South Carolina including emergency communications vehicles or mobile command posts.
 - 4. Identify actual and planned actions of commercial and private telecommunications companies to restore services.
 - 5. Coordinate the acquisition and deployment of communications equipment, personnel, and resources to establish temporary communications capabilities.
 - 6. Develop and coordinate frequency management plans, including military, talk groups, and trunked radio for use in disaster areas.
 - 7. Assist as required in developing and conducting communications training.
 - 8. The emergency communications staff will participate in local exercises as available.
 - 9. Review requirements for additional equipment, supplies and resources and take responsive action as needed.
 - 10. Develop emergency measures to protect radio equipment from the elements of natural or man-made disasters.
 - 11. This ESF will be updated and maintained according to federal guidelines.
 - B. Mitigation
 - 1. Support and plan for mitigation measures specific to ESF-2.
 - 2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
 - 3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
 - 4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
 - 5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.
 - C. Response
 - 1. When alerted by appropriate authority, the ESF-2 Supervisor will notify the emergency communications staff.

2. Conduct communications needs assessment (to include determining status of all communications systems), prioritize requirements, and make recommendations to deploy equipment and personnel to affected area, as required.
3. Identify actual actions of commercial telecommunications companies to restore services.
4. Assist the Warning Point in alerting other emergency staff as necessary.
5. Activate all emergency communications systems.
6. Establish communications between EOC officials, shelters that are opened, and municipalities using radio nets and net controllers.
7. Notify State EMD of EOC communications activation and operational readiness status through the Regional Emergency Manager or the State Warning Point.
8. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.

D. Recovery

1. Emergency communication systems will function until normal communications have been restored. Communications may be expanded through utilization of commercial systems. Maintain records for labor, materials, and equipment utilized for federal reimbursement along with providing after-action reports, SITREPs, and other reports as required.
2. Arrange for alternative communication systems to replace systems that are inoperative due to damage from disasters.
3. Assess the need for and obtain telecommunications industry support as needed.
4. Ensure ESF-2 team members or their agencies maintain appropriate records of costs incurred during the event.

V. Responsibilities

A. Colleton County Sheriff's Office - Communications/PSAP/911 Division - Warning Point

1. Identify, train, and assign staff and other personnel to support ESF-2 in the EOC and to deploy and operate communications.
2. Notify all ESF-2 supporting agencies upon activation.
3. Develop and maintain countywide communications plan.
4. Develop current resource lists for all local telecommunications and commercial assets to include availability and points-of-contact for procurement.
5. Provide technician support to maintain countywide 24-hour communication support capability. Develop list of technicians by state agency.
6. Obtain technical support from private sector, as required.
7. Ensure EOC communications systems are operational.
8. Coordinate maintenance of voice, video, data, microwave, and two-way radio systems.

9. Develop and maintain a frequency management plan, to include military assets, talk groups, and trunked radio systems for use in disaster area.
 10. Coordinate contingency radios, cellular phones, satellite phones, computer terminals, video teleconference, internet access, and pagers.
 11. In coordination with SCEMD, develop lists of emergency communications vehicles and mobile command vehicles available throughout the state; and procedures to request and deploy those assets.
- B. Colleton County Fire-Rescue
 1. Maintains a cache of portable radios and an MCC-7100 for use on the Palmetto 800 (PAL800) network.
 2. Maintains several radio programmers that can program 800 MHz radios – although this normally is limited to Colleton County Fire-Rescue radios.
 - C. Colleton Amateur Radio Emergency Services (ARES)
 1. Provides ARES operators to monitor and utilize ARES radios in the EOC.
 - D. Colleton County Information/Technology Department
 1. Ensures that phone and computer systems in the EOC are in working order and maintained.
 - E. Palmetto Rural Telephone Cooperative
 1. Maintains internet and television service to Colleton residents
 - F. Comcast
 1. Maintains internet and television service to Colleton residents
 - G. Frontier
 1. Maintains telephone service to Colleton residents (mainly around the town of Walterboro)
 - H. Verizon Wireless
 1. Maintains wireless voice, text, and data service to mobile phones in Colleton County
 - I. AT&T
 1. Maintains wireless voice, text, and data service to a portion of Colleton County and wired voice and data to Edisto Island
 - J. T-Mobile
 1. Maintains wireless voice, text, and data service to mobile phones in Colleton County
- VI. LOCAL STATE FEDERAL INTERFACE
- A. The local ESF-2 will coordinate with State ESF-2 who will coordinate with the Federal ESF-2 to obtain federal assistance as required. Agencies should develop their internal departmental plans in coordination with these guidelines. ESF-2 Supervisor should be kept apprised of any anticipated communications needs, or major changes in personnel or agency status.

ESF-3 - Public Works and Engineering

Primary: Colleton County Public Works and Engineer

Support: SC Department of Transportation (SCDOT), Walterboro Public Works, Edisto Beach Public Works, SCDES, Colleton County Solid Waste

| Reports To | Receives Reports From |
|------------------------------|--|
| EOC Operations Section Chief | SC Department of Transportation (SCDOT), Walterboro Public Works, Edisto Beach Public Works, SCDES, Colleton County Solid Waste |

I. INTRODUCTION

- A. Public Works, for purposes of this ESF, refers to infrastructure and water/sewer services, including an emergency supply of potable water, temporary restoration of water supply systems, and providing water for firefighting. Engineering activities include emergency ice, snow and debris removal; technical expertise regarding the structural safety of damaged bridges and highways. It should be noted that pipelines are generally considered part of ESF-1 (Transportation) while power and fuel are generally considered part of ESF-12 (Energy).

II. MISSION

- A. To establish policy, procedures, and priorities for the control and restoration of transportation infrastructure, water resources, and sewer facilities and to provide for coordinating immediate and continued engineering resources, construction management, emergency contracting, and expertise following a disaster.
- B. To provide an accurate assessment of damages, losses, and expenditures resulting from an emergency or disaster in order to determine the need for state and/or federal assistance and to conduct safety evaluations to protect the public health and welfare.

III. CONCEPT OF OPERATIONS

- A. The Colleton County Public Works Director and/or the Colleton County Engineer are responsible for the coordination of all ESF-3 administrative, management, planning, training, preparedness, mitigation, response, and recovery activities to include developing, coordinating, and maintaining the ESF-3 plan. All ESF-3 supporting agencies will assist the Public Works Department in the planning and execution of the above.
- B. ESF-3 has the overall responsibility for EOC mission assignments and coordination with the available engineering and construction resources in the county. These mission assignments include tasking ESF-3 resources for urban search and rescue incidents.
- C. Coordination with all supporting and other appropriate departments/agencies and organizations will be performed to ensure continual operational readiness. Each

Support Agency's directors of Public Works or Engineering groups are primarily responsible for engineering operations within the limits of their jurisdiction.

- D. The combined agencies engineering resources should be considered by the Public Works Service Group Supervisor. They could become an integral part of the Public Works Service resources available for employment in the public interest; with due regard to respective agency needs. All forces will remain under their normal chain of command.
 - E. State forces used in support of this ESF will be committed on a mission type basis through the EOC.
 - F. County Public Works Department resources, when available, will support the South Carolina DOT operations, and the other contact/support agencies on a mission type basis through the EOC.
 - G. Public Works and Engineering Services
 - 1. The Department of Environmental Services (SCDES) will provide overall guidance concerning water supply matters and will provide guidance for sewage treatment and disposal.
 - 2. The Department of Transportation will provide overall guidance concerning structural safety of SC DOT damaged bridges and roads and will provide guidance for the restoration of the transportation infrastructure.
 - 3. ESF-3 will coordinate with SCEMD and other ESF-3 support agencies to assist in providing the restoration of water and sewer services, debris management, water (potable and non-potable), and engineering activities as required.
 - 4. ESF-3 will cooperate and coordinate with other ESFs to ensure that County and Municipal assets are deployed effectively and in response to appropriate priorities for the protection of the health, safety, and welfare of county citizens.
 - 5. All ESF-3 personnel will be trained on the principles of the National Incident Management System (NIMS) and integrate those principles into all ESF-3 planning and response operations.
- IV. ESF ACTIONS - The emergency operations necessary for the performance of the Public Works and Engineering Services function include but are not limited to:
- A. Preparedness
 - 1. Participate in state exercises and conduct, at least annually, an ESF-3 exercise to validate this EOP and supporting SOPs.
 - 2. Ensure all ESF-3 personnel integrate NIMS principles in all planning. As a minimum, primary action officers for all ESF-3 agencies will complete FEMA's NIMS Awareness Course, or an equivalent course.
 - 3. Coordinate those procedures jointly affecting city/county disaster operations with each municipality PWD Director or ESF-3 representative. Develop and maintain procedures to implement this plan.

4. Through coordination with the Colleton County Fire-Rescue EMD, maintain resource lists, engineering/public works assignments, and alert lists.
5. Establish operational needs for restoration of public works service during the emergency.
6. Maintain formal agreements and/or working relationships with city, state and federal agencies having mutual engineering/public works emergency responsibilities as necessary.
7. Plan engineering, contracting, and procurement assistance for emergency debris, snow or ice clearance, demolition, public works repair, and water supply, and sewer missions.
8. Coordinate with municipal, county and state agencies in the development and maintenance of a priority restoration list of all essential facilities and utilities.
9. Train sufficient staff in the use of Palmetto EOC.
10. Plan for the provision of water (potable and non-potable) into the disaster area if local supplies become inadequate.
11. In coordination with the local emergency management officials, develop policy for conservation, distribution and use of potable and firefighting water.
12. Identify and locate chemicals to maintain potability of water supply.
13. Include in their individual plans an alerting list, to include points-of-contact and telephone numbers, of agencies, counties, municipalities and organizations supporting public works and engineering functions.
14. Maintain a current inventory of equipment and supplies, to include points-of-contact and telephone numbers, required to sustain emergency operations, including emergency power generators.
15. Develop and maintain listings of commercial and industrial suppliers of services and products, to include points-of-contact and telephone numbers, associated with public works and engineering functions.

B. Mitigation

1. Support and plan for mitigation measures specific to ESF-3.
2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

1. Evaluate available information concerning the nature and extent of the disaster situation and establish a program based on priority lists for the restoration of essential facilities and utilities.
2. Establish priorities to clear roads and dispose of debris. (Debris sites maintained by Public Works).
3. Procure equipment, specialized labor, and transportation to repair or restore public works systems.
4. Coordinate with ESF-19 (Military Support) for use of state military assets.
5. Coordinate with ESF-17 (Animal Services) for advice and assistance regarding disposal of debris containing or consisting of animal carcasses that may pose a risk to public health.
6. Coordinate with ESF-10 (Hazmat) for advice and assistance regarding disposal of hazardous materials.
7. Coordinate with ESF-9 (Search and Rescue) for advice and assistance regarding support to Search and Rescue Operations.
8. Coordinate with ESF-4 (Fire) for advice and assistance regarding firefighting water supply.
9. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.
10. Establish priorities to repair damaged water/sewer systems and coordinate the provision of temporary, alternate or interim sources of emergency power and water/sewer services.
11. Evaluate available information concerning the nature and extent of the disaster situation and establish a program based on priority lists, for the restoration of essential facilities and utilities.

D. Recovery

1. Anticipate and plan for arrival of and coordination with FEMA ESF- 3 personnel in the County EOC.
2. Maintain coordination with all supporting agencies and organizations on operational priorities for emergency repair and restoration of critical infrastructure. Coordinate, as needed, for debris management operations on public and private property (where authorized).
3. Continue to monitor restoration operations when and where needed as long as necessary and until all services have been restored.
4. Continue to direct Public Works Department and Solid Waste Department operations.
5. Through coordination with Colleton County EOC, develop long term recovery operations and establish priority of tasks to be accomplished.
6. Develop a DEMOB plan for appropriate levels of operations.
7. Provide after action reports, SITREPs, and other documentation as required and evaluate changes to improve operational SOPs.
8. Participate in CISD and other debriefings.
9. Attend critiques as may be held and submit updates for implementation into plans as may be applicable. Ensure that ESF-3 team members, their

agencies, or other tasked organizations, maintain appropriate records of time and costs incurred during the event.

V. RESPONSIBILITIES

- A. General: All ESF-3 primary and support agencies must maintain inventories and procedures to deploy their agency's public works and engineering assets.
- B. Colleton County Public Works Department
 - 1. The coordination of all ESF-3 administrative, management, planning, training, preparedness/mitigation, response and recovery activities.
 - 2. Identify, train, and assign personnel to staff ESF-3 in the EOC.
 - 3. Notify all ESF-3 supporting agencies upon activation.
 - 4. Develop and maintain the public works resource list.
 - 5. Provide all available public works and engineering assets.
- C. Colleton County Solid Waste
 - 1. Identify, train, and assign personnel to staff ESF-3 during periods of activation.
 - 2. Provide all available Solid Waste assets.
 - 3. Facilitate temporary burn sites and disposal locations in coordination with SCDES and/or other agencies as required.
- D. Colleton County Engineer
 - 1. Identify, train, and assign personnel to staff ESF-3 during periods of activation as needed.
 - 2. Coordinate with Public Works and Solid Waste to support debris removal and disposal efforts.
 - 3. Coordinate with Damage Assessment Teams to support preliminary damage assessments and documentation of damaged areas.
 - 4. Coordinate with Structural Engineer to evaluate structural safety of public buildings.
- E. Public Water and Sewer facilities
 - 1. Identify, train, and assign personnel to staff ESF-3 during periods of activation.
 - 2. Identify and locate chemicals to maintain potability of water supply.
 - 3. Include in their individual plans an alerting list, to include points-of-contact and telephone numbers, of agencies, counties, municipalities and organizations supporting public works and engineering functions.
 - 4. Maintain a current inventory of equipment and supplies, to include points-of-contact and telephone numbers, required to sustain emergency operations, including emergency power generators.
 - 5. Develop and maintain listings of commercial and industrial suppliers of services and products, to include points-of-contact and telephone numbers, associated with public works and engineering functions.
 - 6. Provide all available public works and engineering assets.
 - 7. Provide personnel for water testing.
- F. SC Department of Transportation (DOT),

1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-3 during periods of activation.
2. Include in their individual plans an alerting list, to include points-of-contact and telephone numbers, of agencies, counties, municipalities and organizations supporting public works and engineering functions.
3. Maintain a current inventory of equipment and supplies, to include points-of-contact and telephone numbers, required to sustain emergency operations, including emergency power generators.
4. Develop and maintain listings of commercial and industrial suppliers of services and products, to include points-of-contact and telephone numbers, associated with public works and engineering functions.
5. Provide all available public works and engineering assets.

G. SCDES

1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-3 during periods of activation.
2. Approve debris sites as necessary.
3. Provide emergency survey, surveillance, sampling, testing, and monitoring of water and sewage pumping, treatment, distribution, and collection systems to ensure public health and safety integrity of such systems.
4. Provide technical assistance concerning the disposal of waste materials, including household hazardous waste and debris containing or consisting of animal carcasses that may pose a risk to public health.

VI. LOCAL, STATE, AND FEDERAL INTERFACE

- A. ESF-3 (Public Works and Engineering) supports Colleton County following a disaster. The SC Budget and Control Board, Office of General Services is the lead state agency and the United States Army Corps of Engineers (USACOE) is the lead federal agency to coordinate support regarding public works issues/needs and a full range of emergency engineering services.
- B. Local ESF-3 will coordinate with State ESF-3 that will coordinate with Federal ESF-3 to obtain federal assistance as required.
- C. Where practical, ESF-12 (Utilities) will assist ESF-3 with the interface of appropriate utility company representatives assigned to recovery operations.
- D. During extended operations, ESF-3 (normally assigned to the Operations Section Chief) and ESF-12 (normally assigned to the Planning Section Chief) may be assigned to the Recovery Section Chief.

ESF-4 – Fire

Primary: Colleton County Fire-Rescue

Support: Walterboro Fire Department, Edisto Beach Fire Department, SC State Fire, South Carolina Forestry Commission, United States Forestry Service, United States Coast Guard

| Reports To | Receives Reports From |
|-------------|--|
| EOC Command | Walterboro Fire Department, Edisto Beach Fire Department, SC State Fire, SC Forestry Commission, United States Forestry Service, United States Coast Guard |

I. INTRODUCTION

- A. While Colleton County and its municipalities have the capability and adequate resources to meet routine fire service needs, during a disaster, problems are multiplied and more complex. Additionally, the responsibility of maintaining hazardous materials monitoring and decontamination capability falls within the functional area of the Fire Service. A disaster will tax the capability and resources of the County Fire Service.
- B. The potential for damage from fires in urban areas during and after a major disaster is extremely high. Numerous fires have the potential to spread rapidly causing extensive damage and threatening life and property. Normally available firefighting resources may be difficult to obtain and utilize because of massive disruptions of communications, transportation, utility and water systems.

II. MISSION - To provide for coordination of fire resources to assist Fireground Incident Commanders with additional resources, including personnel and equipment, in Colleton County during a disaster or serious emergency situation.

III. CONCEPT OF OPERATIONS

- A. The Colleton County Fire-Rescue Chief is designated as the ESF-4 Supervisor. The Fire-Rescue Chief is responsible for coordinating the firefighting activities of all forces when they are requested to support the concept of operations under this ESF.
- B. Coordination with all supporting and other appropriate departments/agencies and organizations who may support ESF-4 will be performed to ensure operational readiness prior to, during or after an incident, emergency, or disaster.
- C. The SC Forestry Commission will support ESF-4 and have primary responsibility for coordinating all wildland fire suppression. The Forestry Commission will function under its own statutory and internal guidelines. Wildland fire protection in unincorporated areas is the responsibility of the Forestry Commission, but it may be supplemented by other resources, to include ESF-4 agencies, when requested.

- D. Municipal governments and fire districts are responsible for providing fire prevention and suppression services within their incorporated areas. ESF-4 will provide assistance when requested.
 - E. County, city, towns and other fire protection organizations are responsible for requesting support through the Colleton County EOC via the Colleton County Fire-Rescue Chief when a fire hazard, fire incident, or disaster exceeds local capabilities. Additional assistance may be state agencies, private companies, and cooperating industries. Based on known or projected threats, imminent hazards or predicted disasters that may require additional resources, ESF-4 may mobilize resources and stage them at designated locations in a condition to respond if assistance is requested.
 - F. The Colleton County Fire-Rescue Chief has overall responsibility for the coordination of fire resources, including strike teams and task force operations, during emergencies.
 - G. ESF-4 will assist in establishing staging areas and coordination of assigned resources to an incident or a staging area.
 - H. State forces used in support of this ESF will be committed on a mission type basis when requested and in accordance with the South Carolina Emergency Operations Plan. The Firefighter Mobilization Act of 2000 mobilizes fire and rescue services statewide to respond to any type of emergency that requires additional resources. Once local mutual aid resources are exhausted, ESF-4 will use the mobilization plan to obtain additional fire resources, as needed.
 - I. Ensure all ESF-4 personnel integrate NIMS principles in all planning. As a minimum, primary action officers for all ESF-4 agencies will complete FEMA's NIMS Awareness Course, or an equivalent course.
- IV. ESF ACTIONS - The following actions are common to all fire departments during the three phases listed below:
- A. Preparedness
 1. Develop plans to implement this ESF.
 2. Identify, train, and assign personnel to radiological monitoring and HAZMAT decontamination teams (ESF-10), as requested.
 3. Maintain agreements and working relationships with supporting agencies/departments.
 4. Upon notification that a disaster is imminent or that a threat of a disaster exists, establish communications with the EOC or incident CP as applicable.
 5. Keep all Fire Service personnel on alert and informed of hazardous situations.
 6. Monitor weather and hazardous conditions that contribute to increased fire danger.
 7. Based on hazardous conditions, conduct fire prevention and education activities for the public.
 8. Maintain current inventories of fire service facilities, equipment, and personnel throughout the county.

B. Mitigation

1. Support and plan for mitigation measures specific to ESF-4.
2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

1. Colleton County EOC/ESF-4 will support local fire departments and the Forestry Commission with appropriate resources to include mobilizing and deploying firefighting teams and resources as needed.
2. Maintain liaison with the EOC to include having the ESF-4 desk position staffed during EOC operation. This responsibility normally falls on the Operations Section Chief (ESF-4/9/10)
3. Monitor status of firefighting resources committed to an incident.
4. Plan for and establish relief resources to replace or rotate with committed resources for extended operations.
5. Obtain and submit fire situation and damage assessment reports and provide information to SEOC.
6. Perform radiological monitoring assignments as directed.
7. Prepare for HAZMAT decontamination operations if needed.
8. Determine needs for disaster victims, with help from other disaster relief agencies.
9. Keep the EOC informed of the situation within their areas of responsibility and provide SITREPs as requested.
10. Maintain all records, logs and other documentation as needed.
11. Request supporting agencies maintain appropriate records of cost incurred during an event.
12. Document any lost or damaged equipment, any personnel or equipment accidents.
13. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.

D. Recovery

1. Maintain liaison with the Colleton County EOC.
2. Continue to provide fire-fighting capabilities within affected area(s) until conditions return to normal, as requested by on scene IC.
3. Assist in search and rescue duties as necessary and in other areas as available.
4. Maintain after-action reports, SITREPs, and other documentation that may be needed for reimbursement, if authorized.

5. Maintain communications with the EOC.
6. Submit recommended DEMOB plan to IC-EOC as situation approaches normal.
7. Submit copies of all logs, SITREPs, and other documentation required for after-action report to ESF-5.
8. Participate in CISD and other debriefings.
9. Attend critiques as may be held and submit updates for implementation into SOP as may be applicable.

V. RESPONSIBILITIES

- A. Colleton County Fire-Rescue Chief
 1. Identify, train, and provide personnel to staff ESF-4 in the EOC.
 2. Notify all ESF-4 supporting agencies upon activation.
 3. Maintain database inventories of fire service facilities, equipment, and personnel throughout the state.
 4. Develop, organize, train, alert, activate, and deploy firefighting Mutual Aid teams as necessary to assist impacted areas.
 5. Monitor status of all fire service operations and provide updates to SEOC.
- B. Walterboro Fire Department - Provides fire protection to the incorporated areas of the City of Walterboro.
- C. Edisto Beach Fire Department
 1. Provides fire protection to the incorporated areas of the Town of Edisto Beach and is contracted by County Council to provide fire protection to the unincorporated areas of Colleton County on Edisto Island.
- D. SC State Fire
 1. Provides assistance through coordination of additional forces under the Firefighter Mobilization Act.
- E. SC Forestry Commission
 1. Provides support to local fire departments when dealing with wildland fires.
- F. United States Forestry Service
 1. Provides support to local fire departments when wildland fires occur on federal lands.
- G. United States Coast Guard
 1. Provides support to local fire departments when dealing when fires occur involving vessels in navigable waterways.

VI. LOCAL, STATE, AND FEDERAL INTERFACE

- A. This ESF is supported by State and Federal Response Plan ESF-4 (Fire). Local ESF-4 will coordinate with State ESF-4 that will coordinate with federal ESF-4 to obtain federal assistance as required and available.

ESF-5 - Planning

Primary: Colleton County Fire-Rescue

Support: Colleton County Sheriff's Office, Municipal Planning/Building Departments/Liaisons, Energy Providers, Colleton County Assessor's Office, Colleton County Information/Technology Department, Colleton County Economic Alliance, ESF-4/9/10 (Operations Section Chief), ESF-7 (Logistics Section Chief), USACOE

| Reports To | Receives Reports From |
|-------------|--|
| EOC Command | Colleton County Sheriff's Office, Municipal Planning/Building Departments/Liaisons, Energy Providers, Colleton County Assessor's Office, Colleton County Information/Technology Department, ESF-12 (Energy), ESF-14 (Recovery), ESF-24 (Business and Industry), USACOE, ESF-4/9/10 (Operations Section Chief), ESF-7 (Logistics Section Chief) |

I. INTRODUCTION

A. During response to a disaster affecting the citizens of Colleton County and surrounding communities, the collection and dissemination of essential information is critical for emergency operations. The gathering of accurate intelligence regarding the situation will facilitate the effectiveness of the overall response and recovery of the disaster operations.

II. MISSION

- A. ESF-5 collects, processes, and disseminates information during a potential or actual disaster or emergency; identifies problems and recommends solutions; and plans and coordinates with the County Emergency Operations Center as well as State and Federal agencies assigned to assist during an emergency or disaster through various electronic means.
- B. Planning will be responsible for collecting information for briefings and Situation Reports (SITREPs) to the EOC Commander and to the State Emergency Operations Center as compiled by ESF-5 staff.

III. CONCEPT OF OPERATIONS

- A. Colleton County Fire-Rescue is responsible for the coordination of all ESF-5 administrative, management, planning, training, preparedness, mitigation, response, and recovery activities, and developing, coordinating, and maintaining the ESF-5 plans. All ESF-5 supporting agencies will assist Colleton County Fire-Rescue in the planning and execution of the above.
- B. ESF-5 will perform the following functions:

1. Information Processing: collect and process essential elements of information for: SCEMD, county government, municipalities, ESFs, and other sources; disseminate information for use by the Operations Section and provide input for reports and briefings. At a minimum, the following information is required:
 - a) Deaths.
 - b) Injuries.
 - c) Missing persons.
 - d) Boundaries or geography of the disaster area and designation of an area of operations.
 - e) Preliminary damage reports.
 - f) Infrastructure status (transportation, communications, energy, and medical).
 - g) Hazard-specific information.
 - h) Weather data.
 - i) Activated emergency management facilities.
 - j) Shelter and mass care information.
 - k) Immediate life-threatening needs.
 - l) Fires reported in impacted areas.
 - m) Lists of non-state resources operating within state boundaries.
 - n) Re-entry.
 2. ESF-5 will consolidate information into SITREPs, situation updates, and briefings, as required, to describe and document overall response activities. ESF-5 also provides information to the Command Staff concerning all aspects of response and recovery operations to include evacuations, shelters, damages, injuries and fatalities.
 3. ESF-5 will monitor respective ESFs in order to maintain and update status boards with current information, maps, charts and other means such as computer displays, as available.
- C. The function of ESF-5 is to provide planning and coordination information to the command staff within the Emergency Operations Center or Command Post (CP).
- D. Working with municipalities, damage assessment teams, SCEMD and others, ESF-5 will put together the overall assessment (big picture) of the response situation so as to assist decision makers with the formulation of their action plans as outlined in section "B.1" above.
- E. Information to the citizens disseminated through the Emergency Operations Center's Public Phone Line will be facilitated by the maintenance of information on Palmetto EOC, situation/status boards and information sources as mutually determined by the PIO, EOC Command and ESF-5.
- F. Information required for SCEMD/SEOC will be consolidated into Situational Reports (SITREPs) on a timetable provided by EOC Command. Other information for Section Chief meetings or those for the Emergency Council will be formatted as required by the meeting facilitator through the agenda.

- G. All ESF-5 personnel will be trained on the principles of the National Incident Management System (NIMS) and integrate those principles into all ESF-5 planning and response operations.

IV. ESF ACTIONS

A. Preparedness

1. Develop procedures and formats for information gathering and reporting to include procedures for SITREP format and submission.
2. Maintain the currency of alert lists and key personnel and inform participating agencies of changes as they occur.
3. Train support agencies on roles and responsibilities.
4. Develop procedures with the state, federal and municipal planning counterparts for reporting critical information as mutually defined.
5. Develop information displays within the Emergency Operations Center.
6. Ensure weather products are up to date and available for use in the SITREP.
7. Coordinate with hazard-specific advisory teams for response actions.
8. Participate in exercises and conduct, at least annually, an ESF-5 exercise to validate this annex and supporting SOPs.
9. In coordination with the Communications Department and EMD review the radio communications requirements for implementing the ESF.

B. Mitigation

1. Support and plan for mitigation measures specific to ESF-5.
2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

1. Activates ESF-5 for duty at the Emergency Operations Center or CP as required by the incident, or as requested by EOC Command and notifies all participating support agencies.
2. Establish contact with the Damage Assessment Teams (DATs) and other field components and agencies responsible for conveying situation-type information into the ESF. Coordinate with State and FEMA ERT-A teams.
3. Assign duties to support agency personnel and provide training as required.
4. Coordinate Emergency Operations Center effort in collecting, processing, reporting and displaying essential information to include development of the SITREP.

5. Conduct planning to identify priorities, develop approaches, and devise recommended solutions for future response operations.
6. Coordinate with PIO, as required.
7. Provide weather information and briefings to the Emergency Operations Center and/or the EOC Command as required.
8. Plan for support of mobilization sites, staging areas, and distribution points.
9. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.
10. Ensuring significant events are entered in Palmetto EOC.

D. Recovery

1. Continue information gathering and processing.
2. Collect and process information concerning recovery activities to include anticipating types of recovery information the Emergency Operations Center and other government agencies will require.
3. Anticipate and plan for the support and establishment of staging areas, distribution sites in coordination with ESF-7, JICs and other local, state and/or federal emergency work teams and activities in the impacted area.
4. Ensure that ESF-5 team members or their agencies maintain appropriate records of costs incurred during an event. Track and summarize all personnel hours, materials, and equipment used on the Incident Action Plan (IAP) for the Emergency Operations Center Finance Section Chief.
5. Determine the anticipated length and extent of operations and provide a draft DEMOB plan and timeline to EOC Command.
6. Organize all logs, SITREP reports, journals, photographs, videos, and other documentation available for the after-action report and for future county-state-federal use.

V. RESPONSIBILITIES

A. Colleton County Fire-Rescue

1. Identify, train, and assign personnel to assist in the training of ESF-5 staff in the Emergency Operations Center in the use of Palmetto EOC.
2. Coordinate with other county and state agencies; develop procedures and formats for information gathering, reporting, and Emergency Operations Center displays.
3. Plan for support of mobilization sites, staging areas, and distribution points.
4. Coordinate with ESF-7 to request resources for operations that are currently or will be beyond county resource capabilities.

B. Colleton County Sheriff's Office

1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-5.
2. Assist in the establishment of a radio communications system among Planning, PIO and Citizens Information Staff during Emergency Operations Center activation.

3. Organize an advisory team to assess the situation, project requirements, and provide information in the event of an emergency.
- C. Municipal Planning Departments / Liaisons
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-5.
 2. Organize an advisory team to assess the potential and actual damage of the situation, project requirements, and provide information in the event of an emergency.
 3. Serve as liaison for municipal planning objectives and unmet needs.
- D. Energy Providers
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-5.
 2. Ensure ESF-5 has accurate information for IAP's and situational status on Energy status throughout the county.
- E. Colleton County Assessor's Office
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-5.
 2. Provide damage assessments for ESF-5 to be included in IAP's and situational status on damage to buildings and infrastructure throughout the county.
- F. Colleton County Information / Technology Department
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-5.
 2. In conjunction with Planning develops a visual display of the overall disaster using GIS assets.
 3. Ensures that information and technology equipment are maintained prior to, during, and after a disaster.
- G. ESF-4/9/10 (Operations Section Chief)
1. Ensures ESF-5 is aware of Operational Status to be included in IAP's.
- H. ESF-7 (Logistics Section Chief)
1. Ensures ESF-5 is aware of Resource Status to be included in IAP's.
- I. ESF-14 (Recovery Section Chief)
1. Ensures ESF-5 is aware of Residential and Business/Industry damage to be included in IAP's.
- J. U.S. Army Corps of Engineers (USACOE)
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-5 during periods of activation.
 2. Provide technical assistance support during EOC activation.
 3. Assist with damage assessment of waterways and related infrastructure.
- VI. LOCAL, STATE, AND FEDERAL INTERFACE
- A. ESF-5 currently exists in the State Emergency Operations Plan as well as the Federal Response Plan. At the State level, ESF-5 is the responsibility of State EMD. In the federal plan, FEMA is the primary agency.

ESF-6 - Mass Care

Primary: Department of Social Services (DSS)

Support: Colleton County School District, Colleton County Facilities Management, American Red Cross, The Salvation Army, Colleton County Sheriff's Office, Colleton County Fire-Rescue, South Carolina Department of Public Health (SCDPH), Lowcountry Community Action Agency, SC Voluntary Organizations Active in Disaster

| Reports To | Receives Reports From |
|-------------------------------------|---|
| ESF-7 (EOC Logistics Section Chief) | Colleton County School District, Colleton County Facilities Management, American Red Cross, The Salvation Army, Colleton County Sheriff's Office, Colleton County Fire-Rescue, South Carolina Department of Public Health (DHP), Lowcountry Community Action Agency, SC Voluntary Organizations Active in Disasters |

I. INTRODUCTION

- A. Department of Social Services (DSS) is the primary County agency designated for coordinating/managing Mass Care. Mass Care encompasses sheltering, feeding, first aid at mass care facilities and designated sites, and disaster welfare inquiry.
- B. The American Red Cross is the primary organization that operates mass care shelters in South Carolina. The American Red Cross, Southern Baptist Convention and the Salvation Army provide feeding capability through their own resources.
- C. South Carolina Department of Public Health (SCDPH) will open and manage Medical Needs Shelters in South Carolina.

II. MISSION

- A. To organize within Colleton County the capability to meet basic human needs in a disaster situation; and to outline responsibility and policy established for Mass Care and Disaster Response Services operations before, during and after a disaster, whether natural, manmade or acts of terrorism.

III. CONCEPT OF OPERATIONS

- A. The Colleton County DSS Director is the ESF-6 Supervisor and is responsible for the coordination of all governmental and non-governmental agencies. ESF-6 effectively supports the needs of the population of the county during emergencies/disasters.
- B. On notification by Colleton County Fire-Rescue Emergency Management Division, the ESF-6 Supervisor will activate the supporting agencies. Requests

for assistance will be routed through the Emergency Operations Center. The ESF-6 Supervisor or a designee makes decisions for response.

- C. Colleton County School District will coordinate all activities pertaining to the provision of shelter services within the schools of their districts with the ESF-6 Supervisor and the American Red Cross.
- D. The American Red Cross provides mass care to disaster victims as part of a broad program of disaster relief. Mass care encompasses the following:
 - 1. Shelter
 - a) The provision of emergency shelter for disaster victims and emergency workers includes the use of pre-disaster designated shelter sites in existing structures, temporary shelters, or the use of similar facilities outside the disaster area should evacuation be necessary. Red Cross and/or other organizations may open general population shelters. However, Red Cross shelter operations are managed by Red Cross-trained volunteers and staff while DSS will provide augmentation to support Red Cross and local/county incident commanders that need additional shelter support if there is an identified need for congregate shelter related to a disaster.
 - b) Listings of pre-disaster designated shelters may be found in the South Carolina Hurricane Plan and the South Carolina Operational Radiological Emergency Response Plan (SCORERP).
 - c) Expedient post-event sheltering may occur in other facilities not pre-designated if the primary facilities have been made unsuitable by the impact of the event.
 - 2. Feeding
 - a) The American Red Cross, The Salvation Army, Colleton County School District and Department of Social Services will work in collaboration to support feeding in congregate shelters for disaster victims and emergency workers through a combination of fixed sites or mobile feeding units.
 - b) Feeding operations will be coordinated through ESF-6 and supported by the Department of Education, DSS, and major volunteer organizations. (See ESF-11).
 - c) Feeding operations will be based on sound nutritional standards and will strive to include provisions for meeting any special dietary requirements of disaster victims.
 - 3. Emergency First Aid
 - a) The American Red Cross and the Salvation Army will provide health care assessment services to disaster victims and workers at their facilities. In the event the American Red Cross cannot provide a nurse for a shelter, Colleton County Fire-Rescue will

provide a Firefighter/Paramedic, or other emergency medical providers, or support under ESF-8 of the Colleton County EOP.

4. Disaster Welfare Inquiry (DWI)

a) Some organizations can coordinate “Disaster Welfare Information,” for families separated by disaster. Red Cross uses the “Safe and Well” website to assist in the reunification of family members.

b) Those organizations should:

- (1) Ensure any release of confidential information is in accordance with all relevant federal, state and local laws, specifically those concerning privacy and confidentiality.
- (2) Work cooperatively with other agencies and organizations to assist in family reunification efforts.
- (3) Provide DWI-related information in accessible formats, when available.

5. Bulk Distribution of Emergency Relief Supplies

a) Sites may be established within the affected area for distribution of emergency relief supplies. Distribution will be determined by the requirement to meet urgent needs of disaster victims for essential items in areas where commercial trade or public utilities are inoperative or insufficient to meet the emergency needs of victims.

E. ESF-6 will coordinate and manage the Emergency Repatriation of US citizens and their dependents back into the United States in times of civil unrest.

IV. ESF ACTIONS

A. Preparedness

1. The primary agency will prepare for disaster exercises by coordinating with support agencies for their participation in exercises.
2. ESF-8 will provide ESF-6 with regularly updated lists of planned Medical Needs shelters or other special needs units in existence in each county.
3. ESF-6 will maintain a roster of primary contact ESF personnel.
4. ESF-6 will coordinate with American Red Cross, Salvation Army, and EMD to ensure an up-to-date shelter list is available.
5. ESF-6 will have, procure, and regularly update a list of all agencies (public and private) that have a mission and capability to provide food services in times of disaster.
6. ESF-6 agencies will participate in county/state exercises and conduct, at least annually, ESF-6 training to validate this annex and supporting plans.

B. Mitigation

1. Support and plan for mitigation measures specific to ESF-6.
2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.

4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

1. Lead and support agencies will have and maintain appropriate listings of agency staff to notify for response activities.
2. ESF-6 will coordinate with ESF-7, 11, and 18 regarding food services sites established by responding emergency management agencies.
3. Shelters will be opened and closed in accordance with public need as assessed by the appropriate volunteer organization, SCEMD, and county emergency management agencies. Final decision rests with the American Red Cross for American Red Cross managed shelters.
4. ESF-6 will monitor occupancy levels and ongoing victims' needs, and will provide ESF-5 with an updated list of operational shelters and occupancy.
5. ESF-6 will coordinate with ESF-8 for the provision of medical services and mental health services in shelters with the appropriate agencies.
6. ESF-6 will coordinate with appropriate agencies to ensure that each shelter has a working communications system and has contact with the county Emergency Operations Center (EOC) and the managing agency. This may include radio (800 MHz and/or Amateur Radio), telephone, computer, or cellular telephone communication devices.
7. ESF-6 will provide a list of mass care sites requiring restoration of services to EOC.
8. ESF-6 will coordinate with ESF-13 regarding additional security resources, if needed, at mass care shelters.
9. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.

D. Recovery

1. ESF-6 will coordinate with ESF-7, 11, and 18 to establish or support existing mass feeding sites operated by the American Red Cross, Salvation Army, and other volunteer agencies. The first priority of food services activities will be disaster victims. Emergency workers will be encouraged to utilize established mass feeding sites in lieu of individual site distribution.
2. ESF-6 will coordinate mass feeding locations to ensure optimal access for public service based on emergency needs.
3. ESF-6 will coordinate with ESF-3 for garbage removal and ESF-8 for sanitation requirements and inspections at mass feeding sites in conjunction with county agencies.
4. ESF-6 will coordinate with responsible agencies for the provision of food and water to mass feeding sites, if needed. Liaison will be established with ESF- 11 and 18 to ensure continued coordination for mass feeding.

V. RESPONSIBILITIES

A. Department of Social Services

1. Identify, train, and assign DSS personnel to staff ESF-6 in the EOC.
2. Plan for mitigation, preparedness, and response, short-term and long-term recovery actions.
3. Maintain and disseminate current information on federal and state policies, laws, and regulations relevant to DSS responsibility in Mass Care operations.
4. Disseminate administrative procedures for specific DSS administered programs designed to meet post-disaster needs to include the Emergency Food Stamp Program (Electronic Benefit Transfer Cards) and the Individual and Households Program.
5. Develop Mass Care training programs for DSS personnel and participate in American Red Cross shelter operations training at state and county level.
6. Maintain formal agreements, Memorandum of Understanding (MOUs), and working relationships with supporting Mass Care agencies and organizations, as required.
7. Maintain written operating procedures including alert list of appropriate Mass Care organizations, and disaster response personnel.
8. Participate in periodic Mass Care drills and exercises. Evaluate and coordinate necessary revisions to Mass Care plans with Mass Care member agencies/ organizations.
9. Provide guidance and consultation to local government in developing and maintaining a local Mass Care capability and capacity.
10. Notify all ESF-6 supporting agencies upon activation.
11. Coordinate with supporting agencies to provide staff, service, communications to the EOC, reporting, to shelter residents and feeding of shelter residents and workers when needed.
12. Provide DSS staff to support shelter operations, as required.
13. Communicate with all Mass Care agencies and organizations to compile and exchange information concerning the extent of the disaster and the status of response operations. Provide such information to the EOC Operations.
14. Provide a County Mass Care Coordinator to the Emergency Operations Center upon request of the EMD.
15. Coordinate with Mass Care organizations to ensure operational coordination in disaster response of mass care services and support to local government.
16. Keep the public informed of available Mass Care assistance programs, in coordination with Mass Care support agencies and organizations by augmenting the county public information services.
17. Provide information on the human-need situation (major problems and needs) to the Department of Health and Human Services, Region IV, the

USDA Food and Consumer Service, and the Federal ESF-6 (American Red Cross) representative in FEMA Region IV, as required via SCEMD SEOC.

18. Collect, compile, and maintain all essential information, generate reports and records concerning Mass Care disaster response.
 19. Continue to coordinate with Mass Care agencies and organizations.
 20. Continue to keep the public informed of available Mass Care state and federal assistance programs.
 21. Administer recovery programs; e.g., the Emergency Food Stamp Program and the Individual and Household Program.
 22. The Department of Social Services, American Red Cross, and other Mass Care support agencies will use normal supply channels with a priority status. DSS will coordinate with all Mass Care agencies/organizations and support agencies to ensure that all county/state assets have been applied prior to requesting federal assistance.
 23. Deactivation of shelters will be done as needed.
- B. Colleton County School District
1. Review emergency procedures to prepare Shelters in coordination with the American Red Cross.
 2. Participate in annual county mass care coordination meetings.
 3. Provide support staff to American Red Cross.
 4. Provide feeding staff when requested by the American Red Cross for shelter residents and emergency workers.
 5. Continue to assist in support of post-storm recovery shelter as facilities are available and safe.
 6. Assist in providing information and referral services for disaster victims.
 7. Strive toward opening schools as educational facilities to begin to bring normalcy back to the community.
- C. Colleton County Facilities Management
1. Assist with maintenance of shelters in public buildings (including backup generators) as needed.
- D. American Red Cross
1. Plan for Disaster Preparedness, Response, Mitigation, Short-term and Long-term Recovery Actions, in coordination with government agencies, based on Hazard Analysis and History of Disasters (See Annex 2, Memorandum of Understanding between the American Red Cross and the State of South Carolina), to Attachment D, (MOUs, MOAs and Other Agreements) to the SCEOP.
 2. Recruit and train Red Cross disaster volunteers, community and faith-based partners, and state and local employees in Red Cross shelter operations, as requested.
 3. Conduct Community Disaster and Mitigation Education Programs in order to provide communities with information to help them prepare for disasters.

4. Identify, coordinate and conduct shelter surveys.
5. Assess the accessibility of potential general population shelters to include both physical access as well as service access.
6. Test validity of Disaster Response Plans and Procedures through internal and inter-agency Disaster Response exercises.
7. Evaluate and coordinate necessary revisions to Mass Care Plans with government agencies.
8. Establish a Red Cross Headquarters in/near the affected area for coordination of services.
9. Assign a Red Cross Liaison to the EOCs.
10. Conduct Community Disaster Needs Assessments.
11. Establish and manage general population Mass Care shelters (facilities) and provide Health Care Assessments, as requested.
12. Provide a list of operational shelters to ESF-6, during disasters.
13. Work cooperatively with ESF-6 to provide shelter status information, as necessary.
14. Provide meals at fixed sites and through mobile feeding units.
15. Provide special dietary needs and culturally appropriate foods, when available and feasible.
16. Assist in securing additional health care supplies, for Red Cross facilities.
17. Provide services to help family members reconnect following a disaster.
18. Coordinate with Federal counterparts to maintain Red Cross' Safe and Well website which provides information about disaster survivors to family members outside the disaster area.
19. Provide assistance based on immediate disaster-caused need, not loss.
20. Depending upon an evaluation of need and resources available, provide:
 - a) Direct client assistance
 - b) Shelter/Temporary Shelter
 - c) Health and Mental Health and Spiritual Care Services
 - d) Recovery Planning Advocacy and Referrals
 - e) Distribution of Emergency Supplies
 - f) Assistance, in obtaining information, about federal and other resources available, for additional assistance, to disaster survivors
 - g) Representatives/information at Disaster Recovery Centers (DRCs) to inform applicants of available Red Cross assistance.
21. Manage its Logistics System of Procurement, warehouses, relief facilities, transportation and communication networks.
22. Assist SCDPH with discharge planning for MNS occupants via Red Cross Nurse Liaison.
23. Having a nurse liaison available either on call or in the Agency Coordination Center (ACC) or the Regional Coordination Center (RCC), until triage is demobilized.

- E. The Salvation Army - The Salvation Army is a national religious and charitable organization with the capability to immediately render emergency disaster relief services to individuals and families threatened, or directly affected by disaster.
 - 1. Identify, train, and assign personnel to staff ESF-6 in the EOC.
 - 2. Conduct disaster response training for Salvation Army staff and volunteers.
 - 3. Test validity of disaster response plans and procedures through internal and inter-agency disaster response exercises.
 - 4. Activate the Divisional Emergency/Response Team.
 - 5. Assign a Salvation Army Liaison to the Emergency Operations Center.
 - 6. Provide on-site feeding of EOC staff during EOC operations as requested by the EMD.
 - 7. Establish a Command Post in the affected area to coordinate Salvation Army activities/personnel/equipment.
 - 8. Initiate Salvation Army emergency sheltering, mobile feeding, and emergency services to disaster workers and victims.
 - 9. Deploy teams to provide emotional and spiritual care.
 - 10. Assign Salvation Army representatives in Disaster Recovery Centers to provide assistance for disaster victims, as required or requested.
 - 11. Provide information and referral services for disaster victims.
 - 12. Distribute food and commodities, clothing, furniture, bedding and household needs to disaster victims.
 - 13. The Salvation Army operates on a self-sustaining basis, with its own warehouses, shelter facilities, transportation resources, mobile feeding units, and communications networks.
- F. Colleton County Sheriff's Office
 - 1. Provide mass care shelter security at shelters designated by ESF-6.
 - 2. Provide Pet Shelter security at shelters designated by ESF-6/17.
 - 3. Participate in annual county mass care coordination meetings.
- G. Colleton County Fire-Rescue
 - 1. Identify, train, and assign personnel to staff shelters designated by ESF-6.
 - 2. Develop and maintain the shelter list (including Medical Needs Shelters)
 - 3. Coordinate with DSS and American Red Cross to have alternate shelters available in the event primary shelters are unavailable.
- H. SC Department of Public Health (SCDPH)
 - 1. Identify, train, and assign SCDPH personnel to maintain contact with and prepare to execute missions in support of ESF-6 during periods of activation.
 - 2. Provide personnel, sanitation and food inspection, health care, crisis counseling and water quality services to support mass care operations.
 - 3. Operates and provides nurses to Medical Needs Shelters.
 - 4. Participate in annual county mass care coordination meetings.
- I. SC Voluntary Organizations Active in Disasters (VOAD)

1. Multiple VOAD agencies can bring significant amounts of resources and services in support of ESF-6.

VI. LOCAL, STATE, AND FEDERAL INTERFACE

- A. Local ESF-6 will coordinate with State ESF-6 who will coordinate with Federal ESF-6 and volunteer agencies to obtain disaster relief assistance as required. After-action reports, SITREPs, and other reports will be provided as required. ESF-6 will also coordinate with ESF-11 regarding emergency food supplies.

ESF-7 - Logistics

Primary: Colleton County Fire-Rescue

Support: Colleton County Sheriff's Office, Colleton County Department of Social Services (DSS), American Red Cross, Colleton County School District, South Carolina EMD/SEOC, South Carolina National Guard, Colleton County Parks and Recreation, Colleton County Information and Technology Services, Amateur Radio Emergency Services (ARES), Lowcountry Regional Airport

| Reports To | Receives Reports From |
|-------------|--|
| EOC Command | SCEMD REM, ESF-1 Transportation, ESF-6 Mass Care, ESF-11 Food Services, ESF-18 Donated Goods & Volunteer Services, ESF-19 Military Support, ESF-4/9/10 (Operations Section Chief), ESF-5 (Planning Section Chief), Lowcountry Regional Airport |

I. INTRODUCTION

A. When disasters or large emergencies occur, normal logistical support operations are severely disrupted. Additionally, the emergency requires resources that go beyond the normal supply system. Emergency procurement operations often make the difference between successful mission accomplishment or failure.

II. MISSION

A. To identify an Emergency Support Function (ESF) that can make emergency procurement for the acquisition of needed supplies, equipment, commodities, and other resources in support of the disaster response and recovery efforts of Colleton County officials.

III. CONCEPT OF OPERATIONS

- A. EOC Logistics Section Chief, or his/her designee, will serve as the ESF-7 supervisor.
- B. The primary function of ESF-7 will be the emergency acquisition of resources (including the coordination of their delivery), as provided by County Ordinance.
- C. ESF-7 will coordinate with the Finance Section regarding funding issues and record-keeping required for federal reimbursement, when applicable.
- D. Prepared numbered purchase orders and pre-selected vendors likely to remain operational will be maintained by ESF-7 agencies.
- E. ESF-7 will coordinate with the Recovery Team and the County Warehouse regarding operations, accountability, and resource tracking.
- F. Ensure all ESF-7 personnel integrate NIMS principles in all planning.

IV. ESF ACTIONS

A. Preparedness

1. Develop methods and procedures for responding to and complying with requests for resources.
2. Develop lists of private vendors and suppliers and their available resources.
3. Establish pre-planned contracts where necessary to ensure prompt support from vendors during emergencies.
4. Develop and train ESF personnel on state emergency procurement procedures for acquiring supplies, resources, and equipment.
5. Develop resource inventories based on hazard specific studies and corresponding likely resource requests by ESF.
6. Participate in state exercises and conduct, at least annually, an ESF-7 exercise to validate this annex and supporting plans.
7. Develop a statewide logistics plan and coordinate with ESF-7 to support logistics operations.
8. Annually review the Department of Homeland Security Universal Task List and integrate tasks as appropriate.

B. Mitigation

1. Support and plan for mitigation measures specific to ESF-7.
2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

1. Alert those agencies whose personnel, equipment, or other resources may be used.
2. Establish a resource tracking and accounting system, including management reports.
3. Assess initial reports to identify potential resource needs.
4. Identify procurement resources and potential facility locations in the disaster area of operations.
5. Provide data to the Public Information Officer for dissemination to the public.
6. Coordinate with Finance Section to make emergency procurement and execute emergency contracts to obtain resources that are necessary due to incident exceeding County resource capabilities.
7. Locate, procure, and issue to county agencies the resources necessary to support emergency operations.
8. Coordinate with ESF-1 to support logistics operations.

9. Coordinate with ESF-19 (Military Support) to develop procedures for deploying state military department personnel in support of emergency operations at warehousing facilities, staging areas, and other areas where the need exists.
10. Coordinate with ESF-13 (Law Enforcement) to evaluate warehouse security or receiving/distribution point requirements.
11. Coordinate with ESF-18 (Donated Goods and Volunteer Services) when donated goods require warehousing, sorting, and/or inspecting or when establishing county receiving and distribution points.
12. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.
13. Coordinate distribution of goods, assets or resources from distribution points.

D. Recovery

1. Continue to conduct procurement activities as long as necessary and until procurement needs have been met.

V. RESPONSIBILITIES

A. Colleton County Fire-Rescue

1. Identify, train, and assign personnel to staff ESF-7 in the EOC.
2. Notify all ESF-7 supporting agencies upon activation.
3. Develop procedures for procurement of commodities and services, leasing of buildings and facilities, and facilities management. Provide staff support, as required.
4. Develop and maintain local resource lists.
5. Develop procedures for the temporary loan and return of county equipment.
6. Develop procedures for allocating resource support.

B. Colleton County Sheriff's Office

1. Provide security to county warehouse and/or receiving and distribution points.
2. Supervise communications networks and ARES

C. Colleton County Department of Social Services (DSS)

1. Identify, train, and assign personnel to staff ESF-6/11, which reports to ESF-7.

D. American Red Cross

1. Identify, train, and assign personnel to staff ESF-6/11, which reports to ESF-7.

E. Colleton County School District

1. Identify, train, and assign personnel to staff ESF-1, which reports to ESF-7.

F. South Carolina EMD/SEOC

1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-7 during periods of activation.
2. Provide support as requested to the County EOC.

- 3. Participate in Emergency Council Activities, when required.
- G. South Carolina National Guard
 - 1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-7 during periods of activation.
 - 2. Provide personnel and equipment to assist in offloading, receiving, handling, and loading of materials to support logistics operations.
 - 3. Serve as Military Liaison in support of ESF-19.
- H. Colleton County Parks and Recreation
 - 1. Identify, train, and assign personnel to staff EOC or work with ESF-18.
 - 2. Operate receiving and distribution points when established.
- I. ESF-4/9/10 (Operations Section Chief)
 - 1. Ensure that ESF-7 is aware of any current resource support needs based on reports from agencies in Operations Section.
- J. ESF-5 (Planning Section Chief)
 - 1. Ensure that ESF-7 is aware of any future resource support needs based on reports from agencies in Planning Section.
- K. Lowcountry Regional Airport
 - 1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-7 during periods of activation.
 - 2. Provide personnel support during EOC activation.
 - 3. Coordinate the use of Lowcountry Regional Airport for military assets when necessary.
 - 4. Coordinate with Air Operations (under Operations Section Chief) to provide accessibility to air medical and air resource delivery assets.
- VI. LOCAL, STATE, AND FEDERAL INTERFACE
 - A. This Emergency Support Function exists at all three levels of government as ESF-7. However, the ESF-7 relationship is closer at the State and County level. This is due to the coordination required between the EOC, SEOC, County Warehouse, and the other components of the Recovery Team system for the movement of commodities and goods required at the local level. This pertains more to the needs of local government rather than the donated goods generally directed at the citizens.

ESF-8 - Health and Medical Services

Primary: Colleton County Fire-Rescue

Support: Colleton County Medical Center, S.C. Department of Public Health (SCDPH), South Carolina First Responder Assistance Team (FAST), Fire-Rescue Chaplains, American Red Cross, The Salvation Army, Colleton County Coroner’s Office, Coastal Empire Mental Health, Private Ambulance Services, Department of Alcohol and Other Drug Abuse Services (DAODAS), Funeral Homes, Lowcountry Council of Governments (LCOG)

| Reports To | Receives Reports From |
|------------------------------|---|
| EOC Operations Section Chief | Colleton County Medical Center, S.C. Department of Public Health (SCDPH), South Carolina First Responder Assistance Team (FAST), Fire-Rescue Chaplains, American Red Cross, The Salvation Army, Colleton County Coroner’s Office, Coastal Empire Mental Health, Private Ambulance Services, Department of Alcohol and Other Drug Abuse Services (DAODAS), Funeral Homes, Lowcountry Council of Governments (LCOG) |

I. INTRODUCTION

- A. When disasters or large emergencies occur the health care system can be overwhelmed by the large numbers of casualties and/or those affected by public health problems related to food, water, vectors, and waste. Victims can suffer both physical and mental injury. Individual medical treatment facilities can be inundated with patients or it can over tax the medical abilities of the entire community.
- B. MEDICAL CARE refers to emergency medical services (including field operations and first responders), resident medical and dental care, doctors, nurses, technicians, pharmaceuticals, supplies, equipment, hospitals, clinics, planning and operation of facilities, and services.
- C. PUBLIC HEALTH AND SANITATION refers to the services, equipment, and staffing essential to protect the public from communicable diseases and contamination of food and water supplies; development and monitoring of health information; inspection and control of sanitation measures; inspection of individual water supplies; disease vector and epidemic control; immunization; laboratory testing.
- D. CRISIS COUNSELING refers to the professional personnel, services, and facilities to relieve mental health and/or substance abuse problems caused or aggravated by a disaster or its aftermath.
- E. DECEASED IDENTIFICATION AND MORTUARY SERVICES refers to the investigation, recovery, identification and disposition of human remains. The

Colleton County Coroner is the official with the authority to declare a Mass Fatality Incident.

II. MISSION

- A. To provide coordinating guidelines and identify agencies that will effectively use available medical resources during times of large man-made emergencies or natural disasters. Resources will include both personnel and specialized equipment at all levels of government and the private sector needed to relieve personal suffering and trauma, or to perform deceased identification and mortuary services operations.

III. CONCEPT OF OPERATIONS

- A. Colleton County Fire-Rescue will serve as the primary agency for this Emergency Support Function in coordination with the support agencies and is responsible for the development of enabling plans. During EOC and Command Post operations Colleton County Fire-Rescue will function as the ESF-8 Supervisor, usually managed by the Operations Section Chief with support from Colleton Medical Center and SCDPH. The Coroner's Office has the responsibility and authority to handle all situations related to fatalities; to include the investigation of deaths and recovery of remains. The support agencies will coordinate with the primary agency while maintaining their autonomy, chain of command, and functional plans.
 - 1. Colleton County Fire-Rescue is the sole Advanced Life Support (ALS) ambulance provider in Colleton County, including all municipalities. It operates 9 full-time, 1 part-time (120 days/year) ALS medic units.
- B. Before, during, and immediately after a significant emergency ESF-8 will focus primarily on public safety. Support agencies will provide services as required by the primary agency according to their normal mission tasking.
- C. Coordination and planning between all appropriate agencies will occur to ensure operational readiness in time of emergency.
- D. ESF-8 will coordinate with all private ambulance providers and will inform ESF-8 supporting agencies of any planning concerns, to include patients with Medical Needs.
- E. Colleton County Fire-Rescue will facilitate planning and preparedness activities with all area medical facilities. Colleton Medical Center will coordinate bed availability and other critical resources.
- F. Upon notification from the Operations Section Chief, SCDPH, or as the daily situation warrants, ESF-8 representatives will respond to the EOC to coordinate appropriate health and medical activities.
- G. Mutual aid medical personnel from around the region will coordinate their response to the local area so that credentials and licensing issues can be addressed through SCDPH.
- H. Medical Care: ESF-8 will provide or coordinate emergency and resident medical and dental care, doctors, nurses, technicians, pharmaceuticals, supplies, equipment, ambulance service, hospitals, clinics and first aid units, planning and operation of facilities, and services. Stage medical assets and deploy as needed

to affected areas. Assists with coordination of patient relocation and establishment of emergency medical care centers.

- I. Behavioral Health: Colleton County Fire-Rescue will manage behavioral health and mental health assistance in coordination with the Department of Mental Health, Department of Alcohol and Other Drug Abuse Services (DAODAS), American Red Cross, Coastal Crisis Chaplaincy, local clergy, Colleton Medical Center, Coastal Empire Mental Health, and other private resources.
- J. Public Health and Sanitation: Coordinates the services, equipment, and staffing essential to protect the public from communicable diseases and contamination of food and water supplies; development and monitoring of health information; inspection and control of sanitation measures; inspection of individual water supplies; surveillance; disease vector and epidemic control; immunization; laboratory testing.
- K. All media releases related to casualties or fatalities will be presented to the Emergency Council and the Coroner, or their designee, prior to any release of information pertaining to any victim(s) for final approval. One voice will be used.
- L. Deceased Identification and Mortuary Services.
 - 1. The County Coroner has overall responsibility for care, identification, and disposition of human remains. The state will provide assistance at the request of the county government.
 - 2. Coroner's Office shall contact authoritative organizations, local government entities and county health officials to assess the magnitude of need to determine appropriate location for mortuary and temporary facilities and specify equipment or materials deemed necessary. Coroner's Office will coordinate security issues with ESF-13 (Law Enforcement).
 - 3. ESF-8 will assure the procurement of supplies and equipment (i.e. refrigeration units, body bags, stretchers, embalming supplies, transportation, etc.), as required to maintain appropriate condition of the deceased until proper identification, notification and disposition can be determined. Use of existing morgues and forensic personnel will be coordinated with state personnel and with dental/medical school personnel, as necessary.
 - 4. In the event a deceased victim has no surviving family, next-of kin or family cannot be located or they have no desire to accept responsibility for a deceased family member, the County Coroner, shall assure that the body will be properly disposed of in accordance with local and State requirements. Burial assistance to families of deceased veterans will be provided through the SC Office of Veterans Affairs. SC Funeral Directors Association will assist with family counseling as needed.
 - 5. The Coroner's Office will be responsible for developing and updating SOG's and policies to support ESF-8.

6. Ensure all ESF-8 personnel integrate NIMS principles in all planning and operations. As a minimum, primary action officers for all ESF-8 agencies will complete FEMA's NIMS Awareness Course.
- IV. ESF ACTIONS - The emergency operations necessary for the performance of this function include but are not limited to:
- A. Preparedness
 1. General
 - a) Develop mutual support relationships with professional associations and other private services and volunteer organizations that may assist during an emergency or disaster.
 - b) Participate in state exercises and conduct, at least annually, an ESF-8 exercise to validate this annex and supporting plans.
 2. Medical Care
 - a) Coordinate the provision of medical and dental care.
 - b) SCDPH will identify and coordinate the deployment of doctors, nurses, technicians and other health professionals who are appropriately licensed to disaster areas.
 - c) Plan for establishment of staging areas for medical personnel, equipment, and supplies.
 - d) Develop plans to implement strategic national stockpile operations for Colleton County in South Carolina.
 - e) Plan for establishment of emergency medical care centers, when emergency facilities are not available.
 - f) Develop protocols and maintain liaison with Disaster Medical Assistance Teams (DMAT).
 - g) Plan for requesting federal medical assistance teams and coordinate for their support while operating in South Carolina.
 - h) Encourage health care facilities (i.e. hospitals, nursing homes, youth and adult medical care facilities) develop patient reduction, evacuation, and relocation procedures.
 - i) Identify agencies, organizations, and individuals capable of providing support services or assistance including South Carolina Hospital Association and South Carolina Medical Association.
 3. Public Health and Sanitation.
 - a) Develop procedures to protect the public from communicable diseases and contamination of food, water, and drug supplies (including veterinary drugs).
 - b) Develop procedures to monitor public health information.
 - c) Develop sanitation inspection procedures and protocols to control unsanitary conditions.
 - d) Develop procedures for inspection of individual water supplies.
 - e) Develop procedures for identification of disease, vector, and epidemic control.
 - f) Develop emergency immunization procedures.

- g) Identify laboratory testing facilities.
- 4. Behavioral Health
 - a) Develop procedures for rapidly providing behavioral health and mental health/substance abuse assistance to individuals and families, to include organizing and training behavioral health teams.
 - b) Develop support relationships with government agencies, professional associations, private services, and volunteer organizations to provide mental health and substance abuse assistance during disasters.
- 5. Deceased Identification and Mortuary Services.
 - a) Develop plans for location, identification, removal and disposition of the deceased.
 - b) Establish a system for collecting and disseminating information regarding victims and have the operational capability to deliver the information in a field environment in coordination with the EOC Public Information Officer.
 - c) Develop protocols and maintain liaison with Disaster Mortuary Operational Readiness Teams (DMORT).
 - d) Identify agencies, organizations, and individuals capable of providing support services for deceased identification including South Carolina Funeral Directors Disaster Committee and South Carolina Coroners Association.
 - e) Establish procedures with Probate Court to settle conflicts regarding disposition of bodies to proper family members when conflicts arise.
 - f) Maintain a description of capabilities and procedures for alert, assembly and deployment of state mortuary assistance assets.

B. Mitigation

- 1. Support and plan for mitigation measures specific to ESF-8.
- 2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
- 3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
- 4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
- 5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

- 1. General.
 - a) Coordinate information releases to the public with the public information officer in the EOC Public Information Group.
 - b) Coordinate with state and federal agencies as required.

- c) Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.
- 2. Medical Care.
 - a) Coordinate the delivery of health and medical services as outlined in paragraph IV.A2 above.
 - b) Arrange for the provision of medical personnel, equipment, pharmaceuticals, and supplies.
 - c) Assist with the coordination of patient evacuation and relocation.
 - d) Implement strategic national stockpile operations.
 - e) Request activation and coordinate DMAT services.
 - f) Identify hospital and nursing home vacancies statewide, in conjunction with SEOC and other appropriate organizations.
 - g) Provide medical assistance with hazardous materials response.
 - h) Implement mass casualty operations (maintained under separate cover).
- 3. Public Health and Sanitation.
 - a) Manage the public health and sanitation services as outlined in paragraph IV.A3 above.
 - b) Determine need for health surveillance programs throughout the state.
 - c) Issue Public Health notice for clean up on private property.
- 4. Behavioral Health: Coordinates for the provision of mental health and recovery services to individuals, families, and communities.
- 5. Deceased Identification and Mortuary Services.
 - a) Initiate the notification of deceased identification teams.
 - b) Retain victim identification records.
 - c) Request activation and coordination of DMORT services.
 - d) Request state assistance for next-of-kin notification.
 - e) Request a County/SCDPH media official representing the Coroner that will remain at the Family Assistance Center that may be established following a mass fatality incident to assist victims' families.

D. Recovery

- 1. General.
 - a) Anticipate and plan for arrival of, and coordination with, FEMA ESF-8 personnel in the EOC and the Joint Field Office (JFO).
 - b) Ensure ESF-8 members or their agencies maintain appropriate records of activities and costs incurred during the event.
- 2. Medical Care.
 - a) Assist with restoration of essential health and medical care systems.
 - b) Assist with restoration of permanent medical facilities to operational status.
 - c) Assist with restoration of pharmacy services to operational status.

- d) Coordinate emergency services staff until local system is self-supporting.
- e) Assist with emergency pharmacy and laboratory services.
- 3. Public Health and Sanitation.
 - a) Monitor environmental and epidemiological surveillance.
 - b) Continue long-term emergency environmental activities.
- 4. Behavioral Health: Coordinate the management of mental health and substance abuse assistance to individuals and families as appropriate.
- 5. Deceased Identification and Mortuary Services.
 - a) Continue the operations necessary for the identification and disposition of the deceased and their personal effects.
 - b) Provide a final fatality report.
 - c) Request reimbursement for expenditures, if authorized.
 - d) Receive the required death reports.

V. RESPONSIBILITIES

A. Colleton County Fire-Rescue

- 1. Notify all ESF-8 supporting agencies upon activation.
- 2. Develop mutual support relationships with professional associations and other private services and volunteer organizations that may assist during emergencies or disasters.
- 3. Request deployment of state agencies, volunteer health/medical personnel, supplies, equipment and provide certain direct resources under the control of SCDPH.
- 4. Develop and conduct drills and exercises to coordinate medical emergencies in disaster situations.
- 5. Encourage health care facilities (i.e. hospitals, nursing homes, youth and adult medical care facilities) to develop patient reduction, evacuation, and relocation procedures.
 - a) Assist with patient and hospital evacuation procedures development when necessary.
- 6. Coordinate the nursing/medical care for standard shelters (as available) to include providing interim medical care support to all shelters until the American Red Cross can provide the function.
- 7. Coordinate with SCDPH to manage the medical care of the Medical Needs shelters to include coordinating with Colleton Medical Center.
- 8. Coordinate need for initiating any waiver of rules and regulations regarding licensed professional personnel.
- 9. Develop and maintain a list of regional and state transport Emergency Medical Service and Ambulance Service resources that can be requested to deploy to assist.
- 10. Maintain and provide a listing of hospitals, nursing homes, and adult care facilities including names of CEOs and 24-hour phone numbers.
- 11. Maintain and provide bed availability status of Colleton Medical Center.
- 12. Determine status of hospitals, in conjunction with SEOC.

13. Implement quarantine procedures as appropriate.
 14. Coordinate the deployment of doctors, nurses, technicians and other medical personnel to disaster areas.
 15. Maintain current inventory lists of medical supplies, pharmaceuticals, equipment, licensed ambulance services, hospitals, and clinics.
 16. Develop protocols and maintain liaison with Disaster Medical Assistance Teams (DMAT).
 17. Develop and coordinate a plan to receive and distribute pharmaceuticals under the strategic national stockpile plan.
- B. Colleton Medical Center
1. Identify, train, and assign personnel to ESF-8 operations during periods of activation.
 2. Manage disaster medical treatment, crisis counseling and behavioral health assistance support within ESF-8 in coordination with other ESF-8 agencies.
 3. Assist with crisis and substance abuse counselors to facilitate recovery.
 4. Assist with nurses and other medical professionals as available.
- C. SC Department of Public Health (SCDPH)
1. Identify personnel and assign personnel to maintain contact with and prepare to execute missions in support of ESF-8 during periods of activation.
 2. Activate and operate Medical Needs shelter.
 3. Coordinate medical transportation resources and assist when applicable.
 4. Provides phone number for triaging potential Medical Needs shelter clients.
 5. Coordinate and provide nursing personnel to assist in shelters, tent cities, public health clinics, etc. whenever possible and as tasked by SEOC.
 6. Provide food inspectors to assist in the inspection of restaurants and provide technical advice to mass feeding sites whenever possible and as tasked by SEOC.
 7. Provide staff and services for monitoring public health conditions.
 8. Advise the public to abstain from consumption of water supplies in the event of suspected contamination and assist in inspection of water supplies.
- D. South Carolina First Responder Assistance Team (FAST)
1. SC FAST can provide mental health services to responders
- E. Fire-Rescue Chaplains
1. Colleton County Fire-Rescue maintains Chaplains that can provide mental health services to responders
- F. American Red Cross
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-8 during periods of activation.
 2. Provide crisis counseling personnel.
- G. The Salvation Army

1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-8 during periods of activation.
 2. Provide crisis counseling personnel.
- H. Colleton County Coroner's Office
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-8 during periods of activation.
 2. Provide mortuary services including personnel, supplies, equipment, transportation, and obtaining information from the families of deceased.
 - a) Coroner's Office has access to mass fatality resources (refrigeration trucks and trailers) through mutual aid agreements and through the South Carolina Coroners Association.
- I. Coastal Empire Mental Health
1. Can provide mental health services to citizens both non-evacuated or in shelters.
- J. Private Ambulance Services
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-8 during periods of activation.
 2. Provide medical transportation resources and assist when applicable.
- K. Department of Alcohol and Other Drug Abuse Services (DAODAS)
1. Can provide services to citizens both non-evacuated or in shelters.
- L. Funeral Homes
1. Can assist the Coroner's Office with mass fatality operations.
- M. Lowcountry Council of Governments (LCOG)
1. Maintains a list of citizens with Medical Needs and delivers shelf stable meals ahead of evacuation orders. When shelf stable meal deliveries occur, LCOG can obtain considerable intelligence on citizens in evacuation zones that are not complying with evacuation orders.
 2. Any information/intelligence gathered by LCOG on potential threats to citizens should be relayed to the Operations Section Chief at the EOC.
- VI. LOCAL, STATE, AND FEDERAL INTERFACE
- A. This ESF exists in both the State and Federal Response Plans. The State's primary agency is SCDPH while in the Federal Plan it is the Department of Health and Human Services and U.S. Public Health. When state and federal agencies are required for ESF-8 preplanning, EMD will be contacted to make the necessary requests.

ESF-9 - Search and Rescue (SAR)

Primary: Colleton County Fire-Rescue

Support: Colleton County Sheriff's Office, Edisto Beach Fire Department, Edisto Beach Police Department, Walterboro Fire Department, Colleton County Public Works Department, S.C. Civil Air Patrol, Med-Trans / Global Medical Response, S.C. Department of Natural Resources, U.S. Coast Guard, S.C. State Fire

| Reports To | Receives Reports From |

| Operations Section Chief / ESF-4 (Fire) | Colleton County Sheriff's Office, Edisto Beach Fire Department, Edisto Beach Police Department, Walterboro Fire Department, Colleton County Public Works Department, S.C. Civil Air Patrol, Med-Trans / Global Medical Response, S.C. Department of Natural Resources, U.S. Coast Guard, S.C. State Fire |

I. INTRODUCTION

- A. The Lowcountry area of South Carolina is inundated with forests, marshes, creeks, and rivers. Even in the urban areas of Colleton County, there are places where people can get lost. Additionally, the County has several group care facilities. Numerous Alzheimer, mental health, elderly or other patients reside in these facilities where the potential exists for them to wander away from the staff. Regardless of the circumstances, search management practices are applicable and should be utilized. With the threat of bombs, terrorism, and earthquakes, the Lowcountry has a high potential for building collapse which would require specially trained rescue teams to locate, extricate, and provide initial medical treatment to entrapped victims.
- B. Search and Rescues Two Components:
 - 1. Urban Search and Rescue is the process of locating, extricating, and providing initial medical treatment to victims trapped in collapsed structures or rescuing or removing persons threatened or stranded in harm's way by any emergency or hazardous event when they cannot remove themselves.
 - 2. Rural Search and Rescue activities include, but are not limited to, emergency incidents involving locating missing persons, locating boats lost at sea or inland waters, swift water rescue, locating downed aircraft, extrication if necessary, and first responder first aid medical treatment of victims.

II. MISSION

- A. The purpose of ESF-9 is to provide assistance in all activities associated with rural and urban search and rescue (SAR) operations. This relates to those rural

and urban SAR missions that are beyond the SAR management capabilities of the local governments.

III. CONCEPT OF OPERATIONS

- A. Colleton County Fire-Rescue has been designated as the primary agency for SAR in coordination with the Colleton County Sheriff's Office. Colleton County Fire-Rescue will be the liaison between the jurisdictional IC and responding State Fire, State and FEMA USAR Task Forces.
- B. The other support agencies are recognized as the group that will carry out the SAR function in those areas where organized rescue teams exist.
- C. Searching for a lost or entrapped person is an emergency. ESF-9 agencies need to appreciate a sense of urgency in responding to any lost or entrapped person call. The host jurisdiction must anticipate that they may not be able to quickly locate the lost subject and that supporting agencies need to be put on alert or requested early. This is particularly important in bad weather, as darkness approaches, or with a subject with medical problems.
- D. Rural SAR, involving lost aircraft, is the primary responsibility of the Civil Air Patrol under the direction of Air Force Rescue Coordination Center at Langley AFB, VA.
- E. SAR OPS in open water such as the harbor, rivers, and creeks will be the primary responsibility of the DNR with assistance from the U.S. Coast Guard.
- F. All SAR OPS can be subject to litigation. It is imperative that OPS are conducted and documented in a professional manner.
- G. Colleton County USAR and RSAR capabilities are limited to the training and equipment at their disposal at the time of a mission. Emergency personnel in the community have received training from the SCFA as well as private and contracted professionals in the USAR and RSAR field of response.
- H. A large collapsed structure will likely result in the request of State Fire or FEMA USAR Task Force support, as appropriate.
- I. At the request of local officials, ESF-9, at the state level, will coordinate the state search and rescue response. Whenever possible, ESF-9 will stage assets before actual requests are forwarded. When local assets are exhausted, or in anticipation of large-scale disasters beyond the county's capability, ESF-9 at the state level will coordinate procurement of other state or federal assets. ESF-9, at the local level, will integrate the use of all search and rescue personnel and resources made available. However, implementation of state search and rescue response will be in accordance with the Incident Command System structure and National Incident Management System (NIMS).
- J. All ESF-9 personnel will be trained on the principles of the National Incident Management System (NIMS) and integrate those principles into all ESF-9 planning and response operations.

IV. ESF ACTIONS

- A. Preparedness
 - 1. SAR Primary Agency

- a) Through EMD and other agencies as available, request assistance with the provision of training, drills, and exercises necessary to keep SAR forces proficient.
 - b) Assist in the development and maintaining of individual and jurisdictional plans, attend planning meetings and exercises as available.
 - c) Provide training opportunities for personnel.
 - d) Regarding USAR, Supporting Agencies are responsible for maintaining a cache of equipment expected to support initial collapse structure operations.
 - e) This ESF will be updated and maintained according to federal guidelines.
2. Support Agencies
- a) Maintain individual plans, personnel records, and supporting documents for Rural/Urban SAR OPS.
 - b) Be familiar with the Incident Command System, Unified Command System, NIMS and the support available from the County.
 - c) Will provide the bulk of the staffing used in ESF-9 operations and will need to keep the primary agencies and EMD apprised of their needs in planning, preparedness, and training.
- B. Mitigation
- 1. Support and plan for mitigation measures specific to ESF-9.
 - 2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
 - 3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
 - 4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
 - 5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.
- C. Response (SAR)
- 1. Primary Agencies RSAR
 - a) Fire-Rescue will request the EOC to activate the other support and coordinating agencies as soon as the emergency support function is required or anticipated.
 - b) As primary agency for Rural SAR, the Fire-Rescue Chief or his/her designee, will ensure that the mission is adequately documented using pre-designated ICS and departmental forms.
 - c) In coordination with EMD, arrange for feeding, rehab, and other logistical needs of all the responding forces.
 - d) Ensure that information for public release is coordinated with the Colleton County Administration, Colleton County Sheriff's Office, and Jurisdictional Public Information Officers.

- e) Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.
- 2. Primary Agencies USAR
 - a) Fire-Rescue will serve as a coordinating agency for USAR requests for assistance for jurisdictional fire departments in the County.
 - b) See USAR SOP and Fields OPS Guide (FOG) for response protocols.
 - c) Should external USAR resources from State or Federal teams be needed, a request will be made through the County EOC to the SEOC for assistance.
 - d) Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.
- 3. Supporting Agencies
 - a) Once notified, determine the staging area or designated meeting place prior to dispatching forces.
 - b) Respond with personnel who are familiar with rural and/or urban SAR, the Incident Command System, and are personally prepared and equipped to operate in the environment.
 - c) Keep the primary agency apprised of operational and logistical needs.
 - d) Track their part of the operations, as required using the pre-designated ICS forms indicated in the plans and individual agency plans.
 - e) Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.

D. Recovery

- 1. All agencies will coordinate for the 'standing down' phase of operations, so that only the required resources remain on scene.
- 2. Provide all mission documentation to the primary agencies as required.
- 3. Recommend changes to agency and county plans based on 'lessons learned' from the incident.
- 4. Participate in an after-action critique or debriefing as coordinated with EMD including Critical Incident Stress Debriefings.

V. RESPONSIBILITIES

A. Colleton County Fire-Rescue

- 1. Identify, train, and assign personnel to staff ESF-9 in the EOC.
- 2. Notify all ESF-9 supporting agencies upon activation.
- 3. Identify and maintain a current resource inventory of all search and rescue assets within the state.
- 4. Identify and train liaison teams.
- 5. Coordinate search and rescue team deployment to, employment in and redeployment from disaster area.

6. Coordinate logistical support for search and rescue assets during field operations.
 7. Develop policies and procedures for the effective use and coordination of search and rescue assets.
 8. Coordinate Municipal urban search and rescue assets to support urban search and rescue operations.
 9. Coordinate South Carolina urban search and rescue assets to support urban search and rescue operations.
- B. Colleton County Sheriff's Office
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-9 during periods of activation.
 2. Plan, coordinate, and execute rural search and rescue operations.
 3. Provide search and rescue teams, technical assistance, equipment, and communications support.
- C. Edisto Beach Fire Department
1. Identify and maintain a current resource inventory of all search and rescue assets.
 2. Identify and train liaison teams.
 3. Coordinate search and rescue team deployment to jurisdiction.
 4. Coordinate logistical support for search and rescue assets during field operations.
- D. Edisto Beach Police Department
1. Identify and maintain a current resource inventory of all search and rescue assets.
 2. Identify and train liaison teams.
 3. Coordinate search and rescue team deployment to jurisdiction.
 4. Coordinate logistical support for search and rescue assets during field operations.
- E. Walterboro Fire Department
1. Identify and maintain a current resource inventory of all search and rescue assets.
 2. Identify and train liaison teams.
 3. Coordinate search and rescue team deployment to jurisdiction.
 4. Coordinate logistical support for search and rescue assets during field operations.
- F. Colleton County Public Works Department
1. Participate in search and rescue team deployments when necessary.
- G. S.C. Civil Air Patrol
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-9 during periods of activation.
 2. Provide aerial search, reconnaissance, communications, and transportation support.
 3. Provide personnel for rural search operations.
- H. Med-Trans / Global Medical Response

1. Through contracts with local aeromedical aircraft (C.A.R.E. Flight), Colleton County enjoys a tremendous working relationship with Med-Trans / Global Medical Response. They have numerous air assets that can be brought to the area after a disaster.
 - I. S.C. Department of Natural Resources
 1. Can assist or take the lead for searches on water or over land and have access to a number of ground, air, and water assets.
 - J. U.S. Coast Guard
 1. Can provide search and rescue assets in any navigable waterways.
 - K. S.C. State Fire
 1. Through the Emergency Response Task Force, State Fire has access to a number of resources including ground, air, and water assets.
- VI. LOCAL, STATE, AND FEDERAL INTERFACE
- A. The State's ESF-9 position is provided by State Fire, and contained in the State EOP as Annex 9/ESF-9. At the federal level this ESF only exists for USAR. However, at times and following a widespread natural disaster, there may be coordinated activity with the FEMA USAR teams and the US Army Corps of Engineers for any SAR type mission.
 - B. Depending on the size of the incident requiring ESF-9 activation, a position may be established in the EOC. If this is not the case, the primary agency on scene needs to coordinate activities with the designated POC selected at the time of the emergency.

ESF-10 - Hazardous Materials (HazMat)

Primary: Colleton County Fire-Rescue

Support: S.C. Department of Environmental Service (SCDES), Colleton County Sheriff's Office, Edisto Beach Fire Department, Walterboro Fire Department, S.C. Department of Natural Resources, South Carolina National Guard 43rd Civil Support Team, U.S. Coast Guard

| Reports To | Receives Reports From |
|---|--|
| Operations Section Chief / ESF-4 (Fire) | S.C. Department of Environmental Services (SCDES), Colleton County Sheriff's Office, Edisto Beach Fire Department, Walterboro Fire Department, S.C. Department of Natural Resources, South Carolina National Guard 43 rd Civil Support Team, U.S. Coast Guard |

I. INTRODUCTION

A. Because of the extreme quantity of hazardous materials transported by land, air, and water, the county is subject to hazardous materials incidents. Materials could be released into the environment from man-made or natural disasters, causing rail accidents, highway collisions, or waterway mishaps. Fixed facilities (e.g., chemical plants, tank farms, laboratories, or nuclear facilities) that produce, use, or store hazardous materials could be damaged so severely that existing spill control apparatus and containment measures would not be effective.

II. MISSION

A. Resources from industry, local, state and federal government, separately or in combination, may be required to cope with an emergency situation. ESF-10's purpose is to provide a well-organized emergency service organization to rapidly mobilize and employ, in a coordinated effort, all resources available to contain and neutralize or minimize the disastrous effects of an incident involving hazardous materials.

III. CONCEPT OF OPERATIONS

A. Colleton County Fire-Rescue is responsible for the coordination of all ESF-10 administrative, management, planning, preparedness, mitigation, response and recovery activities to include developing, coordinating, and maintaining the ESF-10 plans which detail both radiological and non-radiological responsibilities. All ESF-10 supporting agencies will assist Colleton County Fire-Rescue in the planning and execution of the above. All ESF-10 personnel will be trained on the principles of the National Incident Management System (NIMS) and integrate those principles into all ESF-10 planning and response operations.

1. Colleton County Fire-Rescue operates a Type-I HazMat team and is the only hazmat provider in Colleton County. The Type-I HazMat team is capable of identification, control, and decontamination.

2. Colleton Medical Center (the county's only medical facility with an emergency department) maintains capabilities to decontaminate multiple patients that arrive at their facility prior to allowing them admittance.
- B. Hazardous materials incidents may result in fire, explosions, radiation dangers, contamination, and toxic fumes. Firefighters are generally accepted as having the greatest expertise, training, and capability to combat these dangers.
- C. Coordination with all supporting and other appropriate departments/agencies and organizations will be performed to ensure operational readiness in time of emergency.
- D. Following notification of a release of a hazardous material, the senior emergency response official responding to an emergency shall become the individual in charge of the incident. The ICS shall be used throughout the management of an incident. All support agencies and their communications shall be coordinated and controlled through the individual in charge of the ICS, assisted by the senior official present for each agency. A Command Post will be established to manage both personnel and material to mitigate the hazard.
- E. In the event of a radiological emergency, plans and procedures that detail emergency response activities are addressed in the following publications: SC Operational Radiological Emergency Response Plan (SCORERP), and Spent Nuclear Fuel Emergency Action Plan (SNF EAP). SCDES also has developed standard operating procedures for fixed nuclear facilities, transportation of spent fuel, and Waste Isolation Pilot Project (WIPP) shipments.
- F. The Incident Commander (IC) will coordinate, integrate, and manage the effort to detect, identify, contain, and minimize releases and prevent, mitigate, or minimize the threat of potential releases through use of Primary and Support Agencies resources.
- G. Should a state of emergency be declared, the Colleton County EOC may be activated to coordinate efforts of other county, municipal, state, and federal agencies.
- H. When an IC orders an evacuation, refer to ESF-6 (Mass Care) for shelter and care of evacuees. The IC will coordinate evacuation efforts through the County Warning Point and EMD. Law enforcement agencies will secure the defined areas.
- I. Incidents involving radioactive materials will be handled the same as any hazmat incident. Colleton County Fire-Rescue's Type-1 HazMat team maintains capability for radiological detection, identification, decontamination and providing public protective actions/recommendations.
- J. The State Law Enforcement Division (SLED) and the South Carolina Emergency Management Division (SCEMD) are the lead agencies for crisis and consequence management respectively, regarding suspected or confirmed Terrorism or Weapons of Mass Destruction (WMD) incidents involving chemical, biological or radiological agents.
- K. Ensure all ESF-10 personnel integrate NIMS principles in all planning.

IV. ESF ACTIONS

- A. The emergency operations necessary for the performance of both radiological and non-radiological components of this function include but are not limited to:
- B. Preparedness
 - 1. Prepare an inventory of existing threats using SARA Title III, Tier II information, normally accessed through E-Plan or jurisdictional pre-incident surveys.
 - 2. Plan for response to hazardous materials incidents.
 - 3. Develop plans for communications and public information.
 - 4. Develop procedures for identification, control, and cleanup of hazardous materials.
 - 5. Provide, obtain, or recommend training for response personnel using courses made available by FEMA, Department of Energy (DOE), Nuclear Regulatory Commission (NRC), SCEMD, SCDES, the South Carolina Fire Academy, U.S. Environmental Protection Agency (USEPA) and manufacturers and transporters of hazardous materials, as well as training based on OSHA requirements for each duty position.
 - 6. Maintain a listing of private contractors capable of performing emergency and/or remedial actions associated with a hazardous materials incident.
 - 7. Maintain an inventory of state assets capable of responding to a hazardous materials incident.
 - 8. Maintain a list of hazmat (to include radiological) response resources to include Local (Fire Departments), County (EMD and Lowcountry Regional Type II Hazmat Team), Private, State (SCDES, CST, SRS) and Federal agencies.
 - 9. Develop plans and/or mutual aid agreements regarding hazardous materials incidents with local agencies, other state agencies, contiguous states, federal agencies, and private organizations as required.
 - 10. Collect and utilize licensing, permitting, monitoring, and/or transportation information from the appropriate local, state, or federal agencies and/or private organizations to facilitate emergency response.
 - 11. Participate in state exercises and conduct, at least annually, an ESF-10 exercise to validate this annex and supporting plans.
 - 12. Annually review the Department of Homeland Security Universal Task List and integrate tasks as appropriate.
- C. Mitigation
 - 1. Support and plan for mitigation measures specific to ESF-10.
 - 2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
 - 3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
 - 4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.

5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

D. Response

1. ESF-10 will coordinate, with the Unified/Incident Command, all hazardous substance response-specific efforts and provide information to the EOC for coordination.
2. Provide 24-hour response capability and dispatch personnel to an incident scene as necessary.
3. ESF-10 will assess the situation to include: the nature, amount and location of real or potential releases of hazardous materials; pathways to human and environmental exposure; probable direction and time of travel of the materials; potential impact on human health, welfare, safety, and the environment; types, availability, and location of response resources, technical support, and cleanup services; and priorities for protecting human health, welfare and the environment; and guidance for public protective actions.
4. After reviewing reports, gathering and analyzing information and consulting with appropriate agencies, determine and provide, as available, the necessary level of assistance.
5. Provide protective action recommendations such as evacuation or shelter in place, as the incident requires.
6. Provide for monitoring to determine the extent of the contaminated area and consult with appropriate support agencies to provide access and egress control to contaminated areas; request assistance as required.
7. Consult with appropriate local, state, or federal agencies and/or private organizations with regard to the need for decontamination. Coordinate with ESF-8 (Health and Medical) regarding decontamination of injured or deceased personnel.
8. Coordinate decontamination activities with appropriate local, state, and federal agencies.
9. Coordinate with appropriate local, state, and federal agencies to ensure the proper disposal of wastes associated with hazardous materials incidents; and assist in monitoring or tracking such shipments to appropriate disposal facilities.
10. Coordinate with ESF-3 (Public Works and Engineering) for technical assistance on water, wastewater, solid waste, and disposal.
11. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.

E. Recovery

1. Terminate operations when the emergency phase is over and when the area has been stabilized by responsible personnel. ESF-10 will track continued or needed remediation as necessary.
2. Request and maintain documented records of all expenditures, money, and physical resources of the various governmental

departments/agencies involved in emergency operations. Ensure that ESF-10 team members or their agencies maintain appropriate records of costs incurred during the event.

3. Anticipate and plan for arrival of, and coordination with, SCDES ESF-10 personnel in the EOC and the Joint Field Office (JFO).

V. RESPONSIBILITIES

A. Colleton County Fire-Rescue

1. Identify, train, and assign personnel to assist SCDES staff ESF-10 in the EOC.
2. Notify all ESF-10 supporting agencies on activation.
3. Provide technical assistance in identifying areas that may contain hazardous materials.
4. Review files submitted by industry to EMD & SCDES regarding presence of chemicals covered under the EPCRA (Emergency Planning and Community Right to Know Act) Tier II program (computer accessible).
5. Provide and/or coordinate technical assistance on hazards associated with chemicals known to be present in the disaster area.
6. Provide technical assistance on hazardous material recognition and identification.
7. Coordinate responsible party responses or the use of Federal/State contractors to control and contain a hazardous material release to protect public health and/or the environment.
8. Develop and coordinate activation procedures for Lowcountry Regional Type II Hazmat Team.
9. Develop and coordinate the South Carolina Technical Radiological Response Plan.
10. Develop and maintain a list of HazMat Response Resources (including those for radiological incidents).

B. S.C. Department of Environmental Services (SCDES)

1. Serves as lead ESF-10 agency at the state level
2. Assists with all hazardous materials release mitigation
3. Can evaluate hazardous materials release impacts on environment

C. Colleton County Sheriff's Office

1. Identify, train, and assign personnel to maintain contact with and prepare to conduct operations in support of ESF-10 during periods of activation.
2. Provide communications support, security, transportation, and traffic control.
3. Provide air support (rotary) for surveillance and transportation of essential personnel.

D. Edisto Beach Fire Department

1. Identify, train, and assign personnel to maintain contact with and prepare to conduct operations in support of ESF-10 during periods of activation.

2. Act as an Incident Commander, when needed, and coordinate with SCDES and/or USCG On-Scene Coordinator during hazardous materials incidents.
3. Provide assistance under the Firefighter Mobilization Act to support ESF-10 operations.

E. Walterboro Fire Department

1. Identify, train, and assign personnel to maintain contact with and prepare to conduct operations in support of ESF-10 during periods of activation.
2. Act as an Incident Commander, when needed, and coordinate with SCDES and/or USCG On-Scene Coordinator during hazardous materials incidents.
3. Provide assistance under the Firefighter Mobilization Act to support ESF-10 operations.

F. S.C. Department of Natural Resources

1. Identify, train, and assign personnel to maintain contact with and prepare to conduct operations in support of ESF-10 during periods of activation.
2. Provide technical advice and assistance on environmental contamination issues.
3. Provide personnel, watercraft, and technical assistance.
4. Provide support for communications, water-related evacuation, personnel, security, all-terrain vehicles, watercraft, and aircraft support.
5. Can provide staff that can evaluate the impact of hazardous materials release on local wildlife and the environment

G. South Carolina National Guard 43rd Civil Support Team

1. Maintains a robust hazardous materials response team

H. U.S. Coast Guard

1. Can respond assets to hazardous materials releases in navigable waterways

VI. LOCAL, STATE, AND FEDERAL INTERFACE

- A. This ESF is supported by the State and Federal Response Plan ESF-10. State's primary agency is SCDES, while the Federal primary agency is EPA.

ESF-11 – Food Services

Primary: Department of Social Services (DSS)

Support: Colleton County School District, American Red Cross, Lowcountry Food Bank, The Salvation Army, South Carolina Volunteers Organizations Active in Disasters (VOAD), Private Feeding Contractors

| Reports To | Receives Reports From |
|-------------------------------------|--|
| ESF-7 (EOC Logistics Section Chief) | Colleton County School District, American Red Cross, Lowcountry Food Bank, The Salvation Army, South Carolina Volunteers Organizations Active in Disasters (VOAD), Private Feeding Contractors |

I. INTRODUCTION

- A. A large area emergency or a disaster often deprives mass numbers of people of the ability to obtain or prepare food. In addition to the local loss of power and/or gas, commercial suppliers and supply lines may be disrupted. Outside the impacted area there are organizations, suppliers, and transportation systems that can make emergency food available to those most in need. However, emphasis will still be placed on individual preparedness and family caches of emergency food and water for those events that have no warning period.
- B. On the fringes of the affected areas, schools and small institutions with food inventories could be used to begin the feeding of disaster victims. An effective feeding operation must be immediately initiated, to include obtaining appropriate United States Department of Agriculture (USDA) food supplies, arranging for transportation of those food supplies to designated staging areas within the disaster area, and requesting the Disaster Food Stamp Program as required. USDA food supplies secured and delivered will be suitable for either household distribution or congregate meal service as appropriate. Transportation and distribution of USDA food supplies to the affected areas will be coordinated by the Department of Social Services (DSS). Priority will be given to transportation of critical supplies of USDA food into areas of acute need.

II. MISSION

- A. The purpose of this Emergency Support Function is to identify, secure, and arrange the transportation of food assistance to affected areas within the County following a major disaster or emergency or other event requiring County, State, and possibly Federal response. These guidelines also serve the purpose of coordination amongst agencies with similar missions but separate organizational management.

III. CONCEPT OF OPERATIONS

- A. DSS will serve as the supervisor of ESF-11.

- B. DSS is responsible for developing and maintaining this ESF, as well as pertinent SOPs, and coordinating with other supporting agencies.
- C. Individual agency plans will be coordinated with DSS and are not contained herein as part of these guidelines.
- D. Although DSS is the coordinating agency, each supporting agency will operate under their regulation and directives as required by law, as applicable, and will remain under their individual agency control.
- E. DSS will gather information from food services member agencies and other organizations concerning their operational response, USDA food supplies, and USDA food management requirements.
- F. ESF-11 will coordinate with State and local recovery groups and ESF-6 regarding the location of staging areas and feeding sites and the resolution of the feeding problem areas.
- G. DSS, at the EOC, will be the point of contact for coordinating requests for USDA food.
- H. DSS will coordinate with ESF-7 to develop requests to SCEMD and FEMA for Water and Meals Ready to Eat (MRE's) to be distributed from distribution points to be designated within the community.
- I. All ESF-11 personnel will be trained on the principles of the National Incident Management System (NIMS) and integrate those principles into all ESF-11 planning and response operations.

IV. ESF Actions

A. Preparedness

1. Maintain an accurate roster of personnel assigned to perform ESF-11 duties during a disaster.
2. Identify and schedule disaster response training for ESF-11 personnel.
3. Maintain current food resource directories to include maintaining points of contact.
4. Identify likely transportation needs and coordinate with ESF-1.
5. Participate in state exercises and conduct, at least annually, an ESF-11 exercise to validate this annex and supporting plans.
6. Coordinated with ESF-7 to pre-identify potential locations for FEMA/COE distribution points.

B. Mitigation

1. Support and plan for mitigation measures specific to ESF-11.
2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

1. Inventory food supplies and determine availability of food within the disaster area.
2. Coordinate with ESF-6 to identify the number of people in shelters and others in need of food.
3. Coordinate with ESF-6 to identify the locations of all mass feeding and distribution sites.
4. Coordinate with ESF-7 and ESF-18 to acquire food, equipment, and supplies required to support food service operations. Acquisitions include, but are not limited to, donated food, purchase of additional food, and refrigerated trailers.
5. Coordinate with ESF-1 for transportation of food supplies into the disaster area.
6. Assess warehouse space and needs for staging areas.
7. Coordinate flow of request and delivery of food into disaster area to ensure daily requirements are met.
8. Assess the need and feasibility of issuing disaster supplemental nutrition assistance (DSNAP).
9. In coordination with ESF-6, monitor the number of mass feeding sites, soup kitchens, and pantries providing food to disaster victims.
10. Establish communications with State ESF-11 to coordinate food service assets beyond county capability.
11. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.

D. Recovery

1. Continue to monitor food requirements.
2. Coordinate implementation of the Disaster Supplemental Nutrition Assistance Program (DSNAP).
3. In coordination with ESF-6, assess special food concerns of impacted residents.
4. Establish logistical links with local organizations involved in long term congregate meal services.
5. Ensure ESF-11 team members or their agencies maintain appropriate records of costs incurred during the event.

V. RESPONSIBILITIES

A. Department of Social Services (DSS)

1. Identify, train, and assign DSS personnel to staff ESF-11 in the EOC.
2. Develops operating procedures to implement the DSS Food Service functions of ESF-11, including an alerting list of DSS emergency food services responders.
3. Assesses the stock levels of USDA food (commodities) administered by DSS and the availability of storage space, handling equipment, and support personnel. Coordinates with ESF-6/11 supporting agencies.
4. Participates in exercises to test operating procedures.

5. DSS will coordinate meetings as necessary in which member agencies and organizations will discuss their operational response and resolve problems, to ensure coverage of the critical food needs of the affected population, and to prevent duplication of effort.
6. Provides DSS staff to EOC, as requested; alerts Departments of Education and Agriculture food service team members via the State EOC ESF-11. Notify all ESF-11 supporting agencies upon activation.
7. Coordinates with the food services member agencies and organizations in their assessment of the critical food needs of the affected population and the availability of food preparation facilities, and compiles reports for EOC, coordinating with ESF-7 to address shortfalls.
8. In response to requests for USDA food, arranges shipment of USDA food (commodities) administered by DSS. Coordinates with other food services member agencies and organizations in their shipment of USDA food to designated staging areas or distribution points.
9. Alternate site for distribution is the Recreation Center.
10. Coordinates the DEMOB of USDA food distribution to staging areas.
11. Coordinates with USDA food distribution agencies and with agencies and organizations involved in feeding, to collect reports and records of USDA food usage, labor (staffing hours), and associated expenditures. Compiles a final report for EOC Logistics Chief.
12. Support Disaster Supplemental Nutrition Assistance Program (DSNAP) activities.

B. Colleton County School District

1. Develops operating procedures to implement ESF-11, including an alerting list of Colleton County School District emergency food services responders.
2. Assesses the stock levels of USDA food administered by Department of Education and the availability of storage space, handling equipment, and support personnel. Coordinates with the contracted commercial distributors.
3. Assists county school district food services supervisors by disseminating information and providing guidance in their development of emergency response operational procedures.
4. Provides Colleton County School District staff to EOC.
5. Coordinates with affected school districts in their assessment of USDA food requirements and the condition of the school district's food preparation facilities. Assists DSS in coordinating with other food service agencies and organizations to gather information concerning their food requirements and food preparation facilities and to respond to requests for USDA food.
6. Assesses USDA food stocks administered by Department of Education and distribution facilities.
7. Coordinate the availability of transportation for USDA food.

8. Initiates a DEMOB of USDA food distribution as feeding operations decrease.
9. Collects and records all food usage and distribution, labor (staffing hours), and associated expenditures. Compiles and provides a final report to ESF-11 or EOC Logistics Chief.

C. American Red Cross

1. Assist in identifying and assessing requirements for food prior to and during immediate and sustained phases, as needed.
2. Participate in the coordinated distribution of disaster food either by bulk distribution of food products or prepared meals.
3. Provide independent food preparation and distribution in accordance with Red Cross policies.

D. The Salvation Army

1. Assist in identifying and assessing requirements for food on a two-phase basis: critical emergency needs immediately after the disaster and long-term sustained needs after the emergency phase is over.
2. Assist with the distribution of coordinated disaster relief supplies.
3. Per established agreements with local vendors, supplement USDA food stocks.
4. Provide independent food preparation in accordance with Salvation Army policies.

E. South Carolina Volunteer Organizations Active in Disasters (SC VOAD)

1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-11 during periods of activation.
2. Coordinate with ESF-11 and 18 to provide staffing to assist with disaster relief operations.

F. Food Service Contractors

1. Provide food services to responders and EOC staff during activations
2. Through contractual agreements, provides food to other state and local agencies during states of emergency.
3. Coordinates with food distribution agencies and with agencies and organizations involved in feeding, to collect reports and records of food usage, labor (staffing hours), and associated expenditures. Compiles a final report for EOC Logistics Chief.

VI. LOCAL, STATE, AND FEDERAL INTERFACE

- A. This ESF is supported by State and FEMA in their EOP's by the ESF-11 designation. Municipal EOC's, regardless of ESF designations, are responsible for coordinating emergency food relief for their citizens and will be coordinated with when they are operational. ESF-11 will also coordinate with ESF-6, Mass Care Operations in providing emergency food supplies.

ESF-12 – Energy

Primary: Colleton County Fire-Rescue

Support: Dominion, Coastal Electric Cooperative, Edisto Electric Cooperative, local fueling stations

| Reports To | Receives Reports From |
|------------------------------------|---|
| ESF-5 (EOC Planning Section Chief) | Dominion, Coastal Electric Cooperative, Edisto Electric Cooperative, local fueling stations |

I. INTRODUCTION

- A. Energy includes producing, refining, transporting, generating, transmitting, conserving, building, and maintaining electric and natural gas energy system components. Damage to a system can have a rippling effect on supplies, distribution, or other transmission systems.
- B. ESF-12 will closely coordinate with the electric and natural gas utilities operating in the state to ensure the integrity of power supply systems are maintained during emergency situations and any damages incurred are repaired and services restored in an efficient and expedient manner afterward. ESF-12 will have primary responsibility to monitor and coordinate the availability of electric utility generating capacity and reserves, the availability and supply of natural gas, supply and transportation of power generation and transportation fuels, and emergency power. ESF-12 will also monitor and coordinate the restoration of electric and natural gas services for normal community functioning.

II. MISSION

- A. To assess the extent of damage, provide information, and as required, coordinate the restoration of services as part of the immediate response and long-term recovery. This ESF in the EOP also serves to provide guidance in the development of individual agency plans.

III. CONCEPT OF OPERATIONS

- A. The Colleton County EOC Planning Section Chief (ESF-5) serves as the Supervisor of ESF-12 in the absence of a designee provided by one of the support agencies. The ESF Supervisor will coordinate response and recovery operations with each supporting agency who will maintain their autonomy and internal chain of command. Upon activation of the EOC, ESF-12 will request utility companies to provide representation at the EOC or, in some circumstances, the incident CP. Given the overwhelming circumstances that each utility company faces during a disaster, this may not be possible. In cases, where utility companies cannot provide EOC representation, utility companies must communicate (or provide communication links) to situational reports.

- B. Local Utility companies are likely to be victims of the disaster and will require time to move into the response and recovery phases.
 - C. Damage assessment information will be reported by utility crews to their EOC representatives for dissemination to ESF-5.
 - D. Coordination between all of the support agencies will occur in order to ensure operational readiness, emergency response, and recovery.
 - E. ESF-12 will coordinate with public and investor-owned and operated power and communication services to ensure equitable provision and/or restoration of services.
 - F. Coordinating with ESF-6 (Mass Care) and County EOC to identify emergency shelter power restoration status/needs and coordinate with ESF-12 support agencies and other ESFs with assistance in providing resources for emergency power generation.
 - G. Restoration of services will occur, where practical, according to priorities established in the supporting SOPs.
 - H. Ensure all ESF-12 personnel integrate NIMS principles in all planning. As a minimum, primary action officers for all ESF-12 agencies will complete FEMA's NIMS Awareness Course, or an equivalent course.
- IV. ESF ACTIONS - The emergency operations necessary for the performance of this function include but are not limited to:
- A. Preparedness
 1. Develop and maintain current directories of suppliers of services and products associated with this function.
 2. Participate in state exercises and conduct, at least annually, an ESF-12 exercise to validate this annex and supporting plans.
 3. Establish liaison with support agencies and energy-related organizations.
 4. In coordination with public and private utilities, ensure plans for restoring and repairing damaged energy systems are updated.
 5. In coordination with public and private utilities, establish priorities to repair damaged energy systems and coordinate the provision of temporary, alternate, or interim sources of natural gas supply, petroleum fuels, and electric power.
 6. Promote and assist in developing mutual assistance compacts with the suppliers of all power resources.
 7. Develop energy conservation protocols.
 - B. Mitigation
 1. Support and plan for mitigation measures specific to ESF-12.
 2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
 3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
 4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.

5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

1. Analyze affected areas to determine operational priorities and emergency repair procedures with utility field personnel. Provide status of energy resources to ESF-5 who will relay the information to the EOC Operations Chief.
2. In coordination with public and private utilities, prioritize rebuilding processes, if necessary, to restore power to affected areas.
3. Locate fuel for emergency operations.
4. Administer, as needed, statutory authorities for energy priorities and allocations.
5. Apply necessary county resources and coordinate with municipalities, to include debris removal, in accordance with established priorities in response to an emergency.
6. Provide energy emergency information, education and conservation guidance to the public in coordination with the ESF-15 (Public Information).
7. Coordinate with ESF-1 (Transportation) for information regarding transport of critical energy supplies.
8. Plan for and coordinate security for vital energy supplies with ESF-13 (Law Enforcement).
9. Maintain continual status of energy systems and the progress of utility repair and restoration activities to include collecting and providing energy damage assessment data to ESF-3 (Public Works).
10. Recommend energy conservation measures.
11. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.

D. Recovery

1. Maintain coordination with all supporting agencies and organizations on operational priorities and emergency repair and restoration.
2. Continue to provide energy emergency information, education and conservation guidance to the public in coordination with the ESF-15 (Public Information).
3. Continue to conduct restoration operations until all services have been restored.
4. Ensure that ESF-12 team members or their support agencies maintain appropriate records of costs incurred during the event.

V. RESPONSIBILITIES

A. Colleton County Fire-Rescue

1. Identify, train, and assign personnel to staff ESF-12 in the EOC.
2. Notify all ESF-12 support agencies upon activation.
3. Develop and maintain a list of energy providers / suppliers in Colleton County.

4. Maintain communications with electric utilities in responding to and recovering from emergencies regarding electric generating capacity shortages, electric generating fuel shortages, transmission and distribution line outages, and electrical service outages affecting the public.
 5. Develop protocols to establish priorities to repair damaged energy systems and coordinate the provision of temporary, alternate, or interim sources of fuel and electric power.
 6. Develop protocols to report the following:
 - a) Utility electric generating capacity.
 - b) Utility electric demand.
 - c) By Communities, number of customers impacted, and estimated restoration time.
 - d) Status of major generating unit outages.
 - e) Expected duration of event.
 - f) Explanation of utility planned actions and recommendations of agency actions in support of utilities.
 - g) Maintain status of natural gas pipelines to include private sector providers that connect to utility-maintained pipelines, coordinating with ESF-1.
 7. Executes local and statewide emergency refueling plan while coordinating with local municipal governments.
- B. Dominion
1. Identify and assign personnel to maintain contact with and prepare to execute missions in support of ESF-12 during periods of activation. On request, staff ESF-12 in the EOC.
 2. Direct efforts to manage transportation of supplies in the event of a shortage of supplies and equipment needed to restore utilities as required for residential, commercial, or industrial purposes.
 3. Provide equipment and technical assistance as required.
 4. Coordinate energy restoration efforts with ESF-3
- C. Coastal Electric Cooperative
1. Identify and assign personnel to maintain contact with and prepare to execute missions in support of ESF-12 during periods of activation. On request, staff ESF-12 in the EOC.
 2. Direct efforts to manage transportation of supplies in the event of a shortage of supplies and equipment needed to restore utilities as required for residential, commercial, or industrial purposes.
 3. Provide equipment and technical assistance as required.
 4. Coordinate energy restoration efforts with ESF-3
- D. Edisto Electric Cooperative
1. Identify and assign personnel to maintain contact with and prepare to execute missions in support of ESF-12 during periods of activation. On request, staff ESF-12 in the EOC.

2. Direct efforts to manage transportation of supplies in the event of a shortage of supplies and equipment needed to restore utilities as required for residential, commercial, or industrial purposes.
3. Provide equipment and technical assistance as required.
4. Coordinate energy restoration efforts with ESF-3
5. Edisto Electric Cooperative provides limited power including only the far northwestern (Morningstar Lane) and far northeastern (Happiness Lane) portions of Colleton County.

E. Local Fueling Stations

1. The ability to provide consumers with fuel for automobiles is an activity that is continually tracked by ESF-5.
2. ESF-5 also monitors LP Gas providers to ensure that they are capable of supplying consumers. Many critical facilities (i.e. fire stations, communications hubs, shelters) use LP as fuel for backup generators.

VI. LOCAL, STATE, AND FEDERAL INTERFACE

- A. This annex is supported by the State Emergency Operations Plan and Federal Response Plan ESF-12, Energy. At the State level, ESF-12's lead agency is the Office of Regulatory Staff and at the Federal level, the U.S. Department of Energy is the lead agency. ESF-12 gathers, assesses, and shares information on energy system damages and the impact of energy system outages. ESF-12 works closely with and aids in meeting requests from state and local energy officials, energy suppliers, and distributors. Energy is defined as producing, refining, transporting, generating, transmitting, conserving, building, and maintaining energy systems and energy system components.
- B. During extended operations, ESF-3 (normally assigned to the Operations Section Chief) and ESF-12 (normally assigned to the Planning Section Chief) may be assigned to the Recovery Section Chief.

ESF-13 - Law Enforcement

Primary: Colleton County Sheriff's Office

Support: Walterboro Police Department, Edisto Beach Police Department, Cottageville Police Department, State Law Enforcement Division (SLED), S.C. Highway Patrol, S.C. Department of Probation, Pardon, & Parole Services (SCPPP), S.C. Department Natural Resources (SCDNR), S.C. Department of Environmental Services (SCDES), South Carolina National Guard, US Customs and Border Protection

| Reports To | Receives Reports From |

| EOC Operations Section Chief | Walterboro Police Department, Edisto Beach Police Department, Cottageville Police Department, State Law Enforcement Division (SLED), S.C. Highway Patrol, S.C. Department of Probation, Pardon, & Parole Services (SCPPP), S.C. Department Natural Resources (SCDNR), S.C. Department of Environmental Services (SCDES), South Carolina National Guard, US Customs and Border Protection |

I. INTRODUCTION

A. Effective Law Enforcement (LE) is critical to operations during major emergencies and disasters to ensure community recovery without the additional hindrance of civil disorder. Local law enforcement is responsible for carrying out the laws, traffic control, investigation of crimes, and other public safety duties within their jurisdiction. State support will be on a mission type basis, as resources become available.

II. MISSION

A. To provide guidelines for the coordination of plans for the effective use of available Law Enforcement resources during special police operations, a major emergency, or disaster response. Resources include both personnel and specialized equipment provided at all levels of government. General Law Enforcement is inclusive of all law enforcement tasks excluding traffic management (ESF--16).

III. CONCEPT OF OPERATIONS

- A. The Colleton County Sheriff's Office (CCSO) will serve as the primary agency for ESF-13. The support agencies will coordinate with the CCSO while maintaining their autonomy and chain of command.
1. Walterboro, Edisto, and Cottageville municipalities operate local police departments. Colleton County Sheriff's Office operates as the primary

law enforcement agency in all unincorporated areas, municipal areas not listed above and provides support to all municipal police forces.

- B. CCSO is responsible for developing and maintaining law enforcement plans for ESF-13 in coordination with the supporting agencies.
 - C. Coordination with all appropriate agencies, departments, and organizations will be performed by CCSO to ensure operational readiness in time of emergency.
 - D. LE activities will be conducted under this plan at the Emergency Operations Center (EOC) or, in some circumstances, at the incident command post (CP).
 - E. The jurisdictional police chiefs will coordinate operations in their local area and will request assistance from the ESF-13 as necessary. Tasked resources will report to the jurisdictional department officer in charge for assignment.
 - F. Upon notification from the EOC, CCSO will send a representative to the EOC to coordinate law enforcement activities.
 - G. Mutual Aid Law Enforcement Departments from outside the area, that are not State Law Enforcement agencies, are not likely to be in a position to make arrests on their own, and therefore, will be teamed up with the host jurisdiction police department.
 - H. South Carolina National Guard units will be assigned tasks on a mission type basis and will be accompanied by representatives of state and local law enforcement agencies.
 - I. Private security agencies or volunteers will not be used unless they are sworn and specially trained deputies or auxiliary police. Such personnel will come under the responsibility of the agency which appoints and utilizes them.
 - J. The local law enforcement agency in command will retain direction and control. SLED will coordinate directly with the local level law enforcement agency in control and will coordinate activities for all other state law enforcement agencies involved as it relates to general law enforcement duties.
 - K. In accordance with SC Code of Laws Section 23-3-15 (A) (8), SLED has specific and exclusive jurisdiction and authority for coordinating the state response in the event of a terrorist threat or actual incident.
 - L. The South Carolina National Guard is activated to State Active Duty (SAD) on approval of the Governor through an Executive Order. National Guard forces are to be deployed on a mission-by-mission basis to assist in the protection of life, property, and maintenance of law and order and will be utilized with, or accompanied by, representatives of supported law enforcement agencies.
 - M. Ensure all ESF-13 personnel integrate National Incident Management System (NIMS) principles in all planning. As a minimum, primary action officers for all ESF-13 agencies will complete FEMA's NIMS Awareness Course, or equivalent course.
- IV. IV. ESF ACTIONS - The emergency operations necessary for the performance of this function include but are not limited to:
- A. Preparedness
 - 1. Identify agencies, organizations, and individuals, capable of providing law enforcement support services and associated resource inventories.

2. Analyze potential hazards in the area and special law enforcement operational requirements and plan accordingly.
3. Coordinate agency SOGs, not contained here, with all organizations that are part of the law enforcement planning group to include law enforcement resource list (for security reasons is not included within this plan).
4. Establish and maintain liaison with federal, state and local agencies.
5. Use normal operations as an opportunity to test mutual aid agreements and interagency communications.
6. If so designated, plan for representation at the EOC and plan out shift schedules and other work requirements.
7. Review other ESFs related to LE operations as well as operational plans for evacuation, security, and non-routine functions.
8. Provide training opportunities to EOC LE personnel offered by the State and County EMDs, the South Carolina Fire Academy, and other institutions specializing in emergency management.
9. Keep the primary agency and others informed of key personnel changes and operational capabilities that can impact ESF-13 operations.

B. Mitigation

1. Support and plan for mitigation measures specific to ESF-13.
2. Support requests and directives from the Sheriff, the County Administrator, Governor and/or FEMA concerning mitigation activities.
3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

1. Provide warning and communications in support of the communications and warning plans.
2. Provide EOC and/or Command Post representatives when requested by EMD, the Sheriff, or as required by the incident.
3. Provide security to EOC during full activations or upon request.
4. Maintain unit logs, reports, Situation Reports (SITREPs), and other documents as required.
5. Participate in Group Periodic Briefings as conducted at the EOC or CP.
6. Remain in close coordination with the Operations Section Chief and supporting agency representatives and forward unmet needs to the EOC Operations Section Chief.
7. Participate in Incident Action Plan development and make recommendations for standing down as the situation approaches normal

operations. Event specific operational guidelines are maintained in separate documents by responsible agencies.

8. Secure evacuated areas, including safeguarding critical facilities and shelters, and control entry and exit to the disaster area as required.
9. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.

D. Recovery

1. DEMOB operations as directed by the EOC.
2. Continue those operations necessary to protect people and property.
3. Assist in return of evacuees.
4. Provide documentation to the Group Supervisor regarding labor, materials, and equipment expended for reimbursement consideration.
5. Submit SITREPs, after-action reports, and other documents as may be requested by EMD or the primary agency.
6. Provide an acceptable level of representation at the EOC as operations return to normal.
7. Attend all Critical Incident Stress Debriefing (CISD) briefings and debriefings/critiques as available and forward recommended operational changes to the Operations Section Chief.
8. Update plans and supporting guidelines and this ESF as applicable.

V. RESPONSIBILITIES

A. Colleton County Sheriff's Office (CCSO)

1. Identify, train, and assign Sheriff's Office personnel to staff ESF-13 in the County EOC.
2. Notify all ESF-13 supporting agencies upon activation.
3. Identify agencies, organizations, and individuals, capable of providing law enforcement support services and associated resource inventories.
4. Develop and coordinate a comprehensive plan to marshal and deploy law enforcement assets during emergencies.
5. Develop and coordinate a plan for the safe sheltering or re-location of detention center populations.
6. Develop and maintain a list of local mutual aid Law Enforcement resources that will be maintained by the Dispatch Center.
7. Develop a training program for all ESF-13 team members involved in emergency operations.
8. Provide for the gathering and dissemination of intelligence information.
9. Identify, train and assign personnel (liaison officer and, where possible, administrative support) to staff ESF-13 operations in the EOC or Command Post.
10. Deploy, upon request, the Command Post to support on-scene operations.
11. Provide initial windshield survey of damage assessment in impacted areas.

12. Secure evacuated areas, including safeguarding critical facilities, control entry and exit to the disaster area as requested, provide security to shelters, and assist with evacuation routes (including Traffic Control Points [TCP's]).
 13. Provide access and security at emergency scenes.
 14. Secure prisoner population.
 15. Staff the Emergency Operations Center (EOC) as directed.
 16. Conduct investigations, as may be necessary involving alleged criminal activity.
 17. Provide assistance in securing perimeter (inner and outer zone) of affected area and/or command post.
 18. Provide assistance with secure egress and ingress of the affected area and key facilities.
 19. Provide command level personnel to the unified command location or Joint Operations Center (JOC).
 20. DEMOB operations as directed by the EOC.
 21. Continue those operations necessary to protect people and property.
 22. Assist in return of evacuees.
 23. Assist with reconstitution of law enforcement agencies as necessary.
 24. Ensure ESF-13 team members or their agencies maintain and submit records of costs incurred during the event.
 25. Conduct and participate in After Action Reports to collect lessons learned from the incident/exercise.
- B. Municipal Law Enforcement Agencies (Walterboro Police Department, Edisto Beach Police Department, Cottageville Police Department)
1. Review and update all plans and Standard Operating Guides (SOG).
 2. Participate in exercises as required.
 3. Establish and maintain alert and mobilization system for staffing of law enforcement command post or staging area at local level.
 4. Furnish pertinent intelligence information to Sheriff's Office and SLED.
 5. Identify, train and assign personnel (liaison officer and, where possible, administrative support) to staff ESF-13 operations in the EOC.
 6. Designate a lead contact.
 7. Provide personnel and resources to the affected area as requested.
 8. Support 24-hour operations both in the field and at the EOC.
 9. Be prepared to establish secure egress and ingress points and area control procedures. Assist with access rosters at entry points.
 10. Assist local authorities as requested.
 11. Provide assistance in securing perimeter (inner and outer zone) of affected area and/or command post.
 12. Provide assistance with secure egress and ingress of the affected area and key facilities.
 13. Provide command level personnel to the unified command location or Joint Operations Center (JOC).

14. Conduct and participate in After Action Reports to collect lessons learned from the incident/exercise.
 15. Provide input and updates to the ESF-13 plan from the lessons learned.
- C. DOD, Federal and State Law Enforcement Division
1. Identify agencies, organizations, and individuals, capable of providing law enforcement support services and associated resource inventories.
 2. Develop and coordinate a comprehensive plan to marshal and deploy state law enforcement assets during emergencies.
 3. Develop a training program for all ESF-13 team members involved in emergency operations.
 4. Provide for the gathering and dissemination of intelligence information.
 5. Identify, train and assign personnel (liaison officer and, where possible, administrative support) to staff ESF-13 as requested.
 6. Secure evacuated areas, including safeguarding critical facilities, and control entry and exit to the disaster area as requested.
 7. Conduct investigations, as may be necessary involving alleged criminal activity.
 8. SLED has specific and exclusive jurisdiction and authority for coordinating the state response in the event of a terrorist threat or actual incident.
 9. Provide assistance in securing perimeter (inner and outer zone) of affected area and/or command post.
 10. Provide assistance with secure egress and ingress of the affected area and key facilities.
 11. Provide command level personnel to the unified command location or Joint Operations Center (JOC).
 12. Provide specialized units and other resources as requested and where available.
 13. DEMOB operations as directed by the EOC.
 14. Continue those operations necessary to protect people and property.
 15. Assist in return of evacuees.
 16. Assist with reconstitution of law enforcement agencies as necessary.
 17. Ensure ESF-13 team members or their agencies maintain and submit records of costs incurred during the event.
- D. S.C. Department of Natural Resources (SCDNR)
1. Review and update all plans and SOG's.
 2. Participate in exercises as required.
 3. Establish and maintain alert and mobilization system for staffing of law enforcement command post or staging area at state and/or local level.
 4. Develop plans as to waterways and woodlands security and response activities (i.e. security of vulnerable infrastructures and areas surrounding the same).
 5. Furnish pertinent intelligence information to SLED.
 6. Identify, train and assign personnel (liaison officer and, where possible, administrative support) to staff ESF-13 operations in the EOC.

7. Provide personnel and resources to the affected area as requested.
 8. Support 24-hour operations both in the field and at the EOC.
 9. Assist local authorities as requested through SLED with law enforcement missions.
 10. Provide assistance in securing perimeter (inner and outer zone) of affected area and/or command post.
 11. Provide assistance with secure egress and ingress of the affected area and key facilities.
 12. Secure waterways if they are in the affected area and within the secure zone.
 13. Provide air support and other resources as requested and where available.
 14. Conduct and participate in After Action Reports to collect lessons learned from the incident/exercise.
 15. Provide input and updates to the ESF-13 plans from the lessons learned.
- E. Other State Law Enforcement Agencies (S.C. Department of Probation, Pardon and Parole [SCPPP], S.C. Department of Environmental Services [SCDES]).
1. Review and update all plans and SOG's.
 2. Participate in exercises as required.
 3. Establish and maintain alert and mobilization system for staffing of law enforcement command post or staging area at state and/or local level.
 4. Furnish pertinent intelligence information to SLED.
 5. Identify, train and assign personnel (liaison officer and, where possible, administrative support) to staff ESF-13 operations.
 6. Provide personnel and resources to the affected area as requested.
 7. Be prepared to establish secure egress and ingress points and area control procedures. Assist with access rosters at entry points.
 8. Assist local authorities as requested through SLED with law enforcement missions.
 9. Provide assistance in securing perimeter (inner and outer zone) of affected area and/or command post.
 10. Provide assistance with secure egress and ingress of the affected area and key facilities.
 11. Conduct and participate in After Action Reports to collect lessons learned from the incident/exercise.
 12. Provide input and updates to the ESF-13 plans from the lessons learned.
- F. SC National Guard (SCNG)
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-13 during periods of activation.
 2. Review and update all plans and SOG's.
 3. Participate in exercises as required.
 4. Establish and maintain alert and mobilization system for staffing of law enforcement command post or staging area at state and/or local level.
 5. Support ESF-13 desk operations with liaison officer availability.

6. Support 24-hour operations both in the field and at the EOC.
7. Be prepared to assist with egress and ingress points and area control procedures. Assist with access rosters at entry points. Provide personnel and resources to support law enforcement missions as requested.
8. Assist local authorities as requested through SLED with law enforcement missions.
9. Provide assistance in securing perimeter (inner and outer zone) of affected area and/or command post.
10. Provide assistance with secure egress and ingress of the affected area and key facilities.
11. Provide command level personnel to the unified command location or Joint Operations Center (JOC).
12. Conduct and participate in After Action Reports to collect lessons learned from the incident/exercise. Provide input and updates to the ESF-13 SOP from the lessons learned.

VI. LOCAL, STATE, AND FEDERAL INTERFACE

- A. ESF-13 does not exist as such in the federal plan but does in the State Emergency Operations Plan (EOP), SLED is the lead agency. For the purposes of planning, most of the coordination meetings that take place will occur in support of specific operations such as storm evacuation, shelter security, and general law enforcement operations in the field during the recovery period. As such, pre-deployment meetings between local and state resources will be necessary to determine exactly what can be expected from each group.

ESF-14 - Recovery and Mitigation

Primary: Colleton County Administration

Support: Colleton County Fire-Rescue, Colleton County Assessor’s Office, Colleton County Finance Department, Municipality Administrations, Colleton County Engineer, South Carolina National Guard, South Carolina State Guard, South Carolina Forestry Commission, Colleton County Chamber of Commerce, Colleton County Economic Alliance, Long-Term Recovery Group (LTRG), Community Foundation of the Lowcountry, Town of Edisto Beach Chamber of Commerce

| Reports To | Receives Reports From |

| EOC Command | Colleton County Fire-Rescue, Colleton County Assessor’s Office, Municipality Administrations, Colleton County Engineer, South Carolina National Guard, South Carolina State Guard, South Carolina Forestry Commission, Colleton County Chamber of Commerce, Colleton County Economic Alliance, Long-Term Recovery Group (LTRG), Community Foundation of the Lowcountry, Town of Edisto Beach Chamber of Commerce, Local Emergency Planning Committee (LEPC), Community Emergency Response Team (CERT), Colleton County Library, ESF-18, ESF-24 |

I. INTRODUCTION

A. County assistance under this function consists of two components:

1. RECOVERY activities are those actions that enable disaster victims to begin the process of rebuilding their homes; replacing property; resuming employment; restoring businesses; permanently repairing, rebuilding, or relocating public infrastructure.
2. MITIGATION activities are those actions that either prevent the occurrence of an emergency or reduce the community's vulnerability in ways that minimize the adverse impact of a disaster or other emergency.

B. Within the Incident Command System (ICS) utilized by Colleton County during emergencies, ESF-14 is a part of both the Finance and Recovery Sections although it is normally illustrated as part of only the Recovery Section.

1. Public Assistance (PA), recovery efforts for publicly owned properties and costs such as government facilities or force account labor, is the portion of the recovery process normally supervised by the Finance Section.
 - a) Each municipal government is responsible for seeking FEMA reimbursement for PA costs incurred during a disaster. The

Colleton County Finance Department manages this task for Colleton County Government.

2. Individual Assistance (IA), recovery efforts for privately owned properties such as a privately owned dwelling, is the portion of the recovery process normally supervised by the Recovery Section.
 - a) Individual Assistance incorporates the efforts of many local, state, and federal entities as well as a multitude of VOADs. These efforts are normally managed by the Colleton County Clerk to Council.

II. MISSION

- A. To provide for the coordinated effort of all concerned parties involved with recovery in the community during and after a disaster or major emergency. These events include both natural and man-made emergencies.

III. CONCEPT OF OPERATIONS

- A. The Recovery Section Chief supervises ESF-14 as well as ESF-18 and ESF-24.
- B. The Recovery Section includes ESF-14, ESF-18, ESF-24, Colleton County's Long-Term Recovery Group (LTRG), and Colleton County's Local Emergency Planning Committee (LEPC).
 1. ESF-14 is the coordinating point for all other ESF's during the recovery process.
 2. ESF-18 manages Donated Goods and Volunteer Services. Colleton County Parks and Recreation is the lead agency for Donated Goods and Colleton County Fire-Rescue is the lead agency for Volunteer Services and may utilize its Community Emergency Response Team (CERT) to assist with volunteer efforts.
 3. ESF-24 manages Business and Industry. The lead agency is the Colleton County Economic Alliance.
 4. The Long-Term Recovery Group (LTRG) is a community-based group that manages recovery efforts beyond the scope of FEMA's Individual Assistance (IA) Program. In cases where an uninsured resident is ineligible for FEMA IA or IA is not sufficient, the LTRG may provide supplemental assistance.
 5. The Recovery Section Chief serves as the liaison for all of the Recovery Section agencies in the EOC when they are not represented individually.
- C. After a disaster, the EOC is responsible for establishing a Recovery Section Chief as well as identifying and coordinating the ESF-14 effort of all supporting agencies. SCEMD will assist with this through their normal recovery roles.
- D. RECOVERY OPERATIONS: Colleton County Fire-Rescue will coordinate recovery operations in coordination with federal, state and local agencies to address Disaster Assessment needs within the community.
 1. Planning for recovery operations begins before the disaster occurs. Necessary actions to protect the public will have been implemented. Initial recovery activities will begin after the disaster assessment is complete.
- E. Short-term Recovery Priorities are Damage Assessment, Debris Management, Re-entry, Human Services, Continuity of Operations and Continuity of Government [COOP/COG], Utility/Energy Restoration, Temporary Housing, Economic Recovery, Public Information

1. Damage Assessment - The Colleton County Tax Assessor is designated Chief of Real Property Damage Assessment. He/she is responsible for coordinating and managing real property damage assessment activities resulting from any disaster situation. As soon as it is safe to do so, the Assessor's Office will organize a Local Initial Damage Assessment (LIDA) with emphasis on areas specified by the EOC, based on reports of damage from the field. The County Assessor will designate the organization and determine the number of LIDA teams, based on the area of damage. He/she will consolidate the LIDA reports into the Colleton County Damage Assessment Report to be transmitted to SCEMD.
 - a) In 1988, the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. §§ 5121-5206) was enacted to support State and Local governments and their citizens when disasters overwhelm them. This law, as amended, establishes a process for requesting and obtaining a Presidential disaster declaration, defines the type and scope of assistance available from the Federal government, and sets the conditions of obtaining that assistance. The Federal Emergency Management Agency (FEMA) is tasked with coordinating the application of this program. Requests for Presidential disaster declarations begin with a rapid, but detailed, assessment of the damage sustained within local communities. These damage assessments are aggregated at the state level and submitted to the regional FEMA office to be forwarded to the President for consideration. Therefore, timely and accurate initial damage assessments are paramount in enabling recovery resources for Colleton County citizens.
 - b) Supplies, equipment and transportation necessary to conduct damage assessment, when not available, will be requested through the EOC's Logistics Section
 - c) Additional assessments may be required of waterways, beachfronts, crops, etc. using the appropriate damage assessment agency.
 - d) Other Damage Assessment Agencies may include:
 - (1) Local
 - (a) Colleton County Auditor's Office
 - (b) Colleton County Engineer
 - (c) Colleton County Procurement
 - (2) Private Industry
 - (a) Real Estate Professionals
 - (b) Utility/Energy Companies
 - (c) Manufacturers
 - (3) State
 - (a) S.C. Department of Transportation
 - (b) Cooperative Extension Service, Clemson University
 - (c) S.C. State Guard
 - (d) S.C. Forestry Commission
 - (4) Federal

- (a) United States Department of Agriculture
 - (b) Federal Emergency Management Agency
- (5) Volunteer
 - (a) American Red Cross
- 2. Debris Management - ESF-3 handles debris removal and disposal from public property.
 - a) A “first-push” debris clearing is moving debris from the roadway to the sides of roadways returning community accessibility by road to emergency responders.
 - b) Debris management beyond “first-push” involves picking up debris and disposing (chipping or burning) of such debris. These efforts can involve a number of public and private entities, depending on the scale of debris involved. These efforts will also involve SC DES who will approve or monitor debris sites.
 - c) As a general rule, the cost of debris removal on private property is ineligible for FEMA assistance because it is the responsibility of the individual property owners or the homeowner’s association and not in the public interest, as defined by the Stafford Act. However, a Private Property Debris Removal (PPDR or PPRD) may be approved by FEMA if the request demonstrates that such removal is in the public interest when it is necessary to:
 - (1) Eliminate immediate threats to life, public health, and safety; or
 - (2) Eliminate immediate threats of significant damage to improved public or private property; or
 - (3) Ensure economic recovery of the affected community to the benefit of the community-at-large.
 - d) Private property owners are normally expected to move debris to the public road right-of-way in order to be picked up by debris management entities.
- 3. Re-entry
 - a) Re-entry for citizens, property owners and business owners is a priority after a disaster. Necessary preparations for re-entry of the general public will commence once the area has been deemed safe. This will involve a number of ESF’s and more detailed information on re-entry can be found at item “VII. Re-entry and Security” in the Basic Plan of this EOP.
- 4. Human Services
 - a) Following any disaster and after lifesaving activities are complete, the focus shifts to assisting individuals and households in meeting basic needs and returning to self-sufficiency. It is imperative to provide residents with appropriate resources and support during the time that critical services and infrastructure are not fully operational. ESF-6 (Mass Care) and ESF-11 (Food Services) facilitate the delivery of goods and services to meet the basic human needs until those provisions can be obtained by individuals locally.

- b) ESF-18 will coordinate with ESF-14 to assist with Donated Goods and Volunteer Services.
 - (1) Parks and Recreation can manage donated goods.
 - (2) Colleton County Fire-Rescue and its Community Emergency Response Team (CERT) can manage donated/volunteer services.
 - (3) The LTRG can manage donated monies through the Community Foundation of the Lowcountry, which manages LTRG monetary donations for Colleton County citizens.
 - c) Human services also encompass the coordination and delivery of federal disaster assistance programs. If established, residents will be able to obtain information about disaster assistance programs and the application process at a Disaster Recovery Center (DRC). DRC's have been pre-designated and may be established at one or more of the following locations:
 - (1) Colleton County Recreation Center
 - (2) Edisto Beach Civic Center
 - (3) Colleton Civic Center / Hampton Street Auditorium
 - (4) Cottageville Town Hall
5. Continuity of Operations and Continuity of Government (COOP/COG) in emergency situations is critical as COOP/COG ensures continued performance of essential functions and minimizes damage and loss to critical functions of government. It also ensures leadership succession if needed and reduces disruptions in public services.
- a) COOP is explained in more detail in item XI. of the Basic Plan in this EOP.
 - b) COG is explained in more detail in item X. of the Basic Plan in this EOP.
6. Utility/Energy Restoration
- a) The restoration of critical infrastructure and services, such as transportation, infrastructure, power, potable water, wastewater treatment, and communications, are essential to recovery. Restoration of these critical services requires coordination between ESF-2 (Communication), ESF-3 (Public Works and Engineering), ESF-12 (Energy).
7. Temporary Housing
- a) After a disaster, residents who have sustained significant impacts to their home will transition from emergency shelters (i.e. general population evacuation shelter) to temporary housing. When large areas receive significant impacts from a disaster, the demand for large amounts of temporary housing will increase. This will be one of the most critical and essential components of recovery and may be one of the most challenging relief efforts.
 - b) The Housing Recovery Support Function (RSF), discussed below in ESF-14 Section VI (National Disaster Recovery Framework), will coordinate with FEMA, who manages the federal temporary

housing program. Efforts to address housing needs and locations may have great impacts on long-term recovery.

- c) Planning for temporary housing must also address policy obstacles. Procuring adequate temporary housing sites may involve extensions of infrastructure and overcoming land-use issues. Considerations for environmental impacts and constructing sites in locations not readily available to handle such impacts may create additional problems in the long-term.
- d) Colleton County has access to two shelters not owned by the Colleton County School District. Use of these two shelters allows for the temporary housing of citizens who cannot return to their homes while enabling the restoration of school functions.

8. Economic Recovery

- a) Short-term economic survival for most businesses depends upon their ability to access and recover inventory from heavily damaged areas and their ability to find capital to finance reconstruction, especially if their business is uninsured or under-insured.
- b) As is the case with citizens, businesses should establish a continuity of operations plan pre-disaster. This plan should identify their financial position so that they may better position themselves in times of disaster.
- c) It is critical to get services such as grocery stores and childcare services returned to the impacted area. Temporary business locations may be a consideration depending upon the magnitude of the disaster.
- d) ESF-24 will coordinate with ESF-14 to assist with the recovery of Businesses and Industry in Colleton County.

9. Public Information

- a) Dissemination of public information in short-term recovery will be an essential component in sharing information as it relates to Points of Distribution (PODs), Disaster Recovery Centers (DRCs) and other disaster related information, all of which will be managed by ESF-15 (Public Information) and the Joint information Center (JIC).

F. Long-Term Recovery

- 1. Long-Term Recovery involves the work of Recovery Support Functions (RSF's) long after the EOC closes. When necessary, Long-Term Recovery involves Community Redevelopment and Economic Restoration. In cases where disaster impacts are extensive, Long-Term Recovery efforts will attempt to return the community to a "new normal," recognizing that this state of "new normal" may be different from the "normal" that existed prior to the disaster.

G. Mitigation Operations: The EOC will coordinate mitigation activities in coordination with review and enforcement of building codes and permitting.

- 1. Following a Presidential Disaster Declaration, the State Hazard Mitigation Officer (SHMO) will execute the State Mitigation Plan and implement the

Hazard Mitigation Grant Program (HMGP) according to the Hazard Mitigation Grant Program Administrative Plan.

2. The EOC will work through the State Hazard Mitigation Officer to promote and administer mitigation activities within Colleton County.
3. The EOC and the State Hazard Mitigation Officer (SHMO) will work with FEMA and appropriate state agencies to develop a disaster specific mitigation Implementation Strategy. The Implementation Strategy will include an overview of the disaster, geographical and mitigation measure priorities, and a Joint Field Office Action Plan.
4. ESF-14 representation at the EOC will be established pre-incident as it might relate to the initial response phase and post-incident for coordinated recovery operations. Additional support agencies will be added as identified and required.
5. Ensure all ESF-14 personnel integrate NIMS principles in all planning. At a minimum, primary action officers for all ESF-14 agencies will complete FEMA's NIMS Awareness Course, or equivalent course.

H. Disaster Assistance Programs

1. The Federal Declaration Process

- a) The Stafford Act (§401) requires that: "All requests for a declaration by the President that a major disaster exists shall be made by the Governor of the affected State."
- b) The Governor's request is made through the regional FEMA office. State and Federal officials conduct a joint preliminary damage assessment (JPDA) to estimate the extent of the disaster and its impact on individuals and public facilities. This JPDA includes the results of the LIDA (to inform IA estimates) as well as consolidation of other expenses expected by county and municipal governments (to inform PA estimates). This information is included in the Governor's request to show that the disaster is of such severity and magnitude that effective response is beyond the capabilities of the State and the local governments and that Federal assistance is necessary.
- c) Normally, the JPDA is completed prior to the Governor's request for assistance; however, in an obviously severe or catastrophic event, the Governor's request may be submitted prior to the JPDA. In this case the Governor is still the person who makes the request for assistance. Included in the Governor's request is an estimate of the type and amount of assistance needed under the Stafford Act.
- d) Based on the Governor's request, the President may declare a Major Disaster Declaration or an Emergency Declaration, thus activating an array of Federal programs to assist in the response and recovery effort.
- e) A declaration does not imply that all programs are activated for every disaster. The determination of which programs are activated is based on the needs found during damage assessments and any subsequent information that may be discovered.

- f) There are three basic programs offered through FEMA for disaster assistance in a presidentially declared event. They are Individual Assistance (IA), Public Assistance (PA), and Hazard Mitigation Assistance.
2. Individual Assistance (IA)
- a) Federal - Once a presidential declaration is made, funds are available through a series of disaster relief programs to assist in rebuilding communities within the disaster area. These programs are grouped under the title Individual Assistance. The types of assistance available to individuals and families coordinated under FEMA include one or more of the following:
 - (1) The Individuals and Households Program (IHP) combines FEMA and state programs. When a major disaster occurs, this program provides money and services to people in the declared area whose property has been damaged or destroyed and whose losses are not covered by insurance. Two provisions of this program include: Housing Assistance, which is 100% federally funded and covers rental assistance and home repair and replacement. The other is Other Needs Assistance (ONA) that provides financial assistance to individuals and households who have other disaster related necessary expenses or serious needs and do not qualify for a low interest loan from the Small Business Administration (SBA). These programs are designed to provide funds for expenses that are not covered by insurance. They are available only to homeowners and renters who are US citizens, non-citizen nationals, or qualified aliens affected by the disaster.
 - (a) It is important to note that the maximum Individual Assistance grant award from FEMA is around \$41,000 and less than 1% of applicants receive that amount. FEMA's IA is not designed to make an applicant whole. Most applicants receive between \$1,000 and \$2,000 from FEMA's IA program. This suggests that other resources will likely be necessary for a citizen's long-term recovery.
 - (2) The following is a list of the types of assistance available through the IHP program and what each provides.
 - (a) Temporary Housing – Homeowners and renters receive funds to rent a different place to live or a temporary housing unit when rental properties are not available.
 - (b) Repair – Homeowners receive grants to repair damage from the disaster that is not covered by insurance. The goal is to make the damaged home safe and sanitary.

- (c) Replacement – under rare conditions, homeowners receive limited funds to replace their disaster damaged home.
 - (d) Permanent Housing Construction – homeowners and renters receive direct assistance or a grant for the construction of a new home. This type of assistance occurs only in very unusual situations, in insular areas or remote locations specified by FEMA where no other type of housing is possible.
 - (e) Other Needs Assistance (ONA) – applicants receive grants for necessary and serious needs caused by the disaster. This includes medical, dental, funeral, personal property, transportation, moving and storage, and other expenses the FEMA approves. The homeowner may need to apply for a SBA loan before receiving assistance.
 - (f) The Disaster Recovery Reform Act (2018) authorized two maximum award amounts for IHP. The maximum IHP award during the Federal fiscal year 2023 is \$41,000 for Housing Assistance (HA) and \$41,000 for Other Needs Assistance (ONA).
- (3) Small Business Administration (SBA) – The SBA can make federally subsidized loans to repair or replace homes, personal property or businesses that sustained damages not covered by insurance. For many individuals the SBA disaster loan program is the primary form of disaster assistance. Three types of disaster loans are offered to qualified homeowners and businesses:
- (a) Home disaster loans – for homeowners and renters to repair or replace disaster-related damages to home or personal property.
 - (b) Business physical disaster loans – for business owners to repair or replace disaster-damaged property, including inventory, and supplies.
 - (c) Economic Injury Disaster Loans (EIDL) – which provide capital to small businesses and to small agricultural cooperatives to assist them through the disaster recovery period.
- (4) Disaster Unemployment Assistance – The Disaster Unemployment Assistance (DUA) program provides unemployment benefits and reemployment services to individuals who have become unemployed because of major disasters. Benefits begin with the date the individual was unemployed due to the disaster incident and can extend up to 26 weeks after the Presidential declaration date. These benefits are made available to individuals not covered by other unemployment compensation programs,

such as self-employed, farmers, migrant and seasonal workers, and those who have insufficient quarters to qualify for other unemployment compensation. All unemployed individuals must register with the state's employment services office before they can receive DUA benefits. However, although most states have a provision that an individual must be able and available to accept employment opportunities comparable to the employment the individual held before the disaster, not all States require an individual to search for work.

- (5) Disaster Legal Services – When the President declares a disaster, FEMA, through an agreement with the Young Lawyers Division of the American Bar Association, provides free legal assistance to disaster victims. Legal advice is limited to cases that will not produce a fee (i.e., these attorneys work without payment). Cases that may generate a fee are turned over to the local lawyer referral service. The assistance that participating lawyers provide typically includes:
 - (a) Assistance with insurance claims. (life, medical, property, etc.)
 - (b) Counseling on landlord/tenant problems.
 - (c) Assisting in consumer protection matters, remedies, and procedures.
 - (d) Replacement of wills and other important legal documents destroyed in a major disaster.
 - (e) Disaster Legal Services are provided to low-income individuals who, prior to or because of the disaster, are unable to secure legal services adequate to meet their needs as a consequence of a major disaster.
- (6) Special Tax Considerations- Taxpayers who have sustained a casualty loss from a declared disaster may deduct that loss on the federal income tax return for the year in which the casualty actually occurred, or elect to deduct the loss on the tax return for the preceding tax year. In order to deduct a casualty loss, the amount of the loss must exceed 10 percent of the adjusted gross income for the tax year by at least \$100. If the loss was sustained from a federally declared disaster, the taxpayer may choose which of those two tax years provides the better tax advantage. The Internal Revenue Service (IRS) can expedite refunds due to taxpayers in a federally declared disaster area. An expedited refund can be a relatively quick source of cash, does not need to be repaid, and does not need an Individual Assistance declaration. It is

available to any taxpayer in a federally declared disaster area.

(7) Crisis Counseling - The Crisis Counseling Assistance and Training Program (CCP), authorized by § 416 of the Stafford Act, is designed to provide supplemental funding to states for short-term crisis counseling services to people affected in Presidentially declared disaster. There are two separate portions of the CCP that can be funded: immediate services and regular services. The state may request either or both types of funding. To be eligible for crisis counseling services funded by this program, the person must be a resident of the designated area or must have been located in the area at the time the disaster occurred. The person must also have a mental health problem which was caused by or aggravated by the disaster or its aftermath, or the person must benefit from services provided by the program.

b) State - The State of South Carolina may have limited Individual Assistance programs to provide in a disaster that is not discussed above.

c) Local Government assistance to individuals beyond the immediate needs may include programs made available through the use of Community Development Block Grants (CDBG), and access to federal programs through county program managers, including food stamps (or Disaster Supplemental Nutrition Assistance [DSNAP] administered by SC DSS), which may be expedited to qualified individuals. Local nonprofit organizations may provide certain types of assistance for those not eligible for government sponsored programs. Colleton's Long-Term Recovery Group (LTRG) may assist in allocating resources to entities that can assist citizens who cannot access federal or state recovery resources.

3. Public Assistance (PA)

a) Federal - The Federal Emergency Management Agency's Public Assistance Grant Program, oriented to public entities, can fund the repair, restoration, reconstruction, or replacement of a public facility or infrastructure, which is damaged or destroyed by a disaster. As found in the Public Assistance Program Guide (FEMA 322):

(1) Eligible Applicants - Eligible Applicants include state governments, local governments and any other political subdivision of the State, to include Native American Tribes. Certain private nonprofit (PNP) organizations may also receive assistance. Eligible PNPs include educational, utility, irrigation, emergency, medical, rehabilitation, and temporary or permanent custodial care facilities (including those for the aged and disabled), and other PNP facilities

that provide essential services of a governmental nature to the general public. PNPs that provide “critical services” (power, water, including water provided by an irrigation organization or facility, sewer, wastewater treatment, communications and emergency medical care) may apply directly to FEMA for a disaster grant.

- (2) All PNPs must first apply to the Small Business Administration (SBA) for a disaster loan and if declined or if the loan doesn’t cover all the eligible damages, the applicant may re-apply for FEMA assistance.
- (3) The Applicant Briefing – Immediately following the declaration, the State, assisted by FEMA, conducts the applicant briefing for state, local and PNP officials to inform them of the assistance available and how to apply.
- (4) Application must be filed with the State within 30 days after the area is designated eligible for assistance.
- (5) Kickoff Meeting – The Kickoff Meeting is conducted where damages will be discussed, needs assessed, and a plan of action put in place. Federal, state and local public assistance coordinators proceed with project formulation.
- (6) Project Formulation is the process of documenting the eligible facility, the eligible work, and the cost for fixing the damages to every public or PNP facility identified by state or local representatives.
- (7) Project Worksheets (PW) – Project Worksheets contain a description of the damage, scope of work to repair or replace the damaged site and an actual or estimated cost for the project. The project worksheets are reviewed and approved by FEMA and they obligate the federal cost share (which cannot be less than 75 percent) to the state.
 - (a) Appeals can be made when disagreements arise on project worksheets such as cost eligibilities, etc.
 - (b) Projects fall within one of the following categories:
 - (i) Category A: Debris removal
 - (ii) Category B: Emergency protective measures
 - (iii) Category C: Road systems and bridges
 - (iv) Category D: Water control facilities
 - (v) Category E: Public buildings and contents
 - (vi) Category F: Public utilities
 - (vii) Category G: Parks, recreational, and other
- (8) Small Projects –Projects falling below a certain cost threshold are considered small projects. Thresholds are set by FEMA in the Federal Register Notice for each federal fiscal year (as required by The Stafford Act, Public Law 93-288). The threshold is adjusted annually for inflation. Payment of the federal share of the estimate is

made upon approval of the project and no further accounting to FEMA is required.

(9) Large Projects - Large Projects are defined by a cost threshold set in the same Federal Register Notice as stated above. For larger projects, payment is made on the basis of actual costs determined after the project is completed; although interim payments may be made as necessary. Once FEMA obligates funds to the state, further management of the assistance, including disbursement to sub-grantees (such as the County) is the responsibilities of the state.

(10) Other Assistance – Assistance programs such as the Community Development Block Grant may also be activated to assist those who have been affected by a disaster. The SBA may provide low-interest loans to eligible citizens for home repairs and small business recovery.

b) State – A public assistance coordinator is authorized to administer the public assistance grant program that provides financial assistance.

4. Hazard Mitigation Assistance

a) Hazard Mitigation refers to sustained measures enacted to reduce or eliminate long-term risk to people and property from natural hazards and their effects. In the long-term, mitigation measures reduce personal loss, save lives, and reduce the costs from a disaster both locally and to the nation.

b) Two sections of the Stafford Act § 404 and §406 can provide hazard mitigation funds when a federal disaster has been declared. In each case, the federal government can provide up to 75 percent of the cost, with some restrictions.

c) Through the Hazard Mitigation Grant Program (HMGP), authorized by § 404 of the Act, communities can apply for mitigation funds through the state. The state is the grantee and notifies the applicant with pertinent information regarding projects and funding for those projects. The applicant or sub grantee would be the county who is responsible to carry out the projects. The state or local government must provide the 25 percent match. To be eligible for the HMGP funds the county must maintain a hazard mitigation plan and ensure that mitigation methods are being pursued to reduce impacts from hazards.

d) FEMA's primary emphasis for HMGP funds, where appropriate, is the acquisition and demolition, relocation, elevation, or flood proofing of flood damaged or flood prone properties (non-structural measures).

5. Disaster Recovery Centers (DRCs)

a) A Disaster Recovery Center (DRC) is a facility staffed by representatives from local, state and federal agencies. It is also a location where relief organizations may locate staff and provide

much needed programs centrally. Programs are provided as damage assessments and unmet needs are determined following a disaster. Disaster assistance programs are made available as part of the declaration process and based on need. If necessary and when large areas become impacted, one or more DRCs may be established to assist individuals.

- b) Individuals and businesses may register for disaster assistance and receive information and resource materials at a DRC following a disaster. If possible, Colleton County will provide additional services to the residents of impacted areas by utilizing these locations as a “one-stop-shop” where residents may also seek local governmental services. Application for assistance should be made through the national tele-registration hot-line (1-800-621-3362 or TTY 1-800-462-7585).
6. National Flood Insurance Program (NFIP)
- a) The NFIP is a federal program managed by FEMA and has three components: to provide flood insurance, to improve floodplain management and to develop maps of flood hazard zones. The NFIP allows property owners in participating communities to buy insurance to protect against flood losses. Participating communities are required to establish management regulations in order to reduce future flood damages.
 - b) Colleton County participates in the National Flood Insurance Program (NFIP). FEMA has provided a Flood Insurance Rate Map delineating base flood elevations and flood risk areas.
 - c) Colleton County also participates in the Community Rating System (CRS), which is a program that allows communities to have an impact on flood insurance rates for residents in their jurisdiction. Communities are classified from Class 1 to Class 10. Class 1 communities are those that have the largest allowable premium reduction and Class 10 are communities that have no allowable reduction. Colleton County’s CRS Class rating is a 8. However, continual work to reduce insurance rates for consumers in Colleton County is being made.
7. Finance, Administration and Logistics
- a) General
 - (1) A large-scale emergency or disaster will place a tremendous demand on the resources of the county. The priorities for resources will be dynamic, based on the specific situation that the county is facing.
 - b) Project Worksheets
 - (1) The determination of project cost eligibility is based on Project Worksheets (PWs). Initial PWs detail the scope of repair work proposed for specific damaged sites that may be eligible for state and/or federal funding. These damage repair estimates may be supplemented as work

progresses, to increase funding and reflect any changes to the scope of work previously approved.

- (2) Grant projects must comply with state and federal laws and regulations. Staff must research, review, analyze, and develop reports and recommendations regarding engineering, environmental, historical and insurance related issues. These tasks require close coordination and contact with state and FEMA representatives and other appropriate local agencies.

c) Personnel

(1) County Staff

- (a) When Short-Term Recovery is implemented, all county resources are available and already being used to facilitate recovery from a disaster. In the event of a catastrophic disaster when the short-term activated, personnel may be tasked to accomplish a mission outside of their normal area of responsibility.
- (b) If additional personnel resources are needed, they can be acquired through a variety of means, to include:
 - (i) Statewide Mutual Aid Agreement
 - (ii) State resources through the SEOC
 - (iii) National Guard
 - (iv) Contractors
 - (v) Volunteers
 - (vi) Emergency Management Assistance Compact (EMAC)
- (c) If additional personnel are brought to assist in managing the disaster, care must be given to ensuring that liability issues, pay issues and sustainment issues are properly addressed prior to their arrival.

d) Financial Accountability

- (1) Expenditures of county monies for recovery operations will be conducted in accordance with the county ordinances. In addition, state and federal monies may become available to assist in the disaster effort. Accounting for the expenditures of the federal, state and county monies will be subject to audits, both internally and externally.
- (2) Individual governments and departments within those governments are responsible for collection, reporting and maintenance of records documenting disaster costs.

e) Emergency Management Assistance Compact (EMAC)

- (1) The Emergency Management Assistance Compact (EMAC) establishes a firm legal foundation for states to send personnel, equipment, and commodities to help

disaster relief efforts in other states. Once the conditions for providing assistance to a requesting state have been set, the terms constitute a legally binding contractual agreement that makes affected states responsible for reimbursement. The EMAC legislation solves the problems of liability and responsibilities of cost and allows for credentials, licenses, and certifications to be honored across state lines. Deploying resources through EMAC leverages federal grant dollars (such as HMGP & EMPG) invested in state and local emergency management resource capabilities. Through EMAC, states are able to join forces and help one another when they need it the most; whenever disaster strikes.

- (2) There are five distinct phases of the EMAC process, which is:
 - (a) pre-event preparation
 - (b) activation
 - (c) request and offer
 - (d) response
 - (e) reimbursement.
- (3) All EMAC member states have enacted the EMAC legislation and have agreed to use the EMAC procedures for the implementation of EMAC.
- (4) EMAC is coordinated through the state emergency management agencies within the EMAC member states on behalf of their respective governors.

IV. ESF ACTIONS

A. Preparedness

1. Develop systems to use predictive modeling, to include the HAZUS loss estimation methodology, to determine vulnerable critical facilities as a basis for identifying recovery activities.
2. Support the development of plans, with responsible agencies such as, SCES, Clemson Extension, etc. to address key issues for disasters such as short-term and permanent housing, debris removal, decontamination and environmental restoration, restoration of public facilities and infrastructure, restoration of agricultural sector, and short- and long-term economic recovery.
3. Coordinate the development of plans for deploying damage assessment teams and plans to obtain and analyze damage assessment data.
4. Develop and update agency or department plans to support the Colleton County Emergency Operations Plan.
5. Supporting agencies will communicate their needs to the primary agency for coordination of response and recovery plan development as well as the updates to this ESF in the EOP and individual agency.
6. EMD will provide educational material and information to the citizens in mitigation practices and procedures to reduce vulnerability.

7. Participate in state exercises and conduct, at least annually, an exercise to validate this plan.
- B. Mitigation
1. Support and plan for mitigation measures specific to ESF-14.
 2. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
 3. Using the HAZUS loss estimation methodology support and other mitigation strategies, plan for mitigation measures.
 4. Reference and document updates that can be made to the Lowcountry Hazard Mitigation Plan.
 5. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation and/or recovery activities.
 6. Make recommendations to the County Administrator and County Council on issues directly related to codes and zoning that will mitigate the potential for damages caused by natural and man-made disasters.
 7. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
- C. Response
1. Coordinate with state lead agencies to address key issues for disasters such as temporary/emergency and permanent housing, debris removal, decontamination and environmental restoration, restoration of public facilities and infrastructure, restoration of agricultural sector, and short and long-term economic recovery.
 2. Debris collection and removal sites will be established based on damaged areas and coordinated through ESF-3.
 3. Use predictive modeling, to include HAZUS loss estimation methodology to determine vulnerable critical facilities as a basis for identifying recovery activities.
 4. ESF-14 will coordinate points of distribution operations with ESF-7.
 5. ESF-14 will coordinate all resources dedicated to assisting residences with temporary repairs through the Long-Term Recovery Group.
 6. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.
- D. Recovery
1. Following the disaster, once an all clear is given and an evaluation of the impact area has been made, ESF-14 member agencies will provide ESF-5 with a synopsis of their disaster assessment.
 2. ESF-13 will coordinate with the municipalities and ESF-14 regarding re-entry into damaged areas and information flow back to the EOC.
 3. Deploy damage assessment teams; obtain and analyze damage assessment data.
 4. Request that Colleton/Walterboro and Town of Edisto Chambers of Commerce and/or Economic Development Alliance assign staff to identify and document economic impact and losses avoided due to previous mitigation and new priorities for mitigation in affected areas.

5. Coordinate identification of appropriate federal and state programs to support implementation of long-term recovery plans.
6. Coordinate with State and Federal Officials to identify the appropriate location(s) to establish Disaster Recovery Centers (DRC's) in the impacted areas. DRC's assist citizens with registering with FEMA for Individual Assistance Programs
7. Coordinate with South Carolina Clemson Extension to assist in agricultural recovery operations as required.
8. Coordinate with the Colleton/Walterboro and Town of Edisto Chambers of Commerce to address short- and long-term economic recovery as necessary.
9. Coordinate with State and Federal officials to develop short- and long-term temporary housing within the disaster areas.
10. Coordinate assessment and revision of existing mitigation plans, as necessary.
11. Review the state mitigation plan and local mitigation plans for affected areas to identify potential mitigation projects.

V. RESPONSIBILITIES

- A. Colleton County Assessor's Office
 1. Complete local initial damage assessment (LIDA) of real property.
 2. Manage records to support local initial damage assessments (LIDA).
- B. Colleton County Finance Department
 1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-14 during periods of activation.
 2. Coordinate overall damage assessment of Colleton County to include, homes, businesses, industry and infrastructure.
 3. Review mitigation plans for the early identification of mitigation projects and to reduce state and local socio-economic consequences.
 4. Develop and organize disaster assessment teams and plans to obtain and analyze disaster assessment data from emergency responders, municipal disaster assessment teams and county municipal assessment teams.
 5. Coordinate assessment and revision of existing risk analysis and mitigation plans.
 6. Coordinate with the federal government for emergency loans.
 7. Provide technical assistance for recovery and resource conservation.
 8. Coordinate recovery and mitigation grant programs.
 9. Develop systems to use predictive modeling, to include HAZUS loss estimation methodology, to determine vulnerable critical facilities as a basis for identifying recovery activities.
 10. Provide technical assistance in community and state planning.
- C. Municipal Administrations
 1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-14 during periods of activation.
 2. Plan for and coordinate with ESF-14 damage assessment teams.
 3. Plan for and coordinate with ESF-18 when necessary.
- D. Colleton County Engineer

1. Coordinate ESF-3 recovery efforts including the execution of clean up contracts, coordination of debris management activities and various related recovery activities
- E. South Carolina National Guard
1. If available and authorized, identify, train, and assign personnel to maintain to execute missions in support of ESF-14 during periods of activation for warehouse and distribution operations, damage assessments, and reentry operations.
 2. If available and authorized, plan for and provide personnel and equipment in support of county warehouse operations (ESF-18).
- F. South Carolina State Guard
1. Can assist with a myriad of activities including damage assessments, points of distribution and donated goods.
- G. South Carolina Forestry Commission
1. Can provide damage assessments of crops and agricultural areas.
- H. Colleton Area Chamber of Commerce / Town of Edisto Beach Chamber of Commerce
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF 14 during periods of activation.
 2. In coordination with the state and federal government, assign staff to identify and document economic impact and losses avoided due to previous mitigation projects and new priorities for mitigation in affected areas.
 3. Plan for and provide economic recovery and growth assistance in support of ESF-24.
 4. Provide technical assistance in community planning and economic assessment.
- I. Colleton County Economic Alliance
1. Serves as liaison with local business and industry in support of ESF-14 and 24.
- J. Colleton County Long-Term Recovery Group (LTRG)
1. Coordinates individual assistance for Colleton County citizens beyond the scope of FEMA Individual Assistance programs.
- K. Community Foundation of the Lowcountry
1. Manages the Colleton County LTRG Fund. Can manage any monetary donations intended for Colleton County citizens that have been impacted by the disaster.
- VI. NATIONAL DISASTER RESPONSE FRAMEWORK (NDRF)
- A. The NDRF includes six Recovery Support Functions (RSF's) that provide a structure to facilitate problem solving, improve access to resources and foster coordination among State and Federal agencies and supporting organizations that operate together with local, State and Tribal government officials, nongovernmental organizations (NGO's) and private sector partners.
- B. The six RSF's identified in the NDRF are similar to Emergency Support Functions (ESF's) and contain numerous agencies. Moreover, a single agency can contribute to multiple RSF's. Because many agencies are most familiar with

the ESF to which they contribute, the RSF's will be managed by the Recovery Section and will contain agencies by their assigned ESF as follows:

1. Community Planning and Capacity Building RSF:
 - a) ESF-1, ESF-3, ESF-5, ESF-7, ESF-12, ESF-13, ESF-14, ESF-15, ESF-17, ESF-18, Finance Section
2. Economic RSF
 - a) ESF1, ESF-5, ESF-6, ESF-7, ESF11, ESF-14, ESF-24, Finance Section
3. Health and Social Services RSF
 - a) ESF-5, ESF-6, ESF-7, ESF-8, ESF11, ESF-14, ESF-17, SC ABLE
4. Housing RSF
 - a) ESF-5, ESF-6, ESF-7, ESF-11, ESF-14, ESF-19, LTRG
5. Infrastructure Systems RSF
 - a) ESF-2, ESF-3, ESF-5, ESF-7, ESF-12, ESF-13, ESF-14, ESF-15, ESF-16, ESF-19
 - b) Natural and Cultural Resources RSF - ESF-5, 7, 14, 24
6. The table below provides an example framework of the correlation between ESF's and RSF's.

| <u>Emergency Support Function (ESF) from National Response Framework (NRF)</u> | <u>Recovery Support Function (RSF) from National Disaster Recovery Framework (NDRF)</u> | | | | | |
|---|--|---------------------|---|--------------------|-----------------------------------|---|
| | Community Planning & Capacity Building RSF | Economic RSF | Health & Social Services RSF | Housing RSF | Infrastructure Systems RSF | Natural & Cultural Resources RSF |
| ESF-1 Transportation | X | X | | | | |
| ESF-2 Communications | | | | | X | |
| ESF-3 Public Works & Engineering | X | | | | X | |
| ESF-4 Fire | | | | | | |
| ESF-5 Planning | X | X | X | X | X | X |
| ESF-6 Mass Care | | X | X | X | | |
| ESF-7 Logistics | X | X | X | X | X | X |

VII. LOCAL, STATE, AND FEDERAL INTERFACE

- A. The ESF-14 function is represented at the State EOC as ESF-14 (SCEMD Recovery Section) and should be called upon for assistance. It does not exist at the federal level in the Federal Response Plan per se. However, agencies such as the Small Business Administration and others are in place to provide limited assistance to the private sector.

ESF-15 - Public Information

Primary: Colleton County Emergency Council

Support: Colleton County Fire-Rescue, Colleton County Sheriff's Office, Colleton County Administration, South Carolina Emergency Management Division PIO

| Reports To | Receives Reports From |
|---------------------------------|--|
| Emergency Council / EOC Command | Colleton County Fire-Rescue, Colleton County Sheriff's Office, Colleton County Administration, South Carolina Emergency Management Division PIO, EOC Operations Section Chief, ESF-7 (EOC Logistics Section Chief), ESF-5 (EOC Planning Section Chief), EOC Finance Section Chief (when established), <i>EOC Recovery Section Chief (when established)</i> , Municipal PIO's |

I. INTRODUCTION

- A. Generation of timely public information coordinated with the appropriate level of government is essential to avoid or minimize loss of life and property if a disaster is imminent or has occurred. Before, during and after emergency operations, the public will be apprised through reports to the news media, through the Internet (websites and social media platforms), through Code Red, and through the Emergency Alert System.
- B. County services and assistance provided under this function includes the delineation of responsibilities and protective actions to be taken so as to provide the public with essential information and the documentation of emergency actions and operations implemented or proposed by written, verbal or photographic means.

II. MISSION

- A. Provide effective public information through coordination with appropriate federal, state and local agencies and organizations to minimize loss of life and property before, during and after an emergency or disaster.

III. CONCEPT OF OPERATIONS

- A. The Colleton County Emergency Council is responsible for all ESF-15 administrative, management, planning, preparedness, mitigation, response and recovery activities to include developing, coordinating and maintaining the ESF-15 plans. All ESF-15 supporting agencies will assist the Colleton County Emergency Council in the planning and execution of the above.
 - 1. In cases where the emergency is not related to criminal activities, the Fire-Rescue Chief may be the preferred lead public information officer. Numerous studies show that the Fire Chief has the highest level of trust

among citizens. This is critical particularly when evacuation orders are announced.

2. In cases where the emergency is related to criminal activities, the Sheriff may be the preferred lead public information officer. The Sheriff has the ability to instill trust in the citizenry that proper law enforcement personnel and methods are being utilized during these types of emergencies.
 3. In cases where a multitude of agencies, municipalities, or jurisdictions are involved, the County Administrator may be the preferred lead public information officer. The County Administrator has the ability to instill trust in the citizenry that their municipal or jurisdictional administrations are working in cooperation with Colleton County Government.
 4. In cases where the Fire-Rescue Chief, Sheriff, County Administrator are not available, the EOC Incident Commander or EOC Section Chiefs can provide the citizenry specific situational updates and operational status. The SCEMD Regional Emergency Manager/Coordinator can assist with information distribution, particularly where it is related to state resources being deployed/allocated for Colleton County citizens.
- B. Disaster and emergency information from Colleton County government shall be clear, concise and accurate regarding the existing situation, actions being taken by authorities, and those to be taken by the public. Efforts will be made to prevent and counter rumors and inaccuracies.
 - C. Once activated, the Colleton County Emergency Operations Center (EOC) and/or the State Emergency Operations Center (SEOC), including the Hispanic Hotline and TTY operator, shall answer calls from the public and address questions as they relate to the emergency at hand.
 - D. Coordination with all appropriate departments, agencies and organizations will be performed to the maximum extent, to ensure accurate, timely and consistent emergency information to the public, primarily through media outlets.
 - E. On behalf of Colleton County Administrator, Colleton County Fire-Rescue, through ESF-15, is responsible for informing the public of emergency and disaster operations within Colleton County. The dissemination of public information during emergency and disaster operations is done with the advice and approval of the Colleton County Administrator, who reserves the authority to intervene, to assume control, or to disseminate supplementary public information at any time. The Planning Section Chief will keep the EOC staff informed of media-related events as they unfold and will provide such information on a continuing and timely basis.
 - F. Public information, public relations and public affairs personnel of any county agency or department will be made available to augment ESF-15 when requested.
 - G. The South Carolina Emergency Alert System will be activated appropriately according to established county, state, and national Emergency Alert System procedures.

- H. A coordinated effort to report and document emergency/disaster operations will be conducted at the Colleton County EOC and/or at the incident site. A joint information system (JIS) of public information personnel from all affected jurisdictions, agencies and private sector organizations may be established. If appropriate, representatives of those jurisdictions may provide emergency public information from a Joint Information Center (JIC). Under some circumstances, state agencies or departments may issue press statements. However, these statements must be coordinated with ESF-15 prior to release.
- I. Situation briefings, press conferences, taped messages, photographs, news accounts, statistics on injuries and fatalities, and other information shall be provided to the news media as deemed appropriate by ESF-15 at designated media centers/staging areas.
- J. The County will provide similar materials and briefings for county, state and federal officials, and coordinate state and local information/news releases and news bulletins with related federal, state and local agencies/officials. ESF-15 will coordinate with the County Administrator regarding such activities.
- K. ESF-15 will consult with appropriate department or agency heads and municipal government leaders concerning implementation of emergency or disaster public information activities. Timely and continuing information to the Administrator and EMD will be provided, and appropriate recommendations will be made if requested.
- L. Ensure all ESF-15 personnel integrate NIMS principles in all planning. As a minimum, primary action officers for all ESF-15 agencies will complete FEMA's NIMS Awareness Course or its equivalent.

IV. ESF ACTIONS

A. Preparedness

1. Develop a public information program to educate the public regarding the effects of common, emergency and disaster situations.
2. Develop plans to coordinate with international, national, state and local news media for emergency operations, before, during and after emergency situations.
3. Develop plans to conduct a multi-agency/jurisdiction coordinated public information program during emergencies and disasters.
4. Develop plans and programs to educate news media that ESF-15 is the primary information center during emergency situations, unless otherwise directed by the Colleton County Emergency Council.
5. Develop and maintain pre-scripted Emergency Alert System messages and news releases for all hazards to include hurricanes, earthquakes, nuclear incidents and dam failures.
6. Encourage development of disaster plans and kits for the public.
7. Provide evacuation information to the affected public.
8. Participate in Colleton County exercises and conduct, at least annually, an ESF-15 exercise to validate this annex and supporting plans.

9. Train staff to assist in media and public information functions during EOC activations.
10. Develop and implement a training program for all ESF-15 members.
11. Develop and maintain a roster with contact information of all ESF-15 personnel.
12. Annually review the Department of Homeland Security Universal Task List and integrate tasks as appropriate.

B. Mitigation

1. Support and plan for mitigation measures specific to ESF-15.
2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

1. Alert agencies whose personnel, equipment or other resources that may be used in the event of an emergency.
2. Provide timely and accurate Emergency Alert System messages and news releases in common language and terminology to inform the public. Coordinate with established county/state hotline systems.
3. Coordinate with news media regarding emergency operations.
4. Provide emergency public information to special needs populations.
5. Execute a multi-agency/jurisdiction coordinated public information program.
6. Supplement local emergency management public information operations, as necessary, and when resources are available.
7. Maintain labor, equipment and materials forms used by ESF-15 staff for possible reimbursement, if authorized.

D. Recovery

1. Continue public information activities to include updating the public on recovery efforts.
2. Anticipate and plan for arrival of, and coordination with, FEMA, ESF-15 personnel in the EOC, and the Joint Field Office (JFO).
3. Process and disseminate disaster welfare and family reunification information to the media and public.

V. RESPONSIBILITIES

A. Colleton County Emergency Council

1. Identify, train and assign personnel to staff ESF-15.
2. Notify all ESF-15 supporting agencies upon activation.
3. Develop and implement a training program for all ESF-15 members.

4. Develop and maintain a roster with contact information of all ESF-15 personnel.
 5. Develop a public information program to educate the public regarding the effects of common, emergency and disaster situations.
 6. Develop plans to coordinate with news media for emergency operations, before, during and after an emergency situation.
 7. Develop plans to conduct a multi-agency/jurisdiction coordinated public information program during emergency and disaster situations.
 8. Develop plans and programs to educate news media that ESF-15 is the primary information center during emergency situations, unless otherwise directed by the County Administrator and EMD.
 9. Develop pre-scripted Emergency Alert System messages and news releases for all hazards to include hurricanes, earthquakes, nuclear incidents and dam failures.
- B. Supporting Agencies (Colleton County Fire-Rescue, Colleton County Sheriff's Office, Colleton County Administration, South Carolina Emergency Management Division PIO)
1. Ensure that ESF-15 has timely and accurate information
- C. EOC Section Chiefs
1. Ensure that agencies from which each receives reports are providing timely and accurate information and that information is forwarded to ESF-15.

VI. FEDERAL AND STATE INTERFACE

- A. ESF-15 is supported by the Federal Response Plan ESF-15, Public Information and in the State EOP (ESF-15). Due to multiple federal, state, and local governments and agencies having separate public information officers or the ability to distribute information over their individual respective social media platforms, coordination of a unified message during disasters cannot be overemphasized. Multiple, conflicting messages is not only confusing for the citizenry, but it undermines the confidence that citizens have in government and makes public information messaging ineffective.

ESF-16 - Emergency Traffic Management

Primary: South Carolina Highway Patrol

Support: Colleton County Sheriff's Office, Walterboro Police Department, Edisto Beach Police Department, Cottageville Police Department, SLED, S.C. Department of Probation, Pardon, and Parole Services, S.C. Department of Transportation, S.C. Department of Natural Resources Law Enforcement Division, South Carolina National Guard

| Reports To | Receives Reports From |

| ESF-13 (Law Enforcement) | Colleton County Sheriff's Office, Walterboro Police Department, Edisto Beach Police Department, Cottageville Police Department, SLED, S.C. Department of Probation, Pardon, and Parole Services, S.C. Department of Transportation, S.C. Department of Natural Resources Law Enforcement Division, South Carolina National Guard |

I. INTRODUCTION

- A. The aggressive management of evacuating citizens via motor vehicle traffic during the threat of, or immediately following, an emergency or disaster incident is critical to the life safety of all county residents and transients. This function must be planned and executed in a coordinated manner that will ensure the most timely and orderly movement of the impacted populace to an area of relative safety. Evacuations may occur as a result of natural or technological hazards or acts of terrorism faced by the county and will require planning and coordination within all geographic areas of the state.
- B. Hazards which will require action by this functional area and likely geographic areas impacted include, but not limited to:
 - 1. Hurricanes - Coastal areas, including high population tourist areas. See details contained in the South Carolina Hurricane Plan for population affected areas, designated routes and traffic control point assignments.
 - 2. Spent Nuclear Fuel Shipments – For large spills consider initial downwind evacuation for at least 100 meters (300 feet). See Hazardous Materials Emergency Response Guidebook (ERG).
 - 3. Hazardous Materials Incidents – Densely populated areas. See Hazardous Materials Emergency Response Guidebook (ERG).
 - 4. Flooding – Areas vulnerable to inundation from surge, tidal, ravine, and storm induced flash flooding.
 - 5. Earthquakes – All structures in the densely populated areas.
 - 6. Weapons of Mass Destruction Incidents – Densely populated areas, critical facilities & potential targets within the infrastructure.

7. National Security Emergencies – Densely populated areas.
8. Tornadoes – Countywide to include waterspouts along the coast.
9. Winter Storms – All areas can be potentially affected.
10. Wildfires – rural, woodland areas particularly in populated areas.
11. Tsunamis - Coastal areas, including high population tourist areas.
Primarily barrier islands and low-lying areas at or along the Intercoastal waterway and Saint Helena Sound.

- C. Effective emergency traffic management will be accomplished by multiple cooperating agencies led by the South Carolina Highway Patrol which has overall responsibility for this emergency support function. Transportation system and communication management is vitally important to successfully execute this function; therefore, ESF's 1, 2, 3 and 13 may play a major role in the preparedness and execution phases. Aggressive public awareness, education, and communication efforts are essential to the success of this function and must be accomplished by all ESF's and coordinated by the Colleton County Emergency Operations Center.

II. MISSION

- A. To provide for coordinated plans, policies, and actions of state and local governments to ensure the safe and orderly evacuation of populations affected by all hazards (e.g. Weapons of Mass Destruction, chemical accidents, severe weather, dam failure, etc.) To further ensure that once the threat or hazard no longer exists, and the area is deemed safe by local authority; that prompt and orderly re-entry into the evacuated area is accomplished through city-county-state-federal coordination.

III. CONCEPT OF OPERATIONS

- A. The South Carolina Highway Patrol is the coordinating agency for all emergency traffic management issues before, during, and after any required evacuation brought on by a major disaster. The South Carolina Highway Patrol is responsible for all ESF-16 administrative, management, planning, preparedness, mitigation, response, and recovery activities to include coordinating and maintaining standard operating procedures. All ESF-16 supporting agencies will support the South Carolina Highway Patrol in the planning and execution of the above. The South Carolina Highway Patrol maintains a very robust evacuation plan that considers statewide evacuations across a large number of routes and includes Colleton County.
- B. The South Carolina Highway Patrol, Colleton County law enforcement agencies and Colleton County Fire-Rescue Emergency Management Division (EMD) will monitor conditions which have the potential to require evacuation of any area(s) of the county and implement changes in Operating Conditions (OPCONS) as required. Colleton County Fire-Rescue will coordinate with and advise the County Administrator concerning evacuation decisions and pre-evacuation actions.
- C. Evacuation decisions and timelines will be coordinated in accordance with the County Emergency Operations Center plans and any applicable hazard-specific plans and with the SEOC as applicable.

- D. The South Carolina Highway Patrol will develop, maintain, and execute, when required, an evacuation/re-entry traffic management plan designed to permit evacuation of all citizens in affected areas during a prescribed time frame and to facilitate re-entry following the evacuation. Changes to the plan will be coordinated annually if not sooner due to lessons learned from an actual event.
- E. The South Carolina Highway Patrol will provide overall leadership of ESF-16 during all Emergency Operations Center activations involving evacuation/re-entry actions. The Colleton County Sheriff's Office representative will serve as the primary agency to Colleton County Emergency Operations Center.
- F. The South Carolina Highway Patrol will develop and execute measures intended to gather information on traffic flow and highway usage and disseminate the information to the Public Information Officer for dissemination to the public (including air surveillance) in coordination with South Carolina Department of Transportation. Also, see South Carolina Department of Transportation Standard Operations Guidelines.
- G. All ESF-16 personnel will be trained on the principles of the National Incident Management System (NIMS) and integrate those principles into all ESF-16 planning and response operations.

IV. ESF ACTIONS

A. Preparedness

1. Develop all evacuation routes for affected areas which are hazard specific.
2. Coordinate the designation of all predetermined Traffic Control Points (TCPs) assignments and review at least annually.
3. Develop and coordinate all personnel requirements and support required from state ESF-16 and local law enforcement agencies.
4. Schedule and conduct, in coordination with the county EOC, pre-evacuation meetings with all participating agencies as required.
5. Establish procedures to monitor traffic flow in addition to the South Carolina Department of Transportation camera system.
6. Coordinate plan development for ingress and egress of emergency vehicles during evacuation to include emergency maintenance, fueling, staging and towing.
7. Coordinate with ESF-2 in the development of an evacuation traffic management communications plan to be used by all agencies during evacuation operations.
8. Coordinate with municipal law enforcement agencies to ensure clear understanding of emergency traffic management responsibilities.
9. Participate in state exercises and conduct, at least annually, an ESF-16 tabletop or functional exercise to validate and maintain this Emergency Support Function and supporting Standard Operating Guidelines.

B. Mitigation

1. Support and plan for mitigation measures specific to ESF-16.

2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

1. Designate and coordinate operation of pre-assigned personnel and equipment staging areas.
2. Develop and conduct pre-mission operational briefings for participating agencies to include municipal law enforcement agencies, shelter management teams, and the EOC.
3. Implement evacuation traffic management plan to include interstate/primary highway reversal, including counter flows, and designate and support secondary/alternate routes where applicable.
4. Report traffic flow information to the Colleton County Emergency Operations Center to include out-of-state traffic flows in coordination with South Carolina Department of Transportation/ Evacuation Liaison Team personnel.
5. Coordinate execution of an emergency traffic management communications plan and local South Carolina Department of Transportation roadside radios.
6. Provide traffic information to the Colleton County Detention Center, which may assist their determination to evacuate prisoner populations in affected areas of a disaster.
7. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.

D. Recovery

1. Coordinate with local agencies to facilitate expedited re-entry operations returning displaced citizens into unaffected areas of a disaster.
2. Manage traffic at critical intersections post impact with priority given to emergency service vehicles, transportation of supplies and equipment, and access to critical facilities.
3. Assist public and private organizations with traffic control during the restoration of infrastructure services.

E. Mitigation

1. Support requests and directives resulting from the Governor and/or Federal Emergency Management Administration concerning mitigation and/or re-development activities.
2. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.

V. RESPONSIBILITIES

A. South Carolina Highway Patrol

1. Coordinating agent for all evacuation/re-entry emergency traffic control operations, including regulation of the state road network and management of all contingency actions such as interstate/highway lane reversal operations.
2. Identify, train, and assign personnel to staff ESF-16 in the EOC.
3. Notify all ESF-16 supporting agencies upon activation or anytime close coordination is required or changes in this plan occur.
4. Designate all predetermined traffic control points in coordination with local law enforcement.
5. Develop and coordinate all personnel requirements and support required from ESF-16 and local law enforcement agencies.
6. Designate and manage operation of pre-assigned personnel and equipment staging areas.
7. Schedule and conduct pre-evacuation coordination meetings with all participating agencies as required.
8. Establish procedures to monitor traffic flow and to report information to the Emergency Operations Center.
9. Develop a plan for ingress and egress of emergency vehicles during evacuation including maintenance, staging and refueling.
10. Develop and coordinate execution of an emergency traffic management communications plan to be used by all agencies during evacuation operations.
11. Coordinate with all municipal law enforcement agencies to ensure clear understanding of evacuation traffic management responsibilities.
12. Develop and conduct pre-mission operational briefings for participating agencies.
13. Assist with the guidelines, based on various scenarios, for execution of interstate/highway reversal options.
14. Provide personnel, transportation, communications, and equipment to support emergency traffic management operations.
15. Conduct after action debriefings of ESF-16 activities, inclusive of input from local agencies after each emergency response operation.
16. Provide equipment and aircraft to support emergency traffic management operations where applicable.
17. Survey all evacuation routes in coordination with state forces.
18. Support Department of Public Safety in the selection and management of alternate transportation routes that may be required as a result of interstate/highway lane reversals or closed primary routes.
19. Develop and maintain agency department resource list in support of ESF-16.

B. Local and State Law Enforcement Agencies (Colleton County Sheriff's Office, Walterboro Police Department, Edisto Beach Police Department Cottageville

Police Department, SLED, S.C. Department of Probation, Pardon, and Parole Services, S.C. Department of Transportation, S.C. Department of Natural Resources Law Enforcement Division, South Carolina National Guard)

1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-16 during periods of activation.
2. Be prepared to support ESF-16 operations with personnel, as required, to the critical Traffic Control Points (TCPs) as a minimum.
3. Provide equipment, communications, and personnel to support evacuation traffic management operations.
4. Survey all evacuation routes and report findings to the Emergency Operations Center ESF-16.

C. Colleton County Fire-Rescue

1. Assist ESF-16 in the EOC and provide logistical support when necessary to field units.
2. Maintain a list of evacuation routes and traffic control points (TCPs).

VI. LOCAL, STATE, AND FEDERAL INTERFACE

- A. ESF-16 does not exist as such in the federal plan per se but does in the State Emergency Operations Plan (SC Highway Patrol is the lead agency). For the purposes of planning, most of the coordination meetings that take place will occur in support of specific operations such as storm evacuation, and general law enforcement operations in the field before, during, and after the incident. As such, pre-deployment meetings between local and state resources will be necessary to determine exactly what can be expected from each group. Additionally, for multi-state hurricane threats Federal Emergency Management Administration, through the regional operation center in Atlanta, will establish an Evacuation Liaison Team (ELT) to coordinate multi-state evacuations simultaneously conducted within Federal Emergency Management Administration Region IV.

ESF-17 - Animal/Agricultural Services

Primary: Colleton County Animal Services

Support: Colleton County Animal Response Team (CCART), Friends of Colleton County Animal Shelter (FOCCAS), Clemson Extension Service, Department of Public Health (SCDPH), S.C. Department of Natural Resources, S.C. Department of Agriculture

| Reports To | Receives Reports From |
|------------------------------|--|
| EOC Operations Section Chief | Colleton County Animal Response Team (CCART), Friends of Colleton County Animal Shelter (FOCCAS), Clemson Extension Service, Department of Public Health (SCDPH), S.C. Department of Natural Resources, S.C. Department of Agriculture |

I. INTRODUCTION

- A. A disaster condition can vary from an isolated emergency affecting a single community to a catastrophic event that impacts all of Colleton County, as well as other areas of the State. Depending on the severity of the disaster, ESF-17 details the responsibilities and support of animal related activities within Colleton County. This ESF generalizes disaster-planning activities for both large and small animals, wild and domestic. It addresses public awareness policies and strategies, as well as contingency plans for disaster.
- B. Natural disasters, as well as man-made disasters, may negatively impact the various animal industries/pet populations. Naturally introduced or intentionally introduced (bioterrorist) disease may threaten the animal or plant industry, or disease may threaten public health as well as animal health.
- C. Efficient response and recovery efforts assure rapid return to economic soundness of the livestock/pet industry, public health protection, as well as the benefit of the human-animal bond of pets in the human recovery process following a disaster.
- D. Agriculture is South Carolina’s largest industry with an economic impact of \$46.2 billion annually and providing more than 240,000 jobs. South Carolina exports \$1.4 billion in forest products each year. Direct economic output of South Carolina sanitary paper manufacturing is \$1.6 billion.

II. MISSION

- A. The purpose of this ESF is to provide direction for handling animal and agricultural issues before, during, and after an actual or potential disaster situation. It establishes the coordination of veterinary medicine and animal care resources in Colleton County, and supports individual agency plans.

III. CONCEPT OF OPERATIONS

- A. Colleton County Animal Services has been designated as the primary organization for coordinating veterinary services and animal care needs in emergencies. Animal Services is responsible for communicating information with constituent veterinarians and related organizations.
- B. Colleton County Animal Services will identify, train and assign personnel to maintain contact with and prepare to execute missions in support of ESF-17 during periods of activation. On order, staff ESF-17 in the Colleton County EOC.
- C. Colleton County Animal Services will coordinate with Humane Societies, South Carolina Department of Agriculture, and animal rescue groups.
- D. Animal Services Officials in the community provide for the safety and enforcement of animal related issues as they pertain to domestic animals and livestock.
 - 1. The Department of Natural Resources handles wildlife that become involved in inhabited area situations.
- E. Colleton County Fire-Rescue coordinates the emergency technical rescue of entrapped and entangled large animals with the coordination of Colleton County Animal Services.
- F. Colleton County Fire-Rescue and Sheriff's Office provide for the emergency response of disaster support equipment and personnel to incidents involving animal emergencies.
- G. Colleton Animal Shelter (a division of Colleton County Animal Services) and other volunteer animal care organizations provide for the enforcement of animal care regulations and care of those animals that have been legally seized by court order or the surrendering of neglected animals.
- H. All ESF-17 personnel will be trained on the principles of the National Incident Management System (NIMS) and integrate those principles into all ESF-17 planning and response operations.

IV. ESF ACTIONS

- A. Preparedness
 - 1. In coordination with Colleton County Fire-Rescue Emergency Management Division (EMD) develop plans and procedures, organize personnel, and outline duties and responsibilities.
 - 2. Determine which agencies will assist in search and rescue efforts for injured, stray, or abandoned animals.
 - 3. Maintain liaison with EMD and support organizations within the Animal Protection Service.
 - 4. Develop a sheltering plan for the co-location of pets and owners in designated hurricane shelters in the event of an evacuation of the area with EMD.
 - 5. Develop a procedure for identification of lost or abandoned animals and establish a foster/adoption procedure in the event that lost animals cannot be reclaimed by their owners within a reasonable period of time.

6. Develop information on pet care, known facilities (motels) which accept animals, livestock housing availability, and preparedness information for evacuation.
7. Assist in the development of a procedure for the safe sheltering of animals belonging to essential personnel.
8. Develop and train Colleton County Animal Response Team (CCART) personnel to assist in pet shelter operations.
9. Plan and prepare to coordinate organizations and response teams deployed to assist following a disaster to include a Federal VMAT Team, and animal relief organizations such as; PetSmart, Noah's Ark, Code 3, Animal Planet, etc.
10. Work with public health, state and federal officials, assist in the response to the outbreak of a highly contagious animal/zoonotic disease, an outbreak of a highly infective exotic plant, or an economically devastating plant pest infestation.

B. Mitigation

1. Support and plan for mitigation measures specific to ESF-17.
2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

C. Response

1. Track the activities of animal shelter facilities and confinement areas before, during and after the disaster. This tracking will be based on information provided by the ESF-17 agencies and relief organizations.
2. Provide assistance in the following areas pertaining to animal emergency care:
 - a) Coordinate additional animal sheltering and stabling for both large and small animals.
 - b) Coordinate capture, rescue and transport to designated shelters or pet care facilities.
 - c) Coordinate Veterinarian Medical Assistance Team (VMAT) assistance.
 - d) Organize triage and follow-up medical care.
 - e) Coordinate public information with ESF-15 in the county EOC.
 - f) Organize lost and found data and publicize to achieve animal/owner reunion.
 - g) Organize and manage animal response donations in coordination with ESF-18 (Donated Goods and Volunteer Services).

- h) Coordinate the credentialing, tasking and approval of out of town/state volunteers assisting in animal rescue/care operations.
- 3. Coordinate evacuation issues with the county EOC.
- 4. Provide ESF-5 with summarized information on the location and availability of shelter space, food and water for animals.
- 5. Coordinate with ESF-7 regarding storage sites and staging areas for animal food and medical supplies.
- 6. Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.

D. Recovery

- 1. Coordinate response activities of local and deployed agencies, as required.
- 2. Coordinate damage assessment of animal and pet related facilities.
- 3. Coordinate the consolidation or closing of animal shelters or confinement areas, personnel and supplies as the need diminishes.
- 4. Assist support agencies for long term maintenance, placement, or disposition of animals which cannot be returned to their normal habitat or which have been separated from their owners.
- 5. Coordinate with ESF-3 (Public Works) and ESF-8 (Health and Medical) for the removal and proper disposal of animal waste and dead animals.
- 6. Maintain appropriate documentation to prepare an after-action report to the county EOC.
- 7. Coordinate resources for transport, medical needs, and placement of affected animals.
- 8. It will be the responsibility of animal shelter facilities to assess their damages and report to the county EOC any needs or assistance required following a disaster.
- 9. SC Department of Agriculture will work with Clemson Extension employees and Colleton County Assessor's Office to assess the damages to farms and livestock care facilities.
- 10. Ensure ESF-17 team members or their agencies maintain appropriate records of costs incurred during the event.
- 11. Ensure donated goods are handled through ESF-18 with appropriate guidance from ESF-17.

V. RESPONSIBILITIES

A. Colleton County Animal Services

- 1. Identify, train, and assign personnel to staff ESF-17 in the EOC, alerts ESF-17 support agencies upon activation.
- 2. With the assistance of ESF-17 supporting agencies, staff and operate the pet shelter located at the primary general population shelter / medical needs shelter complex.
- 3. Develop operating procedures to implement the Animal Emergency Response functions of ESF-17 including an alerting list of ESF-17 support agency response teams for the EOC and response teams.

4. Participates in exercises to test operating procedures and will see that all support agencies are included in training/test functions as appropriate.
5. Coordinate meetings as necessary of the Colleton County Animal Response Team (CCART), made up of representatives of involved agencies or organizations, in which members will discuss their operational response and resolve problems, to ensure coverage of animal needs.
6. Develop plans for the safety and security of pets and livestock before and following an emergency or disaster.
7. Coordinates with Regional CART agencies to assess and respond to animal needs in the emergency area, and compile a situation report for the EOC.
8. Coordinates activities of support agencies and gathers pertinent statistics and data for compilation.
9. Coordinates large animal emergency rescue team (LART) activation and assignment.
10. Coordinates animal disease education to responders.
11. Coordinate the influx of well-meaning volunteers coming to assist in animal rescue operations and respond to reports of “animal hoarding” or unauthorized reports of volunteers taking animals from residents.
12. Coordinates the DEMOB of animal emergency services through various support agencies, and within the framework of EOC and ESF guidelines.
13. Coordinates with counties involved to collect appropriate data on animal services rendered, and to compile such data for a final report.
14. Coordinates return to the owner or final disposition of unclaimed animals.
15. Coordinates animal disease diagnosis, control, and depopulate consistent with agency mission.

B. Colleton County Animal Response Team (CCART)

1. Identify, train, and assign personnel to staff ESF-17 in the EOC.
2. Develops operating procedures to implement ESF-17 activities, including an alerting list of Clemson University Cooperative Extension Service responders.
3. Coordinates through county extension agents to assess local situations and identify animal emergency coordinators in each county.
4. Supplies personnel for damage assessment teams, or observation teams, as requested by Clemson University Livestock-Poultry Health and County EOC.
5. Assists in producing public service information through Clemson Extension Office and the SC Emergency Management Division, through ESF-15.
6. Assist with livestock relocation.
7. Assists by providing staffing on a local basis (county extension agents) to monitor recovery efforts and collecting data on damage assessment and ongoing needs and activities of livestock and equine.

8. Provides reports to Clemson University Livestock-Poultry Health of activities and assessments.
- C. Friends of Colleton County Animal Shelter (FOCCAS)
1. Assist ESF-17 with operating pet shelter at Colleton County High School and overflow at Colleton County Animal Shelter
- D. Clemson Extension Service
1. Provide owners of livestock and crops with protection information based on the type of impending hazard.
 2. Clemson University Livestock-Poultry Health (CULPH) has multiple emergency preparedness and response roles within South Carolina that are defined by legal authority or mandated responsibilities. As the state animal health regulatory agency, CULPH assists in the prevention of animal diseases that threaten South Carolina's livestock, poultry, and public health.
 - a) Given the rural areas of both South Carolina and Colleton County as well as the tremendous economic impacts that can be involved in any impact to animals and agriculture, public messaging, agriculture / animal control measures, the establishment of relocation areas, restricted areas, re-entry protocols, return areas, and recovery strategies must be highly coordinated with state and federal officials. The economic impacts of uncoordinated efforts could have incredible consequences for many years.
- E. Department of Public Health (SCDPH)
1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-17 during periods of activation. On order, staff ESF-17 in the EOC.
 2. Provide public health guidelines.
 3. Office of Public Health Preparedness: Coordinate SCDES/SCDPH animal emergency response activities.
 4. Disease Control: Provide epidemiology and public health support.
 5. Environmental Quality Control - Waste Management: Provide agricultural waste and carcass disposal support.
 6. Environmental Health
 - a) Provide vector control and sanitation support.
 - b) Provide dairy product and producer support, and sampling.
 7. Serves as ESF-10 (Hazardous Materials) lead for SC during hazardous materials incidents (i.e., Nuclear Power Plant leak that contaminates surrounding animals and agriculture).
 8. Constructs maps that illustrate the radiation contamination associated with Nuclear Plant releases. These maps require direct readings from areas and could take up to two to three weeks to construct.
 - a) Will advise the Governor's Office on Potassium Iodide (KI) distribution and administration. KI can protect the thyroid of some

people during a radiation emergency. There are limits to who should use KI and how much depending on age,

F. Department of Natural Resources

1. Identify, train, and assign personnel to maintain contact with and prepare to execute missions in support of ESF-17 during periods of activation. On order, staff ESF-17 in the EOC.
2. Develop plans to respond to the outbreak of a highly contagious zoonotic wildlife disease.
3. Provide native wildlife support within agency policy and statutory guidelines.
4. Provide limited assistance, if available, to coordinate zoo/exotic situations.
5. Provide transportation and equipment, if available.

G. S.C. Department of Agriculture

1. Provide owners of crops with protection information based on the type of impending hazard.

VI. LOCAL, STATE, AND FEDERAL INTERFACE

- A. County ESF-17 will contact state agencies, through the EOC, to coordinate any assistance needed in dealing with companion and domestic animals. At the state level, ESF-17 will be managed from the SEOC and can provide additional resources for agricultural concerns. ESF-17 does not exist at the federal level.
- B. Medical, care and rescue efforts are supported by a variety of national agencies/organizations such as the American Veterinary Medical Association, the American Humane Association, the Humane Society of the United States, and the American Horse Protection Association; also, by state agencies such as South Carolina Association of Veterinarians, the South Carolina Animal Care and Control Association, and Clemson University Cooperative Extension Service.
- C. Colleton County ESF-17 will, through the county EOC, coordinate with State ESF-17 along with federal and national organizations to obtain state and federal assistance when required.

ESF-18 - Donated Goods and Volunteer Services

Primary: Colleton County Parks and Recreation

Support: Colleton County Fire-Rescue Emergency Management Division (EMD) - Community Emergency Response Team (CERT), Colleton County Information / Technology Department, American Red Cross, Municipal Administrations, The Salvation Army, South Carolina VOAD, South Carolina State Guard, South Carolina National Guard

| Reports To | Receives Reports From |
|-------------------------------------|--|
| ESF-14 (EOC Recovery Section Chief) | Colleton County Fire-Rescue Emergency Management Division (EMD) - Community Emergency Response Team (CERT), Colleton County Information / Technology Department, American Red Cross, Municipal Administrations, The Salvation Army, South Carolina VOAD, South Carolina State Guard, South Carolina National Guard |

I. INTRODUCTION

- A. The function of this ESF consists of three components working hand in hand to complete a mission. First it must identify the post disaster needs of the community and fulfill those needs through the remaining two components of Donated Goods Management and Volunteer Services to fill personnel needs. The ability of local governments to perform a situational assessment accurately and within the first few hours after an incident is critical. It provides the foundation for the subsequent response of adequate resources to life-threatening situations and imminent hazards. Correct and effective assessments permit local governments to prioritize their response activities, allocate scarce resources, request mutual aid, and State and Federal assistance quickly.
- B. Donated Goods and Volunteer Services are defined as follows: Donated Goods consist of commodities, services, financial resources, and facilities provided by public or private sources without charge to the government. Volunteer Services consist of assistance provided by personnel without charge to the government.

II. MISSION

- A. To identify the emergency support functions and support agencies that will be needed to coordinate the rapid assessment of the post-disaster situation as it relates to casualties, hazards, and human needs. Then to coordinate the information rapidly and working through the Planning Section (ESF 5), disseminate it to decision-makers, the appropriate ESFs in the EOC, outside agencies and the SEOC to request the needed goods and volunteer resources

that may be available from those agencies and resources wanting to assist, and to match the needed volunteers with appropriate tasks needing to be addressed.

III. CONCEPT OF OPERATIONS

- A. The EOC Recovery Section Chief (ESF-14) is responsible for implementing ESF-18 as soon as conditions warrant. Additionally, members of the Incident Management Team (IMT) and/or operations staff may be deployed to the forward impact areas to gather intelligence.
- B. ESF-18 will not be activated in every event, rather only in response to verifiable need within the impacted area.
- C. Offers of donated goods and volunteer services will be handled by the Donated Goods Unit Leader and the Volunteer Services Unit Leader. Calls received by the EOC will be routed to the Volunteer Coordination Center. Individuals will be encouraged to donate cash to the Community Foundation of the Lowcountry or to other local organizations of their choice. Under certain circumstances donated goods and volunteer services may not be accepted.
- D. ESF-18 will coordinate for the human disaster assessment and meet the basic resource requirements of this function.
 - 1. Donated Goods Unit Leader will be at the designated county warehouse upon activation, and will answer to the Logistics Section Chief.
 - 2. Volunteer Services Unit Leader will be at the designated coordination center location upon activation, and will answer to the Logistics Section Chief.
- E. Donated Goods will be delivered to a central warehouse (referred to in this plan as “County Warehouse”) managed by the Warehouse Manager appointed by the Donated Goods Unit Leader. However, pre-certified state and local groups, including volunteer organizations, will be allowed to request donated goods directly from the SCEMD central or regional warehouse.
- F. Volunteer Services will be managed by either Colleton County Parks and Recreation or Colleton County Fire-Rescue Emergency Management Division’s Community Emergency Response Team (CCFR-EMD CERT).
- G. ESF-18 will coordinate with local municipalities and Public Service Districts to pre-establish designated locations to be used as distribution points for FEMA/USACOE disaster supplies and Donated Goods.
- H. ESF-18 will maintain communications with support agencies in the field and/or the EOC, municipal EOCs, damage assessment personnel, Disaster Welfare Services, ESF-14 (Recovery and Mitigation), CCFR-EMD CERT Members, and Air OPS, regarding the rapid acquisition of information needed for the assessment of the disaster.
- I. All ESF-18 personnel will be trained on the principles of the National Incident Management System (NIMS) and integrate those principles into all ESF-18 planning and response operations.

IV. ESF ACTIONS - The emergency operations necessary for the performance of this function include but are not limited to:

- A. Preparedness

1. ESF-18 Supervisor
 - a) Maintain a listing of available support services and capabilities.
 - b) Train and exercise volunteer organization personnel.
 - c) Participate in state exercises. Conduct, at least annually, an ESF-18 exercise to validate this annex and supporting SOPs.
 - d) Annually review the Department of Homeland Security Universal Task List and integrate tasks as appropriate.
 - e) Ensure all ESF-18 personnel integrate NIMS principles in all planning. As a minimum, primary action officers for all ESF-18 agencies will complete FEMA's NIMS Awareness Course or equivalent course.
2. Volunteer Services Unit Leader
 - a) Develop procedures and a database for volunteer resources to be used during emergencies or disasters.
3. Donated Goods Unit Leader
 - a) Coordinate with Colleton County Parks and Recreation as well as ESF-5 to identify prospective staging area warehouses available for lease before an event occurs.

B. Response

1. ESF-18 Supervisor:
 - a) Activate and notify county and municipal agencies and volunteer relief organizations when an emergency or disaster is threatening or has occurred as directed by EOC Incident Commander.
 - b) Activate the Donated Goods and Volunteer Services Management System as directed by EOC Incident Commander.
 - c) Ensure maintenance of accurate records of expenditures for County incurred expenses related to the delivery of services during emergency operations.
 - d) Assist Communications Group Supervisor with the establishment of radio communications for the support agencies still in need of radios and/or communications.
 - e) Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.
2. Volunteer Services Unit Leader
 - a) Activate the Volunteer Services Management System as directed by Recovery Division Supervisor/Section Chief.
 - b) Coordinate delivery of volunteer services to the victims; maintain records of services being provided, the location of operations and requirements for support.
 - c) Ensure maintenance of accurate records of expenditures for County incurred expenses related to the delivery of services during emergency operations.
3. Donated Goods Unit Leader

- a) Activate the Donated Goods Management System as directed by the Logistics Section Chief.
- b) Implement agreement with United Way, Food Bank Associations and other organizations as required.
- c) Coordinate delivery of donated goods to the victims; maintain records of services being provided, the location of operations and requirements for support.
- d) Coordinate with ESF-1 (Transportation) for adequate transportation to deliver donated goods from the county warehouse or local reception centers.
- e) Ensure maintenance of accurate records of expenditures for County incurred expenses related to the delivery of services during emergency operations.

C. Mitigation

- 1. Support and plan for mitigation measures specific to ESF-18.
- 2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
- 3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
- 4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
- 5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.

D. Recovery

- 1. Scale down operations as requirements diminish and return to routine operations as soon as possible.
- 2. Assess the requirements for continued donated goods and volunteer services for the disaster victims.
- 3. Evaluate donated goods and volunteer services operations for effectiveness and revise plans to eliminate deficiencies.
- 4. Provide recommendations to the EOC to determine appropriate distribution of remaining donated goods to County Agencies and/or volunteer groups.
- 5. Assess unmet needs at the local level in providing resources and volunteers to meet those needs from available volunteer organizations.
- 6. Coordinate licensing requirements for volunteers.
- 7. Maintain Unit records required during a federal declaration.

V. RESPONSIBILITIES

A. Colleton County Parks and Recreation

- 1. Identify, train and assign personnel to staff ESF-18 during periods of activation.
- 2. Notify all ESF-18 supporting agencies upon activation.

3. Coordinate training and operation of Donated Goods and Volunteer Services Call Center.
 4. Coordinate a location for the Call Center of ESF-18, which will include adequate space, computers, Internet access, telephones, fax machines, copiers, and any other necessary equipment.
 5. Maintain accurate records of personal services and operational expenditures related to the delivery of services during emergency operations.
 6. Develop procedures to scale down ESF-18 operations as requirements diminish and return to routine operations.
 7. Develop procedures to distribute remaining donated goods to County Agencies and/or volunteer groups.
 8. Prepare a list of “needed” and “not needed” goods for Telephone Operators at the Donated Goods and Volunteer Services Call Center.
- B. Colleton County Fire-Rescue Emergency Management Division – Community Emergency Response Team (CCFR-EMD CERT)
1. Identify, train and assign personnel to maintain contact with and prepare to execute missions in support of ESF-18 during periods of activation to include CCFR-EMD CERT volunteers, Community Groups, etc.
 2. Coordinate and train primary and support agency personnel in the use of Palmetto EOC Resources Module.
 3. Maintain agreements with United Way and other volunteer organizations as required.
 4. Coordinate with County Emergency Operation Centers (local governments) to establish ESF-18 or a Donated Goods and Volunteer Services point of contact at the local level.
 5. ESF-15 will coordinate the news release of the telephone number for the Donated Goods and Volunteer Services Call Center to the appropriate news media.
- C. Colleton County Information and Technology Department
1. Identify, train and assign personnel to maintain contact with and prepare to execute missions in support of ESF-18 during periods of activation.
 2. Set up call center lines and provide technology support for computers, phones, and networking. Manage and develop procedures for mapping damages to impacted areas and assist with technology support at distribution centers for donated goods and volunteer services.
- D. American Red Cross
1. Identify, train and assign personnel to maintain contact with and prepare to execute missions in support of ESF-18 during periods of activation.
 2. Assist with the coordination and management operations of donated goods inventory to include receipt, sorting, storage, and dispersal of donated goods.
- E. Municipal Administrations

1. Identify, train and assign personnel to maintain contact with and prepare to execute missions in support of ESF-18 during periods of activation.
 2. Coordinate and manage requests for donated goods to include receipt and dispersal of donated goods to points of distribution (PODs) and/or Donated Goods Warehouse.
- F. The Salvation Army
1. Identify, train and assign personnel to maintain contact with and prepare to execute missions in support of ESF-18 during periods of activation.
 2. Assist with coordination and management operations of donated goods inventory to include receipt, sorting, storage, and dispersal of donated goods.
- G. South Carolina VOAD
1. Identify, train and assign personnel to maintain contact with and prepare to execute missions in support of ESF-18 during periods of activation.
 2. Assist as requested by ESF-18 agencies.
- H. South Carolina State Guard
1. Assist with operations of donated goods warehouse and/or the coordination of volunteers as needed.
- I. South Carolina National Guard
1. Assist with operations of donated goods warehouse and/or the coordination of volunteers as needed
- VI. LOCAL, STATE, AND FEDERAL INTERFACE
- A. The County ESF-18 position does exist at the State level but not at the Federal level. The State may respond with an Emergency Support Team. At the local level, primary coordination will occur with the municipalities, who will have their Fire and Law Enforcement services gathering assessment information, as well as reports from utility work crews and others. Also, the other ESFs represented in the EOC will be providing information through their primary areas of responsibility.

ESF-19 - Military Support

Primary: S.C. National Guard

Support: SC Army National Guard, SC Air National Guard, S.C. State Guard, South Carolina Emergency Management Division (SCEMD) / State Emergency Operations Center (SEOC)

| Reports To | Receives Reports From |
|--|--|
| SEOC Section / Logistics Chiefs / NG TAG Leadership | SC Army National Guard, S.C. State Guard, Emergency Management Division (SCEMD) / State Emergency Operations Center (SEOC), SEOC ESF-19 |

I. INTRODUCTION

- A. Military support to Colleton County will be coordinated by the South Carolina National Guard (SCNG), with assistance from other State and Department of Defense (DOD) agencies, in times of a threatened or actual major emergency or catastrophic disaster.

II. MISSION

- A. Coordinate planning necessary to identify the capabilities and limitations of State Military and DOD services in advance of the emergency, so as to affect the effective and efficient utilization of military resources for assistance to civil authorities.

III. CONCEPT OF OPERATIONS

- A. ESF-19 will coordinate with their DOD counterparts in those services sent to assist with the recovery process. All DOD agencies will follow their own chain of command. Requests for assistance will be coordinated with the state and federal coordinating officers appointed at the time of the disaster. ESF-19 will coordinate with the Federal Defense Coordinating Officer (DCO) regarding the missions assigned to the DOD/Defense Coordinating Officer (DCO).
- B. Upon activation of the Emergency Operations Center (EOC), ESF-19 desk will be staffed according to the SEOC OPCON levels established by EMD Chief of Operations.
- C. ESF-19 will advise the EOC and County Administrator of capabilities and resources, ongoing mission status, troop numbers, estimated costs, and any other operational considerations.
- D. DOD forces from outside the area, who are assigned to help, will be tasked on a mission type basis by ESF-19, and open request from the county according to their function or specialty area. All DOD forces will be processed into the state by the SCNG prior to entering the state and local county area of operations.
- E. The three phases of operations likely to involve DOD assistance are:

1. Phase I- Relief.
 2. Phase II- Recovery.
 3. DOD will participate less in Phase III- Reconstitution, as they redeploy to their home bases.
- F. All ESF-19 personnel will be trained on the principles of the National Incident Management System (NIMS) and integrate those principles into all ESF-19 planning and response operations.
- IV. ESF ACTIONS - The emergency operations necessary for the performance of this function include but are not limited to:
- A. Preparedness
 1. Keep EMD and other supporting agencies apprised of changes in the agency's mission, ESF-19 personnel or emergency contact information for SCNG personnel.
 2. Review copies of other agency SOGs to maintain a high level of coordination.
 3. Update SOG with State EMD so those plans reflect the current procedures used by EMD and FEMA for Phase I and II operations.
 4. Be familiar with the civilian Incident Command System (ICS) and its application to the military command and control structure.
 - B. Mitigation
 1. Support and plan for mitigation measures specific to ESF-19.
 2. Support requests and directives from the County Administrator, Governor and/or FEMA concerning mitigation activities.
 3. Document matters that may be needed for inclusion in agency or state/federal briefings, situation reports and action plans.
 4. Develop agency specific plans and procedures that reduce the loss of life and property by minimizing the impact of disasters both pre-impact and post-impact.
 5. Reference the Lowcountry Natural Hazard Mitigation Plan for additional information.
 - C. Response
 1. ESF-19 will be activated by EMD, the SCNG, or as required by the emergency or in the anticipation of an event.
 2. As the situation develops, the primary agency will coordinate with the County EMD to determine EOC operational status and the requirement for shift coverage.
 3. Provide SITREPs as required by the primary agency, EMD, or the State EOC (SEOC).
 4. Maintain individual agency logs, records of actions supporting the missions assigned, as well as that required for reimbursement, when authorized.
 5. Assist with request for military support during DEMOB plan in anticipation of concluding Phase II operations, or when requested by the primary agency.

6. Support or carry out response operations in the following areas as available:
 - a) Support evacuation operations.
 - b) Support search and rescue operations.
 - c) Transportation of supplies and services.
 - d) Provide engineering support.
 - e) Coordinate and conduct aviation operations.
 - f) Support law enforcement, security, and homeland defense operations.
 - g) Conduct debris clearance/removal operations.
 - h) Support feeding operations.
 - i) Support logistics staging area operations.
 - j) Support firefighting and HAZMAT operations.
 - k) Maintain labor, equipment and materials forms used for possible reimbursement, if authorized.

D. Recovery

1. Continue assigned missions in support of law enforcement, SAR, damage assessment, debris removal, transportation services, medical support, warehouse operations, and other tasking as assigned.
2. Coordinate all components of the ESF and adjust plans accordingly.
3. Coordinate the standing down phase so that appropriate representation is maintained at the ESF-19 position at the EOC at all times.
4. Recommend changes to the agency plans, based on lessons learned.
5. Participate in After-Action Report writing and any critiques held, once Phase II operations have concluded.

V. RESPONSIBILITIES

A. South Carolina National Guard

1. Identify, train, and assign SC National Guard personnel to maintain contact with and prepare to execute missions in support of ESF-19 during periods of activation.
2. Provide personnel support.
3. Notify all ESF-19 supporting agencies upon activation.
4. Submit copies of all tasking to the Adjutant General.
5. Supervise and provide personnel to assist the EOC with the Air Operations Unit.

B. South Carolina State Guard

1. Identify and assign SCSG personnel to staff ESF-19 in the EOC.
2. Provide military support for functions as assigned by the Adjutant General (TAG) or as acceptable.
3. Operates under the Adjutant General (TAG) and serves as the state's emergency management coordination point within the SEOC, when activated.

C. South Carolina Air National Guard

1. Identify, train, and assign SC National Guard personnel to maintain contact with and prepare to execute missions in support of ESF-19 during periods of activation.
 2. Provide personnel support.
 3. Notify all ESF-19 supporting agencies upon activation.
 4. Submit copies of all tasking to the Adjutant General.
 5. Supervise and provide personnel to assist the EOC with the Air Operations Unit.
- D. South Carolina Emergency Management Division (SCEMD) / State Emergency Operations Center (SEOC)
1. Operates under the Adjutant General (TAG) and serves as the state's emergency management coordination point within the SEOC, when activated.
- VI. LOCAL, STATE, AND FEDERAL INTERFACE
- A. ESF-19 does exist in the State EOP. The services are represented at the state level by the SCNG at the SEOC. Depending on the magnitude of the event and whether or not a federal declaration is made, the DCO will work under the FCO out of the designated Disaster Field Office (DFO).

ESF-24 - Business and Industry

Primary: Colleton County Economic Alliance

Support: Colleton County Administration, Colleton County Chamber of Commerce, Town of Edisto Beach Chamber of Commerce, Local Emergency Planning Committee (LEPC)

| Reports To | Receives Reports From |
|-------------------------------------|---|
| ESF-14 (EOC Recovery Section Chief) | Colleton County Administration, Municipal Administrations, Colleton County Chamber of Commerce, Town of Edisto Beach Chamber of Commerce, Local Emergency Planning Committee (LEPC) |

I. INTRODUCTION

- A. The physical safety and economic security of the citizens, business and industry of Colleton County are issues of common concern to the public and private sectors. There are actions these entities can take together to prepare for, respond to, and quickly recover from an impact to Colleton County’s business and industry. These actions will minimize business “down time” and ensure the county’s economic engine remains strong.
- B. A significant portion of Colleton County’s economic infrastructure is situated in and managed by the private sector. This segment of the economy must be represented during a disaster response to assist with risk communication, hazard/vulnerability assessment, loss prevention activities, lifeline protection, prioritization of lifeline and critical sector restoration, and business recovery.
- C. Correspondingly, it is also imperative that non-infrastructure-based business and industrial enterprises be represented as full partners and respond to the natural and technological threats/impacts to their and the state’s economic welfare. Such a well-rounded government/private sector partnership helps to assure the survivability and continuity of a vibrant Colleton area economy.
- D. The ability of the local community to recover from a catastrophic event requires the coordination and cooperation between its citizens, members of business and industry, local government and many others-including visitors. There is often a fine line between providing for public safety while at the same time facilitating economic revitalization crucial to the recovery process. ESF-24 is a collaborative approach to disaster mitigation and recovery management for businesses and industry desiring to maintain their share of their market environment while at the same time being good community neighbors.
- E. According to the SC Department of Commerce (based on various sources), one in four businesses that close due to a disaster will not reopen. Roughly 40-60% of small businesses never re-open following a disaster. Ninety percent of small

companies fail within 1 year of disaster unless they resume operations within 5 days. This reiterates the importance of ensuring proper coordination and support of Colleton County businesses during recovery efforts (*Note: these are pre-COVID-19 statistics).

II. MISSION

- A. Purpose - To provide for the coordinated effort of all concerned parties involved with economic mitigation, preparedness, response, and most importantly recovery in the community before, during and after a disaster or major emergency. These events include both natural and man-made emergencies.
- B. Organization – Colleton County Economic Alliance or Recovery Section Chief will lead ESF-24 activities.

III. CONCEPT OF OPERATIONS

- A. When notified, representatives of local business and industry will provide personnel to staff and manage ESF-24 activities during EOC activations, and other disaster-oriented activities or training.
- B. When available, representatives from the many area associations will be involved and requested to interface with their constituents regarding disaster preparedness, mitigation, planning and response procedures. Association leaders can then disseminate the local plans and standard operating guides (SOGs) to their members.
- C. Additional support agencies will be added as identified and approved.

IV. Primary ESF-24 activities include, but are not limited to:

- A. Communicate risk and vulnerability to entities under their purview.
- B. Assist with hazard and risk assessment.
- C. Encourage and assist (as appropriate) the development of business/industry response and recovery plans.
- D. Coordinate and develop business/industry incident specific action plans during disaster response activities.
- E. Assist EMD planners with mitigation, response, restoration and recovery priorities and plans for such critical links as:
 - 1. Health/medical
 - 2. Water and wastewater
 - 3. Food processing, distribution, and sale
 - 4. Electrical power generation and distribution
 - 5. Communications
 - 6. Banking and insurance
 - 7. Fuel
 - 8. Building trades industry and large building supply retailers
- F. Assist EMD Planning Section with preparedness, response, mitigation and recovery priorities and strategies for other business segments such as:
 - 1. Hospitality and other service-oriented business
 - 2. Light and heavy industry
 - 3. Non-profit entities

- G. Assist Recovery Section in developing/executing business and industry long-term recovery priorities, plans, and strategies.
 - H. Develop/communicate loss prevention strategies.
 - I. Assist with Damage Assessment Team, by receiving reports of and analyzing private sector damage assessment information.
 - J. Monitor, coordinate, and communicate lodging vacancy rates with ESF-5 immediately prior to, and during hurricane evacuation.
 - K. Coordinate with South Carolina Department of Commerce, FEMA, and Small Business Administration (SBA) to connect affected local business and industry to recovery resources and funding where applicable and feasible. These connections may include direct references, information distribution and/or Business Recovery Centers (BRC's).
 - L. Plan, coordinate, and monitor the deployment/activities of insurance claims adjusters, and Independent Agents to facilitate assessment of insurable claims.
 - M. Source, coordinate the deployment of, and monitor business/industry specific response, recovery, and/or restoration teams.
- V. LOCAL, STATE, AND FEDERAL INTERFACE
- A. The ESF-24 function is represented at the State EOC as ESF-24 and should be called upon for assistance. It does not exist at the federal level in the Federal Response Plan per se. However, agencies such as the Small Business Administration and others are in place to provide limited assistance to the private sector.
 - B. The roles, responsibilities, and participation of the private sector during Incidents of National Significance vary based on the nature of the organization and the type and impact of the incident. The roles of the private sector organizations are summarized as follows:
 1. Impacted Organizations or Infrastructure: Private sector organizations may be affected by direct or indirect consequences of the incident, including privately owned critical infrastructure, key resources, and those main private sector organizations that are significant to local, regional, and national economic recovery for the incident.
 2. Response Resource: Private sector organizations provide response resources (donated or compensated) during an incident – including specialized teams, equipment, and advanced technologies through local public-private emergency plans, mutual aid agreements, or incident specific requests from government and private sector/volunteer initiatives.
 3. Regulated and/or Responsible Party: Owners/operators of certain regulated facilities or hazardous operations may bear responsibilities under the law for preparing for and preventing incidents from occurring and responding to an incident once it occurs.

EOP Citizen Emergency Management Recommendations

I. Introduction

A. General

1. Colleton County Government strives to provide its citizens with emergency services in the event a disaster or emergency occurs. However, there are certain types of events that would overwhelm local resources. This means that emergency response assets could be largely delayed or possibly even unavailable during these types of events. Given that state resources may not be immediately available for Colleton County citizens and federal resources may not arrive until days after the event occurs, it is recommended that Colleton County citizens make the necessary preparations to care for themselves in the event that local or state resources are not immediately available to respond. The strength of Colleton County's preparedness and the resiliency of the county's recovery begins with the preparations that Colleton citizens make in their own homes.

II. Preparations by Hazard

A. General - The following recommendations are separated by hazard:

1. Hurricanes/Tropical Storms/Coastal Storms/Coastal Erosion
 - a) If you are in an evacuation zone, know your zone. Know where to go. If you are ordered to evacuate, know the local hurricane evacuation route(s) to take and have a plan for where you can stay. Contact the Emergency Management Division for more information.
 - b) Put together a go-bag: disaster supply kit, including a flashlight, batteries, cash, first aid supplies, medications, and copies of your critical information if you need to evacuate.
 - c) If you are not in an area that is advised to evacuate and you decide to stay in your home, plan for adequate supplies in case you lose power and water for several days and you are not able to leave due to flooding or blocked roads.
 - d) Make a family emergency communication plan so that family members can communicate during and after a storm.
 - e) Preparing Your Home
 - (1) Hurricane winds can cause trees and branches to fall, so before hurricane season trim or remove damaged trees and limbs to keep you and your property safe.

- (2) Secure loose rain gutters and downspouts and clear any clogged areas or debris to prevent water damage to your property.
- (3) Reduce property damage by retrofitting to secure and reinforce the roof, windows and doors, including the garage doors.
- (4) Purchase a portable generator or install a generator for use during power outages. Remember to keep generators and other alternate power/heat sources outside, at least 20 feet away from windows and doors and protected from moisture; and NEVER try to power the house wiring by plugging a generator into a wall outlet.
- (5) Consider building a FEMA safe room or ICC 500 storm shelter designed for protection from high-winds and in locations above flooding levels.
- (6) Hurricane Watch
 - (a) Hurricane watch = conditions possible within the next 48 hrs. Steps to take:
 - (i) Review your evacuation route(s) & listen to local officials.
 - (ii) Review the items in your disaster supply kit; and add items to meet the household needs for children, parents, individuals with disabilities or other access and functional needs or pets.
 - (b) Hurricane warning = conditions are expected within 36 hrs. Steps to take:
 - (i) Follow evacuation orders from local officials, if given.
 - (ii) Check-in with family and friends by texting or using social media.
 - (iii) Follow the hurricane timeline preparedness checklist, depending on when the storm is anticipated to hit and the impact that is projected for your location.
 - (c) What to do when a hurricane is 36 hours from arriving
 - (i) Turn on your TV or radio in order to get the latest weather updates and emergency instructions.
 - (ii) Build or restock your emergency preparedness kit. Include food and water sufficient for at least three days,

- medications, a flashlight, batteries, cash, and first aid supplies.
 - (iii) Plan how to communicate with family members if you lose power. For example, you can call, text, email or use social media. Remember that during disasters, sending text messages is usually reliable and faster than making phone calls because phone lines are often overloaded.
 - (iv) Review your evacuation plan with your family. You may have to leave quickly so plan ahead.
 - (v) Keep your car in good working condition and keep the gas tank full; stock your vehicle with emergency supplies and a change of clothes.
- (d) What to do when a hurricane is 18-36 hours from arriving
- (i) Bookmark your city or county website for quick access to storm updates and emergency instructions.
 - (ii) Bring loose, lightweight objects inside that could become projectiles in high winds (e.g., patio furniture, garbage cans); anchor objects that would be unsafe to bring inside (e.g., propane tanks); and trim or remove trees close enough to fall on the building.
 - (iii) Cover all of your home's windows. Permanent storm shutters offer the best protection for windows. A second option is to board up windows with 5/8" exterior grade or marine plywood, cut to fit and ready to install.
- (e) What to do when a hurricane is 6-18 hours from arriving
- (i) Turn on your TV/radio or check your city/county website every 30 minutes in order to get the latest weather updates and emergency instructions.
 - (ii) Charge your cell phone now so you will have a full battery in case you lose power.
- (f) What to do when a hurricane is less than 6 hours from arriving

- (i) If you're not in an area that is recommended for evacuation, plan to stay at home or where you are and let friends and family know where you are.
 - (ii) Close storm shutters and stay away from windows. Flying glass from broken windows could injure you.
 - (iii) Turn your refrigerator or freezer to the coldest setting and open only when necessary. If you lose power, food will last longer. Keep a thermometer in the refrigerator to be able to check the food temperature when the power is restored.
 - (iv) Turn on your TV/radio or check your city/county website every 30 minutes in order to get the latest weather updates and emergency instructions.
- (g) After a Hurricane
- (i) Listen to local officials for updates and instructions.
 - (ii) Check-in with family and friends by texting or using social media.
 - (iii) Return home only when authorities indicate it is safe.
 - (iv) Watch out for debris and downed power lines.
 - (v) Avoid walking or driving through flood waters. Just 6 inches of moving water can knock you down, and one foot of fast-moving water can sweep your vehicle away.
 - (vi) Avoid flood water as it may be electrically charged from underground or downed power lines and may hide dangerous debris or places where the ground is washed away.
 - (vii) Photograph the damage to your property in order to assist in filing an insurance claim.
 - (viii) Do what you can to prevent further damage to your property, (e.g., putting a tarp on a damaged roof), as insurance may not cover additional damage that occurs after the storm.
- (h) When there is no hurricane:

- (i) Make a hurricane plan.
Know your hurricane risk. Talk to your local emergency management division.
- (ii) Make an emergency plan.
- (iii) Sign up for alerts and warnings.
- (iv) Make a Family Communication plan.
- (v) Plan shelter options.
- (vi) Know your evacuation route.
- (vii) Build or restock your basic disaster supplies kit, including food and water, a flashlight, batteries, chargers, cash, and first aid supplies.
- (viii) Consider buying flood insurance.
- (ix) Familiarize yourself with local emergency plans. Know where to go and how to get there should you need to get to higher ground or to evacuate.
- (x) Stay tuned to local wireless emergency alerts, TV, or radio for weather updates, emergency instructions, or evacuation orders.

2. Floods

- a) Turn Around, Don't Drown! ®
- b) Avoid walking or driving through flood waters.
- c) Do not drive over bridges that are over fast-moving floodwaters. Floodwaters can scour foundation material from around the footings and make the bridge unstable.
- d) Just 6 inches of moving water can knock you down, and one foot of moving water can sweep your vehicle away.
- e) If there is a chance of flash flooding, move immediately to higher ground.
- f) If floodwaters rise around your car but the water is not moving, abandon the car and move to higher ground. Do not leave the car and enter moving water.
- g) Avoid camping or parking along streams, rivers, and creeks during heavy rainfall. These areas can flood quickly and with little warning.
- h) Flood Watch = "Be Aware." Conditions are right for flooding to occur in your area. Steps to take
 - (1) Turn on your TV/radio. You will receive the latest weather updates and emergency instructions.
 - (2) Know where to go. You may need to reach higher ground quickly and on foot.

- (3) Build or restock your emergency preparedness kit. Include a flashlight, batteries, cash, and first aid supplies.
- (4) Prepare Your Home
 - (a) Bring in outdoor furniture and move important indoor items to the highest possible floor. This will help protect them from flood damage.
 - (b) Disconnect electrical appliances and do not touch electrical equipment if you are wet or standing in water. You could be electrocuted.
 - (c) If instructed, turn off your gas and electricity at the main switch or valve. This helps prevent fires and explosions.
- i) Flood Warning = "Take Action!" Flooding is either happening or will happen shortly. Steps to take
 - (1) Move immediately to higher ground or stay on high ground.
 - (2) Evacuate if directed.
 - (3) Avoid walking or driving through flood waters. Turn Around, Don't Drown! Just 6 inches of moving water can knock you down and one foot of moving water can sweep your vehicle away.
- j) After a flood
 - (1) Return home only when authorities say it is safe.
 - (2) Be aware of areas where floodwaters have receded and watch out for debris. Floodwaters often erode roads and walkways.
 - (3) Do not attempt to drive through areas that are still flooded.
 - (4) Avoid standing water as it may be electrically charged from underground or downed power lines.
 - (5) Photograph damage to your property for insurance purposes.
- k) When it is not flooding:
 - (1) Make a flood plan.
 - (2) Know your flood risk.
 - (3) Familiarize yourself with local emergency plans. Know where to go and how to get there should you need to get to higher ground, the highest level of a building, or to evacuate.
 - (4) Make a flood emergency plan for the relevant type/s of local flood risk with plans such as evacuation, shelter, locations for high ground.
 - (5) Build or restock your emergency preparedness kit, including a minimum of 3 days of food and water, flashlight, batteries, cash, and first aid supplies.
 - (6) Consider buying flood insurance.

- (7) Stay tuned to your phone alerts, TV, or radio for weather updates, emergency instructions, or evacuation orders.

3. Wildfires

- a) Fire weather watch = dangerous fire weather conditions are possible over the next 12 to 72 hours. Steps to take
 - (1) Turn on your TV/radio. You'll get the latest weather updates and emergency instructions.
 - (2) Know where to go. If you are ordered to evacuate, know the route to take and have a plan of where you will go. Check-in with your friends and family.
 - (3) Keep your car fueled, in good condition, and stocked with emergency supplies and a change of clothes.
- b) Before Wildfire season
 - (1) Make a Wildfire plan.
 - (2) Know your wildfire risk.
 - (3) Familiarize yourself with local emergency plans. Know where to go and how to get there should you need to evacuate.
 - (4) Make a wildfire emergency plan including an evacuation plan and a communication plan.
 - (5) Build or restock your emergency preparedness kit, including a flashlight, batteries, cash, and first aid supplies. Stay tuned to your phone alerts, TV, or radio, for weather updates, emergency instructions or evacuation orders.
- c) Prepare Your Home
 - (1) Create and maintain an area approximately 30' away from your home that is free of anything that will burn, such as wood piles, dried leaves, newspapers, brush, and other landscaping that can burn. From 30 feet to 100 feet reduce or replace as much of the most flammable vegetation as possible and prune vegetation. Create "fuel breaks," such as driveways, gravel walkways, and lawns. Work with neighbors to create spaces up to 200 feet around your homes where vegetation is thinned to remove underbrush and tall trees do not touch each other for continuous canopies.
 - (2) Regularly clean the roof and gutters.
 - (3) Connect garden hoses long enough to reach any area of the home and fill garbage cans, tubs, or other large containers with water.
 - (4) Review your homeowner's insurance policy and also prepare/update a list of your home's contents.
- d) During a Wildfire

- (1) If there is a wildfire in the area, be ready to evacuate on short notice.
- (2) If you see a wildfire and haven't received evacuation orders yet, call 9-1-1. Don't assume that someone else has already called.
- (3) If ordered to evacuate during a wildfire, do it immediately-make sure and tell someone where you are going and when you have arrived.
- (4) If you or someone you are with has been burned, call 9-1-1 or seek help immediately; cool and cover burns to reduce chance of further injury or infection.

e) After a Wildfire

- (1) Return home only when authorities say it is safe.
- (2) For several hours after the fire, maintain a "fire watch." Check and recheck for smoke, sparks or hidden embers throughout the house, including the roof and the attic.
- (3) Use caution when entering burned areas as hazards may still exist, including hot spots, which can flare up without warning. Evacuate immediately if you smell smoke.

f) Cleaning Your Home

- (1) Wear a NIOSH certified-respirator (dust mask) and wet debris down to minimize breathing dust particles.
- (2) Discard any food that has been exposed to heat, smoke or soot.
- (3) Do NOT use water that you think may be contaminated to wash dishes, brush teeth, prepare food, wash hands, or to make ice or baby formula.
- (4) Photograph damage to your property for insurance purposes.

4. Tornadoes

a) Before a Tornado

- (1) Identify safe rooms built to FEMA criteria, ICC 500 storm shelters or other potential protective locations in sturdy buildings near your home, work, and other locations you frequent so you have a plan for where you will go quickly for safety when there is a Warning or an approaching tornado.
- (2) For schools, malls, and other buildings with long-span roofs or open space plans, or many occupants, ask the building manager to identify the best available refuge. Build an emergency kit and make a family communications plan.
- (3) Listen to NOAA Weather Radio or to commercial radio or television newscasts for the latest information. In any

emergency, always listen to the instructions given by local emergency management officials.

- (4) Be alert to changing weather conditions. Look for approaching storms.
- (5) Look for the following danger signs:
 - (a) Dark, often greenish sky
 - (b) Large hail
 - (c) A large, dark, low-lying cloud (particularly if rotating)
 - (d) Loud roar, similar to a freight train.
 - (e) If you see approaching storms or any of the danger signs, be prepared to take shelter immediately.

b) Tornado Facts

- (1) The extent of destruction caused by tornadoes depends on the tornado's intensity, size, path, time of day, and amount of time it is on the ground. Wind from tornadoes can reach more than 300 miles per hour, and damage paths can be more than 1 mile wide and 50 miles long. Wind from tornadoes can destroy buildings and trees, transform debris into deadly projectiles, and roll vehicles.
- (2) They may strike quickly, with little or no warning.
- (3) They may appear nearly transparent until dust and debris are picked up or a cloud forms in the funnel.
- (4) The average tornado moves Southwest to Northeast, but tornadoes have been known to move in any direction.
- (5) Tornadoes can accompany tropical storms and hurricanes as they move onto land.
- (6) Waterspouts are tornadoes that form over water.

c) Know the Terms. Familiarize yourself with these terms to help identify a tornado hazard:

- (1) Tornado Watch - Tornadoes are possible. When there is a Watch, move to be near enough to a shelter or sturdy building to be able to get there quickly in a few minutes if there is a Warning or if you see signs of a tornado approaching. Remain alert for approaching storms. Watch the sky and stay tuned to NOAA Weather Radio, commercial radio or television for information.
- (2) Tornado Warning - A tornado has been sighted or indicated by weather radar. Take shelter immediately.

d) During a Tornado

- (1) If you are under a tornado warning, seek shelter immediately! Most injuries associated with high winds are from flying debris, so remember to protect your head.

- (2) If you are in school, nursing home, hospital, factory, shopping center, high-rise building pre-identified best available refuge then:
 - (a) Go to a pre-designated area such as a safe room built to FEMA criteria or a small interior windowless room on the lowest level such as a closet or interior hallway. A room below ground in a basement, or storm cellar, is best. Put as many walls as possible between you and the outside. Get under a sturdy table and cover your head and neck with your arms and cover your body as best you can e.g., with a heavy coat or blankets, pillows.
 - (b) In a high-rise building, go to a small interior room or hallway on the lowest floor possible.
 - (c) Do not open windows.
- (3) If you are in a manufactured home or office then:
 - (a) Get out immediately and go to a pre-identified location such as the lowest floor of a sturdy, nearby building or a storm shelter. Mobile homes, even if tied down, do not offer protection from tornadoes.
- (4) If you are outside with no shelter then:
 - (a) If you are not in a sturdy building, there is no single research-based recommendation for what last-resort action to take because many factors can affect your decision. Possible actions include: Immediately get into a vehicle, buckle your seat belt and try to drive to the closest sturdy shelter. If your vehicle is hit by flying debris while you are driving, pull over and park.
 - (b) Take cover in a stationary vehicle. Put the seat belt on and cover your head with your arms and a blanket, coat or other cushion if possible.
- (5) In all situations:
 - (a) Do not get under an overpass or bridge. You are safer in a low, flat location.
 - (b) Never try to outrun a tornado in urban or congested areas in a car or truck. Instead, leave the vehicle immediately for protection in a sturdy building.
 - (c) Outdoor areas are not protected from flying debris.
 - (d) Flying debris from tornadoes causes most fatalities and injuries.

e) After a Tornado

- (1) If you are trapped, do not move about or kick up dust. Tap on a pipe or wall or use a whistle, if you have one, so that rescuers can locate you.
 - (2) Listen to local officials for updates and instructions.
 - (3) Check-in with family and friends by texting or using social media.
 - (4) Watch out for debris and downed power lines.
 - (5) Stay out of damaged buildings and homes until local authorities indicate it is safe.
 - (6) Use extreme caution during post-disaster clean-up of buildings and around debris. Do not attempt to remove heavy debris by yourself. Wear protective clothing, including a long-sleeved shirt, long pants, work gloves, and sturdy, thick-soled shoes during clean-up.
 - (7) Photograph the damage to your property in order to assist in filing an insurance claim.
 - (8) Do what you can to prevent further damage to your property, (e.g., putting a tarp on a damaged roof), as insurance may not cover additional damage that occurs after the storm.
 - (9) If your home is without power, use flashlights or battery-powered lanterns rather than candles to prevent accidental fires.
- f) Build a Safe Room
- (1) Extreme windstorms in many parts of the country pose a serious threat to buildings and their occupants. Your residence may be built "to code" but that does not mean it can withstand winds from extreme events such as tornadoes and major hurricanes. The purpose of a safe room built to FEMA criteria or a storm shelter built to ICC 500 standards is to provide a space where you and your family can seek refuge that provides a high level of protection. You can build a safe room in one of several places in your home.
 - (a) Your basement
 - (b) Atop a concrete slab-on-grade foundation or garage floor.
 - (c) An interior room on the first floor.
 - (2) Safe rooms built below ground level provide the greatest protection, but a safe room built in a first-floor interior room also can provide the necessary protection. Below-ground safe rooms must be designed to avoid accumulating water during the heavy rains that often accompany severe windstorms.

- (3) To protect its occupants, a safe room must be built to withstand high winds and flying debris, even if the rest of the residence is severely damaged or destroyed. Consider the following when building a safe room:
 - (a) The safe room must be adequately anchored to resist overturning and uplift.
 - (b) The walls, ceiling and door of the shelter must withstand wind pressure and resist penetration by windborne objects and falling debris.
 - (c) The connections between all parts of the safe room must be strong enough to resist the wind.
 - (d) Sections of either interior or exterior residence walls that are used as walls of the safe room must be separated from the structure of the residence so that damage to the residence will not cause damage to the safe room.

5. Earthquakes

a) Before An Earthquake

- (1) Before an earthquake occurs, secure items that could fall or move and cause injuries or damage (e.g., bookshelves, mirrors, light fixtures, televisions, computers, hot water heaters. Move beds away from windows and secure any hanging items over beds, couches, cribs or other places people sit or lie.
- (2) Practice how to “Drop, Cover, and Hold On!”
- (3) Plan and practice how to Drop to the ground, cover your head and neck with your arms, and if a safer place is nearby that you can get to without exposing yourself to flying debris, crawl to it and Hold On to maintain cover.
- (4) To react quickly you must practice often. You may only have seconds to protect yourself in an earthquake.
- (5) Store critical supplies (e.g., water, medication) and documents.
- (6) Plan how you will communicate with family members, including multiple methods by making a family emergency communication plan.
- (7) Consult a structural engineer to evaluate your home and ask about updates to strengthen areas that would be weak during an earthquake. When choosing your home or business to rent or buy, check if the building is earthquake resistant per local building codes.

b) During an Earthquake

- (1) If you are inside a building, drop down onto your hands and knees so the earthquake doesn't knock you down. Drop to the ground (before the earthquake drops you!)
 - (2) Cover your head and neck with your arms to protect yourself from falling debris.
 - (3) If you are in danger from falling objects, and you can move safely, crawl for additional cover under a sturdy desk or table.
 - (4) If no sturdy shelter is nearby, crawl away from windows, next to an interior wall. Stay away from glass, windows, outside doors and walls, and anything that could fall, such as light fixtures or furniture.
 - (5) Hold on to any sturdy covering so you can move with it until the shaking stops.
 - (6) Stay where you are until the shaking stops. Do not run outside. Do not get in a doorway as this does not provide protection from falling or flying objects, and you may not be able to remain standing.
 - (7) If getting safely to the floor to take cover won't be possible:
 - (a) If getting safely to the floor will be difficult, actions before an earthquake to secure or remove items that can fall or become projectiles should be a priority to create spaces.
 - (b) Identify an area away from windows and objects that could fall on you. The Earthquake Country Alliance advises getting as low as possible to the floor. People who use wheelchairs or other mobility devices should lock their wheels, bend over, and remain seated until the shaking stops. Protect your head and neck with your arms, a pillow, a book, or whatever is available.
 - (8) If you are in bed when you feel the shaking:
 - (a) Stay there and Cover your head and neck with a pillow. At night, hazards and debris are difficult to see and avoid; attempts to move in the dark result in more injuries than remaining in bed.
- c) If you are outside when you feel the shaking:
- (1) If you are outdoors when the shaking starts, move away from buildings, streetlights, and utility wires. Once in the open, "Drop, Cover, and Hold On." Stay there until the shaking stops.
- d) If you are in a moving vehicle when you feel the shaking:
- (1) It is difficult to control a vehicle during the shaking. If you are in a moving vehicle, stop as quickly and safely as

possible and stay in the vehicle. Avoid stopping near or under buildings, trees, overpasses, and utility wires. Proceed cautiously once the earthquake has stopped. Avoid roads, bridges, or ramps that the earthquake may have damaged.

e) After an Earthquake

- (1) When the shaking stops, look around. If the building is damaged and there is a clear path to safety, leave the building and go to an open space away from damaged areas.
- (2) If you are trapped, do not move about or kick up dust.
- (3) If you have a cell phone with you, use it to call or text for help.
- (4) Tap on a pipe or wall or use a whistle, if you have one, so that rescuers can locate you.
- (5) Once safe, monitor local news reports via battery operated radio, TV, social media, and cell phone text alerts for emergency information and instructions.
- (6) Check for injuries and provide assistance if you have training. Assist with rescues if you can do so safely.
- (7) If you are near the coast, learn about tsunamis in your area. If you are in an area that may have tsunamis, when the shaking stops, walk inland and to higher ground immediately. Monitor official reports for more information on the area's tsunami evacuation plans.
- (8) Use extreme caution during post-disaster clean-up of buildings and around debris. Do not attempt to remove heavy debris by yourself. Wear protective clothing, including a long-sleeved shirt, long pants, work gloves, and sturdy, thick-soled shoes during clean-up.
- (9) Be prepared to "Drop, Cover, and Hold on" in the likely event of aftershocks.

6. Hazardous Materials Incident

a) Before a Hazardous Materials Incident

- (1) The following are things you can do to protect yourself, your family and your property from the effects of a hazardous materials incident:
 - (a) Build an Emergency Supply Kit with the addition of plastic sheeting and duct tape.
 - (b) Make a Family Emergency Plan.
 - (c) Know how to operate your home's ventilation system.
 - (d) Identify an above-ground shelter room with as few openings as possible.

- (e) Read more about Sheltering in Place during a Hazardous Materials Incident. Listen to local radio or television stations for detailed information and follow instructions carefully. Remember that some toxic chemicals are odorless.
- b) If you are:
- (1) Asked to evacuate, then
 - (a) Do so immediately.
 - (b) Stay tuned to a radio or television for information on evacuation routes, temporary shelters, and procedures.
 - (c) If you have time, minimize contamination in the house by closing all windows, shutting all vents, and turning off attic fans.
 - (d) Take pre-assembled disaster supplies.
 - (e) Remember to help your neighbors who may require special assistance--infants, elderly people and people with access and functional needs.
 - (2) Caught Outside, then
 - (a) Stay upstream, uphill, and upwind. In general, try to go at least one-half mile (usually 8-10 city blocks) from the danger area.
 - (b) Do not walk into or touch any spilled liquids, airborne mists, or condensed solid chemical deposits. Try not to inhale gases, fumes and smoke. If possible, cover your mouth with a cloth or mask while leaving the area.
 - (c) Stay away from accident victims until the hazardous material has been identified.
 - (d) In a motor vehicle, stop and seek shelter in a permanent building.
 - (e) If you must remain in your car, keep car windows and vents closed and shut off the air conditioner and heater.
 - (3) Requested to stay indoors, then
 - (a) Bring pets inside.
 - (b) Close and lock all exterior doors and windows.
 - (c) Close vents, fireplace dampers, and as many interior doors as possible.
 - (d) Turn off air conditioners and ventilation systems or set ventilation systems to 100 percent recirculation so that no outside air is drawn into the building.
 - (e) If gas or vapors could have entered the building, take shallow breaths through a cloth or a towel.

- (f) Avoid eating or drinking any food or water that may be contaminated.
- (g) Go into your pre-selected shelter room.
- (h) Seal gaps under and around the following areas with wet towels, plastic sheeting, duct tape, wax paper or aluminum foil:
 - (i) Doorways and windows
 - (ii) Air conditioning units
 - (iii) Bathroom and kitchen exhaust fans
 - (iv) Stove and dryer vents with duct tape and plastic sheeting
- c) After a Hazardous Materials Incident
 - (1) The following are guidelines for the period following a hazardous materials incident:
 - (a) Listen to local radio or television stations for the latest emergency information.
 - (b) Go to a designated public shelter if you have been told to evacuate or you feel it is unsafe to remain in your home. Text SHELTER + your ZIP code to 43362 (4FEMA) to find the nearest shelter in your area (example: shelter 29488).
 - (c) Act quickly if you have come into contact with or have been exposed to hazardous chemicals.
 - (d) Follow decontamination instructions from local authorities.
 - (e) Seek medical treatment for unusual symptoms as soon as possible.
 - (f) Place exposed clothing and shoes in tightly sealed containers.
 - (g) Advise everyone who comes in contact with you that you may have been exposed to a toxic substance.
 - (h) Return home only when authorities say it is safe.
 - (i) Open windows and vents and turn on fans to provide ventilation.
 - (j) Find out from local authorities how to clean up your land and property.
 - (k) Report any lingering vapors or other hazards to your local emergency services office.

7. Rip Currents

- a) When visiting the beach, check with the National Weather Service and local officials to determine the rip current risk.
- b) Follow instructions from local officials and obey no swimming advisories.

- c) If caught in a rip current, swim perpendicular to the rip current (parallel to the shore) until you are clear of the rip current.
8. Severe Storms/Wind Storms/Hail/Other Hazard Events
- a) Before Thunderstorm and Lightning
 - (1) To prepare for a thunderstorm, you should do the following:
 - (a) To begin preparing, you should build an emergency kit and make a family communications plan.
 - (b) Remove dead or rotting trees and branches that could fall and cause injury or damage during a severe thunderstorm.
 - (c) Postpone outdoor activities.
 - (d) Secure outdoor objects that could blow away or cause damage.
 - (e) Get inside a home, building, or hard top automobile (not a convertible). Although you may be injured if lightning strikes your car, you are much safer inside a vehicle than outside.
 - (f) Remember, rubber-soled shoes and rubber tires provide NO protection from lightning. However, the steel frame of a hard-topped vehicle provides increased protection if you are not touching metal.
 - (g) Shutter windows and secure outside doors. If shutters are not available, close window blinds, shades or curtains.
 - (h) Unplug any electronic equipment well before the storm arrives.
 - (i) Lightning Risk Reduction When Outdoors
 - (i) If you are in a forest, seek shelter in a low area under a thick growth of small trees.
 - (ii) In an open area, go to a low place such as a ravine or valley. Be alert for flash floods.
 - (iii) On open water, get to land and find shelter immediately.
 - (2) Facts about Thunderstorms
 - (a) They may occur singly, in clusters or in lines.
 - (b) Some of the most severe occur when a single thunderstorm affects one location for an extended time.
 - (c) Thunderstorms typically produce heavy rain for a brief period, anywhere from 30 minutes to an hour.
 - (d) Warm, humid conditions are highly favorable for thunderstorm development.

- (e) About 10 percent of thunderstorms are classified as severe – one that produces hail at least an inch or larger in diameter, has winds of 58 miles per hour or higher or produces a tornado.

(3) Facts about Lightning

- (a) Lightning’s unpredictability increases the risk to individuals and property.
- (b) Lightning often strikes outside of heavy rain and may occur as far as 10 miles away from any rainfall.
- (c) “Heat lightning” is actually lightning from a thunderstorm too far away from thunder to be heard. However, the storm may be moving in your direction.
- (d) Most lightning deaths and injuries occur when people are caught outdoors in the summer months during the afternoon and evening.
- (e) Your chances of being struck by lightning are estimated to be 1 in 600,000 but could be reduced even further by following safety precautions.
 - (i) Lightning strike victims carry no electrical charge and should be attended to immediately.
 - (ii) Know the Terms. Familiarize yourself with these terms to help identify a thunderstorm hazard:
 - (a) Severe Thunderstorm Watch - Tells you when and where severe thunderstorms are likely to occur. Watch the sky and stay tuned to NOAA Weather Radio, commercial radio or television for information.
 - (b) Severe Thunderstorm Warning - Issued when severe weather has been reported by spotters or indicated by radar. Warnings indicate imminent danger to life and property to those in the path of the storm.
 - (iii) During Thunderstorms and Lightning If thunderstorm and lightning are occurring in your area, you should:

- (a) Use your battery-operated NOAA Weather Radio for updates from local officials.
- (b) Avoid contact with corded phones and devices including those plugged into electric for recharging. Cordless and wireless phones not connected to wall outlets are OK to use.
- (c) Avoid contact with electrical equipment or cords. Unplug appliances and other electrical items such as computers and turn off air conditioners. Power surges from lightning can cause serious damage.
- (d) Avoid contact with plumbing. Do not wash your hands, do not take a shower, do not wash dishes, and do not do laundry. Plumbing and bathroom fixtures can conduct electricity.
- (e) Stay away from windows and doors and stay off porches.
- (f) Do not lie on concrete floors and do not lean against concrete walls.
- (g) Avoid natural lightning rods such as a tall, isolated tree in an open area.
- (h) Avoid hilltops, open fields, the beach or a boat on the water.
- (i) Take shelter in a sturdy building.
- (j) Avoid isolated sheds or other small structures in open areas.
- (k) Avoid contact with anything metal—tractors, farm equipment, motorcycles, golf carts, golf clubs, and bicycles.
- (l) If you are driving, try to safely exit the roadway and park. Stay in the vehicle and turn on the emergency flashers until the heavy rain ends.
- (m) Avoid touching metal or other surfaces that conduct electricity in and outside the vehicle.

(4) After a Thunderstorm or Lightning Strike

- (a) If lightning strikes you or someone you know, call 9-1-1 for medical assistance as soon as possible. The following are things you should check when you attempt to give aid to a victim of lightning:
 - (i) Breathing - if breathing has stopped, begin mouth-to-mouth resuscitation.
 - (ii) Heartbeat - if the heart has stopped, administer CPR.
 - (iii) Pulse - if the victim has a pulse and is breathing, look for other possible injuries.
 - (iv) Check for burns where the lightning entered and left the body. Also, be alert for nervous system damage, broken bones and loss of hearing and eyesight.

(5) After the storm passes remember to:

- (a) Never drive through a flooded roadway. Turn around, don't drown!
- (b) Stay away from storm-damaged areas to keep from putting yourself at risk from the effects of severe thunderstorms.
- (c) Continue to listen to a NOAA Weather Radio or to local radio and television stations for updated information or instructions, as access to roads or some parts of the community may be blocked.
- (d) Help people who may require special assistance, such as infants, children and the elderly or those with access or functional needs.
- (e) Stay away from downed power lines and report them immediately.
- (f) Watch your animals closely. Keep them under your direct control.

9. Drought/Heat Advisory

a) Indoor Water Conservation Tips Prior to a Drought

(1) General

- (a) Never pour water down the drain when there may be another use for it. For example, use it to water your indoor plants or garden.
- (b) Repair dripping faucets by replacing washers. One drop per second wastes 2,700 gallons of water per year.
- (c) Check all plumbing for leaks and have any leaks repaired by a plumber.
- (d) Retrofit all household faucets by installing aerators with flow restrictors.

- (e) Insulate your water pipes to reduce heat loss and prevent them from breaking.
- (f) Install a water-softening system only when the minerals in the water would damage your pipes. Turn the softener off while on vacation.
- (g) Choose appliances that are more energy and water efficient.

(2) Bathroom

- (a) Consider purchasing a low-volume toilet that uses less than half the water of older models. Note: In many areas, low-volume units are required by law. Install a toilet displacement device to cut down on the amount of water needed to flush. Place a one-gallon plastic jug of water into the tank to displace toilet flow (do not use a brick, it may dissolve and loose pieces may cause damage to the internal parts). Be sure installation does not interfere with the operating parts.
- (b) Replace your shower head with an ultra-low-flow version.

(3) Kitchen

- (a) Start a compost pile as an alternate method of disposing of food waste or simply dispose of food in the garbage. (Kitchen sink disposals require a lot of water to operate properly).

b) Outdoor Water Conservation Tips Prior to a Drought

(1) General

- (a) Check your well pump periodically. If the automatic pump turns on and off while water is not being used, you have a leak.
- (b) Plant native and/or drought-tolerant grasses, ground covers, shrubs, and trees. Once established, plants adapted to your local climate do not need water as frequently and usually will survive a dry period without watering. Small plants require less water to become established. Group plants together based on similar water needs. Install irrigation devices that are the most water efficient for each use, such as micro and drip irrigation, and soaker hoses.
- (c) Use mulch to retain moisture in the soil. Mulch also helps control weeds that compete with landscape plants for water.

- (d) Avoid purchasing recreational water toys that require a constant stream of water.
- (e) Avoid installing ornamental water features (such as fountains) unless they use recirculated water.
- (f) Consider rainwater harvesting where practical.
- (g) Contact your local water provider for information and assistance.

(2) Lawn Care

- (a) Position sprinklers so water lands on the lawn and shrubs and not on paved areas.
- (b) Repair sprinklers that spray a fine mist. Most misting issues result from a pressure problem, properly regulating pressure in an irrigation system will prevent misting.
- (c) Check sprinkler systems and timing devices regularly to be sure they operate properly.
- (d) Raise the lawn mower blade to at least three inches or to its highest level. A higher cut encourages grass roots to grow deeper, shades the root system, and holds soil moisture.
- (e) Plant drought-resistant lawn seed. Reduce or eliminate lawn areas that are not used frequently. Avoid over-fertilizing your lawn. Applying fertilizer increases the need for water. Apply fertilizers that contain slow-release, water-insoluble forms of nitrogen.
- (f) Choose a water-efficient irrigation system such as drip irrigation for your trees, shrubs, and flowers.
- (g) Turn irrigation down in fall and off in winter. Water manually in winter only if needed.
- (h) Put a layer of mulch around trees and plants to reduce evaporation and keep the soil cool. Organic mulch also improves the soil and prevents weeds.
- (i) Invest in a weather-based irrigation controller—or a smart controller. These devices will automatically adjust the watering time and frequency based on soil moisture, rain, wind, and evaporation and transpiration rates. Check with your local water agency to see if there is a rebate available for the purchase of a smart controller.

(3) Pool

- (a) Install a new water-saving pool filter. A single back flushing with a traditional filter uses 180 to 250 gallons of water.

- (b) Cover pools and spas to reduce evaporation of water.
- c) During a Drought
 - (1) Always observe state and local restrictions on water use during a drought. If restricted, for example, do not water your lawn, wash your car, or other non-essential uses, to help ensure there is enough water for essential uses. Contact your state or local government for current information and suggestions.
 - (2) Indoor Water Conservation Tips While in a Drought
 - (a) Bathroom
 - (i) Avoid flushing the toilet unnecessarily. Dispose of tissues, insects, and other similar waste in the trash rather than the toilet.
 - (ii) Avoid taking baths—take short showers—turn on water only to get wet and lather and then again to rinse off.
 - (iii) Avoid letting the water run while brushing your teeth, washing your face or shaving.
 - (iv) Place a bucket in the shower to catch excess water for watering plants.
 - (b) Kitchen
 - (i) Operate automatic dishwashers only when they are fully loaded. Use the "light wash" feature, if available, to use less water.
 - (ii) Hand wash dishes by filling two containers—one with soapy water and the other with rinse water containing a small amount of chlorine bleach.
 - (iii) Clean vegetables in a pan filled with water rather than running water from the tap.
 - (iv) Store drinking water in the refrigerator. Do not let the tap run while you are waiting for water to cool.
 - (v) Avoid wasting water waiting for it to get hot. Capture it for other uses such as plant watering or heat it on the stove or in a microwave.
 - (vi) Avoid rinsing dishes before placing them in the dishwasher; just remove large particles of food. (Most dishwashers can clean soiled dishes very well, so dishes do not have to be rinsed before washing)

- (vii) Avoid using running water to thaw meat or other frozen foods. Defrost food overnight in the refrigerator or use the defrost setting on your microwave oven.
- (c) Laundry
 - (i) Operate automatic clothes washers only when they are fully loaded or set the water level for the size of your load.
- (3) Outdoor Water Conservation Tips While in a Drought
 - (a) Car Washing
 - (i) Use a commercial car wash that recycles water.
 - (ii) If you wash your own car, use a shut-off nozzle that can be adjusted down to a fine spray on your hose.
 - (b) Lawn Care
 - (i) Avoid over watering your lawn and water only when needed:
 - (ii) A heavy rain eliminates the need for watering for up to two weeks. Most of the year, lawns only need one inch of water per week.
 - (iii) Check the soil moisture levels with a soil probe, spade or large screwdriver. You don't need to water if the soil is still moist. If your grass springs back when you step on it, it doesn't need water yet.
 - (iv) If your lawn does require watering, do so early in the morning or later in the evening, when temperatures are cooler.
 - (v) Check your sprinkler system frequently and adjust sprinklers so only your lawn is watered and not the house, sidewalk, or street.
 - (vi) Water in several short sessions rather than one long one, in order for your lawn to better absorb moisture and avoid runoff.
 - (vii) Use a broom or blower instead of a hose to clean leaves and other debris from your driveway or sidewalk.
 - (viii) Avoid leaving sprinklers or hoses unattended. A garden hose can pour out 600 gallons or more in only a few hours.

- (ix) In extreme drought, allow lawns to die in favor of preserving trees and large shrubs.

10. Winter Weather (Freezing/Snow/Ice)

a) Before Snowstorms and Extreme Cold

- (1) Make a Family Communications Plan. Your family may not be together when disaster strikes, so it is important to know how you will contact one another, how you will get back together and what you will do in case of an emergency.
- (2) Make an emergency kit for at least three days of self-sufficiency.
- (3) Keep space heater safety in mind: Use electric space heaters with automatic shut-off switches and non-glowing elements. Remember to keep all heat sources at least three feet away from furniture and drapes.
- (4) Prepare your home:
 - (a) Make sure your home is well insulated and that you have weather stripping around your doors and window sills to keep the warm air inside. Make sure you have a working carbon monoxide detector.
 - (b) Keep fire extinguishers on hand, and make sure everyone in your house knows how to use them.
 - (c) House fires pose an additional risk, as more people turn to alternate heating sources without taking the necessary safety precautions.
 - (d) Learn how to shut off water valves (in case a pipe bursts).
 - (e) Insulate your home by installing storm windows or covering windows with plastic from the inside to keep cold air out.
 - (f) Hire a contractor to check the structural ability of the roof to sustain unusually heavy weight from the accumulation of snow - or water, if drains on flat roofs do not work.
 - (g) If you have a wood burning fireplace, consider storing wood to keep you warm if winter weather knocks out your heat. Also, make sure you have your chimney cleaned and inspected every year.
 - (h) Have at least one of the following heat sources in case the power goes out:
 - (i) Extra blankets, sleeping bags and warm winter coats.

- (j) Fireplace or wood-burning stove with plenty of dry firewood, or a gas log fireplace.
- (5) Prepare your vehicle:
- (a) Fully winterize your vehicle: Have a mechanic check antifreeze, brakes, heater and defroster, tires, and windshield wipers to ensure they are in good shape. Keep your gas tank at least half full.
 - (b) Keep an extra emergency kit specifically created for your car. In addition to the basic essentials, consider adding a portable cell phone charger, ice scraper, extra blanket, sand for traction and jumper cables.
 - (c) Rock salt or more environmentally safe products to melt ice on walkways. Visit the Environmental Protection Agency for a complete list of recommended products.
 - (d) Sand to improve traction.
 - (e) Make sure you have a cell phone with an emergency charging option (car, solar, hand crank, etc.) in case of a power failure.
 - (f) People who depend on electricity to operate medical equipment should have alternate arrangements in place in case power is out for an extended period of time.
 - (g) Plan to check on elderly/disabled relatives and neighbors.
 - (h) Plan to bring pets inside.
 - (i) Know where the manual release lever of your electric garage door opener is located and how to operate it in case you lose power.
 - (j) Fill a gallon container with water and place it in the freezer to help keep food cold.
 - (k) A NOAA Weather Radio broadcasts alerts and warnings directly from the NWS for all hazards. You may also sign up in advance to receive notifications from your local emergency management division.
- b) During Snowstorms and Extreme Cold
- (1) Stay indoors during the storm.
 - (2) Drive only if it is absolutely necessary. If you must drive: travel during the day; don't travel alone; keep others informed of your schedule and your route; stay on main roads and avoid back road shortcuts.
 - (3) Walk carefully on snowy, icy, walkways.

- (4) Avoid overexertion when shoveling snow. Overexertion can bring on a heart attack—a major cause of death in the winter. Use caution, take breaks, push the snow instead of lifting it when possible, and lift lighter loads.
 - (5) Keep dry. Change wet clothing frequently to prevent a loss of body heat. Wet clothing loses all of its insulating value and transmits heat rapidly.
 - (6) If you must go outside, wear several layers of loose-fitting, lightweight, warm clothing rather than one layer of heavy clothing. The outer garments should be tightly woven and water repellent.
 - (7) Wear mittens, which are warmer than gloves.
 - (8) Wear a hat and cover your mouth with a scarf to reduce heat loss.
- c) Cold Related Illness
- (1) Frostbite is a serious condition that's caused by exposure to extremely cold temperatures. Symptoms include:
 - (a) a white or grayish-yellow skin area.
 - (b) skin that feels unusually firm or waxy.
 - (c) Numbness.
 - (d) If you detect symptoms of frostbite, seek medical care.
 - (2) Hypothermia, or abnormally low body temperature, is a dangerous condition that can occur when a person is exposed to extremely cold temperatures. Hypothermia is caused by prolonged exposures to very cold temperatures. When exposed to cold temperatures, your body begins to lose heat faster than it's produced. Lengthy exposures will eventually use up your body's stored energy, which leads to lower body temperature. Warnings signs of hypothermia:
 - (a) Adults: shivering, exhaustion, confusion, fumbling hands, memory loss, slurred speech drowsiness
 - Infants: bright red, cold skin, very low energy
 If you notice any of these signs, take the person's temperature. If it is below 95° F, the situation is an emergency—get medical attention immediately.
 - (3) Carbon Monoxide
 - (a) Caution: Each year, an average of 430 Americans die from unintentional carbon monoxide poisoning, and there are more than 20,000 visits to the emergency room with more than 4,000 hospitalizations. Carbon monoxide-related deaths are highest during colder months. These deaths are likely due to increased use of gas-powered

furnaces and alternative heating, cooking, and power sources used inappropriately indoors during power outages.

- (b) Never use a generator, grill, camp stove or other gasoline, propane, natural gas or charcoal burning devices inside a home, garage, basement, crawlspace or any partially enclosed area. Locate the unit away from doors, windows and vents that could allow carbon monoxide to come indoors. Keep these devices at least 20 feet from doors, windows, and vents.
 - (c) The primary hazards to avoid when using alternate sources for electricity, heating or cooking are carbon monoxide poisoning, electric shock and fire.
 - (d) Install carbon monoxide alarms in central locations on every level of your home and outside sleeping areas to provide early warning of accumulating carbon monoxide.
 - (e) If the carbon monoxide alarm sounds, move quickly to a fresh air location outdoors or by an open window or door.
 - (f) Call for help from the fresh air location and remain there until emergency personnel arrive to assist you.
- d) Stay or Go
- (1) Stay:
 - (a) If stuck on the road to avoid exposure and/or when rescue is likely.
 - (b) If a safe location is neither nearby or visible.
 - (c) If you do not have appropriate clothing to go outside.
 - (d) If you do not have the ability to call for help.
 - (2) Go:
 - (a) If the distance to call for help is accessible.
 - (b) If you have visibility and outside conditions are safe.
 - (c) If you have appropriate clothing.
 - (d) Once the storm has passed, if you are not already home, follow instructions from your local transportation department and emergency management division to determine if it is safe to drive and, if so, which route will be safest for you to get home. Drive with extra caution.
- e) After Snowstorms and Extreme Cold

- (1) If your home loses power or heat for more than a few hours or if you do not have adequate supplies to stay warm in your home overnight, you may want to go to a designated public shelter if you can get there safely. Text SHELTER + your ZIP code to 43362 (4FEMA) to find the nearest shelter in your area (e.g., SHELTER 29488).
 - (2) Bring any personal items that you would need to spend the night (such as toiletries, medicines). Take precautions when traveling to the shelter. Dress warmly in layers, wear boots, mittens, and a hat.
 - (3) Continue to protect yourself from frostbite and hypothermia by wearing warm, loose-fitting, lightweight clothing in several layers. Stay indoors, if possible.
- f) Winter Weather Watches and Warnings - familiarize yourself with these terms to help identify extreme winter weather alerts:
- (1) Freezing Rain - Rain that freezes when it hits the ground, creating a coating of ice on roads, walkways, trees and power lines.
 - (2) Sleet - Rain that turns to ice pellets before reaching the ground. Sleet also causes moisture on roads to freeze and become slippery.
 - (3) Wind Chill- Windchill is the temperature it “feels like” when you are outside. The NWS provides a Windchill Chart to show the difference between air temperature and the perceived temperature and the amount of time until frostbite occurs. For more information, visit:
<http://www.nws.noaa.gov/om/winter/windchill.shtml>.
 - (4) Winter Weather Advisory - Winter weather conditions are expected to cause significant inconveniences and may be hazardous. When caution is used, these situations should not be life threatening. The NWS issues a winter weather advisory when conditions are expected to cause significant inconveniences that may be hazardous. If caution is used, these situations should not be life-threatening.
 - (5) Winter Storm Watch - A winter storm is possible in your area. Tune in to NOAA Weather Radio, commercial radio, or television for more information. The NWS issues a winter storm watch when severe winter conditions, such as heavy snow and/or ice, may affect your area but the location and timing are still uncertain. A winter storm watch is issued 12 to 36 hours in advance of a potential severe storm. Tune in to NOAA Weather Radio, local radio, TV, or other news sources for more information. Monitor alerts,

check your emergency supplies, and gather any items you may need if you lose power.

- (6) Winter Storm Warning - A winter storm is occurring or will soon occur in your area.
- (7) Blizzard Warning - Sustained winds or frequent gusts to 35 miles per hour or greater and considerable amounts of falling or blowing snow (reducing visibility to less than a quarter mile) are expected to prevail for a period of three hours or longer.
- (8) Frost/Freeze Warning - Below freezing temperatures are expected.

11. Avian (Bird) Flu or Other Disease Pandemic

a) Before a Pandemic

- (1) Store a two-week supply of water and food. Periodically check your regular prescription drugs to ensure a continuous supply in your home.
- (2) Have any nonprescription drugs and other health supplies on hand, including pain relievers, stomach remedies, cough and cold medicines, fluids with electrolytes, and vitamins.
- (3) Get copies and maintain electronic versions of health records from doctors, hospitals, pharmacies and other sources and store them, for personal reference. Get help accessing electronic health records.
- (4) Talk with family members and loved ones about how they would be cared for if they got sick, or what will be needed to care for them in your home.

b) During a Pandemic

- (1) Limit the spread of germs and prevent infection
- (2) Avoid close contact with people who are sick.
- (3) When you are sick, keep your distance from others to protect them from getting sick too.
- (4) Cover your mouth and nose with a tissue when coughing or sneezing. It may prevent those around you from getting sick.
- (5) Washing your hands often will help protect you from germs.
- (6) Avoid touching your eyes, nose or mouth.
- (7) Practice other good health habits. Get plenty of sleep, be physically active, manage your stress, drink plenty of fluids, and eat nutritious food.

12. Terrorism

- a) Actions will be based upon the type of terrorist attack. Follow local news outlets or contact the Emergency Management

Division. Follow recommendations from local law enforcement, Fire-Rescue, and Emergency Management Officials.

13. Tsunami

a) Before a Tsunami

- (1) The following are things you can do to protect yourself, your family and your property from the effects of a tsunami:
 - (a) To begin preparing, you should build an emergency kit and make a family communications plan.
 - (b) Talk to everyone in your household about what to do if a tsunami occurs. Create and practice an evacuation plan for your family. Familiarity may save your life. Be able to follow your escape route at night and during inclement weather. Practicing your plan makes the appropriate response more of a reaction, requiring less thinking during an actual emergency.
 - (c) If the school evacuation plan requires you to pick your children up from school or from another location. Be aware telephone lines during a tsunami alert may be overloaded and routes to and from schools may be jammed.
 - (d) Knowing your community's warning systems and disaster plans, including evacuation routes.
 - (e) If you are a tourist, familiarize yourself with local tsunami evacuation protocols. If you are concerned that you will not be able to reach a safe place in time, ask your local emergency management office about vertical evacuation. Some strong (e.g., reinforced concrete) and tall buildings may be able to provide protection if no other options are available.
 - (f) If an earthquake occurs and you are in a coastal area, turn on your radio to learn if there is a tsunami warning.

b) Tsunami Warning

- (1) A tsunami warning is issued when a tsunami with the potential to generate widespread inundation is imminent or expected. Warnings alert the public that dangerous coastal flooding accompanied by powerful currents is possible and may continue for several hours after initial arrival. Warnings alert emergency management officials to take action for the entire tsunami hazard zone. Appropriate actions to be taken by local officials may include the evacuation of low-lying coastal areas, and the

repositioning of ships to deep waters when there is time to safely do so. Warnings may be updated, adjusted geographically, downgraded, or canceled. To provide the earliest possible alert, initial warnings are normally based only on seismic information.

c) Tsunami Advisory

(1) A tsunami advisory is issued when a tsunami with the potential to generate strong currents or waves dangerous to those in or very near the water is imminent or expected. The threat may continue for several hours after initial arrival, but significant inundation is not expected for areas under an advisory. Appropriate actions to be taken by local officials may include closing beaches, evacuating harbors and marinas, and the repositioning of ships to deep waters when there is time to safely do so. Advisories are normally updated to continue the advisory, expand/contract affected areas, upgrade to a warning, or cancel the advisory.

d) Tsunami Watch

(1) A tsunami watch is issued to alert emergency management officials and the public of an event which may later impact the watch area. The watch area may be upgraded to a warning or advisory - or canceled - based on updated information and analysis. Therefore, emergency management officials and the public should prepare to take action. Watches are normally issued based on seismic information without confirmation that a destructive tsunami is underway.

e) Tsunami Information Statement

(1) A tsunami information statement is issued to inform emergency management officials and the public that an earthquake has occurred, or that a tsunami warning, advisory or watch has been issued for another section of the ocean. In most cases, information statements are issued to indicate there is no threat of a destructive tsunami and to prevent unnecessary evacuations as the earthquake may have been felt in coastal areas. An information statement may, in appropriate situations, caution about the possibility of destructive local tsunamis. Information statements may be re-issued with additional information, though normally these messages are not updated. However, a watch, advisory or warning may be issued for the area, if necessary, after analysis and/or updated information becomes available.

f) During a Tsunami

- (1) Follow the evacuation order issued by authorities and evacuate immediately. Take your animals with you.
 - (2) Move to high ground or inland and away from water immediately.
 - (3) Stay away from the beach. Never go down to the beach to watch a tsunami come in. If you can see the wave you are too close to escape it. CAUTION - If there is noticeable recession in water away from the shoreline this is nature's tsunami warning and it should be heeded. You should move away immediately.
 - (4) Save yourself - not your possessions.
 - (5) Remember to help your neighbors who may require special assistance - infants, elderly people, and individuals with access or functional needs.
- g) After a Tsunami
- (1) Return home only after local officials tell you it is safe. A tsunami is a series of waves that may continue for hours.
 - (2) Do not assume that after one wave the danger is over. The next wave may be larger than the first one.
 - (3) Go to a designated public shelter if you have been told to evacuate or you feel it is unsafe to remain in your home. Text SHELTER + your ZIP code to 43362 (4FEMA) to find the nearest shelter in your area (example: shelter 29488).
 - (4) Avoid disaster areas. Your presence might interfere with emergency response operations and put you at further risk from the residual effects of floods.
 - (5) Stay away from debris in the water; it may pose a safety hazard to people or pets.
 - (6) Check yourself for injuries and get first aid as needed before helping injured or trapped persons.
 - (7) If someone needs to be rescued, call professionals with the right equipment to help. Many people have been killed or injured trying to rescue others.
 - (8) Help people who require special assistance—infants, elderly people, those without transportation, people with access and functional needs and large families who may need additional help in an emergency situation.
 - (9) Continue using a NOAA Weather Radio or tuning to a Coast Guard station or a local radio or television station for the latest updates.
 - (10) Stay out of any building that has water around it. Tsunami water can cause floors to crack or walls to collapse.
 - (11) Use caution when re-entering buildings or homes. Tsunami-driven flood water may have damaged buildings

where you least expect it. Carefully watch every step you take.

(12) To avoid injury, wear protective clothing and be cautious when cleaning up.

14. Nuclear Power Plant Incidents

a) Before a Nuclear Power Plant Emergency

(1) The following are things you can do to protect yourself, your family and your property from the effects of a nuclear power plant emergency:

(a) Build an Emergency Supply Kit with the addition of plastic sheeting, duct tape and scissors.

(b) Make a Family Emergency Plan

(c) Obtain public emergency information materials from the power company that operates your local nuclear power plant or your local emergency services office. If you live within 10 miles of the power plant, you should receive the materials yearly from the power company or your state or local government.

(2) During a Nuclear Power Plant Emergency

(a) If an accident at a nuclear power plant were to release radiation in your area, local authorities would activate warning sirens or another approved alert method. They also would instruct you through the Emergency Alert System (EAS) on local television and radio stations on how to protect yourself.

(b) Follow the EAS instructions carefully.

(c) Minimize your exposure by increasing the distance between you and the source of the radiation. This could be evacuation or remaining indoors to minimize exposure.

(d) If you are told to evacuate, keep car windows and vents closed; use re-circulating air.

(e) If you are advised to remain indoors, turn off the air conditioner, ventilation fans, furnace and other air intakes.

(f) Shield yourself by placing heavy, dense material between you and the radiation source. Go to a basement or other underground area, if possible.

(g) Stay out of the incident zone. Most radiation loses its strength fairly quickly.

(3) After a Nuclear Power Plant Emergency

- (a) The following are guidelines for the period following a nuclear power plant emergency:
- (i) Go to a designated public shelter if you have been told to evacuate or you feel it is unsafe to remain in your home. Text SHELTER + your ZIP code to 43362 (4FEMA) to find the nearest shelter in your area (example: shelter 29488). Act quickly if you have come into contact with or have been exposed to hazardous radiation.
 - (ii) Follow decontamination instructions from local authorities.
 - (iii) Change your clothes and shoes; put exposed clothing in a plastic bag; seal it and place it out of the way.
 - (iv) Seek medical treatment for unusual symptoms, such as nausea, as soon as possible.
 - (v) Listen to local radio or television stations for the latest emergency information.
 - (vi) Help a neighbor who may require special assistance - infants, elderly people and people with access and functional needs may require additional assistance.
 - (vii) Return home only when authorities say it is safe.
 - (viii) Keep food in covered containers or in the refrigerator.

15. Nuclear Blast

- a) Nuclear explosions can cause significant damage and casualties from blast, heat, and radiation but you can keep your family safe by knowing what to do and being prepared if it occurs.
- b) A nuclear weapon is a device that uses a nuclear reaction to create an explosion.
- c) Nuclear devices range from a small portable device carried by an individual to a weapon carried by a missile.
- d) A nuclear explosion may occur with or without a few minutes warning.
- e) Fallout is most dangerous in the first few hours after the detonation when it is giving off the highest levels of radiation. It takes time for fallout to arrive back to ground level, often more than 15 minutes for areas outside of the immediate blast damage

zones. This is enough time for you to be able to prevent significant radiation exposure by following these simple steps:

(1) Get Inside

- (a) Get inside the nearest building to avoid radiation. Brick or concrete are best.
- (b) Remove contaminated clothing and wipe off or wash unprotected skin if you were outside after the fallout arrived.
- (c) Go to the basement or middle of the building. Stay away from the outer walls and roof.

(2) Stay Inside

- (a) Stay inside for 24 hours unless local authorities provide other instructions.
- (b) Your family should stay inside where they are. Reunite later to avoid exposure to dangerous radiation.
- (c) Keep your pets inside.

(3) Stay Tuned

- (a) Tune into any media available for official information such as when it is safe to exit and where you should go.
- (b) Battery operated and hand crank radios will function after a nuclear detonation.
- (c) Cell phone, text messaging, television, and internet services may be disrupted or unavailable.

(4) How to Stay Safe in the Event of a Nuclear Explosion

(a) What to do NOW: Prepare

- (i) Identify shelter locations. Identify the best shelter location near where you spend a lot of time, such as home, work, and school. The best locations are underground and in the middle of larger buildings.
- (ii) While commuting, identify appropriate shelters to seek in the event of a detonation.
- (iii) Outdoor areas, vehicles, mobile homes do NOT provide adequate shelter. Look for basements or the center of large multistory buildings.
- (iv) Make sure you have an Emergency Supply Kit for places you frequent and might have to stay for 24 hours. It should include bottled water, packaged foods, emergency medicines, a hand-crank or battery-powered radio to get information in case power is out,

a flashlight, and extra batteries for essential items. If possible, store supplies for three or more days.

(b) What to do DURING: Survive

- (i) If warned of an imminent attack, immediately get inside the nearest building and move away from windows. This will help provide protection from the blast, heat, and radiation of the detonation.
- (ii) If you are outdoors when a detonation occurs take cover from the blast behind anything that might offer protection. Lie face down to protect exposed skin from the heat and flying debris. If you are in a vehicle, stop safely, and duck down within the vehicle.
- (iii) After the shock wave passes, get inside the nearest, best shelter location for protection from potential fallout. You will have 10 minutes or more to find an adequate shelter.
- (iv) Be inside before the fallout arrives. The highest outdoor radiation levels from fallout occur immediately after the fallout arrives and then decrease with time.
- (v) Stay tuned for updated instructions from emergency response officials. If advised to evacuate, listen for information about routes, shelters, and procedures.
- (vi) If you have evacuated, do not return until you are told it is safe to do so by local officials.

(c) What to do AFTER: Be Safe

- (i) Immediately after you are inside shelter, if you may have been outside after the fallout arrived:
- (ii) Remove your outer layer of contaminated clothing to remove fallout and radiation from your body.
- (iii) Take a shower or wash with soap and water to remove fallout from any skin or hair that was not covered. If you cannot wash or shower, use a wipe or clean wet cloth to wipe any skin or hair that was not covered.

- (iv) Clean any pets that were outside after the fallout arrived. Gently brush your pet's coat to remove any fallout particles and wash your pet with soap and water, if available.
- (v) It is safe to eat or drink packaged food items or items that were inside a building. Do not consume food or liquids that were outdoors uncovered and may be contaminated by fallout.
- (vi) If you are sick or injured, listen for instructions on how and where to get medical attention when authorities tell you it is safe to exit.
- (vii) Hazards related to nuclear explosions
 - (a) Bright FLASH can cause temporary blindness for less than a minute.
 - (b) BLAST WAVE can cause death, injury, and damage to structures several miles out from the blast.
 - (c) RADIATION can damage cells of the body. Large exposures can cause radiation sickness.
 - (d) FIRE AND HEAT can cause death, burn injuries, and damage to structures several miles out.
 - (e) ELECTROMAGNETIC PULSE (EMP) can damage electrical power equipment and electronics several miles out from the detonation and cause temporary disruptions further out.
 - (f) FALLOUT is radioactive, visible dirt and debris raining down from several miles up that can cause sickness to those who are outside.
